Market Commentary

U.S. stocks advanced in April, with many major indexes enjoying their strongest month in years as artificial intelligence (AI)-related strength and largely favorable corporate earnings overshadowed concerns over the conflict in Iran. As measured by Russell indexes, small-caps fared best, followed by large-cap stocks and mid-caps. Growth led value in small-caps and large-caps, while value outperformed growth in mid-caps. Within the S&P 500 Index, communication services, information technology, and consumer discretionary led returns while energy and health care lagged.

Throughout the month, ongoing uncertainty around the trajectory of the conflict in Iran influenced equity markets given the attendant uncertainty around energy supply and associated costs. But as April progressed, investor focus shifted toward datapoints suggesting the U.S. economy remained resilient, and optimism around the strength of the AI data center build-out and capital expenditure in the space served as a tailwind near the end of the month.

We continue to monitor the impact of the conflict in Iran on equity markets as its scale and duration can have a significant impact going forward, with further potential influence on equity markets from macroeconomic data. Even as AI enthusiasm persists, we continue to see signs of broadening across the market, which could continue to benefit more cyclical and inflation-sensitive segments. We believe this creates an attractive setup for our active research platform to help deftly maneuver in an ever-changing environment and add value going forward.

Past performance is not a guarantee or a reliable indicator of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Investing style: Because the fund may hold stocks with either growth or value characteristics, it could underperform other funds that take a strictly growth or value approach to investing when one style is currently in favor. **Sector exposure:** Issuers in the same economic sector may be similarly affected by economic or market events, making the fund more vulnerable to unfavorable developments in that economic sector than funds that invest more broadly. See the prospectus for more detail on the fund's principal risks.

Past performance is not a guarantee or a reliable indicator of future results. Analysis represents the total performance of the portfolio as calculated by the FactSet attribution model and is inclusive of other assets. Non-equity positions are excluded from structure shown. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted to USD using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested.
