## Global Value Equity Fund – Proxy Voting Summary

6 months ending 31 December 2023

### PROXY VOTING PROGRAM OVERVIEW

Proxy voting is a crucial link in the chain of stewardship responsibilities we execute on behalf of our clients. Each vote represents both the privileges and the responsibilities that come with owning a company's equity instruments.

We take our responsibility to vote our clients' shares very seriously - taking into account both high-level principles of corporate governance and company-specific circumstances. Our overarching objective is to cast votes to foster long-term, sustainable success for the company and its investors.

T. Rowe Price portfolio managers are ultimately responsible for the voting decisions within the strategies they manage. They receive recommendations and support from a range of internal and external resources:

- The T. Rowe Price ESG Committee
- Our global industry analysts
- Our specialists in corporate governance and responsible investment
- ISS, our external proxy advisory firm

Our proxy voting program serves as one element of our overall relationship with corporate issuers. We use our voting power in a way that complements the other aspects of our relationship with these companies, including engagement, investment diligence, and investment decision-making.

### SUMMARY OF MAJOR PROPOSAL ITEMS

The following table breaks down voting records into categories. Some categories, such as the election of directors, are universal across the markets where we invest. Other voting issues are unique to select regions. For management-sponsored proposals, a vote "FOR" is a vote aligned with the board's recommendation. For shareholder-sponsored proposals, a vote "FOR" is generally a vote contrary to the board's recommendation.

## SIGNIFICANT VOTES

The definition of a significant vote can vary across the investment industry. At T. Rowe Price, meetings may be tagged as significant where the situation is particularly contentious, or the vote illustrates a key aspect of our voting approach. Detailed below is the summary of a resolution, how we voted, and our rationale for that voting decision. T. Rowe Price portfolio managers decide how to vote on the proxy proposals of companies in their portfolios and, as a result, may not all vote the same.

This case study describes proxy voting being carried out on behalf of the fund. This material is for informational purposes only and is not intended as an offer or recommendation concerning investments, investment strategies, products, and account types.

CASE STUDY: Power Grid Corporation of India – Agenda item numbers 3 and 5	
Summary of the resolution(s)	Agenda item number 3: Reelect Abhay Choudhary as Director Agenda item number 5: Elect Saibaba Darbamulla as Director
Country	India
Company description	Power Grid Corporation of India, majority owned by the government, has a near-monopoly position in the interstate electricity transmission business.
Date of vote	August 30, 2023
Meeting type	Annual
Proponent	Management
How we voted	Agenda item number 3: Against Agenda item number 5: Against
Rationale for the voting decision(s)	There are long-running independence issues at Power Grid Corporation of India's Board, which also remains a single gender board. As recommended by the T. Rowe Price Policy, we voted AGAINST the reelection of Abhay Choudhary and the election of Saibaba Darbamulla as both are non-independent and would contribute to Board independence being too low.

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the OEIC sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

**RISKS - The following risks are materially relevant to the fund (refer to prospectus for further details):** Currency - Currency exchange rate movements could reduce investment gains or increase investment losses. Small and mid-cap - Small and mid-size company stock prices can be more volatile than stock prices of larger companies. Style - Style risk may impact performance as different investment styles go in and out of favor depending on market conditions and investor sentiment.

**General fund risks - to be read in conjunction with the fund specific risks above.** Equity - Equities can lose value rapidly for a variety of reasons and can remain at low prices indefinitely. Geographic concentration - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the fund's assets are concentrated. Investment fund - Investing in funds involves certain risks an investor would not face if investing in markets directly. Management - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. Market - Market risk may subject the fund to experience losses caused by unexpected changes in a wide variety of factors. Operational - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.
