

T. ROWE PRICE FUNDS SICAV

US Impact Equity Fund – Proxy Voting Summary

6 months ending 31 December 2022

PROXY VOTING PROGRAM OVERVIEW

Proxy voting is a crucial link in the chain of stewardship responsibilities we execute on behalf of our clients. Each vote represents both the privileges and the responsibilities that come with owning a company's equity instruments.

We take our responsibility to vote our clients' shares very seriously - taking into account both high-level principles of corporate governance and company-specific circumstances. Our overarching objective is to cast votes to foster long-term, sustainable success for the company and its investors.

T. Rowe Price portfolio managers are ultimately responsible for the voting decisions within the strategies they manage. They receive recommendations and support from a range of internal and external resources:

- The T. Rowe Price ESG Committee
- Our global industry analysts
- Our specialists in corporate governance and responsible investment
- ISS, our external proxy advisory firm

Our proxy voting program serves as one element of our overall relationship with corporate issuers. We use our voting power in a way that complements the other aspects of our relationship with these companies, including engagement, investment diligence, and investment decision-making.

SUMMARY OF MAJOR PROPOSAL ITEMS

The following table breaks down voting records into categories. Some categories, such as the election of directors, are universal across the markets where we invest. Other voting issues are unique to select regions. For management-sponsored proposals, a vote "FOR" is a vote aligned with the board's recommendation. For shareholder-sponsored proposals, a vote "FOR" is generally a vote contrary to the board's recommendation.

INVESTMENT OBJECTIVE

To have a positive impact on the environment and society by investing primarily in sustainable investments, where the companies' current or future business activities are expected to generate a positive impact whilst at the same time seeking to increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS

The fund is actively managed and invests mainly in a diversified portfolio of shares of companies in the United States. The investment manager will focus on companies that it believes have the potential to create positive social or environmental impact through their products or services, and that appear to offer superior growth prospects and investment characteristics. The fund may invest in securities whose underlying economic activities contribute to environmental objectives including, but not limited to, climate change mitigation and/or climate change adaptation, as described in the Taxonomy Regulation. As well as investing in securities that contribute to environmental objectives, the fund may invest in securities that contribute to social or other objectives. No minimum exposure to an objective is imposed upon the fund, which means the fund may at times invest only in securities that contribute to non-environmental objectives. The fund may use derivatives for hedging and efficient portfolio management. Any use of derivatives aims to be consistent with the fund's objective. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark.
