INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS

The fund is classified as Article 8 under SFDR (the EU's Sustainable Finance Disclosure Regulation); it promotes, among other characteristics, environmental and/or social characteristics and the companies in which the investments are made follow good governance practices. The fund is actively managed and invests mainly in a diversified portfolio of shares of large and medium sized "blue chip" companies in the United States. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging and efficient portfolio management. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

Past performance is not a reliable indicator of future performance.
