INVESTMENT OBJECTIVE

To maximise the value of its shares through both growth in the value of, and income from, its investments.

INVESTMENT PROCESS

The fund is actively managed and invests mainly in a diversified portfolio of corporate bonds that are denominated in euro. The fund may use derivatives for hedging and efficient portfolio management and will be consistent with the fund objectives and Environmental Sustainability characteristics of the fund. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). As a consequence, specific companies whose business activities involve controversial weapons (cluster munitions, anti-personnel mines, incendiary, chemical, biological and nuclear weapons), tobacco production, coal production, assault-style weapons for civilian use, adult entertainment, direct gambling operations and certain conduct-based criteria are excluded. There may be circumstances where a fund has some limited, indirect, exposure to the Environmental, Social and Governance criteria. Examples of these circumstances could include an investment in an instrument that gives exposure to an index, or an investment in a fund managed by an unaffiliated investment manager. Please refer to prospectus for further information on proprietary exclusion list and Sustainability Indicators.

Past performance is not a reliable indicator of future performance.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with distributions reinvested, if any. The value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Performance data will be displayed when a share class has more than 1 year history of returns.

The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

KEY FUND RISKS

Credit - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. **Default** - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. **Derivatives** - derivatives may result in losses that are significantly greater than the cost of the derivative. **Emerging markets** - Emerging markets are less established than developed markets and therefore involve higher risks. **Interest rate** - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. **Liquidity** - Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price. **Sector concentration** - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. **Total return swap** - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.
