KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends may rise or fall. These risk factors may cause you to lose some or all of your investment. Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to equity risk. Equities involve higher risks than bonds or money market instruments. Equities can lose value rapidly and can remain at low prices indefinitely. Equities of rapidly growing companies can be highly sensitive to bad news, because much of their value is based on high expectations for the future. Equities of companies that appear to be priced below their true value may continue to be undervalued. If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value. • You are exposed to geographic concentration risk. To the extent that the fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by any social, political, economic, environmental or market conditions within that area. This can mean higher volatility and risk of loss as compared to a fund that invests more broadly. • You are exposed to issuer concentration risk. To the extent that a fund invests a large portion of its assets in securities from a relatively small number of issuers, its performance will be more strongly affected by any business, industry, economic, financial or market conditions affecting those issuers. This can mean higher volatility and risk of loss as
