Benchmark	Russell 3000 Financial Index
Expense Information (as of the most recent Prospectus)	0.89%
Fiscal Year End	December 31
12B-1 Fee	-

MARKET COMMENTARY

U.S. equities endured their first monthly losses since March. As measured by various Russell indexes, growth stocks outperformed value stocks among small- and mid-caps, while value did better than growth among large-caps. Within the S&P 500 Index, the energy, communication services, and information technology sectors underperformed, while materials and utilities were the only sectors to display positive returns, albeit modest ones.

Equities declined during the month as the continued gridlock in Washington over another potential round of stimulus and the controversy over replacing Supreme Court Justice Ruth Bader Ginsburg weighed on the market. Investors appeared particularly concerned about the lack of additional aid for fiscally strained states and municipalities, while news on potential coronavirus vaccines as well as fears over a second wave of the virus in Europe were also important drivers of sentiment. The month's economic data generally pointed to a continuing, but slowing, recovery. Declines in weekly jobless claims stalled, although gauges of consumer confidence rose sharply. Manufacturing data largely came in better than expected, but the service sector continued to struggle with cautious consumers. Housing remained the bright spot in the economy, with new home sales reaching their highest level since September 2006.

Investors face an exceptionally uncertain environment in the final months of 2020. While the economic recovery is continuing, its pace appears to be slowing considerably, and most observers agree that some additional stimulus will be needed to speed the recovery. However, not all "risks" are to the downside. Firms and individuals continue to benefit from record-low interest rates, and many consumers appear to have the wherewithal to increase spending as they grow more confident. The biggest boost to confidence, of course, would come from a successful coronavirus vaccine, as well as effective and widely available treatment options. The timing of a commercial rollout of a vaccine and what proportion of the population will choose to take it remain open questions for investors.

PERFORMANCE

(NAV, total return)

	One Month	Three Months	Year-to-Date	One Year	Annualized			
					Three Years	Five Years	Ten Years	Fifteen Years
Financial Services Fund	-4.19%	1.53%	-19.74%	-14.31%	-0.52%	5.79%	8.97%	4.96%

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit troweprice.com. Read it carefully. The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

Financial services companies may be hurt when interest rates rise sharply and may also be vulnerable to rapidly rising inflation. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details. For Sourcing Information, please see Additional Disclosures.

Past performance is not a reliable indicator of future performance. Figures are calculated using monthly data and are net of fees.**INDUSTRY ATTRIBUTION DATA VS. RUSSELL 3000 FINANCIAL INDEX (TOP AND BOTTOM 5 BY TOTAL VALUE ADDED)**

(12 months ended September 30, 2020)

Past performance is not a reliable indicator of future performance. Numbers may not total due to rounding; all other numbers are percentages. Analysis represents the total performance of the portfolio as calculated by the FactSet attribution model and is inclusive of other assets that will not receive a classification assignment in the detailed structure shown. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested. Sources: Financial data and analytics provider FactSet. Copyright 2020 FactSet. All Rights Reserved. Analysis by T. Rowe Price Associates, Inc. T. Rowe Price uses a custom structure for sector and industry reporting for this product. Figures are shown gross of fees. Returns would be lower as a result of the deduction of such fees. Performance returns are in USD. For Sourcing Information, please see Additional Disclosures.

Definitions

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.
