

## 2021 Tax Information

# T. ROWE PRICE FUNDS

The enclosed tables provide supplemental tax information on T. Rowe Price funds that can help in the preparation of your taxes and can assist you in tax planning. These tables contain the following:

- **Interest on U.S. Government Securities:** the percentage of ordinary income dividends paid by T. Rowe Price funds derived from interest on U.S. government securities.
- **Long-Term Capital Gains:** the portion of long-term capital gain that was derived from section 1250 property.
- **Qualified Dividend Income Percentage:** the percentage of ordinary income dividends paid by T. Rowe Price funds that may qualify for taxation at the reduced capital gains rate.
- **Qualified REIT Dividends:** the percentage of ordinary income dividends paid by T. Rowe Price funds that may be eligible for a deduction of up to 20% on qualified real estate investment trust (REIT) dividends.
- **Reporting for Foreign Taxes Paid:** information you will need to take a credit or a deduction for foreign taxes paid by the T. Rowe Price funds.
- **Return of Capital and Reclassifications:** lists nontaxable distributions—or return of capital on a fund—and indicates if any dividends paid throughout the year were reclassified for 1099 purposes.
- **Dividends-Received Deduction (for corporations only):** the percentage of ordinary income dividends paid by T. Rowe Price funds that may qualify for a deduction applicable to corporate shareholders.
- **Tax Information for Tax-Free Funds:** state and federal tax reporting requirements for your T. Rowe Price tax-free fund investments.

For help regarding your federal tax filings, we recommend that you consult a tax adviser or contact the IRS.

The complexity and diversity of state requirements are such that we cannot provide guidance concerning what must be reported and on what forms. If you have questions about state tax requirements, contact your local tax office.

## 2021 INTEREST ON U.S. GOVERNMENT SECURITIES

In most states, fund dividends from interest on direct U.S. government securities are exempt from state and local taxes. To determine this amount for each of your funds, multiply the “% of dividends from U.S. government securities” (shown below in Column 1) by the amount for that fund in Box 1a of your Form 1099-DIV.

Check the specific requirements for your state. For example, some states only exempt dividends for those funds holding a minimum percentage, usually 50%, of government securities at the end of each quarter. We indicate in Column 3 below whether any of your investments meet this requirement.

### State intangible property tax

If you pay state intangible property tax on the value of your fund, you may be able to exempt the percentage of the fund’s investments held in U.S. government securities. To determine this amount, multiply the “% of funds held in U.S. government securities on December 31, 2021” (shown below in Column 2) by the total value of your shares at year-end. Consult your tax adviser for more information.

	Column 1 % of Dividends From U.S. Government Securities	Column 2 % of Funds Held in U.S. Government Securities on December 31, 2021	Column 3 U.S. Government Securities Are at Least 50% of Holdings at Each Quarter End

<sup>1</sup>Formerly New America Growth.

Percentages are the same for all fund classes (Investor, Advisor, R, and I classes). For more information on Advisor, R, Institutional, and Portfolio funds, please visit our website for financial intermediaries at [troweprice.com/financial-intermediary/us/en/investments/tax-center.html](http://troweprice.com/financial-intermediary/us/en/investments/tax-center.html).

N/A indicates that a fund did not pay a dividend or short-term capital gain, or pass through foreign tax paid. A dash indicates that the fund paid a dividend or short-term capital gain, but the income was not from government securities.

## 2021 LONG-TERM CAPITAL GAINS

Capital gain distributions are taxed at various rates. For most long-term capital gains realized by a fund, the maximum tax rate is 20%. For the funds listed below, a portion of the long-term capital gain was derived from section 1250 property and is subject to a maximum rate of 25%. Unrecaptured section 1250 gains are typically due to investments in real estate investment trusts (REITs) and are reported in Box 2b of Form 1099-DIV.

T. Rowe Price Fund	Payment Date	Total Capital Gain Distribution	Amount Subject to Max 20% Tax	Amount Subject to Max 25% (Section 1250 Gain)
<b>Unrecaptured Section 1250 Gains</b>

U.S. Equity Research	12/16/21	\$0.79	\$0.785889946	\$0.004110054
Value	12/15/21	\$3.26	\$3.258938870	\$0.001061130

<sup>1</sup>Formerly New America Growth.

Amounts are the same for all fund classes (Investor, Advisor, R, and I classes). For more information on Advisor, R, Institutional, and Portfolio funds, please visit our website for financial intermediaries at [troweprice.com/financial-intermediary/us/en/investments/tax-center.html](http://troweprice.com/financial-intermediary/us/en/investments/tax-center.html).

If a fund is not listed, it did not have any unrecaptured section 1250 gains.

## 2021 QUALIFIED DIVIDEND INCOME PERCENTAGE

All or a portion of your ordinary income dividend from a fund may be taxed at a reduced capital gains rate rather than the higher marginal rates applicable to ordinary income. The amount of your dividend subject to this lower rate is reported in Box 1b of your Form 1099-DIV.

The table below reports the percentage of the ordinary income dividend paid by the T. Rowe Price funds that qualify for the reduced rate. It is provided here for informational purposes only and to assist you in your tax planning. In preparing your tax return, please use the amount in Box 1b of your Form 1099-DIV.

To treat a dividend as qualifying for the reduced rates, you must have held your shares on which you received the dividend for at least 61 days during the 121-day period beginning 60 days before the ex-dividend date of the distribution.

In addition, the ordinary dividend of a fund (the amount included in Box 1a of Form 1099-DIV) includes net short-term capital gains and foreign taxes paid, which may not qualify for the reduced rates. As a result, the percentage of the Box 1a amount that qualifies for the reduced rate can vary widely from year to year, depending on the amount of short-term gains distributed by the fund.

If you own a fund that has more than one distribution during the year, the amount reported in Box 1b of your Form 1099-DIV will be based on the qualifying percentage of each distribution.

Calculations based on the percentages below may yield amounts that differ from the amounts on your Form 1099-DIV due to rounding.

Total Return ETF	1.01
U.S. Equity Research ETF	100.00
Ultra Short-Term Bond ETF	-

<sup>1</sup>This percentage applies to the sum of your income dividend plus short-term capital gain distribution paid for the calendar year or other period, if indicated, as reported in Box 1a of your IRS Form 1099-DIV.

<sup>2</sup>Formerly New America Growth.

Percentages are the same for all fund classes (Investor, Advisor, R, and I classes). For more information on Advisor, R, Institutional, and Portfolio funds, please visit our website for financial intermediaries at [troweprice.com/financial-intermediary/us/en/investments/tax-center.html](https://troweprice.com/financial-intermediary/us/en/investments/tax-center.html).

N/A indicates that a fund did not pay a dividend or short-term capital gain, or pass through foreign tax paid.

A dash indicates that the fund paid a dividend or short-term capital gain, but it was not qualified dividend income.

## 2021 QUALIFIED REIT DIVIDENDS

Beginning in 2018 (until the end of 2025), if you are a taxpayer other than a corporation, you are generally allowed a deduction of up to 20% of your qualified real estate investment trust (REIT) dividends. Qualified REIT dividends from a fund are reported in Box 5 of your Form 1099-DIV.

The table below reports the percentage of the ordinary dividend paid by the T. Rowe Price funds that may be eligible for the deduction. The data is provided here for informational purposes only and to assist you in your tax planning. In preparing your tax return, use the amount in Box 5 of your Form 1099-DIV.

Note that you may not take this deduction for a dividend on shares of a fund that have been held for less than 46 days during the 91-day period beginning on the date 45 days before the ex-dividend date.

If you own a fund that has more than one distribution during the year, the amount reported in Box 5 of your Form 1099-DIV will be based on the qualifying percentage of each distribution.

Calculations based on the percentages below may yield amounts that differ from the amounts on your Form 1099-DIV due to rounding.

Please consult your tax advisor for the impact on your return. You may also find the information on this IRS web page useful:

<sup>1</sup>The percentage applies to the total of your ordinary dividends paid for the calendar year or other period, if indicated, as reported in Box 1a of your IRS Form 1099-DIV.

<sup>2</sup>Formerly New America Growth.

Percentages are the same for all fund classes (Investor, Advisor, R, and I classes).

For more information on Advisor, R, Institutional, and Portfolio funds, please visit our website for financial intermediaries at [www.troweprice.com/financial-intermediary/us/en/investments/tax-center.html](http://www.troweprice.com/financial-intermediary/us/en/investments/tax-center.html).

If a fund is not listed, it did not pass through any qualified REIT dividends.

## 2021 TAX REPORTING FOR FOREIGN TAXES PAID

Most investors can take a credit or deduction for their share of foreign taxes paid by their mutual funds with significant non-U.S. holdings. Taking a credit is usually more advantageous, but to qualify, you must have held your shares in a fund for at least 16 days of the 31-day period starting 15 days before the ex-dividend date of the fund. Refer to IRS Publication 514, Foreign Tax Credit for Individuals for additional information.

### Foreign tax deduction

If you wish to take a deduction instead of a credit:

For each fund that paid foreign taxes, report the amount from Box 7 of your Form 1099-DIV. You do not have to fill out Form 1116, Foreign Tax Credit (Individual, Estate, or Trust).

### Foreign tax credit

If you wish to take a credit, you may use the simplified or standard method. You can use the simplified method if:

- Your share of creditable foreign taxes from all sources is \$300 or less if you file your taxes separately (or \$600 or less if you file jointly with your spouse) and
- All such income is passive. (All ordinary income from T. Rowe Price funds is passive.)

### Simplified method

If you can use the simplified method, report the total foreign taxes paid shown in Box 7 of your Form 1099-DIV plus any other eligible foreign taxes on Form 1040.

### Standard method

If you cannot use the simplified method, you will be required to complete Form 1116 and attach it to your return. Form 1116 computes a limitation on the amount of the foreign tax credit you may deduct based on the total income received from foreign sources (foreign source income) and total foreign taxes paid. Please note that you no longer have to report the income or taxes paid on a country-by-country basis on your federal income tax return.

Your total **foreign taxes paid** for Form 1116 is provided in Box 7 of your Form 1099-DIV and together with the total of your taxes paid from other funds or sources should be included on Form 1116, Part II, Line 8.

Your **foreign source income** for Form 1116, Part I, Line 1a should be calculated using one of two methods:

**Method 1:** Multiply the amount in Box 1a of your Form 1099-DIV by the “**Foreign Source Income Percentage**” in the tables that follow. You should use this method, if:

- Your income (excluding net capital gain and qualified dividend income) is taxed at or below the 24% income tax bracket and
- Your foreign qualified dividend income and foreign long-term capital gain from all sources is less than \$20,000. Your foreign qualified dividend income for your T. Rowe Price fund can be calculated by multiplying the amount in Box 1a of your Form 1099-DIV by the “**Foreign Source Qualified Dividend Percentage**” in the tables that follow. Please note that no portion of your T. Rowe Price fund’s distributions is foreign long-term capital gains.

You should also use this method if you determine that you cannot treat any portion of the foreign qualified dividend amount in Box 1b of your Form 1099-DIV as qualified dividends. (This would apply, for example, if you did not meet the holding period requirement to tax your fund dividends at the new lower rates.)

**Method 2:** If you do not qualify to use Method 1, the IRS requires you to adjust the amount of foreign source income used to calculate your foreign tax credit because of foreign qualified dividends.

To calculate an adjusted foreign source income percentage, the “Foreign Source Income Percentage” is reduced by the “Foreign Source Qualified Dividend Percentage” multiplied by an adjustment factor. The adjustment factor is the difference between the highest marginal income tax rate and your lower qualified dividend tax rate, divided by the highest marginal income tax rate.

Once you have determined your adjusted foreign source income percentage, compute your foreign source income by multiplying the amount in Box 1a of your Form 1099-DIV by this adjusted percentage. This amount, together with the total of your adjusted foreign source income from other funds or sources, should be included on Form 1116, Part I, Line 1a.

Please consult with your tax advisor for details.

<sup>1</sup> The fund received a refund of foreign taxes paid (with an interest adjustment) and the amount of Foreign Tax Paid in Box 7 may be less than what is included in Box 1a for Ordinary Dividends on your Form 1099-DIV. Ordinary Dividends is the sum of your income dividends, short-term capital gain, foreign tax paid, as well as any interest adjustment.

<sup>2</sup> The ex-dividend and reinvestment date is December 16, 2021.

If a fund is not listed, it did not pass through a foreign tax credit.

Percentages are the same for all fund classes (Investor, Advisor, R, and I classes). For more information on Advisor, R, Institutional, and Portfolio funds, please visit our website for financial intermediaries at [troweprice.com/financial-intermediary/us/eninvestments/tax-center.html](https://troweprice.com/financial-intermediary/us/eninvestments/tax-center.html).

## 2021 RETURN OF CAPITAL AND RECLASSIFICATIONS

### Return of Capital

If a T. Rowe Price fund pays out more in distributions than it earned during the year, you do not owe tax on your share of the excess amount, which is called a “nontaxable distribution” or “return of capital.” We report this type of distribution in Box 3 of Form 1099-DIV. You will need to subtract any amounts reported in Box 3 of Form 1099-DIV from the cost basis of your shares. For information on IRS Form 8937 and organizational actions affecting the basis of securities, including items such as mergers, fund liquidations, and reclassifications that affect cost basis, commonly referred to as “corporate actions,” please visit our website at [troweprice.com/taxplanning](http://troweprice.com/taxplanning).

Listed below are the 2021 dividends paid by the T. Rowe Price funds that have a return of capital for Form 1099-DIV purposes.

**Reclassifications**

A reclassification means that the tax character of the dividend on your Form 1099-DIV is different than the tax character reported on your statement, which reported the dividend to you. Tax character indicates whether the dividend is from taxable or tax-exempt income or is a short-term or long-term gain.

Listed below are the 2021 dividends paid by the T. Rowe Price funds that have been reclassified for Form 1099-DIV purposes.

T. Rowe Price Fund	2021 Payment Date	Per Share Amount to Reclassify	Tax Character*

\* Amounts after reclassification only represent the reclassified amount and not necessarily the fund's total per share for that category.

## 2021 DIVIDENDS-RECEIVED DEDUCTION

(for corporations only)

Corporate taxpayers are generally entitled to a deduction for dividends received from another domestic corporation. To determine the amount of dividends qualifying for this deduction, multiply the “percent qualifying for deduction” (shown in the table) by the amount of your total ordinary dividends. Please note that ordinary dividends of a fund include, if applicable, net short-term capital gains and foreign taxes paid.

Note that you may not take this deduction for a dividend on shares of a fund that have been held 46 days or less during the 91-day period beginning on the date 45 days before the ex-dividend date.

<sup>1</sup>This percentage applies to the sum of your income dividend plus short-term capital gain distribution paid for the calendar year or other period, if indicated, as reported in Box 1a of your IRS Form 1099-DIV.

<sup>2</sup>Formerly New America Growth.

Percentages are the same for all fund classes (Investor, Advisor, R, and I classes). For more information on Advisor, R, Institutional, and Portfolio funds, please visit our website for financial intermediaries at [troweprice.com/financial-intermediary/us/en/investments/tax-center.html](https://troweprice.com/financial-intermediary/us/en/investments/tax-center.html).

N/A indicates that a fund did not pay a dividend or short-term capital gain or pass through foreign tax paid.

A dash indicates that the fund paid a dividend or short-term capital gain, but it was not entitled to a deduction for dividends received.

## T. ROWE PRICE TAX-FREE FUNDS

This guide should help you meet state and federal tax reporting requirements for your T. Rowe Price tax-free fund investments.

### **Municipal Bond Funds Tax Facts**

Although income generated by municipal bonds is generally exempt from federal tax, we want to remind you of the following:

- Exempt-interest dividends paid from T. Rowe Price tax-free funds are reported to the IRS. This amount, which you also must report to the IRS on your tax return, is shown in Box 11 of your Form 1099-DIV and must be reported on your Form 1040 along with any other tax-exempt interest or dividends you may have received.
- Income from municipal bonds may be subject to state and local income taxes.
- You may have to include a portion of your exempt-interest dividends in your calculation of the AMT (see Exhibit 3—Percentage of Income to Include in the AMT Calculation). This information is reported in Box 12 of your Form 1099-DIV.
- Tax-free funds' capital gains are subject to federal, state, and local taxes. The same rules apply if you have sold shares of tax-free funds.
- Fund capital gain distributions (if any) are reported on Form 1099-DIV, and proceeds from your own sales of fund shares are reported on Form 1099-B.
- If you receive Social Security benefits, the receipt of tax-free income may increase the portion of those benefits subject to income taxes.

Because of the complexity and diversity of state requirements, you may want to consult a tax advisor or contact your state tax authority on taxability of income and gains and other reporting requirements. If you need help regarding your personal federal tax filings, you may want to consult a tax advisor or contact the IRS.

On the following pages, you will find:

**Exhibit 1**—Sources of National Tax-Free Funds' Income

**Exhibit 2**—Taxability of State Tax-Free Funds' Dividend Income

**Exhibit 3**—Percentage of Income to Include in the Alternative Minimum Tax Calculation

**EXHIBIT 1—2021 SOURCES OF NATIONAL TAX-FREE FUNDS' INCOME**

Depending on your state's tax laws, the portion of your income dividend attributable to interest earned by a fund on securities issued by your state may be exempt from your state's tax. Please check your state's requirements. To determine this portion, multiply (1) the percentage of your fund's dividend that may be exempt from your state's income tax listed below by (2) the amount of exempt-interest dividends for your fund as reported in Box 11 of your Form 1099-DIV. In addition, check your state's rules to see if you may also exclude the percentages attributable to U.S. territories.

**Note:** Column totals may add up to more than 100% because income on some bonds is exempt in more than one state.

\* Percentages are the same for all fund classes (Investor, Advisor, and I classes).

<sup>1</sup>All of the dividend income is subject to state tax because minimum threshold requirements were not met.

<sup>2</sup>Illinois does not exempt the portion of dividends from state or local obligations held indirectly through a mutual fund.

<sup>3</sup>Interest earned from a direct obligation of another state or political subdivision acquired before January 1, 2012, is exempt from Indiana income tax. The acquisition date by the shareholder of the mutual fund shares is considered to be the purchase date of the obligation when determining if the exemption applies.

<sup>4</sup>Some dividend income may be subject to tax. Only certain specified obligations are exempt in this state. Please consult with your tax advisor.

<sup>5</sup>Includes interest earned on Utah and applicable non-Utah obligations, including U.S. territories, and interest on certain states' obligations acquired before January 1, 2003.

**EXHIBIT 2—2021 TAXABILITY OF STATE TAX-FREE FUNDS’ DIVIDEND INCOME**

All of the funds’ dividends are exempt from federal income tax, and certain portions will also be exempt from state taxes for investors filing in that state.

To determine the state tax treatment of your fund dividends, multiply the percentage shown below by each fund’s tax-free dividend income shown in Box 11 of your Form 1099-DIV. This amount is exempt from state tax.

Tax-Free Fund*	Percent of Dividend Income Exempt From State Tax
California Tax-Free Bond	100.00%
California Tax-Free Money	95.71
Georgia Tax-Free Bond	99.86
Maryland Short-Term Tax-Free Bond	100.00
Maryland Tax-Free Bond	100.00

New Jersey Tax-Free Bond	100.00
New York Tax-Free Bond	100.00
New York Tax-Free Money	99.32
Virginia Tax-Free Bond	99.88

\*Percentages are the same for all fund classes (Investor, Advisor, and I classes).

**EXHIBIT 3—2021 PERCENTAGE OF INCOME TO INCLUDE IN THE ALTERNATIVE MINIMUM TAX CALCULATION**

This table is relevant only for investors who must calculate the alternative minimum tax (AMT). It reflects the percentage of income earned by each tax-free fund from investments in “private activity” bonds. Such income is subject to the AMT calculation.

Please note that this table is for informational purposes only. The portion of your exempt-interest dividends, if any, subject to the AMT calculation is reported in Box 12 of your Form 1099-DIV. Please use the Box 12 amount when preparing your tax return, if applicable.

Tax-Free Fund*	Percentage of Fund Income Subject to AMT
California Tax-Free Bond	11.93%
California Tax-Free Money	3.12
Georgia Tax-Free Bond	1.33
