

PORTFOLIO UPDATE

# T. Rowe Price Global Growth Equity Pool

As of 28 February 2023

**Portfolio Manager:**

Scott Berg

**Managed Fund Since:**

2015

**Joined Firm:**

2002

## SUMMARY INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital through investments primarily in the common stocks of large-cap companies throughout the world.

## FUND INFORMATION

Inception Date of Fund	20 January 2015
Benchmark	MSCI ACWI Net

## MARKET COMMENTARY

In Canadian dollar terms, global equity markets declined in February as some stronger-than-expected economic data and hawkish messaging from the U.S. Federal Reserve reignited fears that central banks would continue raising interest rates and keep borrowing costs elevated for some time, thus increasing the potential for a recession. U.S. stocks pulled back over the month, surrendering some of their January gains. Stronger-than-expected economic data and persistently high inflation renewed fears that the Federal Reserve would continue to raise interest rates aggressively and for longer than previously hoped. Shares in developed Europe rose on an improving economic outlook and China's economy reopening after the government relaxed policies designed to curb the spread of COVID-19. Investors were also encouraged that a forewarned winter energy crisis in Europe did not materialize to the extent expected. Developed Asian stocks declined. In Japan, speculation about the Bank of Japan's (BoJ's) future monetary policy trajectory continued as it was announced that surprise nominee Kazuo Ueda was set to become the next BoJ governor in April. Emerging market equities fell as broader fears of recession and expectations for continued high interest rates in developed markets triggered a risk-off environment and pressured shares in emerging economies. Emerging Asia was among the worst-performing regions, mainly driven by a sell-off in Chinese equities as rising geopolitical tensions with the U.S. and concerns about the strength of the country's recovery dampened sentiment. Latin American markets were also broadly lower, especially Colombia and Brazil. Emerging Europe held up well despite a massive and tragic earthquake near the border of Turkey and Syria.

Sector performance in the MSCI All Country World Index was mostly negative. Materials, real estate, and utilities were the worst performers, while information technology and industrials and business services were the only sectors to post positive returns.

## PERFORMANCE

(NAV, total return)

	One Month	Three Months	Year-to-Date	One Year	Annualized		
					Three Years	Five Years	Since Inception 20 Jan 2015
T. Rowe Price Global Growth Equity Pool (NAV) <sup>1</sup> (CAD)	-0.77%	0.41%	5.75%	-8.06%	8.01%	8.49%	11.39%
T. Rowe Price Global Growth Equity Pool (NAV, net of management fee) <sup>2</sup> (CAD)	-0.82	0.24	5.64	-8.66	7.31	7.79	10.67
MSCI All Country World Index Net (CAD)	-0.89	0.42	4.60	-1.53	9.32	7.11	8.92

Source for performance: T. Rowe Price. Fund performance is calculated after the deduction of expenses using the official NAV with dividends reinvested, if any. The value of the investment will vary and is not guaranteed. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures. **Past performance is not a reliable indicator of future performance.**

<sup>1</sup> The management fee has not been deducted from the NAV. If the fee had been deducted, performance would be lower.

<sup>2</sup> The maximum management fee of 65 bps has been deducted from the NAV.

Index returns are calculated in US Dollars and converted to CAD using an exchange rate determined by an independent third party.

See the GIPS<sup>®</sup> Composite Report located in this material for additional information.

All investments are subject to risk, including the possible loss of the money you invest. International investments can be riskier than U.S. investments due to the adverse effects of currency exchange rates, differences in market structure and liquidity, as well as specific country, regional, and economic developments. These risks are generally greater for investments in emerging markets. For Sourcing Information, please see Additional Disclosures.

## Definitions

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.

## Additional Disclosures

The specific securities identified and described do not represent all of the securities purchased, sold or recommended for the Fund, and no assumptions should be made that the securities identified and discussed were or will be profitable.

Source for MSCI data: MSCI. MSCI and its affiliates and third party sources and providers (collectively, "MSCI") makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, reviewed, or produced by MSCI. Historical MSCI data and analysis should not be taken as an indication or guarantee of any future performance analysis, forecast or prediction. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Unless otherwise noted, index returns are shown with gross dividends reinvested.

<sup>1</sup>The fee rate used to calculate net returns is 1.11%. This represents the maximum fee rate applicable to all composite members. **Past performance is not a reliable indicator of future performance.**

<sup>2</sup>Effective July 1, 2018, the secondary benchmark changed from gross to net of withholding taxes. The change was to provide additional information on potential tax impacts for the composite. Historical benchmark representations were restated. Effective June 27, 2013, the primary benchmark changed to MSCI All Country World Index and the secondary benchmark changed to MSCI All Country World Large-Cap Index.

<sup>3</sup>Preliminary - subject to adjustment.

T. Rowe Price (TRP) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. TRP has been independently verified for the 25-year period ended June 30, 2021 by KPMG LLP. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm wide basis. Verification does not ensure the accuracy of any specific composite presentation. TRP is a U.S. investment management firm with various investment advisers registered with the U.S. Securities and Exchange Commission, the U.K. Financial Conduct Authority, and other regulatory bodies in various countries and holds itself out as such to potential clients for GIPS purposes. TRP further defines itself under GIPS as a discretionary investment manager providing services primarily to institutional clients with regard to various mandates, which include U.S., international, and global strategies but excluding the services of the Private Asset Management group. The minimum asset level for equity portfolios to be included in composites is \$5 million and prior to January 2002 the minimum was \$1 million. The minimum asset level for fixed income and asset allocation portfolios to be included in composites is \$10 million; prior to October 2004 the minimum was \$5 million; and prior to January 2002 the minimum was \$1 million. Valuations and performance are computed in U.S. dollars and converted to Canadian Dollar. When converting U.S. dollar composite returns, benchmarks, dispersion and asset data, the same exchange rate source is used consistently. Total returns in non-U.S. dollar currencies are calculated by adjusting U.S. dollar performance by the percent change in the U.S. dollar/foreign currency exchange rate (as determined by an independent third party) for the time periods selected.

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the maximum fee rate applicable to all composite members as shown above. Gross and net performance returns reflect the reinvestment of dividends and are net of nonreclaimable withholding taxes on dividends, interest income, and capital gains. Effective June 30, 2013, portfolio valuation and assets under management are calculated based on the closing price of the security in its respective market. Previously portfolios holding international securities may have been adjusted for after-market events. Gross performance returns are used to calculate presented risk measures. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within a composite for the full year. Dispersion is not calculated for the composites in which there are five or fewer portfolios.

Some portfolios may trade futures, options, and other potentially high-risk derivatives that may create leverage and generally represent in aggregate less than 10% of a portfolio.

Benchmarks are taken from published sources and may have different calculation methodologies, pricing times, and foreign exchange sources from the composite.

Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow greater than or equal to 15% of portfolio assets. The temporary removal of such an account occurs at the beginning of the measurement period in which the significant cash flow occurs and the account re-enters the composite on the last day of the current month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request.

The firm's list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

**Global Growth Equity Composite.** The Global Growth Equity Composite seeks long-term capital appreciation by investing primarily in a diversified portfolio of transferable equity and equity-related securities of larger cap companies listed on the world's stock markets. The portfolio may include investments in the securities of companies listed on the stock exchange of developed and developing countries. (Created October 2008; incepted October 31, 2008) (Formerly known as the Global Large-Cap Equity Composite)

### **Fee Schedule**

First 30 million CAD 65 basis points

Next 30 million CAD 60 basis points

Next 60 million CAD 55 basis points

Above 120 million CAD 50 basis points on all assets <sup>1</sup>

Above 230 million CAD 45 basis points on all assets <sup>1</sup>

Minimum Canadian pooled fund account size 5 million CAD.

Total year-end operating expenses are up to 10 basis points.

<sup>1</sup> A transitional credit is applied to the fee schedule as assets approach or fall below the breakpoint.
