## Euro Corporate Bond Fund – ESG Report

Providing transparency on Environment, Social and Governance aspects of the fund

As at 30 June 2020

### ESG INTEGRATION APPROACH

- The Euro Corporate Bond Fund uses ESG integration as part of its investment process. This means incorporating environmental, social and governance factors to enhance investment decisions. Our central mission is to help our clients reach their long-term financial goals and we believe that incorporating ESG factors into our investment process alongside financials, valuation, macro-economics and other factors is consistent with that objective. Our philosophy is that ESG factors are a component of the investment decision – meaning that they are not the sole driver of an investment decision, nor are they considered separately from more traditional analysis.
- The process of ESG integration takes place on two levels: first, with our research analysts as they incorporate environmental, social, and governance factors into issuer valuations and ratings; and, second, with the portfolio manager as he balances these ESG factor exposures at the portfolio level. Both the analysts and portfolio manager are able to leverage dedicated, in-house resources to assist them in analyzing ESG criteria.
- Our ESG specialist teams provide investment research on ESG issues at the issuer level and on thematic topics. Additionally, they have built tools to help pro-actively and systematically analyze the environmental, social and governance factors that could impact our investments. The foundation of the analysis is a proprietary flagging tool called the Responsible Investing Indicator Model (RIIM). It covers approximately 14,000 securities and pulls from data sets that are not in the wheelhouse of traditional financial analysis. These data sets include:
  - ESG performance data (i.e. number of accidents, carbon emissions, strength of whistle-blower programs);
  - ESG targets (i.e. plans to reduce carbon emissions, increase diversity, etc.);
  - ESG incidents and controversies (i.e. environmental fines paid, local community controversies/protests against a company, etc.)
- Our Euro Corporate Bond Fund aims to generate alpha through security selection based on bottom-up research. By drawing on our global research resources and analyst teams, we aim to identify positive idiosyncratic stories and names that can perform over the long term. As such, our primary emphasis is on company fundamentals, which include the consideration of environmental, social, and governance factors. We find that this long-standing investment philosophy tends to yield an ESG-friendly portfolio; however, we also screen the portfolio using T. Rowe Price's proprietary RIIM analysis at regular intervals. This helps us understand the ESG characteristics of the portfolio and makes us aware of any elevated exposures to specific ESG factors.

### RECENT COMPANY ENGAGEMENTS

We maintain a regular dialogue with the management teams of companies represented across the portfolio. Our investment-driven engagement program frequently identifies targets through our proprietary RIIM analysis, governance screening and analysts' fundamental research. While we engage with companies in a variety of different contexts, ESG engagement focuses on learning about, influencing or exchanging perspectives on the environmental practices, corporate governance or social issues affecting their business.

While most of the meetings we hold with company managements will include some discussion of ESG topics, we differentiate meetings held with a heavy focus on ESG, meaning ESG issues were the sole items on the agenda or made up a meaningful part of the meeting. Agenda items are classified as "meaningful" when they take up a significant portion of the meeting or are a significant factor in the investment case.

The following are selected examples of recent engagements with companies held in or considered for the portfolio. The examples are not meant to be representative of every engagement held, but to illustrate the types of ESG engagements we are having with the managements of our investment companies.

**For Investment Professionals only. Not for further distribution.**

**Munich Re (4<sup>th</sup> Quarter 2019)**

<b>Focus</b>	Governance
<b>Company Description</b>	Germany based Munich Re is global reinsurer spanning both non-life and life reinsurance. Additionally, the group includes a sizeable primary insurance business.
<b>Engagement Objective</b>	We engaged with Munich Re for a broad discussion on governance. Additionally, we discussed Munich Re's integration of ESG across its investment platform.
<b>Participants</b>	T. Rowe Price's Head of Corporate Governance engaged with Munich Re's Head of Investor Relations, Head of Department Group Legal, Head of Department Group Executive Affairs, and an Investor Relations representative.
<b>Engagement Outcome</b>	<p>The purpose of our engagement with Munich Re was to have discussion around governance. We reviewed our voting decisions for the prior AGM season and the company signaled two non-routine resolutions for the upcoming 2020 AGM.</p> <p>We also discussed ESG integration. Munich Re's focus has been on ESG integration across its investment platform, particularly non-equity assets. This engagement allowed us to have a constructive, long-term oriented discussion on governance and proxy voting. Additionally, it helped inform our investment research.</p>

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

**Nestle (4<sup>th</sup> Quarter 2019)**

<b>Focus</b>	Environmental, Social, Governance
<b>Company Description</b>	Nestle is a leading manufacturer of processed food and beverages.
<b>Engagement Objective</b>	We engaged with Nestle's Chairman for a broad discussion on governance and sustainability topics.
<b>Participants</b>	A T. Rowe Price Investment Analyst and a Responsible Investing Analyst engaged with Nestle's Chairman, Secretary to the Board, and an Investor Relations representative.
<b>Engagement Outcome</b>	<p>The purpose of our engagement with Nestle was to have discussion on governance and sustainability. The discussion allowed us to share our viewpoint and understand the company's approach.</p> <p>A notable change this year has been Nestle's explicit focus on environmental topics to meet societal demands. The following targets have been introduced:</p> <ol style="list-style-type: none"> <li>1. Net greenhouse gas neutral by 2050, including upstream and downstream impacts.</li> <li>2. 100% reusable/recyclable packaging by 2025.</li> </ol> <p>Board changes are partly responsible for Nestle's sharper environmental focus. The Chairman noted that younger board members are asking tougher questions and holding the board accountable for advancing in environmental areas. 2019 compensation changes are another driver as Nestle develops a framework to integrate ESG outcomes into remuneration.</p> <p>Nestle is now part of a World Economic Forum working group whose focus is on the standardisation of sustainability reporting. The company has also committed to the Taskforce for Climate-related Financial Disclosures.</p> <p>The engagement informed our investment research. Nestle gave us a better understanding of its sustainability strategy and we gained confidence that the company is on track to achieve most of its 2020 goals.</p>

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

**Risks - The following risks are materially relevant to the fund (refer to prospectus for further details):**

**Country risk (Russia and Ukraine)** - in these countries, risks associated with custody, counterparties and market volatility are higher than in developed countries. **Credit risk** - a bond or money market security could lose value if the issuer's financial health deteriorates. **Default risk** - the issuers of certain bonds could become unable to make payments on their bonds. **Derivatives risk** - derivatives may result in losses that are significantly greater than the cost of the derivative. **Emerging markets risk** - emerging markets are less established than developed markets and therefore involve higher risks. **Interest rate risk** - when interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. **Liquidity risk** - any security could become hard to value or to sell at a desired time and price. **Sector concentration risk** - the performance of a fund that invests a large portion of its assets in a particular economic sector (or, for bond funds, a particular market segment), will be more strongly affected by events affecting that sector or segment of the fixed income market.

**General fund risks - to be read in conjunction with the fund specific risks above.** **Capital risk** - the value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. **Counterparty risk** - an entity with which the fund transacts may not meet its obligations to the fund. **Geographic concentration risk** - to the extent that a fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area. **Hedging risk** - a Fund's attempts to reduce or eliminate certain risks through hedging may not work as intended. **Investment fund risk** - investing in funds involves certain risks an investor would not face if investing in markets directly. **Management risk** - the investment manager or its designees may at times find their obligations to a fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably). **Operational risk** - operational failures could lead to disruptions of fund operations or financial losses.

**IMPORTANT INFORMATION**

The Funds are sub-funds of the T. Rowe Price Funds SICAV, a Luxembourg investment company with variable capital which is registered with Commission de Surveillance du Secteur Financier and which qualifies as an undertaking for collective investment in transferable securities ("UCITS"). Full details of the objectives, investment policies and risks are located in the prospectus which is available with the key investor information documents in English and in an official language of the jurisdictions in which the Funds are registered for public sale, together with the articles of incorporation and annual and semi-annual reports (together "Fund Documents"). Any decision to invest should be made on the basis of the Fund Documents which are available free of charge from the local representative, local information/paying agent or from authorised distributors and via [www.troweprice.com](http://www.troweprice.com).
