Investment Strategy and Implementation

Objective

To maximise the value of its shares through both growth in the value of, and income from, its investments over a full market cycle (a minimum of 5 years).

Portfolio securities

The fund is actively managed and invests at least 80% of total assets in a portfolio of high yield (non-investment grade) corporate bonds that have the potential for consistent growth. The high yield corporate bonds will be from issuers around the world, including emerging markets (up to 40% of the total assets of the fund). Debt securities can include fixed and floating rate bonds, warrants and other transferable debt securities of any type. The debt securities are rated by Standard & Poor's or an alternative credit rating agency. Where the securities are unrated, the investment manager will ensure they are of a similar quality in accordance with its in-house rating. The fund may also invest up to 25% in convertible bonds (including up to 15% in contingent convertible bonds). The fund aims to hedge any non-Sterling assets to Sterling. The fund may also invest up to 20% of its assets in other transferable securities (including government bonds, deposits, preferred shares and equity related securities). The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The use of derivatives for investment purposes is expected to be limited. The fund's investment approach is to invest in securities that demonstrate attractive investment attributes and to apply the following screening steps:

Exclusionary screening

The investment manager screens potential investments by excluding companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, biological, chemical and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment and gambling. The fund also excludes companies that do not meet the investment manager's conduct-based criteria, which typically means companies that have been involved in an extreme environmental, social, ethical or governance breach and the investment manager does not believe that they are taking adequate steps to remediate the issue. Further details of the Responsible Exclusion List Policy can be found on

https://www.troweprice.com/content/dam/tpd/Articles/PDFs/Responsible_Exclusion_List_Policy_UK.pdf

Inclusionary screening

By investing at least 10% of the value of its portfolio in sustainable investments. The following three tests must be met for an investment to be considered sustainable:

1. The investment must be in an economic activity that contributes to an environmental or social (sustainable) objective as measured through revenues, use of proceeds, capex or opex;
2. The investment does not cause significant harm to any other environmental or social objective; and
3. The investee company exhibits good governance practices.

Investment process

The investment manager's approach is to:

- Use proprietary fundamental research and relative value analysis.
- Seek out opportunities where they exist in the market, and identify "best ideas" by assessing issuers in a global context.
- Place a strong emphasis on risk management practices and portfolio diversification to manage the overall risk profile.
- First apply a socially responsible screen and then assess environmental, social and governance ("ESG") factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the funds' portfolio. These ESG factors, which are incorporated into the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis. Further information on the ESG investment policies can be found on www.troweprice.com/corporate/en/what-we-do/investing-approach/esg-investment-policy.html.
- Investing at least 10% of the value of its portfolio in sustainable investments.

Key Material Medium to Long-term Risks

The fund is subject to the risk that rising interest rates will cause bond prices to fall. Bond holdings could also lose value if the financial health of issuers deteriorate. The fund primarily invests in high yield bonds which have reduced creditworthiness versus investment grade bonds and the increased risk of credit rating downgrades and issuer defaults. In some cases, debt may be called by its issuer before maturity, or it may be subject to the issuer's debt restructuring by which the fund will become the owner of another debt or a common stock with potentially partial or total loss of the invested capital and generated income. In addition, high yield bonds are usually more sensitive to market conditions and fluctuations. Their market is typically thinner and less active, creating a higher liquidity risk than for higher-rated bonds. This implies they may become hard to value or to sell at a desired price or an optimum time. The fund may invest in Rule 144A securities and other securities with low liquidity.

The fund may have investments in emerging and frontier market countries that are subject to greater risk and overall volatility than investments in the U.S. and developed markets. Emerging market countries tend to have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries. In addition to the risks associated with investing outside of developed markets, emerging markets are more susceptible to governmental interference, political and economic uncertainty, local taxes and restrictions on the fund's investments, less efficient trading markets with lower overall liquidity, and more volatile currency exchange rates.

Portfolio Composition

Use of Proxy Advisors for the Purpose of Engagement Activities

T. Rowe Price does not utilize proxy advisors for the purpose of engagement activities.

Policy on Securities Lending and Application to Engagement Activities

As of 31 December 2023, T. Rowe Price does not utilize securities lending for any SRD II applicable accounts.

Investment Decisions and Conflicts of Interest

Generally speaking, the ownership structure of our company serves to eliminate certain categories of potential conflicts of interest with regard to our stewardship activities. At T. Rowe Price, our overarching approach to dealing with potential conflicts of interest is to resolve them in the manner that solely takes into consideration the interests of our clients. With regards to engagement activities, we believe the most likely source of any potential conflicts between the interests of our firm and the interests of our clients would arise in the context of proxy voting or engagement. Our publicly disclosed Proxy Voting Policies and Engagement Policy offer details about how we manage such potential conflicts of interest. In addition for separately managed accounts, if T. Rowe Price received voting instruction from the account owner which may give rise to conflicts of interests in T. Rowe Price's opinion, this will be reported to the clients for discussion before execution.
