### Market Commentary

International developed markets stocks advanced, extending a remarkable run of outperformance relative to U.S. markets, despite volatility primarily related to concerns regarding artificial intelligence (AI)-in terms of both disruption and massive capex spending. Geopolitical tensions remained elevated, with heightened U.S.-Iran tensions and continued uncertainty surrounding Ukraine-Russia developments. Developed European equities advanced. Investors continued to rotate into Europe, drawn by more reasonable valuations and improving corporate earnings. Economic indicators were generally positive. Eurozone composite Purchasing Managers' Index (PMI) rose to a three-month high, led by Germany, where manufacturing posted its first expansionary reading since August 2025 and new orders hit four-year highs. The United Kingdom saw its composite PMI hit a 22-month high with manufacturing climbing to an 18-month high. Developed Asian equity markets surged in February, led by a powerful rally in Japan, with market sentiment improving after Prime Minister Takaichi's election win reduced political uncertainty. This also led to higher Japanese government bond prices and a weaker yen. Emerging markets stocks advanced. A weakening U.S. dollar provided a powerful tailwind for developing-world assets, while the Supreme Court's International Emergency Economic Powers Act ruling lifted sentiment by signaling reduced tariff risk for key trading partners including China and India. All 11 sectors of the MSCI EAFE Index advanced, led by real estate, consumer staples, materials, and energy. The financials, health care, and information technology sectors lagged but still finished in positive territory.

**Risks: Foreign investing:** Non-U.S. securities tend to be more volatile and have lower overall liquidity than investments in U.S. securities and may lose value because of adverse local, political, social, or economic developments overseas, or due to changes in the exchange rates between foreign currencies and the U.S. dollar. **Emerging markets:** Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. See the prospectus for more detail on the fund's principal risks.

**Past performance is not a guarantee or a reliable indicator of future results.** Analysis represents the total performance of the portfolio as calculated by the FactSet attribution model and is inclusive of other assets. Non-equity positions are excluded from structure shown. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted to USD using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested.
