RPGEX	T. ROWE PRICE  Global Growth Stock  Fund
PAGLX	Global Growth Stock Fund-Advisor Class
RGGIX	Global Growth Stock Fund-I Class
	For more insights from T. Rowe Price investment professionals, go to <b>troweprice.com</b> .

#### HIGHLIGHTS

- The Global Growth Stock Fund underperformed its benchmark, the MSCI All Country World Index Net, and performed in line with the Lipper peer group average for the 12-month reporting period.
- Relative underperformance was largely driven by stock selection and an overweight in financials. Our private placement holdings also meaningfully detracted from relative performance. Holdings in the consumer discretionary sector also hurt relative performance. On the positive side, health care names contributed to relative returns. At the regional level, holdings in developed Europe detracted, while stock picks in North America contributed.
- We have continued to maintain a broadly balanced portfolio with sector exposures relatively neutral to our core benchmark. Our largest overweights at the end of the reporting period were in materials and industrials and businesses, although these were still relatively modest overweights, and our largest underweights were in consumer discretionary and utilities. At the regional level, emerging markets represent a meaningful overweight due to the structural, long-term growth drivers we see in select countries.
- An environment of higher interest rates and inflation is more challenging for stocks as real growth becomes harder to come by; however, we believe the current macroeconomic backdrop is well suited to our active management style as our fundamental approach to investing and robust global research platform give us an information advantage.

# Go Paperless

Going paperless offers a host of benefits, which include:

- Timely delivery of important documents
- Convenient access to your documents anytime, anywhere
- Strong security protocols to safeguard sensitive data

## Waive your account service fee by going paperless.\*

\*An account service fee will be charged annually for each T. Rowe Price mutual fund account unless you meet criteria for a fee waiver. Go to troweprice.com/personal-investing/help/fees-and-minimums.html to learn more about this account service fee, including other ways to waive it.

Market Commentary

# Dear Shareholder

Most major global stock and bond indexes produced positive results during your fund's fiscal year, the 12-month period ended October 31, 2023, although a downturn over the past six months offset some of the strong gains recorded in the first half of the period. Global economies managed to avoid the recession that was widely predicted at the start of 2023, but signs that central banks might need to keep interest rates higher for longer than previously expected weighed on market sentiment.

Growth stocks outperformed value shares over the 12-month period, and stocks in developed markets generally outpaced their counterparts in emerging markets. Currency movements were mixed over the period, although a weaker dollar versus major European currencies was beneficial for U.S. investors in European securities.

Technology companies benefited from investor enthusiasm for artificial intelligence developments and produced some of the strongest results in the equity market. Within the S&P 500 Index, the communication services and information technology sectors were lifted by the rally in tech-related companies and recorded significant gains. The financials sector partly recovered from the failure of three large regional banks during the period but still finished in negative territory.

Corporate fundamentals were broadly supportive. Although year-over-year earnings growth contracted in the first and second quarters of 2023, results were better than expected, and preliminary estimates pointed to a resumption of growth in the third quarter.

The U.S. economy was the strongest among the major markets during the period, with gross domestic product growth coming in at 4.9% in the third quarter's initial estimate, the highest since the end of 2021. Growth in Europe and Japan was more sluggish, and China's economy was beset by worries about its property sector after an initial boost from its decision at the end of 2022 to lift most of its pandemic-related restrictions. A protracted debt ceiling standoff in the U.S., the ongoing conflict between Ukraine and Russia, and the outbreak of war in the Middle East following the attack on Israel by Hamas produced headwinds for markets at various times.

Investors also remained focused on inflation as price increases moderated but remained well above the Federal Reserve's 2% target. In response, the Fed continued to raise its short-term lending benchmark rate, lifting it to a target range of 5.25% to 5.50% by the end of July, the highest level since March 2001.

U.S. Treasury yields increased as the Fed tightened monetary policy and investors priced in the possibility that the central bank may have to keep rates higher for longer than previously anticipated. In addition, Treasuries were pressured by Fitch Ratings' decision to downgrade the credit rating of U.S. government debt from the highest level, AAA, to AA+ along with expectations for higher levels of borrowing by the Treasury Department. The yield on the benchmark 10-year Treasury note briefly reached 5.00% in October for the first time since late 2007 before falling back to 4.88% by period-end.

Increasing yields over the past six months led to weak results across most of the fixed income market, although high yield bonds, which are less sensitive to rising rates, held up relatively well as default rates remained low by historical standards.

Global economies and markets showed surprising resilience in 2023, but considerable uncertainty remains as we look ahead to 2024. Geopolitical events, the path of monetary policy, and the impact of the Fed's rate hikes on the economy all raise the potential for additional volatility. We believe this environment makes skilled active management a critical tool for identifying risks and opportunities, and our investment teams will continue to use fundamental research to identify securities that have the potential to add value to your portfolio over the long term.

Thank you for your continued confidence in T. Rowe Price.

Sincerely,

Robert Sharps
CEO and President

Solut Su Jumpa

Management's Discussion of Fund Performance

#### **INVESTMENT OBJECTIVE**

The fund seeks long-term growth of capital through investments primarily in the common stocks of large-cap companies throughout the world, including the U.S.

#### **FUND COMMENTARY**

## How did the fund perform in the past 12 months?

The Global Growth Stock Fund returned 6.95% in the 12-month period ended October 31, 2023. The fund underperformed the MSCI All Country World Index Net benchmark, which returned 10.50%, and performed in line with the Lipper Global Multi-Cap Growth Funds Average, which returned 6.82%. (Returns for the Advisor and I Class shares varied slightly, reflecting their different fee structures. *Past performance cannot guarantee future results.*)

PERFORMANCE COMPAR	ISON					
	Total Return					
Periods Ended 10/31/23	6 Months	12 Months				
Global Growth Stock Fund	-1.04%	6.95%				
Global Growth Stock Fund- Advisor Class	-1.15	6.79				
Global Growth Stock Fund- I Class	-0.94	7.18				
MSCI All Country World Index Net	-1.93	10.50				
Lipper Global Multi-Cap Growth Funds Average	-3.01	6.82				

# What factors influenced the fund's performance?

The fund's underperformance was largely driven by stock selection and an overweight in financials. Holdings in consumer discretionary also hurt relative performance. Our private placement holdings were another meaningful relative detractor. On the positive side, stock picks in health care boosted relative performance. At the regional level, holdings in

developed Europe detracted the most from relative results, while stock selection in North America helped.

Within financials, our position in discount broker Charles Schwab was the largest relative detractor. Charles Schwab does not carry the same credit risk as banks, but shares were caught in the crossfire of the U.S. regional bank turmoil in March. Cash sorting headwinds further pressured the stock during the period. While the cash sorting issues are likely to pressure near-term earnings,

we continue to appreciate the company's dominant competitive positions in fast-growing wealth channels, which we believe makes Schwab a premier asset gatherer. (Please refer to the portfolio of investments for a complete list of holdings and the amount each represents in the portfolio.)

Holdings in the consumer discretionary sector also hurt relative returns, most notably our position in electric vehicle maker Rivian Automotive. While shares of Rivian rebounded in the latter part of the period, the stock had previously been weighed down by supply chain constraints and suboptimal operational execution that raised investor concerns about the firm's cash burn rate. We remain constructive on Rivian, which we believe is well positioned to benefit from the automotive industry's most powerful trend of electrification as it targets mid-size luxury and large luxury, the largest, most profitable segments of this growing market.

On the positive side, our position in Eli Lilly within the health care sector contributed to relative performance. During the period, shares of Eli Lilly advanced following the U.S. Food and Drug Administration approval of the company's new diabetes drug tirzepatide. Positive results from a number of other drugs in the company's pipeline also drove shares higher throughout the year. Shares appreciated further after management increased the company's 2023 revenue guidance and earnings outlook. We believe the company has several late-stage assets with high probabilities of success that will benefit its visibility and revenue over the next 12 to 18 months. We also expect that Eli Lilly's base business will remain stable against competition and drug pricing pressures, and we are encouraged by management's goal of increasing the company's operating margin percentage over the next five years.

### How is the fund positioned?

For much of the reporting period, markets were able to grind higher as they shrugged off continued interest rate increases, still high inflation, heightened geopolitical risk, and turmoil in the U.S. and European banking sectors. However, near the end of the year, markets became more volatile as investors began to accept the new economic reality of higher inflation and higher interest rates for longer than most people had expected at the start of the year. This type of environment is challenging for stocks as real growth becomes harder to come by; however, we are optimistic about our ability to find quality companies that can deliver strong, durable growth over the long term, because we believe it means our fundamental approach to investing and robust global research platform give us the information advantage needed to succeed in a volatile and uncertain world.

SECTOR DIVERSIFICATION	N	
	Percent of	Net Assets
	4/30/23	10/31/23
Information Technology	21.5%	23.8%

Utilities	0.5	0.6
Other and Reserves	0.1	0.2
Total	100.0%	100.0%
Historical weightings reflect co	urrent industry/	sector

classifications.

At the end of October, the fund's largest sector overweights were in materials and industrials and business services, although these were not generally significant overweights. Our largest underweights were in consumer discretionary and utilities, and we meaningfully reduced our exposure to financials, though still maintain a modest overweight.

The consumer discretionary sector is one of the largest underweights in the portfolio and where we meaningfully reduced our exposure over the year. The pandemic pulled forward years of e-commerce share gains, and we have an expanded

and diverse set of names levered to that trend. However, recognizing that the world has changed over the last year with consumer trends shifting yet again amid rapidly rising inflation, we have pragmatically scaled back the extent of our e-commerce bet. We have also set a higher bar for higher-valuation, longer-duration growth stocks but are retaining those truly advantaged, disruptive businesses we believe can deliver outsized market share gains and accelerating economic returns over the medium term. Over the period, some of our more notable eliminations were in Porsche, GM, Home Depot, and Etsy, and we also meaningfully trimmed our positions in Tesla, MercadoLibre, and Rivian. However, we did add high-conviction, durable growth names that we think can do well over the next two to three years, such as Jollibee Foods, Las Vegas Sands, Yum China, Amadeus IT, Louis Vuitton, and Sony.

We also meaningfully reduced our position in financials, though we still maintain a modest overweight position. The turmoil in the banking sector that occurred earlier in the year appears to have moderated, but with capital market requirements for banks likely to be higher than originally anticipated, we scaled back some of our exposure to U.S. banks. We remain meaningfully underweight European and Japanese banks that broadly have more negative

credit exposure and are not as well run as their U.S. counterparts. We have more exposure to insurance companies than we have typically had in the past, as an improving pricing environment and better yields on portfolio investments have created a positive near- and medium-term setup for the group. We continue to own several emerging market financials we believe are undervalued and underappreciated and have exposure to high-quality alternative asset managers and leading capital markets companies as well. Some of our most notable trades included eliminating Goldman Sachs, Wells Fargo, and Signature Bank, while reducing our exposure to J.P. Morgan Chase & Co. We picked up more nontraditional financials like LPL Financial, AIG, Asia Commercial Bank, and Apollo Global Management.

Regionally, our exposure to developed Europe decreased meaningfully, while our exposure to North America increased. Other regions had more modest changes. We continue to favor fast-growing emerging market countries that have low debt-to-gross domestic product ratios and attractive demographic growth, such as India, Indonesia, and Vietnam. As the growth outlook for the developed world has become less attractive, we think it is prudent to have exposure to regions with real growth that are already used to higher interest rates.

# What is portfolio management's outlook?

Equity markets struggled in recent months, yet year-to-date returns have still exceeded most expectations in a year marked by elevated inflation, meaningfully higher interest rates, and ongoing geopolitical tensions. Markets have begun looking to the other side of post-pandemic normalization, with companies having broadly taken cost actions in recognition of the new reality they face. Exciting developments around generative artificial intelligence have tipped global market sentiment to a "glass half full" mentality, especially for the largest-cap companies with adaptable business models, the most data, and the most processing power.

Even though markets have performed better than we expected thus far in 2023, in our view, it has been more about people's worst fears avoided rather than about absolute strength. The U.S. has avoided a recession and has been much more resilient than Europe, which continues to be very anemic, and China, which has been incredibly weak following its post-COVID reopening. However, U.S. growth has still been disappointing in any historical context, and overall global gross domestic product growth projections for 2023 and 2024 are below pre-pandemic levels.

Headline inflation has shown signs of easing, but wage inflation has proven to be quite sticky. This is making the Federal Reserve's job harder, and it likely means rates will need to stay higher for longer. Corporate earnings did not collapse as much as feared but are still down year over year, and we are seeing steady negative revisions to 2023 and 2024 numbers. The bank failures earlier in the year did not grow into a global financial crisis, but we have tight liquidity in the system, commercial real estate issues that are starting to feed through, and government fiscal and debt issues. Tensions between the U.S. and China have softened somewhat, but geopolitics remain more challenged than they were pre-pandemic, and we still have war on the ground in Europe and an escalating Israel-Gaza conflict.

We think all of this adds up to a world with higher interest rates, more challenging growth prospects, and likely lower corporate earnings as we move forward. While that may seem gloomy, we believe the more challenging investment environment also means there will be bigger winners and losers, which should provide ample opportunity for active managers. We remain incredibly excited that we have finally exited the COVID era and believe we are entering a time for real quality, durable growth companies—the kind of companies we invest in—to shine.

#### RISKS OF INTERNATIONAL INVESTING

Funds that invest overseas generally carry more risk than funds that invest strictly in U.S. assets. Funds investing in a single country or in a limited geographic region tend to be riskier than more diversified funds. Risks can result from varying stages of economic and political development; differing regulatory environments, trading days, and accounting standards; and higher transaction costs of non-U.S. markets. Non-U.S. investments are also subject to currency risk, or a decline in the value of a foreign currency versus the U.S. dollar, which reduces the dollar value of securities denominated in that currency.

### **GROWTH OF \$10,000**

This chart shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with benchmarks, which include a broad-based market index and may also include a peer group average or index. Market indexes do not include expenses, which are deducted from fund returns as well as mutual fund averages and indexes.

# GLOBAL GROWTH STOCK FUND

	As of 10/31/23
—— Global Growth Stock Fund	\$22,455
MSCI All Country World Index Net	19,322
Lipper Global Multi-Cap Growth Funds Average	20,428

Note: Performance for the Advisor and I Class shares will vary due to their differing fee structures. See the Average Annual Compound Total Return table on the next page.

## **AVERAGE ANNUAL COMPOUND TOTAL RETURN**

Periods Ended 10/31/23	1 Year	5 Years	10 Years	Since Inception	Inception Date
Global Growth Stock Fund	6.95%	8.46%	8.43%	-	-
Global Growth Stock Fund- Advisor Class	6.79	8.22	8.26	-	-
Global Growth Stock Fund- I Class	7.18	8.65	-	9.57%	3/6/17

This table shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. Past performance cannot guarantee future results.

## **EXPENSE RATIO**

Global Growth Stock Fund	0.91%
Global Growth Stock Fund-Advisor Class	1.10
Global Growth Stock Fund-I Class	0.69

The expense ratio shown is as of the fund's most recent prospectus. This number may vary from the expense ratio shown elsewhere in this report because it is based on a different time period and, if applicable, includes acquired fund fees and expenses but does not include fee or expense waivers.

#### **FUND EXPENSE EXAMPLE**

As a mutual fund shareholder, you may incur two types of costs: (1) transaction costs, such as redemption fees or sales loads, and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other fund expenses. The following example is intended to help you understand your ongoing costs (in dollars) of investing in the fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the most recent six-month period and held for the entire period.

Please note that the fund has three share classes: The original share class (Investor Class) charges no distribution and service (12b-1) fee, the Advisor Class shares are offered only through unaffiliated brokers and other financial intermediaries and charge a 0.25% 12b-1 fee, and I Class shares are available to institutionally oriented clients and impose no 12b-1 or administrative fee payment. Each share class is presented separately in the table.

#### **Actual Expenses**

The first line of the following table (Actual) provides information about actual account values and expenses based on the fund's actual returns. You may use the information on this line, together with your account balance, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number on the first line under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

## **Hypothetical Example for Comparison Purposes**

The information on the second line of the table (Hypothetical) is based on hypothetical account values and expenses derived from the fund's actual expense ratio and an assumed 5% per year rate of return before expenses (not the fund's actual return). You may compare the ongoing costs of investing in the fund with other funds by contrasting this 5% hypothetical example and the 5% hypothetical examples that appear in the shareholder reports of the other funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

### FUND EXPENSE EXAMPLE (CONTINUED)

**Note:** T. Rowe Price charges an annual account service fee of \$20, generally for accounts with less than \$10,000. The fee is waived for any investor whose T. Rowe Price mutual fund accounts total \$50,000 or more; accounts electing to receive electronic delivery of account statements, transaction confirmations, prospectuses, and shareholder reports; or accounts of an investor who is a T. Rowe Price Personal Services or Enhanced Personal Services client (enrollment in these programs generally requires T. Rowe Price assets of at least \$250,000). This fee is not included in the accompanying table. If you are subject to the fee, keep it in mind when you are estimating the ongoing expenses of investing in the fund and when comparing the expenses of this fund with other funds.

You should also be aware that the expenses shown in the table highlight only your ongoing costs and do not reflect any transaction costs, such as redemption fees or sales loads. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. To the extent a fund charges transaction costs, however, the total cost of owning that fund is higher.

#### GLOBAL GROWTH STOCK FUND

	Beginning Account Value 5/1/23	Ending Account Value 10/31/23	Expenses Paid During Period* 5/1/23 to 10/31/23
Investor Class Actual	\$1,000.00	\$989.60	\$4.61
Hypothetical (assumes 5% return before expenses)	1,000.00	1,020.57	4.69
Advisor Class Actual	1,000.00	988.50	5.51
Hypothetical (assumes 5% return before expenses)	1,000.00	1,019.66	5.60
I Class Actual	1,000.00	990.60	3.46
Hypothetical (assumes 5% return before expenses)	1,000.00	1,021.73	3.52

<sup>\*</sup> Expenses are equal to the fund's annualized expense ratio for the 6-month period, multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half year (184), and divided by the days in the year (365) to reflect the half-year period. The annualized expense ratio of the Investor Class was 0.92%, the Advisor Class was 1.10%, and the I Class was 0.69%.

#### QUARTER-END RETURNS

Periods Ended 9/30/23	1 Year	5 Years	10 Years	Since Inception	Inception Date
Global Growth Stock Fund	15.58%	7.32%	9.32%	-	-
Global Growth Stock Fund- Advisor Class	15.37	7.09	9.15	-	-
Global Growth Stock Fund- I Class	15.87	7.52	_	10.19%	3/6/17

The fund's performance information represents only past performance and is not necessarily an indication of future results. Current performance may be lower or higher than the performance data cited. Share price, principal value, and return will vary, and you may have a gain or loss when you sell your shares. For the most recent month-end performance, please visit our website (troweprice.com) or contact a T. Rowe Price representative at 1-800-225-5132 or, for Advisor and I Class shares, 1-800-638-8790.

This table provides returns through the most recent calendar quarter-end rather than through the end of the fund's fiscal period. It shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. When assessing performance, investors should consider both short- and long-term returns.

#### **AFFILIATED COMPANIES**

(\$000s)

The fund may invest in certain securities that are considered affiliated companies. As defined by the 1940 Act, an affiliated company is one in which the fund owns 5% or more of the outstanding voting securities, or a company that is under common ownership or control. The following securities were considered affiliated companies for all or some portion of the year ended October 31, 2023. Net realized gain (loss), investment income, change in net unrealized gain/loss, and purchase and sales cost reflect all activity for the period then ended.

	Change in Net

# NOTES TO FINANCIAL STATEMENTS

T. Rowe Price International Funds, Inc. (the corporation) is registered under the Investment Company Act of 1940 (the 1940 Act). The Global Growth Stock Fund (the fund) is a diversified, open-end management investment company established by the corporation. The fund seeks long-term growth of capital through investments primarily in the common stocks of large-cap companies throughout the world, including the U.S. The fund has three classes of shares: the Global Growth Stock Fund (Investor Class), the Global Growth Stock Fund-Advisor Class (Advisor Class), and the Global Growth Stock Fund-I Class (I Class). Advisor Class shares are sold only through various brokers and other financial intermediaries. I Class shares require a \$500,000 initial investment minimum, although the minimum generally is waived or reduced for financial intermediaries, eligible retirement plans, and certain other accounts. Prior to November 15, 2021, the initial investment minimum was \$1 million and was generally waived for financial intermediaries, eligible retirement plans, and other certain accounts. As a result of the reduction in the I Class minimum, certain assets transferred from the Investor Class to the I Class. This transfer of shares from Investor Class to I Class is reflected in the Statement of Changes in Net Assets within the Capital shares transactions as Shares redeemed and Shares sold, respectively. The Advisor Class operates under a Board-approved Rule 12b-1 plan pursuant to which the class compensates financial intermediaries for distribution, shareholder servicing, and/ or certain administrative services; the Investor and I Classes do not pay Rule 12b-1 fees. Each class has exclusive voting rights on matters related solely to that class; separate voting rights on matters that relate to all classes; and, in all other respects, the same rights and obligations as the other classes.

#### **NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES**

Basis of Preparation The fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946 (ASC 946). The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), including, but not limited to, ASC 946. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity.

Investment Transactions, Investment Income, and Distributions Investment transactions are accounted for on the trade date basis. Income and expenses are recorded on the accrual basis. Realized gains and losses are reported on the identified cost basis. Income tax-related interest and penalties, if incurred, are recorded as income tax expense. Dividends received from other investment companies are reflected as dividend income; capital gain distributions are reflected as realized gain/loss. Dividend income and capital gain distributions are recorded on the ex-dividend date. Earnings on investments recognized as partnerships for federal income tax purposes reflect the tax character of such earnings. Distributions from REITs are initially recorded as dividend income and, to the extent such represent a return of capital or capital gain for tax purposes, are reclassified when such information becomes available. Non-cash dividends, if any, are recorded at the fair market value of the asset received. Proceeds from litigation payments, if any, are included in either net realized gain (loss) or change in net unrealized gain/loss from securities. Distributions to shareholders are recorded on the ex-dividend date. Income distributions, if any, are declared and paid by each class annually. A capital gain distribution, if any, may also be declared and paid by the fund annually.

Currency Translation Assets, including investments, and liabilities denominated in foreign currencies are translated into U.S. dollar values each day at the prevailing exchange rate, using the mean of the bid and asked prices of such currencies against U.S. dollars as provided by an outside pricing service. Purchases and sales of securities, income, and expenses are translated into U.S. dollars at the prevailing exchange rate on the respective date of such transaction. The effect of changes in foreign currency exchange rates on realized and unrealized security gains and losses is not bifurcated from the portion attributable to changes in market prices.

Class Accounting Shareholder servicing, prospectus, and shareholder report expenses incurred by each class are charged directly to the class to which they relate. Expenses common to all classes, investment income, and realized and unrealized gains and losses are allocated to the classes based upon the relative daily net assets of each class. The Advisor Class pays Rule 12b-1 fees, in an amount not exceeding 0.25% of the class's average daily net assets.

**In-Kind Redemptions** In accordance with guidelines described in the fund's prospectus, and when considered to be in the best interest of all shareholders, the fund may distribute portfolio securities rather than cash as payment for a redemption of fund shares (in-kind redemption). Gains and losses realized on in-kind redemptions are not recognized for tax purposes and are reclassified from undistributed realized gain (loss) to paid-in capital. During the year ended October 31, 2023, the fund realized \$4,471,000 of net gain on \$10,051,000 of in-kind redemptions.

Capital Transactions Each investor's interest in the net assets of the fund is represented by fund shares. The fund's net asset value (NAV) per share is computed at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. However, the NAV per share may be calculated at a time other than the normal close of the NYSE if trading on the NYSE is restricted, if the NYSE closes earlier, or as may be permitted by the SEC. Purchases and redemptions of fund shares are transacted at the next-computed NAV per share, after receipt of the transaction order by T. Rowe Price Associates, Inc., or its agents.

New Accounting Guidance In June 2022, the FASB issued Accounting Standards Update (ASU), ASU 2022-03, Fair Value Measurement (Topic 820) – Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions, which clarifies that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. The amendments under this ASU are effective for fiscal years beginning after December 15, 2023; however, the fund opted to early adopt, as permitted, effective December 1, 2022. Adoption of the guidance did not have a material impact on the fund's financial statements.

**Indemnification** In the normal course of business, the fund may provide indemnification in connection with its officers and directors, service providers, and/or private company investments. The fund's maximum exposure under these arrangements is unknown; however, the risk of material loss is currently considered to be remote.

#### **NOTE 2 - VALUATION**

Fair Value The fund's financial instruments are valued at the close of the NYSE and are reported at fair value, which GAAP defines as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fund's Board of Directors (the Board) has designated T. Rowe Price Associates, Inc. as the fund's valuation designee (Valuation Designee). Subject to oversight by the Board, the Valuation Designee performs the following functions in performing fair value determinations: assesses and manages valuation risks; establishes and applies fair value methodologies; tests fair value methodologies; and evaluates pricing vendors and pricing agents. The duties and responsibilities of the Valuation Designee are performed by its Valuation Committee. The Valuation Designee provides periodic reporting to the Board on valuation matters.

Various valuation techniques and inputs are used to determine the fair value of financial instruments. GAAP establishes the following fair value hierarchy that categorizes the inputs used to measure fair value:

- Level 1 quoted prices (unadjusted) in active markets for identical financial instruments that the fund can access at the reporting date
- Level 2 inputs other than Level 1 quoted prices that are observable, either directly or indirectly (including, but not limited to, quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in inactive markets, interest rates and yield curves, implied volatilities, and credit spreads)
- Level 3 unobservable inputs (including the Valuation Designee's assumptions in determining fair value)

Observable inputs are developed using market data, such as publicly available information about actual events or transactions, and reflect the assumptions that market participants would use to price the financial instrument. Unobservable inputs are those for which market data are not available and are developed using the best information available about the assumptions that market participants would use to price the financial instrument. GAAP requires valuation techniques to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. When multiple inputs are used to derive fair value, the financial instrument is assigned to the level within the fair value hierarchy based on the lowest-level input that is significant to the fair value of the financial instrument. Input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level but rather the degree of judgment used in determining those values.

Valuation Techniques Equity securities, including exchange-traded funds, listed or regularly traded on a securities exchange or in the over-the-counter (OTC) market are valued at the last quoted sale price or, for certain markets, the official closing price at the time the valuations are made. OTC Bulletin Board securities are valued at the mean of the closing bid and asked prices. A security that is listed or traded on more than one exchange is valued at the quotation on the exchange determined to be the primary market for such security. Listed securities not traded on a particular day are valued at the mean of the closing bid and asked prices for domestic securities and the last quoted sale or closing price for international securities.

The last quoted prices of non-U.S. equity securities may be adjusted to reflect the fair value of such securities at the close of the NYSE, if the Valuation Designee determines that developments between the close of a foreign market and the close of the NYSE

will affect the value of some or all of the fund's portfolio securities. Each business day, the Valuation Designee uses information from outside pricing services to evaluate the quoted prices of portfolio securities and, if appropriate, decide whether it is necessary to adjust quoted prices to reflect fair value by reviewing a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. The Valuation Designee uses outside pricing services to provide it with quoted prices and information to evaluate or adjust those prices. The Valuation Designee cannot predict how often it will use quoted prices and how often it will determine it necessary to adjust those prices to reflect fair value.

Investments in mutual funds are valued at the mutual fund's closing NAV per share on the day of valuation. Assets and liabilities other than financial instruments, including short-term receivables and payables, are carried at cost, or estimated realizable value, if less, which approximates fair value.

Investments for which market quotations are not readily available or deemed unreliable are valued at fair value as determined in good faith by the Valuation Designee. The Valuation Designee has adopted methodologies for determining the fair value of investments for which market quotations are not readily available or deemed unreliable, including the use of other pricing sources. Factors used in determining fair value vary by type of investment and may include market or investment specific considerations. The Valuation Designee typically will afford greatest weight to actual prices in arm's length transactions, to the extent they represent orderly transactions between market participants, transaction information can be reliably obtained, and prices are deemed representative of fair value. However, the Valuation Designee may also consider other valuation methods such as market-based valuation multiples; a discount or premium from market value of a similar, freely traded security of the same issuer; discounted cash flows; yield to maturity; or some combination. Fair value determinations are reviewed on a regular basis. Because any fair value determination involves a significant amount of judgment, there is a degree of subjectivity inherent in such pricing decisions. Fair value prices determined by the Valuation Designee could differ from those of other market participants, and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security.

**Valuation Inputs** The following table summarizes the fund's financial instruments, based on the inputs used to determine their fair values on October 31, 2023 (for further detail by category, please refer to the accompanying Portfolio of Investments):

(\$000s)	Level 1	Level 2	Level 3	Total Value
Assets

	 ······································			
Total	\$ 602,414	\$ 285,153	\$ 58,529	\$ 946,096

Following is a reconciliation of the fund's Level 3 holdings for the year ended October 31, 2023. Gain (loss) reflects both realized and change in unrealized gain/loss on Level 3 holdings during the period, if any, and is included on the accompanying Statement of Operations. The change in unrealized gain/loss on Level 3 instruments held at October 31, 2023, totaled \$(10,672,000) for the year ended October 31, 2023.

Total	\$	68,051	\$	(10,562)	\$ 2,904	\$	(1,864)	\$ 58,529

In accordance with GAAP, the following table provides quantitative information about significant unobservable inputs used to determine the fair valuations of the fund's Level 3 assets, by class of financial instrument. Because the Valuation Designee considers a wide variety of factors and inputs, both observable and unobservable, in determining fair values, the unobservable inputs presented do not reflect all inputs significant to the fair value determination.

Investments in Securities	Value (000s)	Valuation Technique(s)+	Significant Unobservable Input(s)		Weighted Average of Input(s)*	Impact to Valuation from an Increase in Input**

<sup>+</sup> Valuation techniques may change in order to reflect the Valuation Designee's judgment of current market participant assumptions.

#### **NOTE 3 - OTHER INVESTMENT TRANSACTIONS**

Consistent with its investment objective, the fund engages in the following practices to manage exposure to certain risks and/or to enhance performance. The investment objective, policies, program, and risk factors of the fund are described more fully in the fund's prospectus and Statement of Additional Information.

<sup>\*</sup> Unobservable inputs were weighted by the relative fair value of the instruments.

<sup>\*\*</sup>Represents the directional change in the fair value of the Level 3 investment(s) that would have resulted from an increase in the corresponding input at period end. A decrease in the unobservable input would have had the opposite effect. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

<sup>#</sup> No quantitative unobservable inputs significant to the valuation technique were created by the Valuation Designee.

Emerging and Frontier Markets The fund invests, either directly or through investments in other T. Rowe Price funds, in securities of companies located in, issued by governments of, or denominated in or linked to the currencies of emerging and frontier market countries. Emerging markets, and to a greater extent frontier markets, tend to have economic structures that are less diverse and mature, less developed legal and regulatory regimes, and political systems that are less stable, than those of developed countries. These markets may be subject to greater political, economic, and social uncertainty and differing accounting standards and regulatory environments that may potentially impact the fund's ability to buy or sell certain securities or repatriate proceeds to U.S. dollars. Emerging markets securities exchanges are more likely to experience delays with the clearing and settling of trades, as well as the custody of holdings by local banks, agents, and depositories. Such securities are often subject to greater price volatility, less liquidity, and higher rates of inflation than U.S. securities. Investing in frontier markets is typically significantly riskier than investing in other countries, including emerging markets.

**Restricted Securities** The fund invests in securities that are subject to legal or contractual restrictions on resale. Prompt sale of such securities at an acceptable price may be difficult and may involve substantial delays and additional costs.

Securities Lending The fund may lend its securities to approved borrowers to earn additional income. Its securities lending activities are administered by a lending agent in accordance with a securities lending agreement. Security loans generally do not have stated maturity dates, and the fund may recall a security at any time. The fund receives collateral in the form of cash or U.S. government securities. Collateral is maintained over the life of the loan in an amount not less than the value of loaned securities; any additional collateral required due to changes in security values is delivered to the fund the next business day. Cash collateral is invested in accordance with investment guidelines approved by fund management. Additionally, the lending agent indemnifies the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a possible loss of income or value if the borrower fails to return the securities, collateral investments decline in value, and the lending agent fails to perform. Securities lending revenue consists of earnings on invested collateral and borrowing fees, net of any rebates to the borrower, compensation to the lending agent, and other administrative costs. In accordance with GAAP, investments made with cash collateral are reflected in the accompanying financial statements, but collateral received in the form of securities is not. At October 31, 2023, the value of loaned securities was \$21,272,000; the value of cash collateral and related investments was \$21,480,000.

**Other** Purchases and sales of portfolio securities other than short-term securities aggregated \$635,007,000 and \$776,324,000, respectively, for the year ended October 31, 2023.

#### **NOTE 4 - FEDERAL INCOME TAXES**

Generally, no provision for federal income taxes is required since the fund intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and distribute to shareholders all of its taxable income and gains. Distributions determined in accordance with federal income tax regulations may differ in amount or character from net investment income and realized gains for financial reporting purposes.

The fund files U.S. federal, state, and local tax returns as required. The fund's tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return, but which can be extended to six years in certain circumstances. Tax returns for open years have incorporated no uncertain tax positions that require a provision for income taxes.

Capital accounts within the financial reporting records are adjusted for permanent book/ tax differences to reflect tax character but are not adjusted for temporary differences. The permanent book/tax adjustments, if any, have no impact on results of operations or net assets. The permanent book/tax adjustments relate primarily to redemptions in kind, the character of net currency gains or losses, the character of income on passive foreign investment companies, the recharacterization of distributions and the character of foreign capital gains taxes.

The tax character of distributions paid for the periods presented was as follows:

(\$000s)				
	October 2023	-	(	October 31, 2022
Ordinary income (including short-term capital gains, if any)	\$	1,770	\$	82,866
Long-term capital gain		_		48,854
Total distributions	\$	1,770	\$	131,720

At October 31, 2023, the tax-basis cost of investments (including derivatives, if any) and gross unrealized appreciation and depreciation were as follows:

(\$000s)		
Cost of investments	\$	783,367
Unrealized appreciation	\$	231,322
Unrealized depreciation	***************************************	(69,792)
Net unrealized appreciation (depreciation)	\$	161,530
At October 31, 2023, the tax-basis components of accumulated ne as follows:	t earnings	(loss) were
(\$000s)		
Undistributed ordinary income	\$	2,610

Net unrealized appreciation (depreciation) 161,530

Loss carryforwards and deferrals (100,139)

Total distributable earnings (loss) \$ 64,001

Temporary differences between book-basis and tax-basis components of total distributable earnings (loss) arise when certain items of income, gain, or loss are recognized in different periods for financial statement purposes versus for tax purposes; these differences will reverse in a subsequent reporting period. The temporary differences relate primarily to the deferral of losses from wash sales and the realization of gains/losses on passive foreign investment companies. The loss carryforwards and deferrals primarily relate to capital loss carryforwards. Capital loss carryforwards are available indefinitely to offset future realized capital gains.

#### **NOTE 5 - FOREIGN TAXES**

The fund is subject to foreign income taxes imposed by certain countries in which it invests. Additionally, capital gains realized upon disposition of securities issued in or by certain foreign countries are subject to capital gains tax imposed by those countries. All taxes are computed in accordance with the applicable foreign tax law, and, to the extent permitted, capital losses are used to offset capital gains. Taxes attributable to income are accrued by the fund as a reduction of income. Current and deferred tax expense attributable to capital gains is reflected as a component of realized or change

in unrealized gain/loss on securities in the accompanying financial statements. To the extent that the fund has country specific capital loss carryforwards, such carryforwards are applied against net unrealized gains when determining the deferred tax liability. Any deferred tax liability incurred by the fund is included in either Other liabilities or Deferred tax liability on the accompanying Statement of Assets and Liabilities.

#### **NOTE 6 - RELATED PARTY TRANSACTIONS**

The fund is managed by T. Rowe Price Associates, Inc. (Price Associates), a wholly owned subsidiary of T. Rowe Price Group, Inc. (Price Group). The investment management agreement between the fund and Price Associates provides for an annual investment management fee, which is computed daily and paid monthly. The fee consists of an individual fund fee, equal to 0.35% of the fund's average daily net assets, and a group fee. The group fee rate is calculated based on the combined net assets of certain mutual funds sponsored by Price Associates (the group) applied to a graduated fee schedule, with rates ranging from 0.48% for the first \$1 billion of assets to 0.260% for assets in excess of \$845 billion. The fund's group fee is determined by applying the group fee rate to the fund's average daily net assets. At October 31, 2023, the effective annual group fee rate was 0.29%. Price Associates has agreed to permanently waive a portion of the fund's annual investment management fee in order to limit the fund's management fees to 0.65% of the fund's average daily net assets. This agreement can only be modified or terminated with approval by the fund's shareholders. The fund has no obligation to repay fees waived under this arrangement. No management fees were waived under this arrangement for the year ended October 31, 2023.

The Advisor Class is subject to a contractual expense limitation through the expense limitation date indicated in the table below. During the limitation period, Price Associates is required to waive its management fee or pay any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses) that would otherwise cause the class's ratio of annualized total expenses to average net assets (net expense ratio) to exceed its expense limitation. The class is required to repay Price Associates for expenses previously waived/paid to the extent the class's net assets grow or expenses decline sufficiently to allow repayment without causing the class's net expense ratio (after the repayment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such amounts were waived; or (2) the class's current expense limitation. However, no repayment will be made more than three years after the date of a payment or waiver.

The I Class is also subject to an operating expense limitation (I Class Limit) pursuant to which Price Associates is contractually required to pay all operating expenses of the I Class, excluding management fees; interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses, to the extent such operating expenses, on an annualized basis, exceed the I Class Limit. This agreement will continue through the expense limitation date indicated in the table below, and may be renewed, revised, or revoked only with approval of the fund's Board. The I Class is required to repay Price Associates for expenses previously paid to the extent the class's net assets grow or expenses decline sufficiently to allow repayment without causing the class's operating expenses (after the repayment is taken into account) to exceed the lesser of: (1) the I Class Limit in place at the time such amounts were paid; or (2) the current I Class Limit. However, no repayment will be made more than three years after the date of a payment or waiver.

Pursuant to these agreements, expenses were waived/paid by and/or repaid to Price Associates during the year ended October 31, 2023 as indicated in the table below. Including these amounts, expenses previously waived/paid by Price Associates in the amount of \$65,000 remain subject to repayment by the fund at October 31, 2023. Any repayment of expenses previously waived/paid by Price Associates during the period would be included in the net investment income and expense ratios presented on the accompanying Financial Highlights.

	Advisor Class	I Class
Expense limitation/I Class Limit	1.10%	0.05%
Expense limitation date	02/28/25	02/28/25
(Waived)/repaid during the period (\$000s)	\$—(1)	\$(56)

<sup>(1)</sup> Amount rounds to less than \$1,000

In addition, the fund has entered into service agreements with Price Associates and two wholly owned subsidiaries of Price Associates, each an affiliate of the fund (collectively, Price). Price Associates provides certain accounting and administrative services to the fund. T. Rowe Price Services, Inc. provides shareholder and administrative services in its capacity as the fund's transfer and dividend-disbursing agent. T. Rowe Price Retirement Plan Services, Inc. provides subaccounting and recordkeeping services for certain retirement accounts invested in the Investor Class and Advisor Class. For the year ended October 31, 2023, expenses incurred pursuant to these service agreements were \$112,000 for Price Associates; \$540,000 for T. Rowe Price Services, Inc.; and \$7,000 for T. Rowe

Price Retirement Plan Services, Inc. All amounts due to and due from Price, exclusive of investment management fees payable, are presented net on the accompanying Statement of Assets and Liabilities.

T. Rowe Price Investment Services, Inc. (Investment Services) serves as distributor to the fund. Pursuant to an underwriting agreement, no compensation for any distribution services provided is paid to Investment Services by the fund (except for 12b-1 fees under a Board-approved Rule 12b-1 plan).

The fund may invest its cash reserves in certain open-end management investment companies managed by Price Associates and considered affiliates of the fund: the T. Rowe Price Government Reserve Fund or the T. Rowe Price Treasury Reserve Fund, organized as money market funds (together, the Price Reserve Funds). The Price Reserve Funds are offered as short-term investment options to mutual funds, trusts, and other accounts managed by Price Associates or its affiliates and are not available for direct purchase by members of the public. Cash collateral from securities lending, if any, is invested in the T. Rowe Price Government Reserve Fund. The Price Reserve Funds pay no investment management fees.

As of October 31, 2023, T. Rowe Price Group, Inc., or its wholly owned subsidiaries, owned 302,683 shares of the I Class, representing 2% of the I Class's net assets.

The fund may participate in securities purchase and sale transactions with other funds or accounts advised by Price Associates (cross trades), in accordance with procedures adopted by the fund's Board and Securities and Exchange Commission rules, which require, among other things, that such purchase and sale cross trades be effected at the independent current market price of the security. During the year ended October 31, 2023, the fund had no purchases or sales cross trades with other funds or accounts advised by Price Associates.

Price Associates has voluntarily agreed to reimburse the fund from its own resources on a monthly basis for the cost of investment research embedded in the cost of the fund's securities trades. This agreement may be rescinded at any time. For the year ended October 31, 2023, this reimbursement amounted to \$41,000, which is included in Net realized gain (loss) on Securities in the Statement of Operations.

#### **NOTE 7 - BORROWING**

To provide temporary liquidity, the fund may borrow from other T. Rowe Price-sponsored mutual funds under an interfund borrowing program developed and managed by Price Associates. The program permits the borrowing and lending of cash at rates beneficial to both the borrowing and lending funds. Pursuant to program guidelines, loans totaling 10% or more of a borrowing fund's total assets require collateralization at 102% of the value of the loan; loans of less than 10% are unsecured. During the year ended October 31, 2023, the fund incurred \$9,000 in interest expense related to outstanding borrowings on five days in the average amount of \$12,760,000 and at an average annual rate of 5.42%. At October 31, 2023, there were no borrowings outstanding.

#### **NOTE 8 - OTHER MATTERS**

Unpredictable events such as environmental or natural disasters, war and conflict, terrorism, geopolitical events, and public health epidemics and similar public health threats may significantly affect the economy and the markets and issuers in which the fund invests. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others, and exacerbate other pre-existing political, social, and economic risks.

The global outbreak of COVID-19 and the related governmental and public responses have led and may continue to lead to increased market volatility and the potential for illiquidity in certain classes of securities and sectors of the market either in specific countries or worldwide.

In February 2022, Russian forces entered Ukraine and commenced an armed conflict, leading to economic sanctions imposed on Russia that target certain of its citizens and issuers and sectors of the Russian economy, creating impacts on Russian-related stocks and debt and greater volatility in global markets.

In March 2023, the banking industry experienced heightened volatility, which sparked concerns of potential broader adverse market conditions. The extent of impact of these events on the US and global markets is highly uncertain.

These are recent examples of global events which may have a negative impact on the values of certain portfolio holdings or the fund's overall performance. Management is actively monitoring the risks and financial impacts arising from these events.

#### **NOTE 9 - SUBSEQUENT EVENT**

Effective November 1, 2023, the fund's Investor Class (class) is subject to a contractual expense limitation through February 28, 2025. During the limitation period, Price Associates is required to waive or pay any class operating expenses excluding interest; expenses related to borrowings, taxes, and brokerage; non-recurring, extraordinary expenses; and acquired fund fees and expenses that would otherwise cause the class's ratio of annualized total expenses to average daily net assets (net expense ratio) to exceed its expense limitation of 0.99%. Any class expenses waived or paid by Price Associates pursuant to a contractual expense limitation are subject to reimbursement to Price Associates by the class whenever the class expenses are below the contractual expense limitation. However, no reimbursement by the class to Price Associates will be made more than three years after the waiver or payment of class expenses by Price Associates or if such reimbursement would result in the class expenses exceeding the contractual expense limitation in place at the time such amounts were waived or paid by Price Associates.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of T. Rowe Price International Funds, Inc. and Shareholders of T. Rowe Price Global Growth Stock Fund

#### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of T. Rowe Price Global Growth Stock Fund (one of the funds constituting T. Rowe Price International Funds, Inc., referred to hereafter as the "Fund") as of October 31, 2023, the related statement of operations for the year ended October 31, 2023, the statement of changes in net assets for each of the two years in the period ended October 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended October 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of October 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended October 31, 2023 and the financial highlights for each of the five years in the period ended October 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

# **Basis for Opinion**

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

# REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM (CONTINUED)

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2023 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP

Baltimore, Maryland December 19, 2023

We have served as the auditor of one or more investment companies in the T. Rowe Price group of investment companies since 1973.

### TAX INFORMATION (UNAUDITED) FOR THE TAX YEAR ENDED 10/31/23

We are providing this information as required by the Internal Revenue Code. The amounts shown may differ from those elsewhere in this report because of differences between tax and financial reporting requirements.

The fund's distributions to shareholders included \$669,000 from short-term capital gains.

For taxable non-corporate shareholders, \$9,626,000 of the fund's income represents qualified dividend income subject to a long-term capital gains tax rate of not greater than 20%.

For corporate shareholders, \$4,767,000 of the fund's income qualifies for the dividends-received deduction.

# INFORMATION ON PROXY VOTING POLICIES, PROCEDURES, AND RECORDS

A description of the policies and procedures used by T. Rowe Price funds to determine how to vote proxies relating to portfolio securities is available in each fund's Statement of Additional Information. You may request this document by calling 1-800-225-5132 or by accessing the SEC's website, sec.gov.

The description of our proxy voting policies and procedures is also available on our corporate website. To access it, please visit the following Web page:

https://www.troweprice.com/corporate/us/en/utility/policies.html

Scroll down to the section near the bottom of the page that says, "Proxy Voting Guidelines." Click on the links in the shaded box.

Each fund's most recent annual proxy voting record is available on our website and through the SEC's website. To access it through T. Rowe Price, visit the website location shown above, and scroll down to the section near the bottom of the page that says, "Proxy Voting Records." Click on the Proxy Voting Records link in the shaded box.

#### **RESULTS OF PROXY VOTING**

A Special Meeting of Shareholders was held on July 24, 2023 for shareholders of record on April 7, 2023, to elect the following director-nominees to serve on the Board of all Price Funds. The newly elected Directors took office effective July 24, 2023.

The results of the voting were as follows:

	Votes For	Votes Withheld
Melody Bianchetto	5,316,532,865	42,338,636
Mark J. Parrell	5,314,462,793	44,388,756
Kellye L. Walker	5,314,203,135	44,903,088
Eric L. Veiel	5,309,419,858	49,685,657

Teresa Bryce Bazemore, Bruce W. Duncan, Robert J. Gerrard, Jr., Paul F. McBride and David Oestreicher continue to serve as Directors on the Board of all Price Funds.

#### **HOW TO OBTAIN QUARTERLY PORTFOLIO HOLDINGS**

The fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The fund's reports on Form N-PORT are available electronically on the SEC's website (sec.gov). In addition, most T. Rowe Price funds disclose their first and third fiscal quarter-end holdings on **troweprice.com**.

# TAILORED SHAREHOLDER REPORTS FOR MUTUAL FUNDS AND EXCHANGE TRADED FUNDS

In October 2022, the Securities and Exchange Commission (SEC) adopted rule and form amendments requiring Mutual Funds and Exchange-Traded Funds to transmit concise and visually engaging streamlined annual and semiannual reports that highlight key information to shareholders. Other information, including financial statements, will no longer appear in the funds' shareholder reports but will be available online, delivered free of charge upon request, and filed on a semiannual basis on Form N-CSR. The rule and form amendments have a compliance date of July 24, 2024.

#### LIQUIDITY RISK MANAGEMENT PROGRAM

In accordance with Rule 22e-4 (Liquidity Rule) under the Investment Company Act of 1940, as amended, the fund has established a liquidity risk management program (Liquidity Program) reasonably designed to assess and manage the fund's liquidity risk, which generally represents the risk that the fund would not be able to meet redemption requests without significant dilution of remaining investors' interests in the fund. The fund's Board of Directors (Board) has appointed the fund's investment adviser, T. Rowe Price Associates, Inc. (Adviser), as the administrator of the Liquidity Program. As administrator, the Adviser is responsible for overseeing the day-to-day operations of the Liquidity Program and, among other things, is responsible for assessing, managing, and reviewing with the Board at least annually the liquidity risk of each T. Rowe Price fund. The Adviser has delegated oversight of the Liquidity Program to a Liquidity Risk Committee (LRC), which is a cross-functional committee composed of personnel from multiple departments within the Adviser.

The Liquidity Program's principal objectives include supporting the T. Rowe Price funds' compliance with limits on investments in illiquid assets and mitigating the risk that the fund will be unable to timely meet its redemption obligations. The Liquidity Program also includes a number of elements that support the management and assessment of liquidity risk, including an annual assessment of factors that influence the fund's liquidity and the periodic classification and reclassification of a fund's investments into categories that reflect the LRC's assessment of their relative liquidity under current market conditions. Under the Liquidity Program, every investment held by the fund is classified at least monthly into one of four liquidity categories based on estimations of the investment's ability to be sold during designated time frames in current market conditions without significantly changing the investment's market value.

As required by the Liquidity Rule, at a meeting held on July 24, 2023, the Board was presented with an annual assessment that was prepared by the LRC on behalf of the Adviser and addressed the operation of the Liquidity Program and assessed its adequacy and effectiveness of implementation, including any material changes to the Liquidity Program and the determination of each fund's Highly Liquid Investment Minimum (HLIM). The annual assessment included consideration of the following factors, as applicable: the fund's investment strategy and liquidity of portfolio investments during normal and reasonably foreseeable stressed conditions, including whether the investment strategy is appropriate for an open-end fund, the extent to which the strategy involves a relatively concentrated portfolio or large positions in particular issuers, and the use of borrowings for investment purposes and derivatives; short-term and long-term cash flow projections covering both normal and reasonably foreseeable stressed conditions; and holdings of cash and cash equivalents, as well as available borrowing arrangements.

## LIQUIDITY RISK MANAGEMENT PROGRAM (CONTINUED)

For the fund and other T. Rowe Price funds, the annual assessment incorporated a report related to a fund's holdings, shareholder and portfolio concentration, any borrowings during the period, cash flow projections, and other relevant data for the period of April 1, 2022, through March 31, 2023. The report described the methodology for classifying a fund's investments (including any derivative transactions) into one of four liquidity categories, as well as the percentage of a fund's investments assigned to each category. It also explained the methodology for establishing a fund's HLIM and noted that the LRC reviews the HLIM assigned to each fund no less frequently than annually.

During the period covered by the annual assessment, the LRC has concluded, and reported to the Board, that the Liquidity Program continues to operate adequately and effectively and is reasonably designed to assess and manage the fund's liquidity risk.

#### ABOUT THE FUND'S DIRECTORS AND OFFICERS

Your fund is overseen by a Board of Directors (Board) that meets regularly to review a wide variety of matters affecting or potentially affecting the fund, including performance, investment programs, compliance matters, advisory fees and expenses, service providers, and business and regulatory affairs. The Board elects the fund's officers, who are listed in the final table. The directors who are also employees or officers of T. Rowe Price are considered to be "interested" directors as defined in Section 2(a)(19) of the 1940 Act because of their relationships with T. Rowe Price Associates, Inc. (T. Rowe Price), and its affiliates. The business address of each director and officer is 100 East Pratt Street, Baltimore, Maryland 21202. The Statement of Additional Information includes additional information about the fund directors and is available without charge by calling a T. Rowe Price representative at 1-800-638-5660.

#### INDEPENDENT DIRECTORS(a)

Name (Year of Birth) Year Elected	
[Number of T. Rowe Price Portfolios Overseen]	Principal Occupation(s) and Directorships of Public Companies and Other Investment Companies During the Past Five Years
