## T. Rowe Price Global Focused Growth Equity Fund – Carbon Footprint

*As at 31 December 2023*

At T. Rowe Price, we recognize that many of our clients wish to understand the carbon footprint of their portfolios and, as such, we provide the following analysis.

While carbon footprint analysis can be a useful tool for comparing portfolios, we would caution that a significant portion of the carbon emissions data set is estimated as many companies do not report this figure. In particular, there is typically a greater degree of estimation included in Scope 3 Carbon Emissions data.

Additionally, the statistic of carbon intensity can lack informational relevance in some cases. Carbon intensity is a calculation of carbon emissions divided by revenues, so a low emitting company selling an inexpensive product can have a higher carbon footprint than a high emitting company selling an expensive product; and trend movements can be skewed by currency moves affecting revenues.

The following analysis is produced by T. Rowe Price using data provided by Sustainalytics.

The comparator benchmark of the Fund is the MSCI All Country World Net Index. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

**INVESTMENT OBJECTIVE:** To increase the value of its shares, over the long term, through growth in the value of its investments.

**INVESTMENT PROCESS:** The fund is actively managed and invests mainly in a diversified portfolio of shares of companies that have the potential for above average and sustainable rates of earnings growth. The companies may be anywhere in the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in sustainable investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging and efficient portfolio management. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

## GLOSSARY OF TERMS

**Scope 1** - Direct Carbon Emissions from owned or controlled sources (e.g. fuel combustion, company vehicles, fugitive emissions).

**Scope 2** - Indirect Carbon Emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting company.

**Scope 3** - Includes all other indirect Carbon Emissions that occur in a company's value chain (e.g. purchased goods and services, business travel, employee commuting, waste disposal, use of sold products, transportation and distribution (up- and downstream), Investments, leased assets and franchises).

**mtCO<sub>2</sub>e** - Metric tons of carbon dioxide equivalent.

**Percentage of Data Reported** - The percentage for which Carbon Emissions data is reported by Companies.

**Percentage of Data Estimated** - The percentage for which Carbon Emissions data is estimated by Sustainalytics.

**Percentage of Carbon Metrics Pro-rated** - The percentage of the Fund and Benchmark which are pro-rated based on the Carbon Metrics of the remainder.

**Total Carbon Emissions** - Total amount of greenhouse gas (GHG) emissions that are released by the Fund holdings that are attributable to the % ownership of the Fund in each company, aggregated to give the total carbon emissions equivalent for the Fund. This metric is grossed up using the percentage of data available to give the overall carbon footprint of the Fund. Only applicable to equities.

**Carbon Emissions per US\$1mn investment in the Fund** - This metric enables an investor to calculate the carbon emissions of their investment in the Fund. Only applicable to equities.

**Weighted Average Carbon Intensity** - The weighted average, by Fund weight, of the total carbon emissions per US\$1mn of revenues for each of the Fund holdings. This metric gives the Fund's exposure to carbon intensive companies and can be applied across equity and fixed income portfolios. This is the Task Force on Climate-Related Financial Disclosures (TCFD) recommended metric.
