¹Reflects deduction of highest applicable fee schedule without benefit of breakpoints. Investment return and principal value will vary. Past performance is not a reliable indicator of future performance. Monthly composite performance is available upon request. **See below for further information related to net of fee calculations.**

²Primary benchmark is J.P. Morgan Global High Yield Index and the secondary benchmarks are FTSE All BB&B Rated Index and Credit Suisse High Yield Index. Prior to July 1, 2010, the primary benchmark was FTSE All BB&B Rated Index and the secondary benchmark was J.P. Morgan Global High Yield Index. The changes were made because the firm viewed the new benchmarks to be a better representation of the investment strategy of the composite. Effective April 1, 2016, Credit Suisse changed its methodology for calculating the performance of the Credit Suisse High Yield Index. Historical benchmark representations have not been restated.

³Non-fee paying portfolios account for less than three percent of the composite.

⁴Preliminary - subject to adjustment.

T. Rowe Price (TRP) has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®). TRP has been independently verified for the 23-year period ended June 30, 2019 by KPMG LLP. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

TRP is a U.S. investment management firm with various investment advisers registered with the U.S. Securities and Exchange Commission, the U.K. Financial Conduct Authority, and other regulatory bodies in various countries and holds itself out as such to potential clients for GIPS purposes. TRP further defines itself under GIPS as a discretionary investment manager providing services primarily to institutional clients with regard to various mandates, which include U.S., international, and global strategies but excluding the services of the Private Asset Management group. The minimum asset level for equity portfolios to be included in composites is \$5 million and prior to January 2002 the minimum was \$1 million. The minimum asset level for fixed income and asset allocation portfolios to be included in composites is \$10 million; prior to October 2004 the minimum was \$5 million; and prior to January 2002 the minimum was \$1 million. Valuations are computed and performance reported in U.S. dollars.

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the highest applicable management fee that would be charged based on the fee schedule contained within this material, without the benefit of breakpoints. Gross and net performance returns reflect the reinvestment of dividends and are net of nonreclaimable withholding taxes on dividends, interest income, and capital gains. Effective June 30, 2013, portfolio valuation and assets under management are calculated based on the closing price of the security in its respective market. Previously portfolios holding international securities may have been adjusted for after-market events. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within a composite for the full year. Dispersion is not calculated for the composites in which there are five or fewer portfolios.

The strategy utilizes on a regular basis a variety of derivative instruments such as (but not limited to) currency forwards, fixed income futures, interest rate swaps and credit default swaps, primarily to hedge certain market risks associated with the strategy's objective and to express directional opportunities on specific markets and to facilitate liquidity management.

Benchmarks are taken from published sources and may have different calculation methodologies, pricing times, and foreign exchange sources from the composite.

Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow greater than or equal to 15% of portfolio assets. The temporary removal of such an account occurs at the beginning of the measurement period in which the significant cash flow occurs and the account re-enters the composite on the last day of the current month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request.

The firm's list of composite descriptions and/or a presentation that adheres to the GIPS® standards are available upon request.

A portfolio management change occurred effective July 8, 2015, January 14, 2019, and January 1, 2020. There were no changes to the investment program or strategy related to this composite.

High Yield Master Bond Composite. The High Yield Master Bond Composite combines accounts included in the High Yield Core Bond Composite and the High Yield Strategy Bond Composite. The master composite seeks high current income and capital appreciation primarily through investment in fixed income securities rated below investment grade (BB or below) by S&P, Moody's, or another nationally recognized securities rating organization (NRSRO). Emerging market sovereign and corporate securities are excluded from this strategy. (Created June 2006)

Fee Schedule

First 50 million USD 50 basis points
Next 50 million USD 45 basis points
Next 150 million USD 40 basis points
Next 250 million USD 37.5 basis points
Minimum separate account size 100 million USD.
