

STRATEGY REPORT

As of 31 December 2024

Europe Equity Strategy

Total Europe Equity Strategy Assets: €1.1 billion¹

Figures shown in Euros

INVESTMENT APPROACH

- Fundamental research is critical to successfully identify and assess long-term investment opportunities. The portfolio results from our considerable equity research resources with over 20 European analysts seeking insights into the industries and companies that they cover.
- We look to discover quality businesses that may benefit from change, either as a result of being on what we believe to be the “right side” of change, or from idiosyncratic change, and where we have an insight on key long-term drivers for the stock.
- Valuation needs to present an attractive risk/reward profile, and we follow this overall approach across the market cycle and across style and market cap boundaries.
- ESG considerations are embedded across our investment process, particularly as they can be a key indicator of the durability of a business and a source of change across many industries.
- Risk management is integral to the portfolio construction process, and the portfolio results from close collaboration with our Risk, Quantitative and ESG teams as well as other investment personnel.

PORTFOLIO CONSTRUCTION

- Typically 50-80 stocks
- Individual position size up to 4.0% relative to the benchmark
- Sector ranges: typically +/-10% relative to benchmark
- Market ranges: typically +/-10% relative to benchmark
- Cash target range: fully invested, typically less than 5.0%
- Turnover range: 40%-100%

TOP AND BOTTOM FIVE OVER/UNDERWEIGHTS

PERFORMANCE

	Three Months	One Year	Annualized			
			Three Years	Five Years	Ten Years	Fifteen Years
Europe Equity Composite (Gross)	-1.35%	9.68%	2.34%	6.89%	7.00%	9.35%
Europe Equity Composite (Net)	-1.47	9.13	1.83	6.36	6.47	8.81
MSCI Europe Index Net	-2.72	8.59	4.41	6.61	6.63	7.39
Value Added (Gross)	1.37	1.09	-2.07	0.28	0.37	1.96
Value Added (Net)	1.25	0.54	-2.58	-0.25	-0.16	1.42

Performance data quoted represents past performance which is not a guarantee or a reliable indicator of future results.

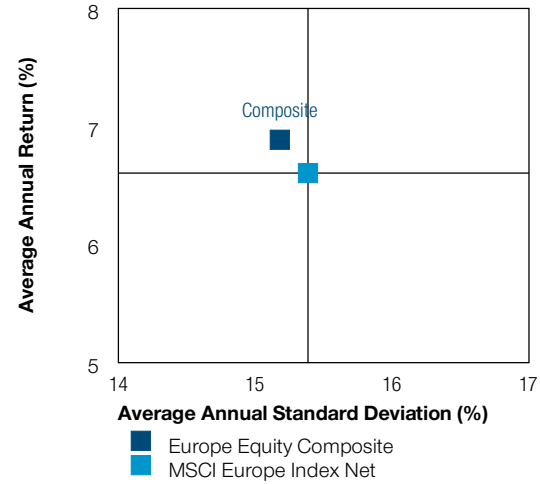

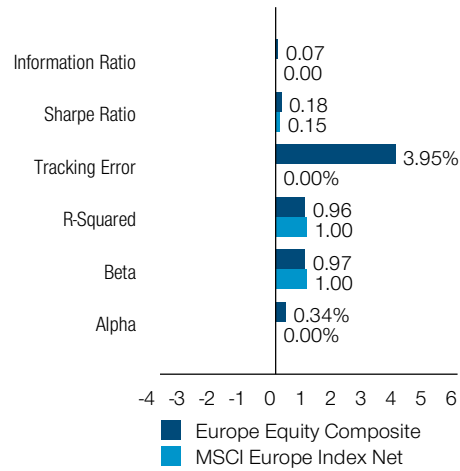

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the highest applicable management fee that would be charged based on the fee schedule, without the benefit of breakpoints. Gross and net performance returns reflect the reinvestment of dividends and are net of all non-reclaimable withholding taxes on dividends, interest income, and capital gains.

Valuations and performance are computed in USD and converted to EUR. When converting U.S. dollar composite returns, benchmarks, dispersion, and asset data, the same exchange rate source is used consistently. Total returns in non-U.S. dollar currencies are calculated by adjusting U.S. dollar performance by the percent change in the U.S. dollar/foreign currency exchange rate (as determined by an independent third party) for the time periods selected.

See GIPS® Composite Report located in this material for additional information.

RISK/RETURN CHARACTERISTICS

Five Years ended 31 December 2024

Performance data quoted represents past performance which is not a guarantee or a reliable indicator of future results. Statistics based on monthly gross returns. Returns would have been lower as the result of the deduction of applicable fees.
Risk/Return Characteristics are computed in USD and converted to EUR using an exchange rate determined by an independent third party.

¹The fee rate used to calculate net returns is 1.67%. This represents the maximum fee rate applicable to all composite members. **Past performance is not a reliable indicator of future performance.**

²Effective July 1, 2018, the benchmark for the composite changed from gross to net of withholding taxes. The change was made because the firm viewed the new benchmark to be more consistent with the tax impacts of the portfolios in the composite. Historical benchmark representations have been restated.

³Preliminary - subject to adjustment.

T. Rowe Price (TRP) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. TRP has been independently verified for the 27-year period ended June 30, 2023 by KPMG LLP. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm wide basis. Verification does not ensure the accuracy of any specific composite presentation.

TRP is a U.S. investment management firm with various investment advisers registered with the U.S. Securities and Exchange Commission, the U.K. Financial Conduct Authority, and other regulatory bodies in various countries and holds itself out as such to potential clients for GIPS purposes. TRP further defines itself under GIPS as a discretionary investment manager providing services primarily to institutional clients with regard to various mandates, which include U.S., international, and global strategies but excluding the services of the Private Asset Management group. As of October 1, 2022, there is no minimum asset level for portfolio inclusion into the composite. Prior to October 2022, the minimum asset level for equity portfolios to be included in composites was \$5 million. The minimum asset level for fixed income and asset allocation portfolios to be included in composites was \$10 million. Valuations and performance are computed in U.S. dollars and converted to Euro. When converting U.S. dollar composite returns, benchmarks, dispersion and asset data, the same exchange rate source is used consistently. Total returns in non-U.S. dollar currencies are calculated by adjusting U.S. dollar performance by the percent change in the U.S. dollar/foreign currency exchange rate (as determined by an independent third party) for the time periods selected.

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the maximum fee rate applicable to all composite members as shown above. Gross performance returns reflect the reinvestment of dividends and are net of nonreclaimable withholding taxes on dividends, interest income, and capital gains. Gross performance returns are used to calculate presented risk measures. Effective June 30, 2013, portfolio valuation and assets under management are calculated based on the closing price of the security in its respective market. Previously portfolios holding international securities may have been adjusted for after-market events. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within a composite for the full year. Dispersion is not calculated for the composites in which there are five or fewer portfolios. Some portfolios may trade futures, options, and other potentially high-risk derivatives that may create leverage and generally represent in aggregate less than 10% of a portfolio.

Benchmarks are taken from published sources and may have different calculation methodologies, pricing times, and foreign exchange sources from the composite.

Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow greater than or equal to 15% of portfolio assets. The temporary removal of such an account occurs at the beginning of the measurement period in which the significant cash flow occurs and the account re-enters the composite on the last day of the current month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request.

The firm's list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

ADDITIONAL DISCLOSURES

Portfolio Construction: There is no guarantee that the investment will remain within the anticipated ranges of exposure.

Unless indicated otherwise the source of all data is T. Rowe Price.

The specific securities identified and described do not represent all of the securities purchased, sold or recommended for the portfolio, and no assumptions should be made that the securities identified and discussed were or will be profitable.

GICS and MSCI do not accept any liability for any errors or omissions in the indexes or data, and hereby expressly disclaim all warranties of originality, accuracy, completeness, timeliness, merchantability, and fitness for a particular purpose. No party may rely on any indexes or data contained in this communication. Visit <https://www.troweprice.com/en/us/market-data-disclosures> for additional legal notices & disclaimers.

Unless otherwise noted, index returns are shown with gross dividends reinvested.

T. Rowe Price uses the current MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

The representative portfolio is an account in the composite we believe most closely reflects current portfolio management style for the strategy. Performance is not a consideration in the selection of the representative portfolio. The characteristics of the representative portfolio shown may differ from those of other accounts in the strategy. Please see the GIPS® Composite Report for additional information on the composite.

Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.

Risks

The following risks are materially relevant to the portfolio.

Currency - Currency exchange rate movements could reduce investment gains or increase investment losses. **Small and mid-cap** - Small and mid-size company stock prices can be more volatile than stock prices of larger companies. **Style** - Style risk may impact performance as different investment styles go in and out of favor depending on market conditions and investor sentiment.

General Portfolio Risks

Equity - Equities can lose value rapidly for a variety of reasons and can remain at low prices indefinitely. **ESG and sustainability** - ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the portfolio. **Geographic concentration** - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those markets or regions in which the portfolio's assets are concentrated. **Investment portfolio** - Investing in portfolios involves certain risks an investor would not face if investing in markets directly. **Management** - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. **Market** - Market risk may subject the portfolio to experience losses caused by unexpected changes in a wide variety of factors. **Operational** - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.
