Expense Information (as of the most recent Prospectus) ⁽¹⁾	0.94%(Gross) 0.76%(Net)

⁽¹⁾T. Rowe Price Associates, Inc., permanently waives a portion of the fund's management fee in order to ensure that the fund's management fee does not duplicate the management fees of each underlying fund. T. Rowe Price funds would be required to seek regulatory approval in order to terminate this arrangement.

Market Commentary

Global equity and fixed income markets were narrowly mixed in December. Equities were initially buoyed by expectations for a December interest rate cut due to signs of a weakening labor market. Indeed, the Federal Reserve, which reduced rates in September and October despite continued elevated inflation, lowered rates again on December 10. There were hints of sector rotation during the month, as investors seemed to favor cyclical sectors that have previously underperformed but could benefit from lower interest rates and fiscal stimulus legislation passed during the summer. On the other hand, concerns about heightened valuations and enormous capital expenditures among artificial intelligence-related stocks periodically weighed on some high-growth segments.

While equity valuations remain elevated, underlying fundamentals appear supportive, helped by ongoing fiscal stimulus, easing monetary policy, and a regulatory environment that is generally favorable for risk assets. We continue to see valuation disparities across markets, and favor sectors and regions where policy tailwinds and reasonable valuations converge. Policy easing is likely not fully appreciated by markets, offering potential support for equities. Key risks to global markets include narrowness of AI trends supporting earnings and economic growth and markets, sticky inflation, potential for quickening labor market declines, and ongoing geopolitical tensions. We continue to monitor the economic landscape and maintain our disciplined investment process as we look for opportunities moving forward.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Interest rates: A rise in interest rates typically causes the price of a fixed rate debt instrument to fall and its yield to rise. Conversely, a decline in interest rates typically causes the price of a fixed rate debt instrument to rise and the yield to fall. **Emerging markets:** Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. **Derivatives:** The use of derivatives exposes the fund to additional volatility and potential losses. A derivative involves risks different from, and possibly greater than, the risks associated with investing directly in the assets on which the derivative is based, including liquidity risk, valuation risk, correlation risk, market risk, interest rate risk, leverage risk, counterparty and credit risk, operational risk, management risk, legal risk, and regulatory risk. See the prospectus for more detail on the fund's principal risks.
