

## **ANNUAL REPORT**

October 31, 2023

| PIEQX | T. ROWE PRICE International Equity Index Fund  |
|-------|--|
| TLIEX | International Equity Index<br>Fund-Z Class   |
|       | For more insights from T. Rowe Price investment professionals, go to <b>troweprice.com</b> . |

#### HIGHLIGHTS

- The fund produced a positive return and tracked its benchmark, the MSCI EAFE Index Net, in the 12 months ended October 31, 2023.
- The fund is designed to mirror its benchmark, which is a yardstick of performance in developed non-U.S. stock markets. Active management decisions do not play a role in our allocations.
- At the end of October, Europe represented 63% of net assets, Japan accounted for 22%, and most of the remainder was invested elsewhere in the Pacific Rim.
- Various crosscurrents in international stock markets continue to make it difficult to determine what may be driving stocks at any given moment. In any event, our task is not to select stocks, sectors, or countries that we think will outperform.

## Go Paperless

Going paperless offers a host of benefits, which include:

- Timely delivery of important documents
- Convenient access to your documents anytime, anywhere
- Strong security protocols to safeguard sensitive data

Waive your account service fee by going paperless.\*

#### To Enroll:

(2) If you invest directly with T. Rowe Price, go to **troweprice.com/paperless**.

If you invest through a financial intermediary such as an investment advisor, a bank, or a brokerage firm, please contact that organization and ask if it can provide electronic documentation.

Log in to your account at **troweprice.com** for more information.

\*An account service fee will be charged annually for each T. Rowe Price mutual fund account unless you meet criteria for a fee waiver. Go to troweprice.com/personal-investing/help/fees-and-minimums.html to learn more about this account service fee, including other ways to waive it.

Market Commentary

## Dear Shareholder

Most major global stock and bond indexes produced positive results during your fund's fiscal year, the 12-month period ended October 31, 2023, although a downturn over the past six months offset some of the strong gains recorded in the first half of the period. Global economies managed to avoid the recession that was widely predicted at the start of 2023, but signs that central banks might need to keep interest rates higher for longer than previously expected weighed on market sentiment.

Growth stocks outperformed value shares over the 12-month period, and stocks in developed markets generally outpaced their counterparts in emerging markets. Currency movements were mixed over the period, although a weaker dollar versus major European currencies was beneficial for U.S. investors in European securities.

Technology companies benefited from investor enthusiasm for artificial intelligence developments and produced some of the strongest results in the equity market. Within the S&P 500 Index, the communication services and information technology sectors were lifted by the rally in tech-related companies and recorded significant gains. The financials sector partly recovered from the failure of three large regional banks during the period but still finished in negative territory.

Corporate fundamentals were broadly supportive. Although year-over-year earnings growth contracted in the first and second quarters of 2023, results were better than expected, and preliminary estimates pointed to a resumption of growth in the third quarter.

The U.S. economy was the strongest among the major markets during the period, with gross domestic product growth coming in at 4.9% in the third quarter's initial estimate, the highest since the end of 2021. Growth in Europe and Japan was more sluggish, and China's economy was beset by worries about its property sector after an initial boost from its decision at the end of 2022 to lift most of its pandemic-related restrictions. A protracted debt ceiling standoff in the U.S., the ongoing conflict between Ukraine and Russia, and the outbreak of war in the Middle East following the attack on Israel by Hamas produced headwinds for markets at various times.

Investors also remained focused on inflation as price increases moderated but remained well above the Federal Reserve's 2% target. In response, the Fed continued to raise its short-term lending benchmark rate, lifting it to a target range of 5.25% to 5.50% by the end of July, the highest level since March 2001.

U.S. Treasury yields increased as the Fed tightened monetary policy and investors priced in the possibility that the central bank may have to keep rates higher for longer than previously anticipated. In addition, Treasuries were pressured by Fitch Ratings' decision to downgrade the credit rating of U.S. government debt from the highest level, AAA, to AA+ along with expectations for higher levels of borrowing by the Treasury Department. The yield on the benchmark 10-year Treasury note briefly reached 5.00% in October for the first time since late 2007 before falling back to 4.88% by period-end.

Increasing yields over the past six months led to weak results across most of the fixed income market, although high yield bonds, which are less sensitive to rising rates, held up relatively well as default rates remained low by historical standards.

Global economies and markets showed surprising resilience in 2023, but considerable uncertainty remains as we look ahead to 2024. Geopolitical events, the path of monetary policy, and the impact of the Fed's rate hikes on the economy all raise the potential for additional volatility. We believe this environment makes skilled active management a critical tool for identifying risks and opportunities, and our investment teams will continue to use fundamental research to identify securities that have the potential to add value to your portfolio over the long term.

Thank you for your continued confidence in T. Rowe Price.

Sincerely,

Robert Sharps
CEO and President

Solut Su Jumpa

Management's Discussion of Fund Performance

#### **INVESTMENT OBJECTIVE**

The fund seeks to provide long-term capital growth.

#### **FUND COMMENTARY**

## How did the fund perform in the past 12 months?

The International Equity Index Fund returned 15.12% for the 12 months ended October 31, 2023, versus 14.40% for its benchmark, the MSCI EAFE Index Net. The fund usually lags the benchmark slightly due to operating and management expenses. (The performance of Z Class shares will vary due to a different fee structure. *Past performance cannot guarantee future results.*)

| PERFORMANCE COMPARI                          | SON               |                     |
|--|-------------------|---------------------|
| Periods Ended 10/31/23                       | Total<br>6 Months | Return<br>12 Months |

# What factors influenced the fund's performance?

The fund seeks to mirror the structure and performance of the benchmark and give investors exposure to the major international markets in the developed world. We make no individual stock selection decisions based on bottom-up fundamental research.

Differences in the fund's results relative to the benchmark primarily reflect "fair value" pricing and, as noted earlier, operating and management expenses, which are not incurred by the benchmark. As described in the fund's prospectus, because there are timing differences between when the fund prices its securities and when certain foreign markets close, the fund adjusts the prices of its portfolio securities to reflect market events that may affect prices after the close of foreign markets. The fund values its securities in this way to protect shareholders and deter market timing by speculators. Since the index does not need to apply fair valuation, this technicality contributes to the performance disparity between the fund and the index.

At the sector level, all sectors advanced. Financials, consumer discretionary, information technology, and energy stocks posted the best returns in absolute terms. Real estate, health care, communication services, and consumer staples names all strongly underperformed the broader index but produced positive returns for the year.

|                                      | Percent of | Net Assets |
|--------------------------------------|------------|------------|
|                                      | 4/30/23    | 10/31/23   |

| Energy                               | 4.5        | 4.8        |
| Communication Services               | 4.3        | 4.1        |
| Utilities                            | 3.4        | 3.4        |
| Real Estate                          | 2.3        | 2.2        |
| Other and Reserves                   | 3.2        | 2.6        |
| Total                                | 100.0%     | 100.0%     |

classifications.

Geographically, returns were mostly positive in U.S. dollar terms. Markets in Denmark, Italy, and Spain were among the top performers in absolute terms, while shares in Israel and Finland were among the worst performers and produced losses.

## How is the fund positioned?

The MSCI index's largest regional weightings at the end of October were Europe, Japan, and the Pacific Rim excluding Japan. We construct the fund by sorting the market in each country in the index by industry groups and targeting a representative sampling of the stocks in each industry for inclusion. The fund attempts to

replicate the index's performance by investing in stocks in proportion to their allocation in the index.

At the end of October, Europe represented 63% of net assets, Japan accounted for 22%, and the rest of the Pacific Rim composed 11%. The UK, France, and Switzerland were the fund's largest country allocations in Europe, while Australia, Hong Kong, and Singapore occupied the top positions in the Pacific ex Japan region.

Most changes to the portfolio's sector weights since our previous letter were relatively minor. Financials, industrials and business services, health care, and consumer discretionary were the fund's largest sector allocations at the end of October and accounted for more than half of its assets.

The fund remained broadly diversified, consistent with the MSCI index. The fund's 25 largest holdings represented slightly more than 26% of total net assets at the end of the reporting period. As shown in the Twenty-Five Largest Holdings table on page 8, global health care company Novo Nordisk (Denmark), food company Nestle (Switzerland), semiconductor company

ASML Holding (Netherlands), energy company Shell (United Kingdom), and luxury goods company LVMH Moet Hennessy Louis Vuitton (France) were the fund's largest individual positions. (Please refer to the portfolio of investments for a complete list of holdings and the amount each represents in the portfolio.)

## What is portfolio management's outlook?

Various crosscurrents in international stock markets continue to make it difficult to determine what may be driving stocks at any given moment. On the one hand, we see sticky inflation (especially in the UK and Europe) that will likely push up interest rates, elevated earnings estimates despite declining backlogs, rising wages, and deteriorating excess savings. Second-quarter earnings reports revealed that some companies have been able to cope with inflation by passing higher costs onto their customers. We think that this development is temporary, however, and that earnings in the coming quarters may disappoint. On the other hand, labor markets remain robust with the number of job openings still surpassing jobless workers. Higherfor-longer interest rates increase the risk of something breaking in financial markets. Moreover, the impact from pandemic-era stimulus is subsiding just as governments have begun to worry about fiscal deficits against a backdrop of rising rates and middling growth.

These risks reinforce our view that we are in the late innings of the current cycle—even if the optimism surrounding the artificial intelligence boom has bought us a few extra outs. In the coming quarters, we see more reasons for markets to decline than to advance given corporate fundamentals, valuations, and an uncertain macro environment.

In any event, our task is not to select stocks, sectors, or countries that we think will outperform. Our objective is to pursue long-term capital growth and provide investors with broad exposure to non-U.S. equities by mirroring the broad structure and the performance of the MSCI benchmark.

The views expressed reflect the opinions of T. Rowe Price as of the date of this report and are subject to change based on changes in market, economic, or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## **RISKS OF STOCK INVESTING**

Stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. The value of stocks held by the fund may decline due to general weakness or volatility in the stock markets in which the fund invests or because of factors that affect a particular company or industry.

## RISKS OF INTERNATIONAL INVESTING

Funds that invest overseas generally carry more risk than funds that invest strictly in U.S. assets. Funds investing in a single country or limited geographic region tend to be riskier than more diversified funds. Risks can result from varying stages of economic and political development; differing regulatory environments, trading days, and accounting standards; and higher transaction costs of non-U.S. markets. Non-U.S. investments are also subject to currency risk, or a decline in the value of a foreign currency versus the U.S. dollar, which reduces the dollar value of securities denominated in that currency.

### **RISKS OF INDEX INVESTING**

Because the fund is passively managed and seeks to match the performance of its benchmark index, holdings are generally not reallocated based on changes in market conditions or outlook for a specific security, industry, or market sector. As a result, the fund's performance may lag the performance of actively managed funds.

| Total                                     | 26.2%                                |

Note: The information shown does not reflect any exchange-traded funds (ETFs), cash reserves, or collateral for securities lending that may be held in the portfolio.

## **GROWTH OF \$10,000**

This chart shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with benchmarks, which include a broad-based market index and may also include a peer group average or index. Market indexes do not include expenses, which are deducted from fund returns as well as mutual fund averages and indexes.

## INTERNATIONAL EQUITY INDEX FUND

|   | As of 10/31/23 |
|---|----------------|
| —— International Equity Index Fund        | \$13,558       |
| MSCI EAFE Index Net                       | 13,511         |
| FTSE Developed ex North America Index Net | 13,526         |

Note: Performance for the Z Class shares will vary due to their differing fee structure. See the Average Annual Compound Total Return table.

## AVERAGE ANNUAL COMPOUND TOTAL RETURN

| Periods Ended 10/31/23                      | 1 Year | 5 Years | 10 Years | Since<br>Inception | Inception<br>Date |
|---|--------|---------|----------|--------------------|-------------------|
| International Equity Index<br>Fund          | 15.12% | 4.29%   | 3.09%    | -                  | _                 |
| International Equity Index<br>Fund- Z Class | 15.46  | _       | _        | 5.57%              | 11/2/20           |

This table shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. Past performance cannot guarantee future results.

#### **EXPENSE RATIO**

| International Equity Index Fund         | 0.30% |
|---|-------|
| International Equity Index Fund-Z Class | 0.15  |

The expense ratio shown is as of the fund's most recent prospectus. This number may vary from the expense ratio shown elsewhere in this report because it is based on a different time period and, if applicable, includes acquired fund fees and expenses but does not include fee or expense waivers.

#### **FUND EXPENSE EXAMPLE**

As a mutual fund shareholder, you may incur two types of costs: (1) transaction costs, such as redemption fees or sales loads, and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other fund expenses. The following example is intended to help you understand your ongoing costs (in dollars) of investing in the fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the most recent six-month period and held for the entire period.

Please note that the fund has two share classes: The original share class (Investor Class) charges no distribution and service (12b-1) fee, and the and Z Class shares are offered only to funds advised by T. Rowe Price and other advisory clients of T. Rowe Price or its affiliates that are subject to a contractual fee for investment management services and impose no 12b-1 fee or administrative fee payment.

#### **Actual Expenses**

The first line of the following table (Actual) provides information about actual account values and actual expenses. You may use the information on this line, together with your account balance, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number on the first line under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### **Hypothetical Example for Comparison Purposes**

The information on the second line of the table (Hypothetical) is based on hypothetical account values and expenses derived from the fund's actual expense ratio and an assumed 5% per year rate of return before expenses (not the fund's actual return). You may compare the ongoing costs of investing in the fund with other funds by contrasting this 5% hypothetical example and the 5% hypothetical examples that appear in the shareholder reports of the other funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

## **FUND EXPENSE EXAMPLE (CONTINUED)**

**Note:** T. Rowe Price charges an account service fee that is not included in the accompanying table. The account service fee is charged on a quarterly basis, usually during the last week of a calendar quarter, and applies to accounts with balances below \$10,000 on the day of the assessment. The fee is charged to accounts that fall below \$10,000 for any reason, including market fluctuations, redemptions, or exchanges. When an account with less than \$10,000 is closed either through redemption or exchange, the fee is charged and deducted from the proceeds. The fee applies to IRAs but not to retirement plans directly registered with T. Rowe Price Services or accounts maintained by intermediaries through NSCC® Networking. If you are subject to the fee, keep it in mind when you are estimating the ongoing expenses of investing in the fund and when comparing the expenses of this fund with other funds.

You should also be aware that the expenses shown in the table highlight only your ongoing costs and do not reflect any transaction costs, such as redemption fees or sales loads. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. To the extent a fund charges transaction costs, however, the total cost of owning that fund is higher.

## INTERNATIONAL EQUITY INDEX FUND

|  | Beginning<br>Account Value<br>5/1/23 | Ending<br>Account Value<br>10/31/23 | Expenses Paid<br>During Period*<br>5/1/23 to 10/31/23 |

| Actual   | 1,000.00                             | 926.40                              | 0.00  |
| Hypothetical (assumes 5% return before expenses) | 1,000.00                             | 1,025.21                            | 0.00  |

<sup>\*</sup> Expenses are equal to the fund's annualized expense ratio for the 6-month period, multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184), and divided by the days in the year (365) to reflect the half-year period. The annualized expense ratio of the Investor Class was 0.28%, and the Z Class was 0.00%.

#### QUARTER-END RETURNS

| Periods Ended 9/30/23                       | 1 Year | 5 Years | 10 Years | Since<br>Inception | Inception<br>Date |
|---|--------|---------|----------|--------------------|-------------------|
| International Equity Index<br>Fund          | 25.83% | 3.11%   | 3.73%    | -                  | -                 |
| International Equity Index<br>Fund- Z Class | 26.09  | -       | -        | 6.86%              | 11/2/20           |

The fund's performance information represents only past performance and is not necessarily an indication of future results. Current performance may be lower or higher than the performance data cited. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. For the most recent month-end performance, please visit our website (troweprice.com) or contact a T. Rowe Price representative at 1-800-225-5132 or, for Z Class shares, 1-800-638-8790.

This table provides returns through the most recent calendar quarter-end rather than through the end of the fund's fiscal period. It shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. When assessing performance, investors should consider both short- and long-term returns.

#### **AFFILIATED COMPANIES**

(\$000s)

The fund may invest in certain securities that are considered affiliated companies. As defined by the 1940 Act, an affiliated company is one in which the fund owns 5% or more of the outstanding voting securities, or a company that is under common ownership or control. The following securities were considered affiliated companies for all or some portion of the year ended October 31, 2023. Net realized gain (loss), investment income, change in net unrealized gain/loss, and purchase and sales cost reflect all activity for the period then ended.

|   | Change in Net |              |    |            |

The accompanying notes are an integral part of these financial statements.

## NOTES TO FINANCIAL STATEMENTS

T. Rowe Price International Index Fund, Inc. (the corporation) is registered under the Investment Company Act of 1940 (the 1940 Act). The International Equity Index Fund (the fund) is an open-end management investment company established by the corporation and intends to be diversified in approximately the same proportion as the index it tracks is diversified. The fund may become nondiversified for periods of time solely as a result of changes in the composition of the index (for example, changes in the relative market capitalization or index weighting of one or more securities represented in the index). The fund seeks to provide long-term capital growth. The fund has two classes of shares: the International Equity Index Fund (Investor Class) and the International Equity Index Fund–Z Class (Z Class). The Z Class is only available to funds advised by T. Rowe Price Associates, Inc. and its affiliates and other clients that are subject to a contractual fee for investment management services. Each class has exclusive voting rights on matters related solely to that class; separate voting rights on matters that relate to both classes; and, in all other respects, the same rights and obligations as the other class.

### **NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES**

Basis of Preparation The fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946 (ASC 946). The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), including, but not limited to, ASC 946. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity.

Investment Transactions, Investment Income, and Distributions Investment transactions are accounted for on the trade date basis. Income and expenses are recorded on the accrual basis. Realized gains and losses are reported on the identified cost basis. Premiums and discounts on debt securities are amortized for financial reporting purposes. Income tax-related interest and penalties, if incurred, are recorded as income tax expense. Dividends received from other investment companies are reflected as dividend income; capital gain distributions are reflected as realized gain/ loss. Dividend income and capital gain distributions are recorded on the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the asset

received. Proceeds from litigation payments, if any, are included in either net realized gain (loss) or change in net unrealized gain/loss from securities. Distributions to shareholders are recorded on the ex-dividend date. Income distributions, if any, are declared and paid by each class annually. A capital gain distribution, if any, may also be declared and paid by the fund annually.

Currency Translation Assets, including investments, and liabilities denominated in foreign currencies are translated into U.S. dollar values each day at the prevailing exchange rate, using the mean of the bid and asked prices of such currencies against U.S. dollars as provided by an outside pricing service. Purchases and sales of securities, income, and expenses are translated into U.S. dollars at the prevailing exchange rate on the respective date of such transaction. The effect of changes in foreign currency exchange rates on realized and unrealized security gains and losses is not bifurcated from the portion attributable to changes in market prices.

Class Accounting Shareholder servicing, prospectus, and shareholder report expenses incurred by each class are charged directly to the class to which they relate. Expenses common to all classes, investment income, and realized and unrealized gains and losses are allocated to the classes based upon the relative daily net assets of each class.

Capital Transactions Each investor's interest in the net assets of the fund is represented by fund shares. The fund's net asset value (NAV) per share is computed at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. However, the NAV per share may be calculated at a time other than the normal close of the NYSE if trading on the NYSE is restricted, if the NYSE closes earlier, or as may be permitted by the SEC. Purchases and redemptions of fund shares are transacted at the next-computed NAV per share, after receipt of the transaction order by T. Rowe Price Associates, Inc., or its agents.

New Accounting Guidance In June 2022, the FASB issued Accounting Standards Update (ASU), ASU 2022-03, Fair Value Measurement (Topic 820) – Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions, which clarifies that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. The amendments under this ASU are effective for fiscal years beginning after December 15, 2023; however, the fund opted to early adopt, as permitted, effective December 1, 2022. Adoption of the guidance did not have a material impact on the fund's financial statements.

**Indemnification** In the normal course of business, the fund may provide indemnification in connection with its officers and directors, service providers, and/or private company investments. The fund's maximum exposure under these arrangements is unknown; however, the risk of material loss is currently considered to be remote.

### **NOTE 2 - VALUATION**

Fair Value The fund's financial instruments are valued at the close of the NYSE and are reported at fair value, which GAAP defines as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fund's Board of Directors (the Board) has designated T. Rowe Price Associates, Inc. as the fund's valuation designee (Valuation Designee). Subject to oversight by the Board, the Valuation Designee performs the following functions in performing fair value determinations: assesses and manages valuation risks; establishes and applies fair value methodologies; tests fair value methodologies; and evaluates pricing vendors and pricing agents. The duties and responsibilities of the Valuation Designee are performed by its Valuation Committee. The Valuation Designee provides periodic reporting to the Board on valuation matters.

Various valuation techniques and inputs are used to determine the fair value of financial instruments. GAAP establishes the following fair value hierarchy that categorizes the inputs used to measure fair value:

- Level 1 quoted prices (unadjusted) in active markets for identical financial instruments that the fund can access at the reporting date
- Level 2 inputs other than Level 1 quoted prices that are observable, either directly or indirectly (including, but not limited to, quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in inactive markets, interest rates and yield curves, implied volatilities, and credit spreads)
- Level 3 unobservable inputs (including the Valuation Designee's assumptions in determining fair value)

Observable inputs are developed using market data, such as publicly available information about actual events or transactions, and reflect the assumptions that market participants would use to price the financial instrument. Unobservable inputs are those for which market data are not available and are developed using the best information available about the assumptions that market participants would use to price the financial instrument. GAAP requires valuation techniques to maximize the use of relevant

observable inputs and minimize the use of unobservable inputs. When multiple inputs are used to derive fair value, the financial instrument is assigned to the level within the fair value hierarchy based on the lowest-level input that is significant to the fair value of the financial instrument. Input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level but rather the degree of judgment used in determining those values.

Valuation Techniques Equity securities, including exchange-traded funds, listed or regularly traded on a securities exchange or in the over-the-counter (OTC) market are valued at the last quoted sale price or, for certain markets, the official closing price at the time the valuations are made. OTC Bulletin Board securities are valued at the mean of the closing bid and asked prices. A security that is listed or traded on more than one exchange is valued at the quotation on the exchange determined to be the primary market for such security. Listed securities not traded on a particular day are valued at the mean of the closing bid and asked prices for domestic securities and the last quoted sale or closing price for international securities.

The last quoted prices of non-U.S. equity securities may be adjusted to reflect the fair value of such securities at the close of the NYSE, if the Valuation Designee determines that developments between the close of a foreign market and the close of the NYSE will affect the value of some or all of the fund's portfolio securities. Each business day, the Valuation Designee uses information from outside pricing services to evaluate the quoted prices of portfolio securities and, if appropriate, decide whether it is necessary to adjust quoted prices to reflect fair value by reviewing a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. The Valuation Designee uses outside pricing services to provide it with quoted prices and information to evaluate or adjust those prices. The Valuation Designee cannot predict how often it will use quoted prices and how often it will determine it necessary to adjust those prices to reflect fair value.

Debt securities generally are traded in the over-the-counter (OTC) market and are valued at prices furnished by independent pricing services or by broker dealers who make markets in such securities. When valuing securities, the independent pricing services consider factors such as, but not limited to, the yield or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities.

Investments in mutual funds are valued at the mutual fund's closing NAV per share on the day of valuation. Futures contracts are valued at closing settlement prices. Assets and liabilities other than financial instruments, including short-term receivables and payables, are carried at cost, or estimated realizable value, if less, which approximates fair value.

Investments for which market quotations are not readily available or deemed unreliable are valued at fair value as determined in good faith by the Valuation Designee. The Valuation Designee has adopted methodologies for determining the fair value of investments for which market quotations are not readily available or deemed unreliable, including the use of other pricing sources. Factors used in determining fair value vary by type of investment and may include market or investment specific considerations. The Valuation Designee typically will afford greatest weight to actual prices in arm's length transactions, to the extent they represent orderly transactions between market participants, transaction information can be reliably obtained, and prices are deemed representative of fair value. However, the Valuation Designee may also consider other valuation methods such as market-based valuation multiples; a discount or premium from market value of a similar, freely traded security of the same issuer; discounted cash flows; yield to maturity; or some combination. Fair value determinations are reviewed on a regular basis. Because any fair value determination involves a significant amount of judgment, there is a degree of subjectivity inherent in such pricing decisions. Fair value prices determined by the Valuation Designee could differ from those of other market participants, and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security.

**Valuation Inputs** The following table summarizes the fund's financial instruments, based on the inputs used to determine their fair values on October 31, 2023 (for further detail by category, please refer to the accompanying Portfolio of Investments):

| (\$000s)                      |    | Level 1 |    | Level 2 |    | Level 3  | Total Value |

| Liabilities                   |    |         |    |         |    |          |             |
|                               | ф  | 701     | \$ |         | φ  | Φ.       | 701         |
| Futures Contracts*            | \$ | 791     | Ф  | _       | Ф  | - \$     | 791         |

<sup>\*</sup>The fair value presented includes cumulative gain (loss) on open futures contracts; however, the net value reflected on the accompanying Portfolio of Investments is only the unsettled variation margin receivable (payable) at that date.

### **NOTE 3 - DERIVATIVE INSTRUMENTS**

During the year ended October 31, 2023, the fund invested in derivative instruments. As defined by GAAP, a derivative is a financial instrument whose value is derived from an underlying security price, foreign exchange rate, interest rate, index of prices or rates, or other variable; it requires little or no initial investment and permits or requires net settlement. The fund invests in derivatives only if the expected risks and rewards are consistent with its investment objectives, policies, and overall risk profile, as described in its prospectus and Statement of Additional Information. The fund may use derivatives for a variety of purposes and may use them to establish both long and short positions within the fund's portfolio. Potential uses include to hedge against declines in principal value, increase yield, invest in an asset with greater efficiency and at a lower cost than is possible through direct investment, to enhance return, or to adjust credit exposure. The risks associated with the use of derivatives are different from, and potentially much greater than, the risks associated with investing directly in the instruments on which the derivatives are based.

The fund values its derivatives at fair value and recognizes changes in fair value currently in its results of operations. Accordingly, the fund does not follow hedge accounting, even for derivatives employed as economic hedges. Generally, the fund accounts for its derivatives on a gross basis. It does not offset the fair value of derivative liabilities against the fair value of derivative assets on its financial statements, nor does it offset the fair value of derivative instruments against the right to reclaim or obligation to return collateral. The following table summarizes the fair value of the fund's derivative instruments held as of October 31, 2023, and the related location on the accompanying Statement of Assets and Liabilities, presented by primary underlying risk exposure:

| (\$000s)                              | Location on Statement of<br>Assets and Liabilities |    | Fair Value* |
|---------------------------------------|--|----|-------------|
| <b>Liabilities</b> Equity derivatives |  | \$ | 791         |
| Total                                 |  | \$ | 791         |

\* The fair value presented includes cumulative gain (loss) on open futures contracts; however, the value reflected on the accompanying Statement of Assets and Liabilities is only the unsettled variation margin receivable (payable) at that date.

Additionally, the amount of gains and losses on derivative instruments recognized in fund earnings during the year ended October 31, 2023, and the related location on the accompanying Statement of Operations is summarized in the following table by primary underlying risk exposure:

| (\$000s)       | Location of Gain (Loss) on Statement of Operation | าร |         |
|----------------|---|----|---------|
|                |   |    | Futures |
| Realized Gair  | ı (Loss)  |    |         |
| Equity derivat |   | \$ | 835     |
| Total          |   | \$ | 835     |

| (¢000=)            | Location of Coin (Loca) on Statement of Operations |                |  |
|--------------------|--|----------------|--|
| (\$000s)           | Location of Gain (Loss) on Statement of Operations |                |  |
|                    |  | <b>Futures</b> |  |
| Change in Unrea    | alized   |                |  |
| Equity derivatives | \$   | (669)          |  |
|                    | •••••  |                |  |
| Total              | \$   | (669)          |  |

Counterparty Risk and Collateral The fund invests in exchange-traded and/or centrally cleared derivative contracts, such as futures, exchange-traded options, and centrally cleared swaps. Counterparty risk on such derivatives is minimal because the clearinghouse provides protection against counterparty defaults. For futures and centrally cleared swaps, the fund is required to deposit collateral in an amount specified by the clearinghouse and the clearing firm (margin requirement), and the margin requirement must be maintained over the life of the contract. Each clearinghouse and clearing firm, in its sole discretion, may adjust the margin requirements applicable to the fund.

Collateral may be in the form of cash or debt securities issued by the U.S. government or related agencies. Cash posted by the fund is reflected as cash deposits in the accompanying financial statements and generally is restricted from withdrawal by the fund; securities posted by the fund are so noted in the accompanying Portfolio of Investments; both remain in the fund's assets. While typically not sold in the same manner as equity or fixed income securities, exchange-traded or centrally cleared derivatives may be closed out only on the exchange or clearinghouse where the contracts were cleared. This ability is subject to the liquidity of underlying positions. As of October 31, 2023, securities valued at \$493,000 had been posted by the fund for exchange-traded and/or centrally cleared derivatives.

**Futures Contracts** The fund is subject to equity price risk in the normal course of pursuing its investment objectives and uses futures contracts to help manage such risk. The fund may enter into futures contracts as an efficient means of maintaining liquidity while being invested in the market, to facilitate trading, or to reduce transaction costs. A futures contract provides for the future sale by one party and purchase by another of a specified amount of a specific underlying financial instrument at an agreed-upon price, date, time, and place. The fund currently invests only in exchange-traded futures, which generally are standardized as to maturity date, underlying financial instrument, and other contract terms. Payments are made or received by the fund each day to settle daily fluctuations in the value of the contract (variation margin), which reflect changes in the

value of the underlying financial instrument. Variation margin is recorded as unrealized gain or loss until the contract is closed. The value of a futures contract included in net assets is the amount of unsettled variation margin; net variation margin receivable is reflected as an asset and net variation margin payable is reflected as a liability on the accompanying Statement of Assets and Liabilities. When a contract is closed, a realized gain or loss is recorded on the accompanying Statement of Operations. Risks related to the use of futures contracts include possible illiquidity of the futures markets, contract prices that can be highly volatile and imperfectly correlated to movements in hedged security values, and potential losses in excess of the fund's initial investment. During the year ended October 31, 2023, the volume of the fund's activity in futures, based on underlying notional amounts, was generally between 0% and 2% of net assets.

### **NOTE 4 - OTHER INVESTMENT TRANSACTIONS**

Consistent with its investment objective, the fund engages in the following practices to manage exposure to certain risks and/or to enhance performance. The investment objective, policies, program, and risk factors of the fund are described more fully in the fund's prospectus and Statement of Additional Information.

Securities Lending The fund may lend its securities to approved borrowers to earn additional income. Its securities lending activities are administered by a lending agent in accordance with a securities lending agreement. Security loans generally do not have stated maturity dates, and the fund may recall a security at any time. The fund receives collateral in the form of cash or U.S. government securities. Collateral is maintained over the life of the loan in an amount not less than the value of loaned securities; any additional collateral required due to changes in security values is delivered to the fund the next business day. Cash collateral is invested in accordance with investment guidelines approved by fund management. Additionally, the lending agent indemnifies the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a possible loss of income or value if the borrower fails to return the securities, collateral investments decline in value, and the lending agent fails to perform. Securities lending revenue consists of earnings on invested collateral and borrowing fees, net of any rebates to the borrower, compensation to the lending agent, and other administrative costs. In accordance with GAAP, investments made with cash collateral are reflected in the accompanying financial statements, but collateral received in the form of securities is not. At October 31, 2023, the value of loaned securities was \$14,427,000; the value of cash collateral and related investments was \$15,054,000.

**Other** Purchases and sales of portfolio securities other than short-term securities aggregated \$306,877,000 and \$218,575,000, respectively, for the year ended October 31, 2023.

### **NOTE 5 - FEDERAL INCOME TAXES**

Generally, no provision for federal income taxes is required since the fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and distribute to shareholders all of its taxable income and gains. Distributions determined in accordance with federal income tax regulations may differ in amount or character from net investment income and realized gains for financial reporting purposes.

The fund files U.S. federal, state, and local tax returns as required. The fund's tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return, but which can be extended to six years in certain circumstances. Tax returns for open years have incorporated no uncertain tax positions that require a provision for income taxes.

Capital accounts within the financial reporting records are adjusted for permanent book/tax differences to reflect tax character but are not adjusted for temporary differences. The permanent book/tax adjustments, if any, have no impact on results of operations or net assets. The permanent book/tax adjustments relate primarily to the character of income on passive foreign investment companies.

The tax character of distributions paid for the periods presented was as follows:

| (\$000s)   |    |                     |                     |
|--|----|---------------------|---------------------|
|  | •  | October 31,<br>2023 | October 31,<br>2022 |
| Ordinary income (including short-term capital gains, if any) | \$ | 17,091              | \$<br>22,564        |

At October 31, 2023, the tax-basis cost of investments (including derivatives, if any) and gross unrealized appreciation and depreciation were as follows:

| (\$000\$)   |                      |             |
|---|----------------------|-------------|
| Cost of investments   | \$                   | 652,228     |
| Unrealized appreciation   | \$                   | 234,038     |
| Unrealized depreciation   |                      | (132,441)   |
| Net unrealized appreciation (depreciation)                        | \$                   | 101,597     |
| At October 31, 2023, the tax-basis components of accumas follows: | nulated net earnings | (loss) were |
| (\$000s)  |                      |             |
| Undistributed ordinary income                                     | \$                   | 00.500      |
|   |                      | 22,563      |
| Net unrealized appreciation (depreciation)                        |                      | 101,597     |

(38,096)

86.064

Temporary differences between book-basis and tax-basis components of total distributable earnings (loss) arise when certain items of income, gain, or loss are recognized in different periods for financial statement purposes versus for tax purposes; these differences will reverse in a subsequent reporting period. The temporary differences relate primarily to the deferral of losses from wash sales, and the realization of gains/losses on passive foreign investment companies and certain open derivative contracts. The loss carryforwards and deferrals primarily relate to capital loss carryforwards. Capital loss carryforwards are available indefinitely to offset future realized capital gains.

### **NOTE 6 - FOREIGN TAXES**

Loss carryforwards and deferrals

Total distributable earnings (loss)

The fund is subject to foreign income taxes imposed by certain countries in which it invests. Additionally, capital gains realized upon disposition of securities issued in or by certain foreign countries are subject to capital gains tax imposed by those countries. All taxes are computed in accordance with the applicable foreign tax law, and, to the extent permitted, capital losses are used to offset capital gains. Taxes attributable to income are accrued by the fund as a reduction of income. Current and deferred tax expense attributable to capital gains is reflected as a component of realized or change in unrealized gain/loss on securities in the accompanying financial statements. To the

extent that the fund has country specific capital loss carryforwards, such carryforwards are applied against net unrealized gains when determining the deferred tax liability. Any deferred tax liability incurred by the fund is included in either Other liabilities or Deferred tax liability on the accompanying Statement of Assets and Liabilities.

### **NOTE 7 - RELATED PARTY TRANSACTIONS**

The fund is managed by T. Rowe Price Associates, Inc. (Price Associates), a wholly owned subsidiary of T. Rowe Price Group, Inc. (Price Group). Price Associates has entered into a sub-advisory agreement(s) with one or more of its wholly owned subsidiaries, to provide investment advisory services to the fund. The investment management agreement between the fund and Price Associates provides for an annual investment management fee equal to 0.09% of the fund's average daily net assets. The fee is computed daily and paid monthly.

The Investor Class is subject to a contractual expense limitation through the expense limitation date indicated in the table below. During the limitation period, Price Associates is required to waive its management fee or pay any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses) that would otherwise cause the class's ratio of annualized total expenses to average net assets (net expense ratio) to exceed its expense limitation. The class is required to repay Price Associates for expenses previously waived/paid to the extent the class's net assets grow or expenses decline sufficiently to allow repayment without causing the class's net expense ratio (after the repayment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such amounts were waived; or (2) the class's current expense limitation. However, no repayment will be made more than three years after the date of a payment or waiver.

The Z Class is also subject to a contractual expense limitation agreement whereby Price Associates has agreed to waive and/or bear all of the Z Class' expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses) in their entirety. This fee waiver and/or expense reimbursement arrangement is expected to remain in place indefinitely, and the agreement may only be amended or terminated with approval by the fund's Board. Expenses of the fund waived/paid by the manager are not subject to later repayment by the fund.

In addition, the fund is subject to a permanent contractual expense limitation, pursuant to which Price Associates is required to waive its management fee or pay any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses) that would otherwise cause the class's ratio of annualized total expenses to average net assets (net expense ratio) to exceed 0.45%. The agreement may only be terminated with approval by the fund's shareholders. Each class is required to repay Price Associates for expenses previously waived/paid to the extent the class's net assets grow or expenses decline sufficiently to allow repayment without causing the class's net expense ratio (after the repayment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such amounts were waived; or (2) the class's current expense limitation. However, no repayment will be made more than three years after the date of a payment or waiver. No management fees were waived or any expenses paid under this particular arrangement during the year ended October 31, 2023.

Pursuant to this agreement, expenses were waived/paid by and/or repaid to Price Associates during the year ended October 31, 2023 as indicated in the table below. At October 31, 2023, there were no amounts subject to repayment by the fund. Any repayment of expenses previously waived/paid by Price Associates during the period would be included in the net investment income and expense ratios presented on the accompanying Financial Highlights.

|  | Investor Class | Z Class |
|--|----------------|---------|
| Expense limitation/I Class Limit           | 0.31%          | 0.00%   |
| Expense limitation date                    | 02/28/26       | N/A     |
| (Waived)/repaid during the period (\$000s) | \$-            | \$(116) |

In addition, the fund has entered into service agreements with Price Associates and two wholly owned subsidiaries of Price Associates, each an affiliate of the fund (collectively, Price). Price Associates provides certain accounting and administrative services to the fund. T. Rowe Price Services, Inc. provides shareholder and administrative services in its capacity as the fund's transfer and dividend-disbursing agent. T. Rowe Price Retirement Plan Services, Inc. provides subaccounting and recordkeeping services for certain retirement accounts invested in the Investor Class. For the year ended October 31, 2023, expenses incurred pursuant to these service agreements were \$112,000 for Price Associates; \$326,000 for T. Rowe Price Services, Inc.; and \$105,000 for T. Rowe Price Retirement Plan Services, Inc. All amounts due to and due from Price, exclusive of investment management fees payable, are presented net on the accompanying Statement of Assets and Liabilities.

T. Rowe Price Investment Services, Inc. (Investment Services) serves as distributor to the fund. Pursuant to an underwriting agreement, no compensation for any distribution services provided is paid to Investment Services by the fund (except for 12b-1 fees under a Board-approved Rule 12b-1 plan).

Additionally, the fund is one of several mutual funds in which certain college savings plans managed by Price Associates invests. As approved by the fund's Board of Directors, shareholder servicing costs associated with each college savings plan are borne by the fund in proportion to the average daily value of its shares owned by the college savings plan. Price has agreed to waive/reimburse shareholder servicing costs in excess of 0.05% of the fund's average daily value of its shares owned by the college savings plan. Any amounts waived/paid by Price under this voluntary agreement are not subject to repayment by the fund. Price may amend or terminate this voluntary arrangement at any time without prior notice. For the year ended October 31, 2023, the fund was charged \$67,000 for shareholder servicing costs related to the college savings plans, of which \$40,000 was for services provided by Price. All amounts due to and due from Price, exclusive of investment management fees payable, are presented net on the accompanying Statement of Assets and Liabilities. At October 31, 2023, approximately 18% of the outstanding shares of the Investor Class were held by college savings plans.

Mutual funds, trusts, and other accounts managed by Price Associates or its affiliates (collectively, Price Funds and accounts) may invest in the fund. No Price fund or account may invest for the purpose of exercising management or control over the fund. At October 31, 2023, 100% of the Z Class's outstanding shares were held by Price Funds and accounts.

The fund may invest its cash reserves in certain open-end management investment companies managed by Price Associates and considered affiliates of the fund: the T. Rowe Price Government Reserve Fund or the T. Rowe Price Treasury Reserve Fund, organized as money market funds (together, the Price Reserve Funds). The Price Reserve Funds are offered as short-term investment options to mutual funds, trusts, and other accounts managed by Price Associates or its affiliates and are not available for direct purchase by members of the public. Cash collateral from securities lending, if any, is invested in the T. Rowe Price Government Reserve Fund. The Price Reserve Funds pay no investment management fees.

The fund may participate in securities purchase and sale transactions with other funds or accounts advised by Price Associates (cross trades), in accordance with procedures adopted by the fund's Board and Securities and Exchange Commission rules, which require, among other things, that such purchase and sale cross trades be effected at the

independent current market price of the security. During the year ended October 31, 2023, the fund had no purchases or sales cross trades with other funds or accounts advised by Price Associates.

### **NOTE 8 - BORROWING**

To provide temporary liquidity, the fund may borrow from other T. Rowe Pricesponsored mutual funds under an interfund borrowing program developed and managed by Price Associates. The program permits the borrowing and lending of cash at rates beneficial to both the borrowing and lending funds. Pursuant to program guidelines, loans totaling 10% or more of a borrowing fund's total assets require collateralization at 102% of the value of the loan; loans of less than 10% are unsecured. During the year ended October 31, 2023, the fund incurred \$7,000 in interest expense related to outstanding borrowings on three days in the average amount of \$13,267,000 and at an average annual rate of 6.76%. At October 31, 2023, there were no borrowings outstanding.

### **NOTE 9 - OTHER MATTERS**

Unpredictable events such as environmental or natural disasters, war and conflict, terrorism, geopolitical events, and public health epidemics and similar public health threats may significantly affect the economy and the markets and issuers in which the fund invests. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others, and exacerbate other pre-existing political, social, and economic risks.

The global outbreak of COVID-19 and the related governmental and public responses have led and may continue to lead to increased market volatility and the potential for illiquidity in certain classes of securities and sectors of the market either in specific countries or worldwide.

In February 2022, Russian forces entered Ukraine and commenced an armed conflict, leading to economic sanctions imposed on Russia that target certain of its citizens and issuers and sectors of the Russian economy, creating impacts on Russian-related stocks and debt and greater volatility in global markets.

In March 2023, the banking industry experienced heightened volatility, which sparked concerns of potential broader adverse market conditions. The extent of impact of these events on the US and global markets is highly uncertain.

These are recent examples of global events which may have a negative impact on the values of certain portfolio holdings or the fund's overall performance. Management is actively monitoring the risks and financial impacts arising from these events.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of T. Rowe Price International Index Fund, Inc. and Shareholders of T. Rowe Price International Equity Index Fund

### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of T. Rowe Price International Equity Index Fund (constituting T. Rowe Price International Index Fund, Inc., referred to hereafter as the "Fund") as of October 31, 2023, the related statement of operations for the year ended October 31, 2023, the statement of changes in net assets for each of the two years in the period ended October 31, 2023, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of October 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended October 31, 2023 and the financial highlights for each of the periods indicated therein, in conformity with accounting principles generally accepted in the United States of America.

### **Basis for Opinion**

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

# REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM (CONTINUED)

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2023 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP

Baltimore, Maryland December 19, 2023

We have served as the auditor of one or more investment companies in the T. Rowe Price group of investment companies since 1973.

## TAX INFORMATION (UNAUDITED) FOR THE TAX YEAR ENDED 10/31/23

We are providing this information as required by the Internal Revenue Code. The amounts shown may differ from those elsewhere in this report because of differences between tax and financial reporting requirements.

For taxable non-corporate shareholders, \$21,556,000 of the fund's income represents qualified dividend income subject to a long-term capital gains tax rate of not greater than 20%.

The fund will pass through foreign source income of \$23,573,000 and foreign taxes paid of \$1,930,000.

# INFORMATION ON PROXY VOTING POLICIES, PROCEDURES, AND RECORDS

A description of the policies and procedures used by T. Rowe Price funds to determine how to vote proxies relating to portfolio securities is available in each fund's Statement of Additional Information. You may request this document by calling 1-800-225-5132 or by accessing the SEC's website, sec.gov.

The description of our proxy voting policies and procedures is also available on our corporate website. To access it, please visit the following Web page:

https://www.troweprice.com/corporate/us/en/utility/policies.html

Scroll down to the section near the bottom of the page that says, "Proxy Voting Guidelines." Click on the links in the shaded box.

Each fund's most recent annual proxy voting record is available on our website and through the SEC's website. To access it through T. Rowe Price, visit the website location shown above, and scroll down to the section near the bottom of the page that says, "Proxy Voting Records." Click on the Proxy Voting Records link in the shaded box.

### **RESULTS OF PROXY VOTING**

A Special Meeting of Shareholders was held on July 24, 2023 for shareholders of record on April 7, 2023, to elect the following director-nominees to serve on the Board of all Price Funds. The newly elected Directors took office effective July 24, 2023.

The results of the voting were as follows:

|                   | Votes For  | Votes Withheld |
|-------------------|------------|----------------|
| Melody Bianchetto | 37,367,232 | 104,955        |
| Mark J. Parrell   | 37,357,093 | 108,080        |
| Kellye L. Walker  | 37,354,738 | 107,176        |
| Eric L. Veiel     | 37,369,832 | 107,292        |

Teresa Bryce Bazemore, Bruce W. Duncan, Robert J. Gerrard, Jr., Paul F. McBride and David Oestreicher continue to serve as Directors on the Board of all Price Funds.

### **HOW TO OBTAIN QUARTERLY PORTFOLIO HOLDINGS**

The fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The fund's reports on Form N-PORT are available electronically on the SEC's website (sec.gov). In addition, most T. Rowe Price funds disclose their first and third fiscal quarter-end holdings on **troweprice.com**.

# TAILORED SHAREHOLDER REPORTS FOR MUTUAL FUNDS AND EXCHANGE TRADED FUNDS

In October 2022, the Securities and Exchange Commission (SEC) adopted rule and form amendments requiring Mutual Funds and Exchange-Traded Funds to transmit concise and visually engaging streamlined annual and semiannual reports that highlight key information to shareholders. Other information, including financial statements, will no longer appear in the funds' shareholder reports but will be available online, delivered free of charge upon request, and filed on a semiannual basis on Form N-CSR. The rule and form amendments have a compliance date of July 24, 2024.

### LIQUIDITY RISK MANAGEMENT PROGRAM

In accordance with Rule 22e-4 (Liquidity Rule) under the Investment Company Act of 1940, as amended, the fund has established a liquidity risk management program (Liquidity Program) reasonably designed to assess and manage the fund's liquidity risk, which generally represents the risk that the fund would not be able to meet redemption requests without significant dilution of remaining investors' interests in the fund. The fund's Board of Directors (Board) has appointed the fund's investment adviser, T. Rowe Price Associates, Inc. (Adviser), as the administrator of the Liquidity Program. As administrator, the Adviser is responsible for overseeing the day-to-day operations of the Liquidity Program and, among other things, is responsible for assessing, managing, and reviewing with the Board at least annually the liquidity risk of each T. Rowe Price fund. The Adviser has delegated oversight of the Liquidity Program to a Liquidity Risk Committee (LRC), which is a cross-functional committee composed of personnel from multiple departments within the Adviser.

The Liquidity Program's principal objectives include supporting the T. Rowe Price funds' compliance with limits on investments in illiquid assets and mitigating the risk that the fund will be unable to timely meet its redemption obligations. The Liquidity Program also includes a number of elements that support the management and assessment of liquidity risk, including an annual assessment of factors that influence the fund's liquidity and the periodic classification and reclassification of a fund's investments into categories that reflect the LRC's assessment of their relative liquidity under current market conditions. Under the Liquidity Program, every investment held by the fund is classified at least monthly into one of four liquidity categories based on estimations of the investment's ability to be sold during designated time frames in current market conditions without significantly changing the investment's market value.

As required by the Liquidity Rule, at a meeting held on July 24, 2023, the Board was presented with an annual assessment that was prepared by the LRC on behalf of the Adviser and addressed the operation of the Liquidity Program and assessed its adequacy and effectiveness of implementation, including any material changes to the Liquidity Program and the determination of each fund's Highly Liquid Investment Minimum (HLIM). The annual assessment included consideration of the following factors, as applicable: the fund's investment strategy and liquidity of portfolio investments during normal and reasonably foreseeable stressed conditions, including whether the investment strategy is appropriate for an open-end fund, the extent to which the strategy involves a relatively concentrated portfolio or large positions in particular issuers, and the use of borrowings for investment purposes and derivatives; short-term and long-term cash flow projections covering both normal and reasonably foreseeable stressed conditions; and holdings of cash and cash equivalents, as well as available borrowing arrangements.

### LIQUIDITY RISK MANAGEMENT PROGRAM (CONTINUED)

For the fund and other T. Rowe Price funds, the annual assessment incorporated a report related to a fund's holdings, shareholder and portfolio concentration, any borrowings during the period, cash flow projections, and other relevant data for the period of April 1, 2022, through March 31, 2023. The report described the methodology for classifying a fund's investments (including any derivative transactions) into one of four liquidity categories, as well as the percentage of a fund's investments assigned to each category. It also explained the methodology for establishing a fund's HLIM and noted that the LRC reviews the HLIM assigned to each fund no less frequently than annually.

During the period covered by the annual assessment, the LRC has concluded, and reported to the Board, that the Liquidity Program continues to operate adequately and effectively and is reasonably designed to assess and manage the fund's liquidity risk.

### ABOUT THE FUND'S DIRECTORS AND OFFICERS

Your fund is overseen by a Board of Directors (Board) that meets regularly to review a wide variety of matters affecting or potentially affecting the fund, including performance, investment programs, compliance matters, advisory fees and expenses, service providers, and business and regulatory affairs. The Board elects the fund's officers, who are listed in the final table. The directors who are also employees or officers of T. Rowe Price are considered to be "interested" directors as defined in Section 2(a)(19) of the 1940 Act because of their relationships with T. Rowe Price Associates, Inc. (T. Rowe Price), and its affiliates. The business address of each director and officer is 100 East Pratt Street, Baltimore, Maryland 21202. The Statement of Additional Information includes additional information about the fund directors and is available without charge by calling a T. Rowe Price representative at 1-800-638-5660.
