paid from capital can result in capital erosion and constrain capital growth.							
 The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds from issuers around the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The investment manager implements the following investment strategies: exclusion screen, sustainable investment exposure and active ownership. The fund invests primarily in debt securities that are rated below BBB- by Standard & Poor's or have an equivalent rating (or, if unrated, are of

 equivalent quality) and are issued by companies. In accordance with its own internal rating system, the investment manager will ensure that the unrated corporate debt securities in which the fund invests are of the same quality as the rated securities of the same type. Portfolio debt securities can include fixed and floating rate bonds, preferred shares, warrants and other transferable debt securities of any type (including up to 10% in distressed and/or defaulted bonds). The fund may also invest up to 25% in convertible bonds (including up to 15% in contingent convertible bonds). In seeking to achieve the fund's objective the fund may also invest, on an ancillary basis, in other eligible securities. This may include, up to a limit of 10%, equity, equity related securities (including convertible preferred and common stock)). The fund may use derivatives for hedging, EPM and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. The investment manager's approach is based on proprietary fundamental research and relative value analysis. The investment manager seeks to add value primarily through security selection and sector allocation. The investment manager also assesses ESG factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund's portfolio. Benchmark (set out in the Singapore Prospectus) use: performance comparison. reference portfolio for risk management method (relative VaR). The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark index and has complete freedom to invest in securities that do not form part of the benchmark.
