Share Class Currency	GBP
Categories of Shares	Accumulating
Total Fund Assets	£36.2 million
Number of Issues	95
Percent in Cash	13.6%
Ongoing Charges - based on financial year ending 30 Sep 2021	0.47%
Maximum Initial Charge	—
Minimum Investment	£10,000
Morningstar Category™	EAA Fund Global Flexible Bond
Class C Acc 9 - ISIN Code	GB00BYZMYG27
Class C Acc 9 - Bloomberg Code	TRPDCA9 LN

HISTORICAL PERFORMANCE

CUMULATIVE PERFORMANCE

(NAV, total return)	Inception Date	One Month	Three Months	Year-to-Date	One Year	Three Years	Since Inception
Class C Acc 9	5 Jan 2017	0.52%	-0.58%	1.03%	4.06%	9.75%	5.59%
Linked Performance Benchmark		0.01%	0.02%	0.05%	0.06%	1.38%	2.25%

ANNUAL PERFORMANCE

(NAV, total return)	30 Sep 2016 to 30 Sep 2017	30 Sep 2017 to 30 Sep 2018	30 Sep 2018 to 30 Sep 2019	30 Sep 2019 to 30 Sep 2020	30 Sep 2020 to 30 Sep 2021
Class C Acc 9	—	-2.11%	-2.09%	7.72%	4.06%
Linked Performance Benchmark	—	0.63%	0.83%	0.48%	0.06%

Past performance is not a reliable indicator of future performance.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with distributions reinvested, if any. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Benchmark: Investors may use the benchmark to compare the fund's performance. The benchmark has been selected because it is similar to the investment universe used by the investment manager and therefore acts as an appropriate comparator. The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark and has complete freedom to invest in securities that do not form part of the benchmark.

Index returns are shown with gross income reinvested.

Effective 1 August 2021, the fund changed its primary comparator benchmark from the 3-month GBP LIBOR to the 3-month GBP SONIA in anticipation of the transition away from use of LIBOR settings. Historical benchmark representations have not been restated.

Risks - The following risks are materially relevant to the fund (refer to prospectus for further details):

ABS/MBS risk - these securities may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk. **China Interbank Bond Market risk** - market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. **Country risk (China)** - all investments in China are subject to risks similar to those for other emerging markets investments. In addition, investments that are purchased or held in connection with a QFII licence or the Stock Connect program may be subject to additional risks. **Country risk (Russia and Ukraine)** - in these countries, risks associated with custody, counterparties and market volatility are higher than in developed countries. **Credit risk** - a bond or money market security could lose value if the issuer's financial health deteriorates. **Currency risk** - changes in currency exchange rates could reduce investment gains or increase investment losses. **Default risk** - the issuers of certain bonds could become unable to make payments on their bonds. **Derivatives risk** - derivatives may result in losses that are significantly greater than the cost of the derivative. **Emerging markets risk** - emerging markets are less established than developed markets and therefore involve higher risks. **High yield bond risk** - a bond or debt security rated below BBB- by Standard & Poor's or an equivalent rating, also termed 'below investment grade', is generally subject to higher yields but to greater risks too. **Interest rate risk** - when interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. **Issuer concentration risk** - to the extent that a fund invests a large portion of its assets in securities from a relatively small number of issuers, its performance will be more strongly affected by events affecting those issuers. **Liquidity risk** - any security could become hard to value or to sell at a desired time and price. **Prepayment and extension risk** - with mortgage- and asset-backed securities, or any other securities whose market prices typically reflect the assumption that the securities will be paid off before maturity, any unexpected behaviour in interest rates could impact fund performance. **Sector concentration risk** - the performance of a fund that invests a large portion of its assets in a particular economic sector (or, for bond funds, a particular market segment), will be more strongly affected by events affecting that sector or segment of the fixed income market.

TOP 10 ISSUES

Issuer	Maturity	Coupon (%)	% of Fund
Bundesobligation	10 Apr 26	0.000	9.4

Not Rated	0.3
Reserves	13.6

Credit ratings for the securities held in the fund are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature. When a rating is available from all three agencies, the median rating is used. If there are two ratings, the lower rating is used and if only one rating is available, that rating is used. If a rating is not available, the security is classified as Not Rated (NR). The rating of the underlying investment vehicle is used to determine the creditworthiness of credit default swaps and sovereign securities. The fund is not rated by any agency.

IMPORTANT INFORMATION

General fund risks - to be read in conjunction with the fund specific risks above. **Capital risk** - the value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. **Counterparty risk** - an entity with which the fund transacts may not meet its obligations to the fund. **Geographic concentration risk** - to the extent that a fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area. **Hedging risk** - a Fund's attempts to reduce or eliminate certain risks through hedging may not work as intended. **Investment fund risk** - investing in funds involves certain risks an investor would not face if investing in markets directly. **Management risk** - the investment manager or its designees may at times find their obligations to a fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably). **Operational risk** - operational failures could lead to disruptions of fund operations or financial losses.
