

T. ROWE PRICE FUNDS SICAV US Impact Equity Fund – Carbon Footprint

As at 31 December 2023

At T. Rowe Price, we recognize that many of our clients wish to understand the carbon footprint of their portfolios and, as such, we provide the following analysis.

While carbon footprint analysis can be a useful tool for comparing portfolios, we would caution that a significant portion of the carbon emissions data set is estimated as many companies do not report this figure. In particular, there is typically a greater degree of estimation included in Scope 3 Carbon Emissions data.

Additionally, the statistic of carbon intensity can lack informational relevance in some cases. Carbon intensity is a calculation of carbon emissions divided by revenues, so a low emitting company selling an inexpensive product can have a higher carbon footprint than a high emitting company selling an expensive product; and trend movements can be skewed by currency moves affecting revenues.

The following analysis is produced by T. Rowe Price using data provided by Sustainalytics.

The comparator benchmark of the Fund is the S&P 500 Index Net 30% Withholding Tax. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

INVESTMENT OBJECTIVE: To have a positive impact on the environment and society by investing primarily in sustainable investments, where the companies' current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS: The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in the United States. The investment manager will focus on companies that it believes have the potential to create positive social or environmental impact through their products or services, and that appear to offer superior growth prospects and investment characteristics. The fund has sustainable investment as an objective that the fund aims to achieve through its commitment to maintain at least 70% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: impact exclusions and positive impact inclusion. The fund seeks to achieve its sustainable investment objective through the investment manager's impact inclusion criteria, investment process alignment with one or more of the UN Sustainable Development Goals (UN SDGs) and the application of its proprietary impact exclusion list which aims to avoid sectors and/or companies whose activities may be considered harmful to the environment and/or society. The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund's objective. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

This marketing communication is for investment professionals only. Not for further distribution.

EXECUTIVE SUMMARY

	Data Availability		Carbon Metrics				
	Total Percentage of Data Available	Percentage of Data Reported	Percentage of Data Estimated	Percentage of Carbon Metrics Pro-rated	Total Carbon Emissions	Carbon Emissions per US \$1 mn Invested	Weighted Average Carbon Intensity
	%	%	%	%	mtCO ₂ e	mtCO₂e / US\$1 mn AuM	mtCO₂e / US\$1 mn Revenue
Scope 1 & 2 Carbon Emi	Scope 1 & 2 Carbon Emissions						
Fund	96.47	77.13	19.34	3.53	49	20.18	81.96
Benchmark	99.31	93.05	6.26	0.69	109	44.67	114.37
Fund vs Benchmark					-54.8%	-54.8%	-28.3%
Scope 1, 2 & 3 Carbon Emissions							
Fund	96.47	58.66	37.81	3.53	180	73.95	268.31
Benchmark	99.31	79.69	19.61	0.69	1,008	413.11	899.86
Fund vs Benchmark					-82.1%	-82.1%	-70.2%

The benchmark carbon metrics are calculated using the total net assets of the Fund invested according to the composition of the benchmark.

An explanation of the terms used in the above table is included in the Glossary.

GLOSSARY OF TERMS

Scope 1 - Direct Carbon Emissions from owned or controlled sources (e.g. fuel combustion, company vehicles, fugitive emissions).

Scope 2 - Indirect Carbon Emissions from the generation of purchased electricity, steam, heating and cooling consumed by the reporting company.

Scope 3 - Includes all other indirect Carbon Emissions that occur in a company's value chain (e.g. purchased goods and services, business travel, employee commuting, waste disposal, use of sold products, transportation and distribution (up- and downstream), Investments, leased assets and franchises).

mtCO2e - Metric tons of carbon dioxide equivalent.

Percentage of Data Reported - The percentage for which Carbon Emissions data is reported by Companies.

Percentage of Data Estimated - The percentage for which Carbon Emissions data is estimated by Sustainalytics.

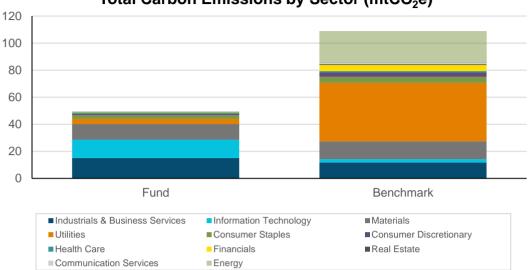

Percentage of Carbon Metrics Pro-rated - The percentage of the Fund and Benchmark which are pro-rated based on the Carbon Metrics of the remainder.

Total Carbon Emissions - Total amount of greenhouse gas (GHG) emissions that are released by the Fund holdings that are attributable to the % ownership of the Fund in each company, aggregated to give the total carbon emissions equivalent for the Fund. This metric is grossed up using the percentage of data available to give the overall carbon footprint of the Fund. Only applicable to equities.

Carbon Emissions per US\$1mn investment in the Fund - This metric enables an investor to calculate the carbon emissions of their investment in the Fund. Only applicable to equities.

Weighted Average Carbon Intensity - The weighted average, by Fund weight, of the total carbon emissions per US\$1mn of revenues for each of the Fund holdings. This metric gives the Fund's exposure to carbon intensive companies and can be applied across equity and fixed income portfolios. This is the Task Force on Climate-Related Financial Disclosures (TCFD) recommended metric.

RISKS - The following risks are materially relevant to the fund (refer to prospectus for further details): Issuer concentration - Issuer concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting those issuers in which the fund's assets are concentrated. Sector concentration - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. Small and mid-cap - Small and mid-size company stock prices can be more volatile than stock prices of larger companies.

General fund risks - to be read in conjunction with the fund specific risks above. Equity - Equities can lose value rapidly for a variety of reasons and can remain at low prices indefinitely. ESG and sustainability - ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the fund. Geographic concentration -Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the fund's assets are concentrated. Investment fund - Investing in funds involves certain risks an investor would not face if investing in markets directly. Management - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. Market - Market risk may subject the fund to experience losses caused by unexpected changes in a wide variety of factors. Operational - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.
