

T. ROWE PRICE FUNDS SICAV

Responsible Emerging Markets Corporate Bond Fund – Carbon Footprint

As at 31 March 2022

At T. Rowe Price, we recognize that many of our clients wish to understand the carbon footprint of their portfolios and, as such, we provide the following analysis. While carbon footprint analysis can be a useful tool for comparing portfolios, we would caution that a significant portion of the carbon emissions dataset is estimated as many companies do not report this figure. Additionally, the statistic of carbon intensity can lack informational relevance in some cases. Carbon intensity is a calculation of carbon emissions divided by revenues, so a low emitting company selling an inexpensive product can have a higher carbon footprint than a high emitting company selling an expensive product; and trend movements can be skewed by currency moves affecting revenues.

The following analysis is produced by T. Rowe Price using data provided by Sustainalytics.

The comparator benchmark of the Fund is the J.P. Morgan Corporate Emerging Market Bond Index Broad Diversified. This benchmark is shown for comparison purposes only.

EXECUTIVE SUMMARY

	Data Availability				Carbon Metrics
	Total Percentage of Data Available %	Percentage of Data Reported %	Percentage of Data Estimated %	Percentage of Carbon Metrics Pro-rated %	Weighted Average Carbon Intensity mtCO ₂ e / US\$1 mn Revenue
Fund	78.91	49.09	29.82	21.09	748.40
Benchmark	86.91	53.88	33.03	13.09	667.12
Fund vs Benchmark					12.2%

The benchmark carbon metrics are calculated using the total net assets of the Fund invested according to the composition of the benchmark.

GLOSSARY OF TERMS

mtCO₂e - Metric tons of carbon dioxide equivalent.

Percentage of Data Reported - The percentage for which Carbon Emissions data is reported by Companies.

Percentage of Data Estimated - The percentage for which Carbon Emissions data is estimated by Sustainalytics.

Percentage of Carbon Metrics Pro-rated - The percentage of the Fund and Benchmark which are pro-rated based on the Carbon Metrics of the remainder.

Weighted Average Carbon Intensity - The weighted average, by Fund weight, of the total carbon emissions per US\$1mn of revenues for each of the Fund holdings. This metric gives the Fund's exposure to carbon intensive companies and can be applied across equity and fixed income portfolios. This is the Task Force on Climate-Related Financial Disclosures (TCFD) recommended metric.

This marketing communication is for Investment Professionals only. Not for further distribution.

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

Risks - The following risks are materially relevant to the fund (refer to prospectus for further details):

China Interbank Bond Market - The China Interbank Bond Market may subject the fund to additional liquidity, volatility, regulatory, settlement procedure and counterparty risks. The fund may incur significant trading and realisation costs.

Contingent convertible bond - Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others. **Country (China)** - Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market. **Credit** - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. **Default** - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. **Derivative** - Derivatives may be used to create leverage which could expose the fund to higher volatility and/or losses that are significantly greater than the cost of the derivative. **Emerging markets** - Emerging markets are less established than developed markets and therefore involve higher risks. **Frontier markets** - Frontier markets are less mature than emerging markets and typically have higher risks, including limited investability and liquidity. **High yield bond** - High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions. **Interest rate** - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. **Liquidity** - Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price. **Sector concentration** - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. **Total Return Swap** - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.

General fund risks - to be read in conjunction with the fund specific risks above. Counterparty - Counterparty risk may materialise if an entity with which the fund does business becomes unwilling or unable to meet its obligations to the fund.

ESG and sustainability - ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the fund. **Geographic concentration** - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the fund's assets are concentrated. **Hedging** - Hedging measures involve costs and may work imperfectly, may not be feasible at times, or may fail completely. **Investment fund** - Investing in funds involves certain risks an investor would not face if investing in markets directly. **Management** - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. **Market** - Market risk may subject the fund to experience losses caused by unexpected changes in a wide variety of factors. **Operational** - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.
