

## STRATEGY HIGHLIGHTS

As of 31 March 2024

# Floating Rate Bank Loan Strategy

**Total Floating Rate Bank Loan Strategy Assets:**<sup>1</sup> \$9.6 billion

Figures shown in U.S. Dollars

### INVESTMENT APPROACH

- Managing Bank Loan securities since 2002
- Invest primarily in BB- and B-rated loans, with the ability to invest in lower-quality loans and high yield bonds when compelling valuation opportunities arise.
- Proprietary and independent fundamental research is key — disciplined and consistently applied investment process with emphasis on industries that enjoy stable cash flow and rational competitive environments.
- Holistic fundamental research – close collaboration between fixed income and equity research analysts provides a complete capital structure perspective and an information advantage
- Disciplined risk management practices employed in conjunction with broad portfolio diversification to manage risk profile.
- Full integration of Environmental, Social, and Governance (ESG) factors in the investment process to seek to enhance investment decisions.

### PORTFOLIO CONSTRUCTION

- Diversified portfolio structure: typically 200-300 issuers
- At least 80% floating rate bank loans and corporate senior floating rate notes
- Up to 20% in fixed-rate securities including high yield bonds and reserves for liquidity
- 15% industry exposure maximum
  - Industry exposure typically will range +/- 5% around benchmark weight

### BENCHMARK

- Morningstar LSTA Performing Loan Index

### PORTFOLIO MANAGEMENT

#### Paul Massaro, CFA®

- 23 years of investment experience; 20 years with T. Rowe Price.
- M.B.A., University of Pennsylvania, The Wharton School
- B.S., Cornell University

#### Stephen Finamore, CFA®

- 23 years of investment experience; 18 years with T. Rowe Price.
- M.B.A., University of Chicago, Booth School of Business
- B.B.A., University of Notre Dame

### PORTFOLIO SPECIALISTS

#### Michael Lesesne

- 32 years of investment experience; 11 years with T. Rowe Price.
- M.B.A., Columbia Business School
- B.A., Brown University

Portfolio Specialists do not assume management responsibilities.

**PERFORMANCE**

	Three Months	One Year	Annualized			
			Three Years	Five Years	Ten Years	Fifteen Years
Floating Rate Bank Loan Composite (Gross)	2.29%	12.27%	6.28%	5.71%	4.93%	6.72%
Floating Rate Bank Loan Composite (Net)	2.17	11.77	5.80	5.23	4.46	6.25
Morningstar LSTA Performing Loan Index	2.53	12.85	6.19	5.70	4.82	7.33
Value Added (Gross)	-0.24	-0.58	0.09	0.01	0.11	-0.61
Value Added (Net)	-0.36	-1.08	-0.39	-0.47	-0.36	-1.08

**Past performance is not a reliable indicator of future performance.**

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the highest applicable management fee that would be charged based on the fee schedule contained within this material, without the benefit of breakpoints. Gross and net performance returns reflect the reinvestment of dividends and are net of all non-reclaimable withholding taxes on dividends, interest income, and capital gains.

See GIPS® Composite Report located in this material for additional information.

RISK/RETURN CHARACTERISTICS

Five Years ended 31 March 2024

Past performance is not a reliable indicator of future performance. Statistics based on monthly gross returns. Returns would have been lower as the result of the deduction of applicable fees.

**FEE SCHEDULE****Floating Rate Bank Loan Composite**

The Floating Rate Bank Loan Composite seeks high current income and capital appreciation primarily through investment in floating rate bank loans and floating rate debt securities rated below investment grade (BB or below) by S&P, Moody's, or another nationally recognized securities rating organization (NRSRO). (Created September 2008, inception February 29, 2008.)

First \$50 million	45 basis points
Next \$50 million	35 basis points
Above \$100 million	35 basis points on all assets *
Above \$250 million	32.5 basis points on all assets *
Minimum separate account size	\$100 million

\* A transitional credit is applied to the fee schedule as assets approach or fall below the break point.

<sup>1</sup>The fee rate used to calculate net returns is 0.98%. This represents the maximum fee rate applicable to all composite members. **Past performance is not a reliable indicator of future performance.**

<sup>2</sup>Preliminary - subject to adjustment.

T. Rowe Price (TRP) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. TRP has been independently verified for the 27-year period ended June 30, 2023 by KPMG LLP. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm wide basis. Verification does not ensure the accuracy of any specific composite presentation. TRP is a U.S. investment management firm with various investment advisers registered with the U.S. Securities and Exchange Commission, the U.K. Financial Conduct Authority, and other regulatory bodies in various countries and holds itself out as such to potential clients for GIPS purposes. TRP further defines itself under GIPS as a discretionary investment manager providing services primarily to institutional clients with regard to various mandates, which include U.S., international, and global strategies but excluding the services of the Private Asset Management group. As of October 1, 2022, there is no minimum asset level for portfolio inclusion into the composite. Prior to October 2022, the minimum asset level for equity portfolios to be included in composites was \$5 million. The minimum asset level for fixed income and asset allocation portfolios to be included in composites was \$10 million. Valuations are computed and performance reported in U.S. dollars.

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the maximum fee rate applicable to all composite members as shown above. Gross performance returns reflect the reinvestment of dividends and are net of nonreclaimable withholding taxes on dividends, interest income, and capital gains. Effective June 30, 2013, portfolio valuation and assets under management are calculated based on the closing price of the security in its respective market. Previously portfolios holding international securities may have been adjusted for after-market events. Generally 5-10% of the composite's portfolio holdings consist of assets for which market data may not be available that are valued using unobservable inputs developed using the best information available at the time of the valuation. Gross performance returns are used to calculate presented risk measures. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within a composite for the full year. Dispersion is not calculated for the composites in which there are five or fewer portfolios.

Some portfolios may trade futures, options, and other potentially high-risk derivatives that may create leverage and generally represent in aggregate less than 10% of a portfolio.

Benchmarks are taken from published sources and may have different calculation methodologies, pricing times, and foreign exchange sources from the composite.

Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow greater than or equal to 15% of portfolio assets. The temporary removal of such an account occurs at the beginning of the measurement period in which the significant cash flow occurs and the account re-enters the composite on the last day of the current month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request.

The firm's list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

## ADDITIONAL DISCLOSURES

Portfolio Construction: There is no guarantee that the investment will remain within the anticipated ranges of exposure.

Weighted Average Maturity is an average of the maturities of the underlying bonds, with each bond's maturity weighted by the percentage of Composite assets it represents. Weighted Average Effective Duration is a calculation that seeks to measure the price sensitivity of the Composite to changes in interest rates. In general, the longer the average maturity or duration, the greater the Composite's sensitivity to interest rates. Duration is a better indicator of price sensitivity because it takes into account the time value of cash flows.

Unless indicated otherwise the source of all data is T. Rowe Price.

The specific securities identified and described do not represent all of the securities purchased, sold or recommended for the portfolio, and no assumptions should be made that the securities identified and discussed were or will be profitable.

Source for Credit Quality Diversification:

Credit ratings for the securities held in the portfolio are provided by Moody's and Standard & Poor's and are converted to the Standard & Poor's nomenclature. A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. Split ratings (e.g., BB/B and B/CCC) are assigned when Moody's and S&P differ. If a rating is not available, the security is classified as Not Rated (NR). The rating of the underlying investment vehicle is used to determine the creditworthiness of credit default swaps and sovereign securities. The portfolio is not rated by any agency. U.S. Government Agency securities, if any, may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.

## Risks

The following risks are materially relevant to the portfolio.

### General Portfolio Risks

**Counterparty** - Counterparty risk may materialise if an entity with which the portfolio does business becomes unwilling or unable to meet its obligations to the portfolio. **ESG and sustainability** - ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the portfolio. **Geographic concentration** - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the portfolio's assets are concentrated. **Hedging** - Hedging measures involve costs and may work imperfectly, may not be feasible at times, or may fail completely. **Investment portfolio** - Investing in portfolios involves certain risks an investor would not face if investing in markets directly. **Management** - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. **Market** - Market risk may subject the portfolio to experience losses caused by unexpected changes in a wide variety of factors. **Operational** - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.
