

T. ROWE PRICE FUNDS SICAV

US Impact Equity Fund – ESG Report

Providing transparency on Environment, Social and Governance aspects of the Fund

As of 30 June 2024

ESG INTEGRATION APPROACH

- All our stock selection decisions begin with a clearly defined positive impact thesis, which proactively and systematically integrates environmental, social and governance (ESG) considerations. In pursuit of long-term growth of capital, the fund seeks positive environmental or social impact and to outperform the benchmark. We maintain a focus on companies that we believe offer positive impact today and underappreciated impact in the future, together with durable and superior future earnings and cash flow growth, attractive industry structure, strong management quality, and expert capital allocation. Company fundamentals, including the consideration of environmental, social, and governance factors, play a critical role in the stock selection process. Credible ESG solutions require investment and we have been building capability in the field of ESG integration and responsible investing for a number of years in order to fully embed ESG within our investment process. Our philosophy is that ESG factors cannot be separate or a tangential part of a traditional investment thesis; they have to be integrated alongside fundamental factors to create the best outcome for clients.
- The process of ESG integration takes place on three levels: first, as our fundamental and responsible investing research analysts incorporate environmental, social, and governance factors into their analysis; second, as we use T. Rowe Price's proprietary RIIM analysis at regular intervals to help us understand the ESG characteristics of single stocks and the aggregate portfolio; and third, as the portfolio manager integrates ESG considerations within the investment thesis and portfolio construction process itself.
- Our ESG specialist teams provide investment research on ESG issues at the company level and on thematic topics. Additionally, they have built tools to help proactively and systematically analyze the environmental, social, and governance factors that could impact our investments. The foundation of the analysis is a proprietary flagging tool called the Responsible Investing Indicator Model (RIIM). It covers over 15,000 companies and pulls from data sets that are not in the wheelhouse of traditional financial analysis. These data sets include:
 - ESG performance data (e.g., number of accidents, carbon emissions, strength of whistle-blower programs, etc.);
 - ESG targets (e.g., plans to reduce carbon emissions, increase diversity, etc.)
 - ESG incidents and controversies (e.g., environmental fines paid, local community controversies/protests against a company, etc.)
- It is important to reiterate that our impact universe is formed through careful screening by our Responsible Investing team, which allows us to focus our stock picking on companies that are delivering material and measurable impact, while understanding ESG factors as we form our perspectives. We incorporate our team's forward-looking perspective on positive impact into our quantifiable understanding of the past, in order to understand the future direction of change. Deep research resources are needed to embrace this complex challenge, but we have invested in our capabilities on behalf of our clients.

INVESTMENT OBJECTIVE: To have a positive impact on the environment and society by investing in sustainable investments, where the companies' current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS: The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in the United States. The investment manager will focus on companies that it believes have the potential to create positive social or environmental impact through their products or services, and that appear to offer superior growth prospects and investment characteristics. The fund has sustainable investment as an objective that the fund aims to achieve through its commitment to only invest in sustainable investments (excluding cash and derivatives used for portfolio management techniques for the purpose of hedging, liquidity management and risk reduction). The investment manager will use T. Rowe Price's in-house proprietary impact screening process to select companies for its portfolio. Each company selected for inclusion in the fund's portfolio has current or future business activities that are expected to generate a material and measurable positive impact under one of the three impact pillars: Climate and Resources Impact; Social Equity and Quality of Life; Sustainable Innovation and Productivity. In addition, the investment process aims to select companies capable of achieving and sustaining above-average, long-term growth in capital appreciation and in the value of the fund's investments. The fund may use derivatives for hedging and efficient portfolio management. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

This marketing communication is for investment professionals only. Not for further distribution.

RECENT COMPANY ENGAGEMENTS

We maintain a regular dialogue with the management teams of companies represented across the portfolio. Our investment-driven engagement program frequently identifies targets through our proprietary RIIM analysis, governance screening and analysts' fundamental research. While we engage with companies in a variety of different contexts, ESG engagement focuses on learning about, encouraging or exchanging perspectives on the environmental practices, corporate governance or social issues affecting their business.

While most of the meetings we hold with company managements will include some discussion of ESG topics, we differentiate meetings held with a heavy focus on ESG, meaning ESG issues were the sole items on the agenda or made up a meaningful part of the meeting. Agenda items are classified as "meaningful" when they take up a significant portion of the meeting or are a significant factor in the investment case.

The following are selected examples of recent engagements with companies held in or considered for the portfolio. The examples are not meant to be representative of every engagement held, but to illustrate the types of ESG engagements we are having with the managements of our investment companies.

Deere (2nd Quarter 2024 Engagement)

Focus	Environment
Company Description	Deere and Co (Deere) is an agricultural equipment manufacturer.
Engagement Objective	We engaged with Deere to provide feedback on its impact reporting and to discuss risks to its impact thesis.
Participants	From Deere: Director of Sustainability; Sustainability Manager; Director of Investor Relations, Investor Relations Representative From T. Rowe Price Associates, Inc: Impact Portfolio Manager; Impact Investment Analyst; Investment Analyst, Responsible Investing Analysts
Engagement Outcome	<p>Deere has best-in-class impact reporting; it provides a lot of detail on the impact of several precision agriculture and construction/forestry solutions that are already viable to a wide range of farmers and other users. We appreciated the company's efforts in regularly highlighting progress against its "Leap Ambitions", which focus on improved use of fertilizers as well as lower greenhouse gas (GHG) emissions for farmers. We also expressed our preference for Task Force on Climate-Related Financial Disclosures (TCFD) and Sustainability Accounting Standards Board (SASB) reporting as well as for companies to report on material scope 3¹ emission categories, all of which Deere already integrates and plans to keep reporting on.</p> <p>While we reiterated our positive general feedback, we discussed opportunities to regularly track additional real-world impact key performance indicators (KPIs) from farmers' use of precision agriculture products. Deere provides detailed impact data at a product level and is significantly upscaling the amount of "Engaged Acres" that should help the company track more aggregate impact data from customers. KPI suggestions included reporting on aggregate GHG emissions avoided from the use of Deere's precision agriculture products and the aggregate amount of fertilizers saved each year and related cost savings for farmers.</p> <p>We discussed several risks to Deere's impact thesis: equipment affordability, impact of machinery on soil compaction, risks of fertilizer runoff, and machinery emissions. The company is mitigating these issues in several ways, in particular: (1) upgrade tools that do not require farmers to purchase an entire new piece of equipment, thus helping with equipment affordability and cost to farmers; (2) advanced artificial intelligence-enabled precision agriculture technology and sustainably digitalized acres that help optimize the use of machinery throughout seasons and the use fertilizer, thus minimizing risks of soil damage and fertilizer runoff; and (3) investment in large tractor powertrains capable of running with low-carbon and renewable fuels with lower life-cycle emissions compared with traditional diesel engines. We suggested these efforts could be highlighted further in future impact reports by integrating our impact KPI suggestions.</p> <p>We provided the company with feedback on its impact reporting and suggested several impact KPIs to enhance it further, including aggregate GHG emissions avoided and aggregate amount of fertilizers saved and related cost savings for customers.</p>

¹ Scope 1: direct emissions from owned or controlled sources; scope 2: indirect emissions from the generation of purchased electricity, steam, or cooling; scope 3: all other indirect emissions.

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

Sprouts Farmers Market (2nd Quarter 2024 Engagement)

Focus	Social
Company Description	Sprouts Farmers Market (SFM) is a leading food retailer in the U.S. specifically focused on natural and organic products.
Engagement Objective	We engaged with SFM to provide feedback on its approach to impact and ESG disclosure following the recent publication of its 2023 impact report.
Participants	From SFM: Investor Relations Representative From T. Rowe Price Associates, Inc: Impact Portfolio Manager; Impact Investment Analyst; Responsible Investing Analyst
Engagement Outcome	<p>We engaged with SFM mainly on its impact disclosure and also briefly provided general feedback on its recently published 2023 impact report.</p> <p>SFM disclosed that it generated USD 3.3 billion in revenue from the sales of products with social or environmental attributes in FY23 (c.48% of net sales). However, the company does not disclose the composition of this number and what product categories or attributes are in scope. We suggested that SFM include additional information to this effect in future disclosure.</p> <p>We also discussed SFM's approach to identifying new products to include in its stores. SFM highlighted how the growth of the brand means that vendors are increasingly pitching directly to the company. SFM has a list of ingredients it explicitly prohibits from being included in products sold in its stores (i.e., a pitching company may be asked to reformulate a product for it to be sold at SFM as a result). It already includes some disclosure on responsible sourcing in its ESG reporting, but since this is a key differentiating feature for the company, we suggested SFM add additional disclosure on its sourcing processes in future reporting (e.g., more clearly summarizing its approach for key product categories).</p> <p>SFM had previously suggested that alcohol, health and beauty, and other non-natural products accounted for c.6% of its revenue. For our own impact analysis, we asked the company whether there had been any noticeable shift in the sales mix during FY23. SFM believes approximately 95% of its revenues still derive from natural products.</p> <p>The company has restructured its disclosure to focus more explicitly on its impact in this year's report (the report is termed an "impact" report for the first time). The disclosure is Sustainability Accounting Standards Board (SASB)-aligned and is generally strong for a company of this size. For future iterations of the report, we suggested including additional years of historical data to illustrate the company's progress on different ESG topics. The existing reporting only contains key performance indicators in respect of FY23.</p> <p>The engagement allowed us to share our views on best practices for impact reporting and request disclosures that would provide a more comprehensive picture of SFM's impact in future reporting. We were also able to confirm that sustainable investment alignment remained essentially unchanged versus FY22.</p> <p>We will monitor whether the SFM provides additional disclosure on: (1) the composition of revenues derived from the sale of products with a social or environmental objective and (2) responsible sourcing (e.g., detailing the company's overall approach to sourcing and summarizing its approach to sourcing for different product categories).</p>

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

ESG RIIM PROFILE

The T. Rowe Price Responsible Investing Indicator Model (RIIM) rates companies, governments and securitized assets in a traffic light system measuring their environmental, social, and governance profile and flagging issuers with elevated risks. For certain types of investments, including, but not limited to, cash, currency positions, and particular types of derivatives, an ESG analysis may not be relevant or possible due to a lack of data. Where ESG considerations are integrated into the investment research process, we may conclude that other attributes of an investment outweigh ESG considerations when making investment decisions.

	Portfolio		Benchmark	
	No. of securities	% weight	No. of securities	% weight
● Green	47	94.4	419	82.2
● Orange	2	2.4	80	17.2
● Red	0	0.0	3	0.5
● Not in scope / not covered	0	0.0	1	0.1
● Reserves	1	3.1	0	0.0
Total	50	100.0	503	100.0

● No/few Flags ● Medium Flags ● High Flags

The comparator benchmark of the Fund is the S&P 500 Index Net 30% Withholding Tax. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

SUSTAINABILITY INDICATOR

The fund is classified as Article 9 according to the Sustainable Finance Disclosure Regulations (SFDR).

The sustainability indicator used by the fund is a minimum of 70% of the value of the fund's portfolio held in securities that the investment manager identifies as sustainable investments.

The percentage exposure of the fund to sustainable investments is:

	Target Minimum Commitment %	Fund Exposure %
Sustainable Investments	-	84.2%
with Environmental Objectives	25.0%	34.2%
with Social Objectives	25.0%	50.1%

PRINCIPAL ADVERSE IMPACT (PAI) INDICATORS

Under the European Union Sustainable Finance Disclosure Regulations (SFDR), investment managers are required to take into account Principal Adverse Impact (PAI) indicators, a set of metrics that highlight the potential negative impacts on sustainability factors that result from investment decisions. This is integrated into our ESG analysis at a security level.

Some PAI indicators have limited data availability which may lead to misrepresentative values for the fund. In these cases, the metric value and data coverage are displayed as n/a in the following tables.

In addition, the investment manager considers the following PAI indicators at an aggregate fund level. Metric values are shown in the Base Currency of the fund (USD):

PAI Indicator	Metric Description	Unit of Measurement	Metric Value	Metric Coverage (%)
1. GHG Emissions	Scope 1 GHG emissions	mtCO2e	25	95.3%
	Scope 2 GHG emissions	mtCO2e	21	95.3%
	Scope 3 GHG emissions	mtCO2e	320	95.3%
	Total GHG emissions	mtCO2e	366	95.3%
2. Carbon footprint	Carbon footprint	mtCO2e per mn invested	128.6	95.3%
3. GHG intensity of investee companies	GHG intensity of investee companies	mtCO2e per mn revenue	354.9	95.9%
10. Violations of UNGC principles and OECD guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage of total invested	0.0%	96.9%
13. Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of board members	Average ratio of female board members	34.0%	93.9%
14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Percentage of total invested	0.0%	95.1%

The table below displays the remaining PAI indicators as of the report date. These are displayed for reporting purposes. Metric values are shown in the Base Currency of the fund (USD):

PAI Indicator	Metric Description	Unit of Measurement	Metric Value	Metric Coverage (%)
4. Exposure to companies active in fossil fuel sector	Share of investments in companies active in the fossil fuel sector	Percentage of total invested	1.3%	96.9%
5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources	Percentage of non-renewable energy	59.7%	77.3%
6. Energy consumption intensity	Energy consumption in GWh per million of revenue of investee companies	GWh/mn of revenue	0.1	84.3%
7. Activities negatively affecting biodiversity sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	Percentage of total invested	0.0%	96.9%
8. Emissions to water	Tonnes of emissions to water generated by investee companies per million invested, expressed as a weighted average	Ktons per mn invested	n/a	n/a
9. Hazardous waste	Tonnes of hazardous waste generated by investee companies per million invested, expressed as a weighted average	Ktons per mn invested	n/a	n/a
11. Lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage of total invested	0.0%	96.9%
12. Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	Percentage of pay gap	n/a	n/a

GLOSSARY OF TERMS

Metric coverage - The percentage of the portfolio for which PAI data is available

GHG - Greenhouse gas emissions

Scope 1 GHG emissions - Direct greenhouse gas emissions by the fund

Scope 2 GHG emissions - Indirect greenhouse gas emissions made by the fund

Scope 3 GHG emissions - All other indirect emissions that occur in the funds value chain

mtCO₂e - Metric tonnes of carbon dioxide equivalent

Carbon footprint (Scope 1,2 & 3 emissions) - The total greenhouse gas emissions per million invested in the fund

GWh - Gigawatt Hours

Ktons - Kilotonnes

UNGC - The United Nations Global Compact

OECD - The Organization for Economic Co-operation and Development

No data - no data is available or can be calculated for the indicator

RISKS - The following risks are materially relevant to the fund (refer to prospectus for further details): Issuer

concentration - Issuer concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting those issuers in which the fund's assets are concentrated. Sector

concentration - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. Small and mid-cap - Small and mid-size company stock prices can be more volatile than stock prices of larger companies.

General fund risks - to be read in conjunction with the fund specific risks above. Equity - Equities can lose value rapidly for a variety of reasons and can remain at low prices indefinitely. ESG and sustainability - ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the fund. Geographic concentration - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the fund's assets are concentrated. Investment fund - Investing in funds involves certain risks an investor would not face if investing in markets directly. Management - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. Market - Market risk may subject the fund to experience losses caused by unexpected changes in a wide variety of factors. Operational - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.
