

ANNUAL REPORT

December 31, 2023

T. ROWE PRICE

Equity Market Index Funds

For more insights from T. Rowe Price investment professionals, go to **troweprice.com**.

HIGHLIGHTS

- Each of the three Equity Market Index Funds produced positive returns in 2023 and closely tracked their respective benchmarks.
- Most sectors of the U.S. stock market produced positive returns during the 12-month period. Led by a relatively small group of high-growth, technologyoriented mega-cap companies, U.S. stocks surged in 2023.
- Using full replication and sampling strategies, we kept the composition and other attributes of the index funds similar to those of their benchmarks.
- The trajectories of the economy, corporate earnings, and interest rates are unpredictable, and investor sentiment toward the broad market and various market segments could change without warning. Our main task, however, is to use full replication or sampling strategies so that the Equity Market Index Funds are structured like major U.S. equity indexes and closely track their performance.

Go Paperless

Going paperless offers a host of benefits, which include:

- Timely delivery of important documents
- Convenient access to your documents anytime, anywhere
- Strong security protocols to safeguard sensitive data

Waive your account service fee by going paperless.*

If you invest through a financial intermediary such as an investment advisor, a bank, or a brokerage firm, please contact that organization and ask if it can provide electronic documentation.

Log in to your account at **troweprice.com** for more information.

*An account service fee will be charged annually for each T. Rowe Price mutual fund account unless you meet criteria for a fee waiver. Go to troweprice.com/personal-investing/help/fees-and-minimums.html to learn more about this account service fee, including other ways to waive it.

Market Commentary

Dear Shareholder

Global stock and bond indexes were broadly positive during 2023 as most economies managed to avoid the recession that was widely predicted at the start of the year. Technology companies benefited from investor enthusiasm for artificial intelligence developments and led the equity rally, while fixed income benchmarks rebounded late in the year amid falling interest rates.

For the 12-month period, the technology-oriented Nasdaq Composite Index rose about 43%, reaching a record high and producing the strongest result of the major benchmarks. Growth stocks outperformed value shares, and developed market stocks generally outpaced their emerging markets counterparts. Currency movements were mixed over the period, although a weaker dollar versus major European currencies was beneficial for U.S. investors in European securities.

Within the S&P 500 Index, which finished the year just short of the record level it reached in early 2022, the information technology, communication services, and consumer discretionary sectors were all lifted by the tech rally and recorded significant gains. A small group of tech-oriented mega-cap companies helped drive much of the market's advance. Conversely, the defensive utilities sector had the weakest returns in the growth-focused environment, and the energy sector also lost ground amid declining oil prices. The financials sector bounced back from the failure of three large regional banks in the spring and was one of the top-performing segments in the second half of the year.

The U.S. economy was the strongest among the major markets during the period, with gross domestic product growth coming in at 4.9% in the third quarter, the highest since the end of 2021. Corporate fundamentals were also broadly supportive. Year-over-year earnings growth contracted in the first and second quarters of 2023, but results were better than expected, and earnings growth turned positive again in the third quarter. Markets remained resilient despite a debt ceiling standoff in the U.S., the outbreak of war in the Middle East, the continuing conflict between Russia and Ukraine, and a sluggish economic recovery in China.

Inflation remained a concern, but investors were encouraged by the slowing pace of price increases as well as the possibility that the Federal Reserve was nearing the end of its rate-hiking cycle. The Fed held rates steady after raising its short-term lending benchmark rate to a target range of 5.25% to 5.50% in July, the highest level since March 2001, and at its final meeting of the year in December, the central bank indicated that there could be three 25-basis-point rate cuts in 2024.

The yield of the benchmark 10-year U.S. Treasury note briefly reached 5.00% in October for the first time since late 2007 before falling back to 3.88% by period-end, the same level where it started the year, amid cooler-than-expected inflation readings and less-hawkish Fed rhetoric. Fixed income benchmarks were lifted late in the year by falling yields. Investment-grade and high yield corporate bonds produced solid returns, supported by the higher coupons that have become available over the past year, as well as increasing hopes that the economy might be able to avoid a recession.

Global economies and markets showed surprising resilience in 2023, but considerable uncertainty remains as we look ahead. Geopolitical events, the path of monetary policy, and the impact of the Fed's rate hikes on the economy all raise the potential for additional volatility. We believe this environment makes skilled active management a critical tool for identifying risks and opportunities, and our investment teams will continue to use fundamental research to help identify securities that can add value to your portfolio over the long term.

Thank you for your continued confidence in T. Rowe Price.

Sincerely,

Robert Sharps
CEO and President

Management's Discussion of Fund Performance

EQUITY INDEX 500 FUND

INVESTMENT OBJECTIVE

The fund seeks to track the performance of a benchmark index that measures the investment return of large-capitalization U.S. stocks.

FUND COMMENTARY

How did the fund perform in the past 12 months?

The Equity Index 500 Fund returned 26.06% versus 26.29% for its benchmark, the S&P 500 Index. The fund's performance tends to slightly lag that of the index due to operating and management expenses. (Performance for the fund's I Class and Z Class shares will vary due to different fee structures. *Past performance cannot guarantee future results.*)

| PERFORMANCE COMPARIS | SON | |
|-----------------------------------|----------------|---------------------|
| Periods Ended 12/31/23 | Total 6 Months | Return 12 Months |
| Equity Index 500 Fund | 7.93% | 26.06% |
| Equity Index 500 Fund- I Class | 8.01 | 26.23 |
| Equity Index 500 Fund- Z Class | 8.04 | 26.30 |
| S&P 500 Index | 8.04 | 26.29 |
| | | |

What factors influenced the fund's performance?

Most sectors in the S&P 500 Index produced positive returns in 2023. Led by a relatively small group of high-growth, technology-oriented megacap companies, large-cap U.S. stocks surged in 2023. Generally favorable corporate

earnings, a resilient economy, and increased investor interest in artificial intelligence (AI) also provided a favorable backdrop for U.S. equities.

Within our portfolio, information technology stocks contributed the most in absolute terms. Semiconductors, software, and hardware companies were among the best performers in the portfolio, with bellwethers NVIDIA, Microsoft, and Apple, respectively, performing particularly well. Shares of these giants soared with other technology names, as the sector was driven by demand for companies expected to benefit from AI. Also, the prospects for lower interest rates in 2024 gave growth stocks an additional boost at the end of the year. Falling interest rates help high-growth companies by increasing the present value of their future profits. (Please refer to the portfolio of investments for a complete list of holdings and the amount each represents in the portfolio.)

The communication services sector also exhibited positive returns. The interactive media and services segment contributed the most to absolute results, as Facebook parent company Meta Platforms generated robust returns during the year. The stock surged with other mega-cap tech names as investors were bullish on broader economic growth as well as the profit potential of AI adoption and advancements. The entertainment segment also performed well. Shares of streaming service provider Netflix rose for much of the year, buoyed by solid corporate earnings. Near the end of the year, shares benefited from the announcement of large price increases for the company's Basic and Premium subscription plans.

Conversely, utilities shares declined for the 12-month period. Rising interest rates for most of the year pressured the utilities sector, as the relatively high dividend payments that utilities companies typically offer become less attractive

| SECTOR DIVERSIFICATIO | N | |
|--------------------------------------|---------|----------|
| Periods Ended | 6/30/23 | 12/31/23 |
| Information Technology | 28.0% | 28.6% |
| Financials | 12.4 | 12.9 |
| Health Care | 13.4 | 12.5 |
| Consumer Discretionary | 10.6 | 10.8 |
| Industrials and Business Services | 8.6 | 9.0 |
| Communication Services | 8.4 | 8.6 |
| Consumer Staples | 6.6 | 6.1 |
| Energy | 4.1 | 3.9 |
| Real Estate | 2.5 | 2.5 |
| Materials | 2.5 | 2.4 |
| Utilities | 2.6 | 2.3 |
| Other and Reserves | 0.3 | 0.4 |
| Total | 100.0% | 100.0% |

to investors as bond yields climb. Within our portfolio, electric utilities companies performed worst; NextEra Energy, the largest utility company by market value in the U.S., was particularly weak. Shares sold off meaningfully during the year as yield-seeking investors rotated out of the stock and rising rates led to increased borrowing costs for providers of clean energy.

The energy sector also declined during the 12-month period; oil, gas, and consumable fuels companies were weakest. Energy giants Chevron and ExxonMobil were the worst performers in the sector

as both companies faced headwinds throughout the year. Generally lower oil prices in 2023 weighed on shares, as did the large acquisitions of smaller energy sector firms—Chevron acquired Hess, while ExxonMobil bought Pioneer Natural Resources—later in the year.

TOTAL EQUITY MARKET INDEX FUND

INVESTMENT OBJECTIVE

The fund seeks to match the performance of the entire U.S. stock market.

FUND COMMENTARY

How did the fund perform in the past 12 months?

The Total Equity Market Index Fund returned 26.38% versus 26.06% for its benchmark, the S&P Total Market Index. The fund usually lags the benchmark slightly due to operating and management expenses. (*Past performance cannot guarantee future results.*)

| PERFORMANCE COMPARISON | | | | |
|---------------------------|--------------|-----------|--|--|
| | Total Return | | | |
| Periods Ended 12/31/23 | 6 Months | 12 Months | | |
| Total Equity Market Index | | | | |
| Fund | 8.64% | 26.38% | | |
| S&P Total Market Index | 8.44 | 26.06 | | |
| - | | | | |

What factors influenced the fund's performance?

Within our portfolio, information technology stocks contributed the most in absolute terms. Software, semiconductors, and hardware companies

were among the best performers in the portfolio, with bellwethers Microsoft, NVIDIA, and Apple, respectively, performing particularly well. Shares of these giants soared with other technology names, as the sector was driven by demand for companies expected to benefit from AI. Also, the prospects for lower interest rates in 2024 gave growth stocks an additional boost at the end of the year. Falling interest rates help high-growth companies by increasing the present value of their future profits. (Please refer to the portfolio of investments for a complete list of holdings and the amount each represents in the portfolio.)

The consumer discretionary sector also exhibited positive returns. The broadline retail segment contributed the most to absolute results. Shares of Amazon.com surged over the period as the firm's expansive plan to cut costs had a positive impact on margins and offset topline growth weakness in retail and cloud. The strong margin improvement in retail showed that Amazon's decision to regionalize its logistics network has led to faster deliveries at lower costs. The automobiles segment also helped. Shares of Tesla rose sharply in the first half of the year on the back of multiple positive developments, including news that all versions of the firm's cheapest Model 3 would be eligible for the full \$7,500 electric vehicle tax credit, as well as the announcements that Ford, General Motors, and Rivian would each adopt Tesla's North American charging plug standard for their electric vehicles.

Conversely, utilities shares declined for the 12-month period. Rising interest rates for most of the year pressured the utilities sector, as the relatively high dividend payments that utilities companies typically offer become less attractive to investors as bond yields climb. Within our portfolio, electric utilities companies performed worst; NextEra Energy, the largest utility company by market value in the U.S., was particularly weak. Shares sold off meaningfully during the year as yield-seeking investors rotated out of the stock and rising rates led to increased borrowing costs for providers of clean energy.

| SECTOR DIVERSIFICATION | N | |

The energy sector also declined during the 12-month period; oil, gas, and consumable fuels companies were weakest. Energy giants Chevron and ExxonMobil were the worst performers in the sector as both companies faced headwinds throughout the year. Generally lower oil prices in 2023 weighed on shares, as did the large acquisitions of smaller energy sector firms—Chevron acquired Hess, while ExxonMobil bought Pioneer Natural Resources-later in the year.

EXTENDED EQUITY MARKET INDEX FUND

INVESTMENT OBJECTIVE

The fund seeks to track the performance of a benchmark index that measures the investment return of small- and mid-capitalization U.S. stocks.

FUND COMMENTARY

How did the fund perform in the past 12 months?

Small- and mid-cap U.S. stocks produced positive returns in 2023. The Extended Equity Market Index Fund returned 25.35% versus 24.97% for its benchmark, the S&P Completion Index. The fund usually lags the benchmark slightly due to operating and management expenses. (*Past performance cannot guarantee future results.*)

| PERFORMANCE COMPAR | IISON | |
|------------------------|----------|-----------|
| | Total | Return |
| Periods Ended 12/31/23 | 6 Months | 12 Months |
| Extended Equity Market | | |
| Index Fund | 11.40% | 25.35% |
| S&P Completion Index | 11.01 | 24 97 |

What factors influenced the fund's performance?

Within our portfolio, information technology stocks contributed the most in absolute terms. Software, IT services, and

semiconductor companies were among the best performers in the portfolio, with Palo Alto Networks, Snowflake, and Marvell Technology, respectively, being particularly strong. Shares of these companies soared with other technology names, as the sector was driven by demand for companies expected to benefit from AI. Also, the prospects for lower interest rates in 2024 gave growth stocks an additional boost at the end of the year. Falling interest rates help high-growth companies by increasing the present value of their future profits. (Please refer to the portfolio of investments for a complete list of holdings and the amount each represents in the portfolio.)

The industrials and business services sector also exhibited positive returns; the ground transportation segment performed best. Shares of leading ride share brand Uber Technologies surged for most of the year, as strong corporate earnings provided a favorable backdrop. Bookings accelerated across the company's mobility and delivery segments as demand in the U.S. strengthened, most notably in the third quarter. Shares rallied even further at the end of the year in anticipation of Uber Technologies being added to the large-cap S&P 500 Index. The building products segment also advanced during the year, led by Builders FirstSource. The company is a maker of assorted building products used in new home construction, as well as remodeling, repairs, and

renovations. Shares surged as the company reported better-than-expected third-quarter earnings and as a sharp drop in mortgage interest rates boosted sentiment toward homebuilding-related industries. The stock was also added to the S&P 500 late in the year.

The financials sector also generated strong returns during the year, with capital markets and financial services companies performing best. Shares of alternative asset managers Blackstone and Apollo Global Management surged during the year. Both companies benefited from investors who, following a difficult 2022 for stocks and bonds, sought alternative investments that could provide higher returns and possibly other benefits, such as broader diversification or lower volatility. Investors also anticipate that these nonbank institutions could win additional business that might otherwise go to large, heavily regulated banks, particularly if new rules take effect requiring banks to hold substantially more capital reserves.

| SECTOR DIVERSIFICATION | N |
|------------------------|---|
| | |

| Periods Ended | 6/30/23 | 12/31/23 |
|--------------------------------------|---------|----------|
| Information Technology | 17.7% | 19.0% |
| Financials | 15.6 | 17.1 |
| Industrials and Business Services | 18.1 | 16.7 |
| Health Care | 13.0 | 11.9 |
| Consumer Discretionary | 12.0 | 11.3 |
| Real Estate | 6.0 | 6.1 |
| Energy | 4.2 | 4.4 |
| Materials | 4.1 | 4.2 |
| Communication Services | 4.0 | 4.1 |
| Consumer Staples | 2.8 | 2.9 |
| Utilities | 1.9 | 1.7 |
| Other and Reserves | 0.6 | 0.6 |
| Total | 100.0% | 100.0% |

Historical weightings reflect current industry/sector classifications.

Conversely, utilities shares declined for the 12-month period. Rising interest rates pressured the utilities sector throughout the year as the high dividend payments that utilities companies typically offer become less attractive to investors as bond yields climb higher. Within our portfolio, gas utilities companies performed worst as UGI Corporation and National Fuel Gas Company detracted from absolute returns.

How are the Equity Market Index Funds positioned?

The Equity Market Index Funds, which tend to closely track their benchmarks, offer broad exposure to

different sectors of the U.S. stock market, and each fund's sector allocations are consistent with those of its benchmark. As such, changes in each portfolio's sector diversification and other overall characteristics reflect changes in the composition of the indexes, rather than strategic shifts that are typical of an

actively managed fund. Since the portfolios are designed to track their indexes, they do not have the flexibility to shift assets toward stocks or sectors that are rising or away from those that are declining. The funds' expenses are generally low, which allows investors to retain more of their returns.

As a reminder, the Equity Market Index Funds are designed for investors who want to harness the potential for long-term capital appreciation from broad exposure to large-cap U.S. stocks, the entire U.S. stock market, or small- and mid-cap U.S. stocks. The portfolios could serve as core holdings in an investor's portfolio, as they offer attributes that many investors will find appealing. The portfolios intend to be diversified in approximately the same proportion as the indexes they track are diversified. (Diversification cannot assure a profit or protect against loss in a declining market.)

The Equity Index 500 Fund uses a full replication strategy, which involves investing substantially all of its assets in all of the stocks in the S&P 500 Index. The fund seeks to maintain holdings of each stock in proportion to its weight in the index. The Total Equity Market Index Fund and the Extended Equity Market Index Fund use a sampling strategy, which involves investing substantially all of their assets in a group of stocks representative of the sector allocations, financial characteristics, and other attributes of the S&P Total Market Index and S&P Completion Index, respectively. These two funds do not attempt to fully replicate their indexes by owning each of the stocks in them. All three index funds may occasionally invest in securities such as futures and exchange-traded funds so that they can accommodate cash flows and remain fully invested.

What is portfolio management's outlook?

Continued trends in disinflation, alongside a handful of benign jobs reports, have lengthened the runway for an economic soft landing. The Federal Reserve's dovish pivot—and implied rate cut cadence—has encouraged risk-on behavior as the probability of a recession continues to decline. We believe equity returns are likely to be more subdued in 2024; an additional move higher will likely hinge on the ability of companies to demonstrate meaningful earnings and free cash flow growth following the significant move up in the last 12 months, which was aided in large part by multiple expansion.

The trajectories of the economy, corporate earnings, and interest rates are unpredictable, and investor sentiment toward the broad market and various market segments could change without warning. Our main task is not to determine which stocks or sectors may perform best in the period ahead but, rather, to use full replication or sampling strategies so that the Equity Market Index Funds are structured like major U.S. equity indexes and closely track their performance.

The views expressed reflect the opinions of T. Rowe Price as of the date of this report and are subject to change based on changes in market, economic, or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

RISKS OF INVESTING IN THE EQUITY MARKET INDEX FUNDS

Common stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. The value of a stock in which the funds invest may decline due to general weakness in the U.S. stock market, such as when the U.S. financial markets decline, or because of factors that affect a particular company or industry.

Although stocks issued by larger companies tend to have less overall volatility than stocks issued by smaller companies, larger companies may not be able to attain the high growth rates of successful smaller companies, especially during strong economic periods. In addition, larger companies may be less capable of responding quickly to competitive challenges and industry changes and may suffer sharper price declines as a result of earnings disappointments.

Funds that invest in small and medium-sized companies could be more volatile than funds that are exposed to only large companies. Small and medium-sized companies often have less experienced management, narrower product lines, more limited financial resources, and less publicly available information than larger companies. Smaller companies may have limited trading markets and tend to be more sensitive to changes in overall economic conditions.

Because the funds are passively managed, holdings are generally not reallocated based on changes in market conditions or the outlook for a specific security, industry, or market sector. As a result, the funds' performance may lag the performance of actively managed funds. Funds that use a sampling strategy (and thus do not attempt to fully replicate their benchmark indexes) have a greater potential for their performance to deviate from that of their benchmarks.

GROWTH OF \$10,000

This chart shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with benchmarks, which include a broad-based market index and may also include a peer group average or index. Market indexes do not include expenses, which are deducted from fund returns as well as mutual fund averages and indexes.

EQUITY INDEX 500 FUND

| | , . , |

When assessing performance, investors should consider both short- and long-term returns.

GROWTH OF \$10,000

This chart shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with benchmarks, which include a broad-based market index and may also include a peer group average or index. Market indexes do not include expenses, which are deducted from fund returns as well as mutual fund averages and indexes.

EXTENDED EQUITY MARKET INDEX FUND

| | AS OF 12/31/23 |
|-----------------------------------|----------------|
| Extended Equity Market Index Fund | \$22,375 |
| S&P Completion Index | 22,444 |

An of 10/21/02

AVERAGE ANNUAL COMPOUND TOTAL RETURN

| Periods Ended 12/31/23 | 1 Year | 5 Years | 10 Years |
|-----------------------------------|--------|---------|----------|
| Extended Equity Market Index Fund | 25.35% | 11.72% | 8.39% |

The fund's performance information represents only past performance and is not necessarily an indication of future results. Current performance may be lower or higher than the performance data cited. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. For the most recent month-end performance, please visit our website (troweprice.com) or contact a T. Rowe Price representative at 1-800-225-5132.

This table shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. When assessing performance, investors should consider both short- and long-term returns.

EXPENSE RATIOS

| Equity Index 500 Fund | 0.20% |
|-----------------------------------|-------|
| Equity Index 500 Fund-I Class | 0.08 |
| Equity Index 500 Fund-Z Class | 0.05 |
| Total Equity Market Index Fund | 0.21 |
| Extended Equity Market Index Fund | 0.26 |

The expense ratios shown are as of the funds' most recent prospectus. These numbers may vary from the expense ratios shown elsewhere in this report because they are based on a different time period and, if applicable, include acquired fund fees and expenses but do not include fee or expense waivers.

FUND EXPENSE EXAMPLE

As a mutual fund shareholder, you may incur two types of costs: (1) transaction costs, such as redemption fees or sales loads, and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other fund expenses. The following example is intended to help you understand your ongoing costs (in dollars) of investing in the fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the most recent six-month period and held for the entire period.

Please note that the Equity Index 500 Fund has three share classes: The original share class (Investor Class) charges no distribution and service (12b-1) fee, I Class shares are also available to institutionally oriented clients and impose no 12b-1 or administrative fee payment, and Z Class shares are offered only to funds advised by T. Rowe Price and other advisory clients of T. Rowe Price or its affiliates that are subject to a contractual fee for investment management services and impose no 12b-1 fee or administrative fee payment. Each share class is presented separately in the table.

Actual Expenses

The first line of the following table (Actual) provides information about actual account values and actual expenses. You may use the information on this line, together with your account balance, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number on the first line under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information on the second line of the table (Hypothetical) is based on hypothetical account values and expenses derived from the fund's actual expense ratio and an assumed 5% per year rate of return before expenses (not the fund's actual return). You may compare the ongoing costs of investing in the fund with other funds by contrasting this 5% hypothetical example and the 5% hypothetical examples that appear in the shareholder reports of the other funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

FUND EXPENSE EXAMPLE (CONTINUED)

Note: T. Rowe Price charges an account service fee that is not included in the accompanying table. The account service fee is charged on a quarterly basis, usually during the last week of a calendar quarter, and applies to accounts with balances below \$10,000 on the day of the assessment. The fee is charged to accounts that fall below \$10,000 for any reason, including market fluctuations, redemptions, or exchanges. When an account with less than \$10,000 is closed either through redemption or exchange, the fee is charged and deducted from the proceeds. The fee applies to IRAs but not to retirement plans directly registered with T. Rowe Price Services or accounts maintained by intermediaries through NSCC® Networking. If you are subject to the fee, keep it in mind when you are estimating the ongoing expenses of investing in the fund and when comparing the expenses of this fund with other funds.

You should also be aware that the expenses shown in the table highlight only your ongoing costs and do not reflect any transaction costs, such as redemption fees or sales loads. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. To the extent a fund charges transaction costs, however, the total cost of owning that fund is higher.

EQUITY INDEX 500 FUND

| | Beginning Account Value 7/1/23 | Ending Account Value 12/31/23 | Expenses Paid During Period* 7/1/23 to 12/31/23 |
|--|--------------------------------------|-------------------------------------|---|
| Investor Class | | | |
| Actual | \$1,000.00 | \$1,079.30 | \$1.00 |
| Hypothetical (assumes 5% return before expenses) | 1,000.00 | 1,024.25 | 0.97 |
| I Class | | | |
| Actual | 1,000.00 | 1,080.10 | 0.26 |
| Hypothetical (assumes 5% return before expenses) | 1,000.00 | 1,024.95 | 0.26 |
| Z Class | | | |
| Actual | 1,000.00 | 1,080.40 | 0.00 |
| Hypothetical (assumes 5% return before expenses) | 1,000.00 | 1,025.21 | 0.00 |

^{*}Expenses are equal to the fund's annualized expense ratio for the 6-month period, multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184), and divided by the days in the year (365) to reflect the half-year period. The annualized expense ratio of the Investor Class was 0.19%, the I Class was 0.05%, and the Z Class was 0.00%.

AFFILIATED COMPANIES

(\$000s)

The fund may invest in certain securities that are considered affiliated companies. As defined by the 1940 Act, an affiliated company is one in which the fund owns 5% or more of the outstanding voting securities, or a company that is under common ownership or control. The following securities were considered affiliated companies for all or some portion of the year ended December 31, 2023. Net realized gain (loss), investment income, change in net unrealized gain/loss, and purchase and sales cost reflect all activity for the period then ended.

| | (| | |
|---|--------------|------------|------------|

NOTES TO FINANCIAL STATEMENTS

T. Rowe Price Index Trust, Inc. (the corporation) is registered under the Investment Company Act of 1940 (the 1940 Act). The Total Equity Market Index Fund (the fund) is an open-end management investment company established by the corporation and intends to be diversified in approximately the same proportion as the index it tracks is diversified. The fund may become nondiversified for periods of time solely as a result of changes in the composition of the index (for example, changes in the relative market capitalization or index weighting of one or more securities represented in the index). The fund seeks to match the performance of the entire U.S. stock market.

NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES

Basis of Preparation The fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946 (ASC 946). The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), including, but not limited to, ASC 946. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity.

Investment Transactions, Investment Income, and Distributions Investment transactions are accounted for on the trade date basis. Income and expenses are recorded on the accrual basis. Realized gains and losses are reported on the identified cost basis. Premiums and discounts on debt securities are amortized for financial reporting purposes. Income tax-related interest and penalties, if incurred, are recorded as income tax expense. Dividends received from other investment companies are reflected as dividend income; capital gain distributions are reflected as realized gain/ loss. Dividend income and capital gain distributions are recorded on the ex-dividend date. Distributions from REITs are initially recorded as dividend income and, to the extent such represent a return of capital or capital gain for tax purposes, are reclassified when such information becomes available. Non-cash dividends, if any, are recorded at the fair market value of the asset received. Proceeds from litigation payments, if any, are included in either net realized gain (loss) or change in net unrealized gain/loss from securities. Distributions to shareholders are recorded on the ex-dividend date. Income distributions, if any, are declared and paid annually. A capital gain distribution, if any, may also be declared and paid by the fund annually.

Capital Transactions Each investor's interest in the net assets of the fund is represented by fund shares. The fund's net asset value (NAV) per share is computed at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. However, the NAV per share may be calculated at a time other than the normal close of the NYSE if trading on the NYSE is restricted, if the NYSE closes earlier, or as may be permitted by the SEC. Purchases and redemptions of fund shares are transacted at the next-computed NAV per share, after receipt of the transaction order by T. Rowe Price Associates, Inc., or its agents.

New Accounting Guidance In June 2022, the FASB issued Accounting Standards Update (ASU), ASU 2022-03, Fair Value Measurement (Topic 820) – Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions, which clarifies that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. The amendments under this ASU are effective for fiscal years beginning after December 15, 2023; however, the fund opted to early adopt, as permitted, effective December 1, 2022. Adoption of the guidance did not have a material impact on the fund's financial statements.

Indemnification In the normal course of business, the fund may provide indemnification in connection with its officers and directors, service providers, and/or private company investments. The fund's maximum exposure under these arrangements is unknown; however, the risk of material loss is currently considered to be remote.

NOTE 2 - VALUATION

Fair Value The fund's financial instruments are valued at the close of the NYSE and are reported at fair value, which GAAP defines as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fund's Board of Directors (the Board) has designated T. Rowe Price Associates, Inc. as the fund's valuation designee (Valuation Designee). Subject to oversight by the Board, the Valuation Designee performs the following functions in performing fair value determinations: assesses and manages valuation risks; establishes and applies fair value methodologies; tests fair value methodologies; and evaluates pricing vendors and pricing agents. The duties and responsibilities of the Valuation Designee are performed by its Valuation Committee. The Valuation Designee provides periodic reporting to the Board on valuation matters.

Various valuation techniques and inputs are used to determine the fair value of financial instruments. GAAP establishes the following fair value hierarchy that categorizes the inputs used to measure fair value:

- Level 1 quoted prices (unadjusted) in active markets for identical financial instruments that the fund can access at the reporting date
- Level 2 inputs other than Level 1 quoted prices that are observable, either directly or indirectly (including, but not limited to, quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in inactive markets, interest rates and yield curves, implied volatilities, and credit spreads)
- Level 3 unobservable inputs (including the Valuation Designee's assumptions in determining fair value)

Observable inputs are developed using market data, such as publicly available information about actual events or transactions, and reflect the assumptions that market participants would use to price the financial instrument. Unobservable inputs are those for which market data are not available and are developed using the best information available about the assumptions that market participants would use to price the financial instrument. GAAP requires valuation techniques to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. When multiple inputs are used to derive fair value, the financial instrument is assigned to the level within the fair value hierarchy based on the lowest-level input that is significant to the fair value of the financial instrument. Input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level but rather the degree of judgment used in determining those values.

Valuation Techniques Equity securities, including exchange-traded funds, listed or regularly traded on a securities exchange or in the over-the-counter (OTC) market are valued at the last quoted sale price or, for certain markets, the official closing price at the time the valuations are made. OTC Bulletin Board securities are valued at the mean of the closing bid and asked prices. A security that is listed or traded on more than one exchange is valued at the quotation on the exchange determined to be the primary market for such security. Listed securities not traded on a particular day are valued at the mean of the closing bid and asked prices for domestic securities.

Debt securities generally are traded in the over-the-counter (OTC) market and are valued at prices furnished by independent pricing services or by broker dealers who make markets in such securities. When valuing securities, the independent pricing services consider factors such as, but not limited to, the yield or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities.

Investments in mutual funds are valued at the mutual fund's closing NAV per share on the day of valuation. Futures contracts are valued at closing settlement prices. Assets and liabilities other than financial instruments, including short-term receivables and payables, are carried at cost, or estimated realizable value, if less, which approximates fair value.

Investments for which market quotations are not readily available or deemed unreliable are valued at fair value as determined in good faith by the Valuation Designee. The Valuation Designee has adopted methodologies for determining the fair value of investments for which market quotations are not readily available or deemed unreliable, including the use of other pricing sources. Factors used in determining fair value vary by type of investment and may include market or investment specific considerations. The Valuation Designee typically will afford greatest weight to actual prices in arm's length transactions, to the extent they represent orderly transactions between market participants, transaction information can be reliably obtained, and prices are deemed representative of fair value. However, the Valuation Designee may also consider other valuation methods such as market-based valuation multiples; a discount or premium from market value of a similar, freely traded security of the same issuer; discounted cash flows; yield to maturity; or some combination. Fair value determinations are reviewed on a regular basis. Because any fair value determination involves a significant amount of judgment, there is a degree of subjectivity inherent in such pricing decisions. Fair value prices determined by the Valuation Designee could differ from those of other market participants, and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security.

Valuation Inputs The following table summarizes the fund's financial instruments, based on the inputs used to determine their fair values on December 31, 2023 (for further detail by category, please refer to the accompanying Portfolio of Investments):

| (\$000s) | Level 1 | | Level 2 | Level 3 | Total Value |
|-------------------------------|-----------------|----|---------|--------------|-----------------|
| Assets | | | | | |
| Common Stocks | \$ 2,266,146 | \$ | 2 | \$ - : | \$ 2,266,148 |
| Short-Term Investments | 9,074 | | 687 | _ | 9,761 |
| Securities Lending Collateral | 17,819 | | _ | _ | 17,819 |
| Total Securities | 2,293,039 | | 689 | - | 2,293,728 |
| Futures Contracts* | 517 | | _ | _ | 517 |
| | | • | | | |
| Total | \$ 2,293,556 | \$ | 689 | \$ _ : | \$ 2,294,245 |

^{*}The fair value presented includes cumulative gain (loss) on open futures contracts; however, the net value reflected on the accompanying Portfolio of Investments is only the unsettled variation margin receivable (payable) at that date.

NOTE 3 - DERIVATIVE INSTRUMENTS

During the year ended December 31, 2023, the fund invested in derivative instruments. As defined by GAAP, a derivative is a financial instrument whose value is derived from an underlying security price, foreign exchange rate, interest rate, index of prices or rates, or other variable; it requires little or no initial investment and permits or requires net settlement. The fund invests in derivatives only if the expected risks and rewards are consistent with its investment objectives, policies, and overall risk profile, as described in its prospectus and Statement of Additional Information. The fund may use derivatives for a variety of purposes and may use them to establish both long and short positions within the fund's portfolio. Potential uses include to hedge against declines in principal value, increase yield, invest in an asset with greater efficiency and at a lower cost than is possible through direct investment, to enhance return, or to adjust credit exposure. The risks associated with the use of derivatives are different from, and potentially much greater than, the risks associated with investing directly in the instruments on which the derivatives are based.

The fund values its derivatives at fair value and recognizes changes in fair value currently in its results of operations. Accordingly, the fund does not follow hedge accounting, even for derivatives employed as economic hedges. Generally, the fund accounts for its derivatives on a gross basis. It does not offset the fair value of derivative

liabilities against the fair value of derivative assets on its financial statements, nor does it offset the fair value of derivative instruments against the right to reclaim or obligation to return collateral. The following table summarizes the fair value of the fund's derivative instruments held as of December 31, 2023, and the related location on the accompanying Statement of Assets and Liabilities, presented by primary underlying risk exposure:

| (\$000s) | Location on Statement of Assets and Liabilities | Fair Value* |
|--------------------|--|-------------|
| Assets | | |
| Equity derivatives | Futures | \$ 517 |
| Total | | \$ 517 |

^{*} The fair value presented includes cumulative gain (loss) on open futures contracts; however, the value reflected on the accompanying Statement of Assets and Liabilities is only the unsettled variation margin receivable (payable) at that date.

Additionally, the amount of gains and losses on derivative instruments recognized in fund earnings during the year ended December 31, 2023, and the related location on the accompanying Statement of Operations is summarized in the following table by primary underlying risk exposure:

| (\$000s) | Location of Gain (Loss) on Statement of Operations | | |
|----------------------------------|--|---------|--|
| | | Futures | |
| Realized Gain (Loss) | | | |
| Equity derivatives | \$ | 1,148 | |
| Total | \$ | 1,148 | |
| Change in Unrealized Gain (Loss) | | | |
| Equity derivatives | \$ | 868 | |
| Total | \$ | 868 | |

Counterparty Risk and Collateral The fund invests in exchange-traded and/or centrally cleared derivative contracts, such as futures, exchange-traded options, and centrally cleared swaps. Counterparty risk on such derivatives is minimal because the clearinghouse provides protection against counterparty defaults. For futures and centrally cleared swaps, the fund is required to deposit collateral in an amount specified by the clearinghouse and the clearing firm (margin requirement), and the margin requirement must be maintained over the life of the contract. Each clearinghouse and clearing firm, in its sole discretion, may adjust the margin requirements applicable to the fund.

Collateral may be in the form of cash or debt securities issued by the U.S. government or related agencies. Cash posted by the fund is reflected as cash deposits in the accompanying financial statements and generally is restricted from withdrawal by the fund; securities posted by the fund are so noted in the accompanying Portfolio of Investments; both remain in the fund's assets. While typically not sold in the same manner as equity or fixed income securities, exchange-traded or centrally cleared derivatives may be closed out only on the exchange or clearinghouse where the contracts were cleared. This ability is subject to the liquidity of underlying positions. As of December 31, 2023, securities valued at \$680,000 had been posted by the fund for exchange-traded and/or centrally cleared derivatives.

Futures Contracts The fund is subject to equity price risk in the normal course of pursuing its investment objectives and uses futures contracts to help manage such risk. The fund may enter into futures contracts as an efficient means of maintaining liquidity while being invested in the market, to facilitate trading, or to reduce transaction costs. A futures contract provides for the future sale by one party and purchase by another of a specified amount of a specific underlying financial instrument at an agreed-upon price, date, time, and place. The fund currently invests only in exchange-traded futures, which generally are standardized as to maturity date, underlying financial instrument, and other contract terms. Payments are made or received by the fund each day to settle daily fluctuations in the value of the contract (variation margin), which reflect changes in the value of the underlying financial instrument. Variation margin is recorded as unrealized gain or loss until the contract is closed. The value of a futures contract included in net assets is the amount of unsettled variation margin; net variation margin receivable is reflected as an asset and net variation margin payable is reflected as a liability on the accompanying Statement of Assets and Liabilities. When a contract is closed, a realized gain or loss is recorded on the accompanying Statement of Operations. Risks related to the use of futures contracts include possible illiquidity of the futures markets, contract prices that can be highly volatile and imperfectly correlated to movements in hedged

security values, and potential losses in excess of the fund's initial investment. During the year ended December 31, 2023, the volume of the fund's activity in futures, based on underlying notional amounts, was generally less than 1% of net assets.

NOTE 4 - OTHER INVESTMENT TRANSACTIONS

Consistent with its investment objective, the fund engages in the following practices to manage exposure to certain risks and/or to enhance performance. The investment objective, policies, program, and risk factors of the fund are described more fully in the fund's prospectus and Statement of Additional Information.

Securities Lending The fund may lend its securities to approved borrowers to earn additional income. Its securities lending activities are administered by a lending agent in accordance with a securities lending agreement. Security loans generally do not have stated maturity dates, and the fund may recall a security at any time. The fund receives collateral in the form of cash or U.S. government securities. Collateral is maintained over the life of the loan in an amount not less than the value of loaned securities; any additional collateral required due to changes in security values is delivered to the fund the next business day. Cash collateral is invested in accordance with investment guidelines approved by fund management. Additionally, the lending agent indemnifies the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a possible loss of income or value if the borrower fails to return the securities, collateral investments decline in value, and the lending agent fails to perform. Securities lending revenue consists of earnings on invested collateral and borrowing fees, net of any rebates to the borrower, compensation to the lending agent, and other administrative costs. In accordance with GAAP, investments made with cash collateral are reflected in the accompanying financial statements, but collateral received in the form of securities is not. At December 31, 2023, the value of loaned securities was \$17,002,000; the value of cash collateral and related investments was \$17,819,000.

Other Purchases and sales of portfolio securities other than in-kind transactions, if any, and short-term securities aggregated \$118,606,000 and \$161,443,000, respectively, for the year ended December 31, 2023.

NOTE 5 - FEDERAL INCOME TAXES

Generally, no provision for federal income taxes is required since the fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and distribute to shareholders all of its taxable income and gains. Distributions determined in accordance with federal income tax regulations may differ in amount or character from net investment income and realized gains for financial reporting purposes.

The fund files U.S. federal, state, and local tax returns as required. The fund's tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return but which can be extended to six years in certain circumstances. Tax returns for open years have incorporated no uncertain tax positions that require a provision for income taxes.

Capital accounts within the financial reporting records are adjusted for permanent book/ tax differences to reflect tax character but are not adjusted for temporary differences. The permanent book/tax adjustments, if any, have no impact on results of operations or net assets. The permanent book/tax adjustments relate primarily to deemed distributions on shareholder redemptions.

The tax character of distributions paid for the periods presented was as follows:

| (\$000s) | | | | |
|--|----------------------|--------|----------------------|--------|
| | December 31, 2023 | | December 31, 2022 | |
| Ordinary income (including short-term capital gains, if any) | \$ | 27,035 | \$ | 27,424 |
| Long-term capital gain | | 5,795 | <u></u> | 85 |
| Total distributions | \$ | 32,830 | \$ | 27,509 |

At December 31, 2023, the tax-basis cost of investments (including derivatives, if any) and gross unrealized appreciation and depreciation were as follows:

| (\$000s) | |
|--|-----------------|
| Cost of investments | \$ 902,918 |
| Unrealized appreciation | \$ 1,451,908 |
| Unrealized depreciation | (61,113) |
| Net unrealized appreciation (depreciation) | \$ 1,390,795 |

At December 31, 2023, the tax-basis components of accumulated net earnings (loss) were as follows:

| (\$000s) | |
|--|-----------------|
| Undistributed ordinary income | \$ 203 |
| Undistributed long-term capital gain | 6,719 |
| Net unrealized appreciation (depreciation) | 1,390,795 |
| Total distributable earnings (loss) | \$ 1,397,717 |

Temporary differences between book-basis and tax-basis components of total distributable earnings (loss) arise when certain items of income, gain, or loss are recognized in different periods for financial statement purposes versus for tax purposes; these differences will reverse in a subsequent reporting period. The temporary differences relate primarily to the deferral of losses from wash sales.

NOTE 6 - FOREIGN TAXES

The fund is subject to foreign income taxes imposed by certain countries in which it invests. Additionally, capital gains realized upon disposition of securities issued in or by certain foreign countries are subject to capital gains tax imposed by those countries. All taxes are computed in accordance with the applicable foreign tax law, and, to the extent permitted, capital losses are used to offset capital gains. Taxes attributable to income are accrued by the fund as a reduction of income. Current and deferred tax expense attributable to capital gains is reflected as a component of realized or change in unrealized gain/loss on securities in the accompanying financial statements. To the extent that the fund has country specific capital loss carryforwards, such carryforwards are applied against net unrealized gains when determining the deferred tax liability. Any deferred tax liability incurred by the fund is included in either Other liabilities or Deferred tax liability on the accompanying Statement of Assets and Liabilities.

NOTE 7 - RELATED PARTY TRANSACTIONS

The fund is managed by T. Rowe Price Associates, Inc. (Price Associates), a wholly owned subsidiary of T. Rowe Price Group, Inc. (Price Group). Price Associates has entered into a sub-advisory agreement(s) with one or more of its wholly owned subsidiaries, to provide investment advisory services to the fund. The investment

management agreement between the fund and Price Associates provides for an annual investment management fee equal to 0.09% of the fund's average daily net assets. The fee is computed daily and paid monthly.

The fund is subject to a contractual expense limitation through the expense limitation date indicated in the table below. During the limitation period, Price Associates is required to waive or pay any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses) that would otherwise cause the fund's ratio of annualized total expenses to average net assets (net expense ratio) to exceed its expense limitation. The fund is required to repay Price Associates for expenses previously waived/paid to the extent its net assets grow or expenses decline sufficiently to allow repayment without causing the fund's net expense ratio (after the repayment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such amounts were waived; or (2) the fund's current expense limitation. However, no repayment will be made more than three years after the date of a payment or waiver. Pursuant to this agreement, expenses were waived/paid by and/or repaid to Price Associates during the year ended December 31, 2023 as indicated in the table below. At December 31, 2023, there were no amounts subject to repayment by the fund. Any repayment of expenses previously waived/paid by Price Associates during the period would be included in the net investment income and expense ratios presented on the accompanying Financial Highlights.

Expense limitation 0.22% Expense limitation date 04/30/26

\$3

(Waived)/repaid during the period (\$000s)

In addition the fund is subject to a permanent contractual expense limitation, pursuant to which Price Associates is required to waive or pay any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses) that would otherwise cause the fund's ratio of annualized total expenses to average net assets (net expense ratio) to exceed 0.30%. The agreement may only be terminated with approval by the fund's shareholders. The fund is required to repay Price Associates for expenses previously waived/paid to the extent the fund's net assets grow or expenses decline sufficiently to allow repayment without causing the fund's net expense ratio (after the repayment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such amounts were waived; or (2) the fund's current expense limitation. However, no

repayment will be made more than three years after the date of a payment or waiver. No management fees were waived or any expenses paid under this arrangement during the year ended December 31, 2023.

In addition, the fund has entered into service agreements with Price Associates and two wholly owned subsidiaries of Price Associates, each an affiliate of the fund (collectively, Price). Price Associates provides certain accounting and administrative services to the fund. T. Rowe Price Services, Inc. provides shareholder and administrative services in its capacity as the fund's transfer and dividend-disbursing agent. T. Rowe Price Retirement Plan Services, Inc. provides subaccounting and recordkeeping services for certain retirement accounts invested in the fund. For the year ended December 31, 2023, expenses incurred pursuant to these service agreements were \$112,000 for Price Associates; \$794,000 for T. Rowe Price Services, Inc.; and \$151,000 for T. Rowe Price Retirement Plan Services, Inc. All amounts due to and due from Price, exclusive of investment management fees payable, are presented net on the accompanying Statement of Assets and Liabilities.

T. Rowe Price Investment Services, Inc. (Investment Services) serves as distributor to the fund. Pursuant to an underwriting agreement, no compensation for any distribution services provided is paid to Investment Services by the fund (except for 12b-1 fees under a Board-approved Rule 12b-1 plan).

The fund may invest its cash reserves in certain open-end management investment companies managed by Price Associates and considered affiliates of the fund: the T. Rowe Price Government Reserve Fund or the T. Rowe Price Treasury Reserve Fund, organized as money market funds (together, the Price Reserve Funds). The Price Reserve Funds are offered as short-term investment options to mutual funds, trusts, and other accounts managed by Price Associates or its affiliates and are not available for direct purchase by members of the public. Cash collateral from securities lending, if any, is invested in the T. Rowe Price Government Reserve Fund. The Price Reserve Funds pay no investment management fees.

The fund may participate in securities purchase and sale transactions with other funds or accounts advised by Price Associates (cross trades), in accordance with procedures adopted by the fund's Board and Securities and Exchange Commission rules, which require, among other things, that such purchase and sale cross trades be effected at the independent current market price of the security. During the year ended December 31, 2023, the fund had no purchases or sales cross trades with other funds or accounts advised by Price Associates.

NOTE 8 - OTHER MATTERS

Unpredictable events such as environmental or natural disasters, war and conflict, terrorism, geopolitical events, and public health epidemics and similar public health threats may significantly affect the economy and the markets and issuers in which the fund invests. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others, and exacerbate other pre-existing political, social, and economic risks.

The global outbreak of COVID-19 and the related governmental and public responses have led and may continue to lead to increased market volatility and the potential for illiquidity in certain classes of securities and sectors of the market either in specific countries or worldwide.

In February 2022, Russian forces entered Ukraine and commenced an armed conflict, leading to economic sanctions imposed on Russia that target certain of its citizens and issuers and sectors of the Russian economy, creating impacts on Russian-related stocks and debt and greater volatility in global markets.

In March 2023, the banking industry experienced heightened volatility, which sparked concerns of potential broader adverse market conditions. The extent of impact of these events on the US and global markets is highly uncertain.

These are recent examples of global events which may have a negative impact on the values of certain portfolio holdings or the fund's overall performance. Management is actively monitoring the risks and financial impacts arising from these events.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of T. Rowe Price Index Trust, Inc. and Shareholders of T. Rowe Price Total Equity Market Index Fund

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of T. Rowe Price Total Equity Market Index Fund (one of the funds constituting T. Rowe Price Index Trust, Inc., referred to hereafter as the "Fund") as of December 31, 2023, the related statement of operations for the year ended December 31, 2023, the statement of changes in net assets for each of the two years in the period ended December 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2023 and the financial highlights for each of the five years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM (CONTINUED)

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2023 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP

Baltimore, Maryland February 16, 2024

We have served as the auditor of one or more investment companies in the T. Rowe Price group of investment companies since 1973.

TAX INFORMATION (UNAUDITED) FOR THE TAX YEAR ENDED 12/31/23

We are providing this information as required by the Internal Revenue Code. The amounts shown may differ from those elsewhere in this report because of differences between tax and financial reporting requirements.

The fund's distributions to shareholders included \$15,697,000 from long-term capital gains, subject to a long-term capital gains tax rate of not greater than 20%.

For taxable non-corporate shareholders, \$29,849,000 of the fund's income represents qualified dividend income subject to a long-term capital gains tax rate of not greater than 20%.

For corporate shareholders, \$28,573,000 of the fund's income qualifies for the dividends-received deduction.

INFORMATION ON PROXY VOTING POLICIES, PROCEDURES, AND RECORDS

A description of the policies and procedures used by T. Rowe Price funds to determine how to vote proxies relating to portfolio securities is available in each fund's Statement of Additional Information. You may request this document by calling 1-800-225-5132 or by accessing the SEC's website, sec.gov.

The description of our proxy voting policies and procedures is also available on our corporate website. To access it, please visit the following Web page:

https://www.troweprice.com/corporate/us/en/utility/policies.html

Scroll down to the section near the bottom of the page that says, "Proxy Voting Guidelines." Click on the links in the shaded box.

Each fund's most recent annual proxy voting record is available on our website and through the SEC's website. To access it through T. Rowe Price, visit the website location shown above, and scroll down to the section near the bottom of the page that says, "Proxy Voting Records." Click on the Proxy Voting Records link in the shaded box.

HOW TO OBTAIN QUARTERLY PORTFOLIO HOLDINGS

The fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The fund's reports on Form N-PORT are available electronically on the SEC's website (sec.gov). In addition, most T. Rowe Price funds disclose their first and third fiscal quarter-end holdings on **troweprice.com**.

TAILORED SHAREHOLDER REPORTS FOR MUTUAL FUNDS AND EXCHANGE TRADED FUNDS

In October 2022, the Securities and Exchange Commission (SEC) adopted rule and form amendments requiring Mutual Funds and Exchange-Traded Funds to transmit concise and visually engaging streamlined annual and semiannual reports that highlight key information to shareholders. Other information, including financial statements, will no longer appear in the funds' shareholder reports but will be available online, delivered free of charge upon request, and filed on a semiannual basis on Form N-CSR. The rule and form amendments have a compliance date of July 24, 2024.

LIQUIDITY RISK MANAGEMENT PROGRAM

In accordance with Rule 22e-4 (Liquidity Rule) under the Investment Company Act of 1940, as amended, the fund has established a liquidity risk management program (Liquidity Program) reasonably designed to assess and manage the fund's liquidity risk, which generally represents the risk that the fund would not be able to meet redemption requests without significant dilution of remaining investors' interests in the fund. The fund's Board of Directors (Board) has appointed the fund's investment adviser, T. Rowe Price Associates, Inc. (Adviser), as the administrator of the Liquidity Program. As administrator, the Adviser is responsible for overseeing the day-to-day operations of the Liquidity Program and, among other things, is responsible for assessing, managing, and reviewing with the Board at least annually the liquidity risk of each T. Rowe Price fund. The Adviser has delegated oversight of the Liquidity Program to a Liquidity Risk Committee (LRC), which is a cross-functional committee composed of personnel from multiple departments within the Adviser.

The Liquidity Program's principal objectives include supporting the T. Rowe Price funds' compliance with limits on investments in illiquid assets and mitigating the risk that the fund will be unable to timely meet its redemption obligations. The Liquidity Program also includes a number of elements that support the management and assessment of liquidity risk, including an annual assessment of factors that influence the fund's liquidity and the periodic classification and reclassification of a fund's investments into categories that reflect the LRC's assessment of their relative liquidity under current market conditions. Under the Liquidity Program, every investment held by the fund is classified at least monthly into one of four liquidity categories based on estimations of the investment's ability to be sold during designated time frames in current market conditions without significantly changing the investment's market value.

As required by the Liquidity Rule, at a meeting held on July 24, 2023, the Board was presented with an annual assessment that was prepared by the LRC on behalf of the Adviser and addressed the operation of the Liquidity Program and assessed its adequacy and effectiveness of implementation, including any material changes to the Liquidity Program and the determination of each fund's Highly Liquid Investment Minimum (HLIM). The annual assessment included consideration of the following factors, as applicable: the fund's investment strategy and liquidity of portfolio investments during normal and reasonably foreseeable stressed conditions, including whether the investment strategy is appropriate for an open-end fund, the extent to which the strategy involves a relatively concentrated portfolio or large positions in particular issuers, and the use of borrowings for investment purposes and derivatives; short-term and long-term cash flow projections covering both normal and reasonably foreseeable stressed conditions; and holdings of cash and cash equivalents, as well as available borrowing arrangements.

LIQUIDITY RISK MANAGEMENT PROGRAM (CONTINUED)

For the fund and other T. Rowe Price funds, the annual assessment incorporated a report related to a fund's holdings, shareholder and portfolio concentration, any borrowings during the period, cash flow projections, and other relevant data for the period of April 1, 2022, through March 31, 2023. The report described the methodology for classifying a fund's investments (including any derivative transactions) into one of four liquidity categories, as well as the percentage of a fund's investments assigned to each category. It also explained the methodology for establishing a fund's HLIM and noted that the LRC reviews the HLIM assigned to each fund no less frequently than annually.

During the period covered by the annual assessment, the LRC has concluded, and reported to the Board, that the Liquidity Program continues to operate adequately and effectively and is reasonably designed to assess and manage the fund's liquidity risk.

ABOUT THE FUND'S DIRECTORS AND OFFICERS

Your fund is overseen by a Board of Directors (Board) that meets regularly to review a wide variety of matters affecting or potentially affecting the fund, including performance, investment programs, compliance matters, advisory fees and expenses, service providers, and business and regulatory affairs. The Board elects the fund's officers, who are listed in the final table. The directors who are also employees or officers of T. Rowe Price are considered to be "interested" directors as defined in Section 2(a)(19) of the 1940 Act because of their relationships with T. Rowe Price Associates, Inc. (T. Rowe Price), and its affiliates. The business address of each director and officer is 100 East Pratt Street, Baltimore, Maryland 21202. The Statement of Additional Information includes additional information about the fund directors and is available without charge by calling a T. Rowe Price representative at 1-800-638-5660.

INDEPENDENT DIRECTORS(a)

| Name (Year of Birth) Year Elected | |
|---|---|
