

## Extended Equity Market Index Fund (PEXMX)

This annual shareholder report contains important information about Extended Equity Market Index Fund (the "fund") for the period of January 1, 2024 to December 31, 2024. You can find the fund's prospectus, financial information on Form N-CSR (which includes required tax information for dividends), holdings, proxy voting information, and other information at [www.troweprice.com/prospectus](http://www.troweprice.com/prospectus). You can also request this information without charge by contacting T. Rowe Price at 1-800-638-5660 or [info@troweprice.com](mailto:info@troweprice.com) or contacting your intermediary.

### What were the fund costs for the last year? (based on a hypothetical \$10,000 investment)

	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Extended Equity Market Index Fund	\$26	0.24%

### What drove fund performance during the past 12 months?

- Small- and mid-cap U.S. stocks produced strong gains for the second consecutive year in 2024, and various equity indexes reached all-time highs during the year. In the final months of the period, equity investors generally welcomed not only looser monetary policy, but also the U.S. election results. Former President Donald Trump defeated Vice President Kamala Harris in the presidential election, and Republican victories in the House of Representatives and Senate races gave them majorities in both chambers of Congress.
- Financials names produced robust results during the period as the Federal Reserve (Fed) began reducing interest rates in mid-September to avoid, in the words of Fed Chair Jerome Powell, "further cooling in labor market conditions." Capital markets companies performed very well during the year, as KKR and Robinhood Markets advanced strongly.
- No sectors detracted from absolute returns during the reporting period.
- The trajectories of the economy, corporate earnings, and interest rates are unpredictable, and investor sentiment toward the broad market and various market segments could change without warning. Our main task is not to determine which stocks or sectors may perform best but, rather, to replicate the structure of the S&P Completion Index and closely track its performance.

### How has the fund performed?

Cumulative Returns of a Hypothetical \$10,000 Investment as of December 31, 2024

Average Annual Total Returns			
	1 Year	5 Years	10 Years
Extended Equity Market Index Fund	16.67%	9.72%	9.27%
Russell 3000 Index (Regulatory Benchmark)	23.81	13.86	12.55
S&P Completion Index (Strategy Benchmark)	16.88	9.77	9.33

The preceding line graph shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The fund’s performance information included in the line graph and table above is compared with a regulatory required index that represents an overall securities market (Regulatory Benchmark). In addition, the line graph and table may also include one or more indexes that more closely aligns to the fund's investment strategy (Strategy Benchmark(s)). Due to new SEC Rules on shareholder reporting the fund adopted a new broad-based securities market index, referred to as the Regulatory Benchmark. Market index returns do not include expenses, which are deducted from fund returns. The fund's total return figures reflect the reinvestment of dividends and capital gains, if any. Neither the fund's returns nor the index returns reflect the deduction of taxes that a shareholder would pay on fund distributions or redemptions of fund shares. **The fund's past performance is not a good predictor of the fund's future performance.** Updated performance information can be found at [www.troweprice.com](http://www.troweprice.com).

What are some fund statistics?

Fund Statistics			
Total Net Assets (000s)	\$1,011,977	Investment Advisory Fees Paid (000s)	\$891
