Category Description: Target-Date 2025

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2021-2025) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Volatility And Risk

Best 3 Month Return	Worst 3 Month Return
19.33%	-15.86%
(Apr '09 - Jun '09)	(Jan '20 - Mar '20)

Allocation of Assets

Target-date investment options typically invest in other investments and are designed for investors who plan to retire during the target date year. The investment's target date is the approximate date of when investors expect to begin withdrawing their money. A Target-date investment's objective/strategy typically becomes more conservative over time primarily by reducing its allocation to equity investments and increasing its allocations in fixed-income investments. An investor's principal value in a target-date investment option is not guaranteed at anytime, including at the investment's target date.

The performance data quoted reflects past performance and is calculated according to Morningstar's methodology. For new share classes of an investment, the performance reflected for periods prior to the inception date of such class may have been calculated using the historical returns of the original share class, and in such cases is displayed in italics. The historical returns of the original share class are adjusted to reflect differences in fees when the newer share class has higher fees than the oldest share class but are not adjusted when the newer class has lower fees. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower than the performance data quoted. For the most recent month end performance information, please call 1-800-922-9945, or visit rps.troweprice.com.
