INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS

The fund is classified as Article 8 under SFDR (the EU's Sustainable Finance Disclosure Regulation); it promotes, among other characteristics, environmental and/or social characteristics and the companies in which the investments are made follow good governance practices. The fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies in Japan. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging and efficient portfolio management. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

Past performance is not a reliable indicator of future performance.

Performance for additional share classes is shown later in this document.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with dividends reinvested, if any. The value of the investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the subscription currency, if different. Sales charges (up to a maximum of 5% for the A Class), taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Please note that no management fees are charged to the Z, S and J share classes. No administration agent fees are charged to the J Class. No expenses or any other fees are charged to the Z class. Fee arrangements for the Z, S and J share classes are made directly with the investment manager. Please see the prospectus for further information.

Where the base currency of the fund differs from the share class currency, exchange rate movements may affect returns.

Hedged share classes (denoted by 'h', 'b' or 'n') utilize investment techniques to mitigate currency risk between the underlying investment currency(ies) of the fund and the currency of the hedged share class. The costs of doing so will be charged to the share class and there is no guarantee that such hedging will be effective.

Performance data will be displayed when a share class has more than 1 year history of returns.

The manager is not constrained by the fund's benchmark(s), which is (are) used for performance comparison purposes only.

The investment policy of the fund changed as at 1 October 2022, with the addition of a minimum commitment to sustainable investments. The performance prior to this date was achieved without this consideration.

Index returns are shown with net dividends reinvested.

TOPIX index returns are calculated in JPY and converted to EUR using an exchange rate determined by an independent third party.

KEY FUND RISKS

Currency - Currency exchange rate movements could reduce investment gains or increase investment losses. **Liquidity** - Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price. **Small and mid-cap** - Small and mid-size company stock prices can be more volatile than stock prices of larger companies. **Style** - Style risk may impact performance as different investment styles go in and out of favor depending on market conditions and investor sentiment.
