The Board of Directors of T. Rowe Price Funds SICAV has discretion to accept subscriptions for lower amounts than specified above.

What is this product?

T. Rowe Price Funds SICAV – Japanese Equity Fund (the “**Sub-Fund**”) is an open-ended investment company incorporated under Luxembourg law and regulated by the Commission de Surveillance du Secteur Financier.

Objective and Investment Policy

Objective

The objective of the Sub-Fund is to increase the value of its shares, over the long term, through growth in the value of its investments.

Investment Policy

The Sub-Fund is actively managed and invests mainly in a widely diversified portfolio of shares of companies in Japan.

Specifically, the Sub-Fund invests at least 70% of its net asset value in equity and equity-related securities of companies that are either incorporated in Japan or conduct most of their business there. Types of securities may include common shares, preferred shares, warrants, American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). The Sub-Fund may invest 30% or more of its net asset value in small and mid-capitalisation shares.

Although the Sub-Fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the Sub-Fund’s commitment to maintain at least 10% of its net asset value invested in Sustainable Investments¹.

The Investment Manager implements the following investment strategies: exclusion screen (i.e. excluding investments set out in the T. Rowe Price Responsible Exclusion List in the prospectus), Sustainable Investment exposure as mentioned above and active ownership². Details of how environmental and social characteristics are promoted are further explained in the Sub-Fund’s RTS annex in the prospectus.

The Sub-Fund may use derivatives for hedging and efficient portfolio management.

The Investment Manager’s approach is to:

- consider macroeconomic factors in the implementation of a primarily bottom-up and research driven process;
- seek growth opportunities across the market capitalisation and market sector spectrums; manage risk at stock, sector and market cap-range levels; and
- use portfolio rebalancing as an effective risk management tool.

The Sub-Fund is actively managed but may use TOPIX Index Net for performance comparison. The Investment Manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark index and has complete freedom to invest in securities that do not form

part of the benchmark. However, at times, market conditions may result in the Sub-Fund's performance being more closely aligned with that of the benchmark index.

For temporary defensive purposes, the Sub-Fund has the flexibility to invest in money market securities up to 100% of its net asset value.

¹ As defined in the Sustainable Finance Disclosure Regulation, sustainable investments mean an investment in an economic activity that contributes to an environmental objective, as measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy, or an investment in an economic activity that contributes to a social objective, in particular an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

² Active ownership refers to the Investment Manager's engagement with the issuers of the securities in which it invests such as regular dialogue with issuers and active proxy voting.

Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's net asset value.

What are the key risks?

Investment involves risks. The following sets out the key risks. Please refer to the offering document for details of other applicable risk factors.

General investment risk

The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.

Equity market risk

In general, equities involve higher risks than bonds or money market instruments. Equities investment is subject to market risks, whose value may fluctuate due to factors such as changes in investment sentiment, political and economic news, issuer-specific factors, government policy and market changes. Equities can lose value rapidly and remain at low prices indefinitely. Equities of rapidly growing companies can be highly sensitive to adverse news, because much of their value is based on high expectations for the future. Equities of companies that appear to be priced below their intrinsic value may continue to be undervalued. If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value.

Risks associated with depositary receipts

Investment into a given country may be made via direct investments into that market or by depositary receipts traded on other international exchanges. Investments in depositary receipts may be subject to counterparty risk, in which a significant or even total loss might be suffered in the event of the liquidation of the depositary or custodian bank issuing the depositary receipts.

Investments in depositary receipts may also be subject to liquidity risks as depositary receipts are often less liquid than the corresponding underlying securities. Further, holders of depositary receipts are not direct shareholders of the underlying company and generally do not have voting and other shareholder rights.

Geographic concentration risk

As the Sub-Fund invests a large portion of its assets in Japan, its performance will be more strongly affected by any adverse social, political, government policy, foreign exchange, liquidity, tax, legal,

regulatory, economic, environmental or market conditions within that area. This can mean higher volatility and risk of loss as compared to a fund that invests more broadly.

Small and mid-capitalisation shares risk

Shares of small and mid-capitalisation companies can be less liquid and more volatile to adverse economic developments than shares of larger companies in general. Small and mid-capitalisation companies often have less financial resources, shorter operating histories and less diverse business lines which as a result can be at greater risk of long-term or permanent business setbacks. Initial public offerings of small and mid-capitalisation companies can be highly volatile and can be hard to evaluate because of a lack of trading history and relative lack of public information.

Exclusion criteria risk

The use of exclusions may affect the Sub-Fund's investment performance and, as such, the Sub-Fund may perform differently compared to similar funds that do not use such exclusions. The exclusion criteria used in the Sub-Fund's investment strategy may result in the Sub-Fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities when it might be disadvantageous to do so. As such, the application of the exclusion criteria may restrict the ability of the Sub-Fund to acquire or dispose of investments at a price and time that it wishes to do so, and may therefore result in a loss to the Sub-Fund. In addition, the Sub-Fund may be subject to increased operational risk linked to the implementation and maintenance of the relevant exclusion criteria.

Currency risk

The Sub-Fund may invest in securities denominated in currencies other than the base currency of the Sub-Fund. Also, a share class may be designated in a currency other than the base currency of the Sub-Fund. Therefore, changes in currency exchange rates between these currencies and the base currency or exchange rate controls could reduce investment gains or increase investment losses and affect the net asset value of the Sub-Fund unfavourably.

Hedging risk

To the extent that the Sub-Fund takes measures that are designed to offset specific risks (such as seeking to eliminate currency risks in a share class that is denominated in a different currency than the Sub-Fund's base currency), these measures may work imperfectly, may not be feasible at times, or may fail completely. Hedging involves costs, which reduce investment performance. To the extent that a hedge is successful, it generally eliminates opportunities for gain as well as risks of loss.

Derivatives risk

Risk associated with derivatives include credit/counterparty risk, liquidity risk, valuation risk, volatility risk and exchange-traded and over-the-counter transaction risk. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the Sub-Fund. Exposure to derivatives may lead to a risk of significant loss by the Sub-Fund.

How has the Sub-Fund performed?

*** Note: The performance of years 2014-2022 was achieved under circumstances that no longer apply, as the investment policy has changed since 1 October 2022.**

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend re-invested.
- These figures show by how much Class A increased or decreased in value during the calendar year being shown. Performance data has been calculated in EUR including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- The Investment Manager views Class A being the most appropriate representative share class as this share class has the lowest minimum investment amount, a long track record, is available for investment by Hong Kong retail investors and broadly indicative of the Sub-Fund's performance characteristics.
- The benchmark used for performance comparison is TOPIX Index Net.
- Sub-Fund launch date: 12/2005
- Class A launch date: 04/2006

Is there any guarantee?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund.

Fee	What you pay
Subscription fee (Entry Charge)	Class A / Class A (USD) / Class Ah (USD) / Class A (JPY): Up to 5% of the subscription amount
Switching fee	Class A / Class A (USD) / Class Ah (USD) / Class A (JPY): Nil
Redemption fee	Class A / Class A (USD) / Class Ah (USD) / Class A (JPY): Nil

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the net asset value of the relevant share class unless otherwise indicated)
Management fee (Management Co. fee)	Class A / Class A (USD) / Class Ah (USD) / Class A (JPY): up to 1.60%
Custodian fee (Custodial fee) ^{#2}	Class A / Class A (USD) / Class Ah (USD) / Class A (JPY): up to 0.017%, subject to a minimum of 0.0005%
Performance fee	N/A
Administration fee (Administration agent fee) ^{#2}	Class A / Class A (USD) / Class Ah (USD) / Class A (JPY): up to 0.01%, subject to a minimum of 0.003% or USD 27,000 per sub-fund whichever is higher

^{#2} The total operating and administrative expenses will be subject to a limit of 0.17% of the respective net asset value of Class A, Class A (USD), Class Ah (USD) and Class A (JPY). Should the actual total operating and administrative costs attributable to the respective share classes exceed the expense limit, the Management Company will bear the excess. If the actual total operating and administrative costs attributable to the respective share classes fall below the limit, only the actual amount incurred will be deducted from the assets of the respective share classes.

Other fees

You may have to pay other fees when dealing in the shares of the Sub-Fund.

Additional Information

- You generally buy, switch or redeem shares at the Sub-Fund's next determined net asset value after your request is received by the Hong Kong Representative in good order on or before 5pm (Hong Kong time) on a dealing day of the Sub-Fund. Please note that if you submit your application through an authorised distributor of the Sub-Fund, such distributor may apply an earlier deadline.
- There may be share classes with various characteristics and investor eligibility requirements within the Sub-Fund. Each class represents a proportional share of the underlying portfolio of the Sub-Fund. Each share class is identified by a basic share class designation (e.g. A). Where appropriate, one or more suffixes may be added to indicate certain characteristics.
- The net asset value of the Sub-Fund is calculated and the price of shares is published each business day in the South China Morning Post and the Hong Kong Economic Times.

- Investors may obtain the past performance information of other share class(es) offered to Hong Kong investors from the Hong Kong Representative upon request.
