INVESTMENT OBJECTIVE

To maximise the value of its shares through both growth in the value of, and income from, its investments.

INVESTMENT PROCESS

The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds from issuers in the United States. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

Past performance is not a reliable indicator of future performance.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with distributions reinvested, if any. The value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Performance data will be displayed when a share class has more than 1 year history of returns.

The manager is not constrained by the fund's benchmark(s), which is (are) used for performance comparison purposes only.

The investment policy of the fund changed as at 1 October 2022, with the addition of a minimum commitment to sustainable investments. The performance prior to this date was achieved without this consideration.

KEY FUND RISKS

Contingent convertible bond - Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others. **Credit** - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. **Default** - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. **Distressed or defaulted debt** - Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation. **High yield bond** - High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions. **Interest rate** - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. **Liquidity** - Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price. **Total return swap** - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.
