

T. ROWE PRICE FUNDS SICAV

US Impact Equity Fund – Carbon Footprint

As at 31 March 2023

At T. Rowe Price, we recognize that many of our clients wish to understand the carbon footprint of their portfolios and, as such, we provide the following analysis.

While carbon footprint analysis can be a useful tool for comparing portfolios, we would caution that a significant portion of the carbon emissions data set is estimated as many companies do not report this figure. In particular, there is typically a greater degree of estimation included in Scope 3 Carbon Emissions data.

Additionally, the statistic of carbon intensity can lack informational relevance in some cases. Carbon intensity is a calculation of carbon emissions divided by revenues, so a low emitting company selling an inexpensive product can have a higher carbon footprint than a high emitting company selling an expensive product; and trend movements can be skewed by currency moves affecting revenues.

The following analysis is produced by T. Rowe Price using data provided by Sustainalytics.

The comparator benchmark of the Fund is the S&P 500 Index Net 30% Withholding Tax. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

INVESTMENT OBJECTIVE: To have a positive impact on the environment and society by investing primarily in sustainable investments, where the companies' current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS: The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in the United States. The investment manager will focus on companies that it believes have the potential to create positive social or environmental impact through their products or services, and that appear to offer superior growth prospects and investment characteristics. The fund may invest in securities whose underlying economic activities contribute to environmental objectives including, but not limited to, climate change mitigation and/or climate change adaptation, as described in the Taxonomy Regulation. As well as investing in securities that contribute to environmental objectives, the fund may invest in securities that contribute to social or other objectives. No minimum exposure to an objective is imposed upon the fund, which means the fund may at times invest only in securities that contribute to non-environmental objectives. The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund's objective. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

This marketing communication is for investment professionals only. Not for further distribution.

EXECUTIVE SUMMARY

	Data Availability				Carbon Metrics		
	Total Percentage of Data Available %	Percentage of Data Reported %	Percentage of Data Estimated %	Percentage of Carbon Metrics Pro-rated %	Total Carbon Emissions mtCO ₂ e	Carbon Emissions per US\$1mn Invested mtCO ₂ e / US\$1 mn AuM	Weighted Average Carbon Intensity mtCO ₂ e / US\$1 mn Revenue
Scope 1&2 Carbon Emissions							
Fund	94.80	58.62	36.18	5.20	29	14.31	44.79
Benchmark	96.41	79.65	16.76	3.59	104	51.66	125.48
Fund vs Benchmark					-72.3%	-72.3%	-64.3%
Scope 1,2&3 Carbon Emissions							
Fund	94.80	43.28	51.52	5.20	192	95.53	265.01
Benchmark	96.65	67.37	29.28	3.35	850	421.86	855.57
Fund vs Benchmark					-77.4%	-77.4%	-69.0%

The benchmark carbon metrics are calculated using the total net assets of the Fund invested according to the composition of the benchmark.

GLOSSARY OF TERMS

Scope 1 - Direct Carbon Emissions from owned or controlled sources (e.g. fuel combustion, company vehicles, fugitive emissions).

Scope 2 - Indirect Carbon Emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting company.

Scope 3 - Includes all other indirect Carbon Emissions that occur in a company's value chain (e.g. purchased goods and services, business travel, employee commuting, waste disposal, use of sold products, transportation and distribution (up- and downstream), Investments, leased assets and franchises).

mtCO₂e - Metric tons of carbon dioxide equivalent.

Percentage of Data Reported - The percentage for which Carbon Emissions data is reported by Companies.

Percentage of Data Estimated - The percentage for which Carbon Emissions data is estimated by Sustainalytics.

Percentage of Carbon Metrics Pro-rated - The percentage of the Fund and Benchmark which are pro-rated based on the Carbon Metrics of the remainder.

Total Carbon Emissions - Total amount of greenhouse gas (GHG) emissions that are released by the Fund holdings that are attributable to the percentage ownership of the Fund in each company, aggregated to give the total carbon emissions equivalent for the Fund. This metric is grossed up using the percentage of data available to give the overall carbon footprint of the Fund. Only applicable to equities.

Carbon Emissions per US\$1mn investment in the Fund - This metric enables an investor to calculate the carbon emissions of their investment in the Fund. Only applicable to equities.

Weighted Average Carbon Intensity - The weighted average, by Fund weight, of the total carbon emissions per US\$1mn of revenues for each of the Fund holdings. This metric gives the Fund's exposure to carbon intensive companies and can be applied across equity and fixed income portfolios. This is the Task Force on Climate-Related Financial Disclosures (TCFD) recommended metric.
