2. Investment in the Fund involves risks, including general investment risk, geographic concentration risk, emerging markets risk and currency risk which may result in loss of a part or the entire amount of your investment.
3. The investment in debt securities is also subject to credit/counterparty risk, interest rate risk, volatility/liquidity risk in emerging markets, downgrading risk, credit rating risk, risk associated with high yield debt securities which are generally rated below investment grade or unrated, sovereign debt risk, risk associated with investments in debt instruments with loss-absorption features and valuation risk.
4. The Fund may use derivatives for hedging, efficient portfolio management and investment purposes or to create synthetic short positions in currencies, debt securities and credit indices and equities, and is subject to derivatives risk. Dividend may be paid directly out of capital and/or effectively out of the capital of the share class by distributing all gross income prior to the deduction of any fees and expenses attributable to the share class. Any such distribution may result in an immediate reduction of net asset value per share. This could also erode capital and constrain future growth.
6. The value of the Fund can be volatile and could go down substantially.
