Performance for additional share classes is shown later in this document.

Past performance is not a reliable indicator of future performance.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with dividends reinvested, if any. The value of the investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the subscription currency, if different. Sales charges (up to a maximum of 5% for the A Class), taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Please note that no management fees are charged to the Z, S and J share classes. No administration agent fees are charged to the J Class. No expenses or any other fees are charged to the Z class. Fee arrangements for the Z, S and J share classes are made directly with the investment manager. Please see the prospectus for further information.

Where the base currency of the fund differs from the share class currency, exchange rate movements may affect returns.

Hedged share classes (denoted by 'h', 'b' or 'n') utilize investment techniques to mitigate currency risk between the underlying investment currency(ies) of the fund and the currency of the hedged share class. The costs of doing so will be charged to the share class and there is no guarantee that such hedging will be effective.

Performance data will be displayed when a share class has more than 1 year history of returns.

This benchmark is shown for comparison purposes only.

Risks - The following risks are materially relevant to the fund (refer to prospectus for further details):

Credit risk - a bond or money market security could lose value if the issuer's financial health deteriorates. **Default risk** - the issuers of certain bonds could become unable to make payments on their bonds. **Derivatives risk** - derivatives may result in losses that are significantly greater than the cost of the derivative. **Emerging markets risk** - emerging markets are less established than developed markets and therefore involve higher risks. **High yield bond risk** - a bond or debt security rated below BBB- by Standard & Poor's or an equivalent rating, also termed 'below investment grade', is generally subject to higher yields but to greater risks too. **Interest rate risk** - when interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. **Liquidity risk** - any security could become hard to value or to sell at a desired time and price. **Sector concentration risk** - the performance of a fund that invests a large portion of its assets in a particular economic sector (or, for bond funds, a particular market segment), will be more strongly affected by events affecting that sector or segment of the fixed income market.

General fund risks - to be read in conjunction with the fund specific risks above. Capital risk - the value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. **Counterparty risk** - an entity with which the fund transacts may not meet its obligations to the fund. **ESG and Sustainability risk** - may result in a material negative impact on the value of an investment and performance of the fund. **Geographic concentration risk** - to the extent that a fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area. **Hedging risk** - a Fund's attempts to reduce or eliminate certain risks through hedging may not work as intended. **Investment fund risk** - investing in funds involves certain risks an investor would not face if investing in markets directly. **Management risk** - the investment manager or its designees may at times find their obligations to a fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably). **Operational risk** - operational failures could lead to disruptions of fund operations or financial losses.

Effective 2 November 2021, the name of the fund will change from European High Yield Bond Fund to Responsible European High Yield Bond Fund. The fund will then promote environmental and social characteristics through the investment manager's avoidance of sectors or companies, whose activities may be considered harmful to the environment and/or society through the application of its proprietary socially responsible screen (exclusion list). Please see the prospectus for more information.
