

## PORTFOLIO UPDATE

# Capital Appreciation Fund - I Class

As of March 31, 2024

**Portfolio Manager:**  
David Giroux

**Managed Fund Since:**  
2006

**Joined Firm:**  
1998

## INVESTMENT OBJECTIVE

The fund seeks long-term capital appreciation by investing primarily in common stocks. It may also hold fixed income and other securities to help preserve principal value.

## FUND INFORMATION

Symbol	TRAIX
CUSIP	77954M303

Benchmark	S&P 500 Index
Expense Information (as of the most recent Prospectus)*	0.61% (Gross) 0.59% (Net)
Fiscal Year End	December 31
12B-1 Fee	—

\*The I Class operates under a contractual operating expense limitation that expires on April 30, 2024.

## PERFORMANCE

(NAV, total return)

	One Month	Three Months	One Year	Annualized			
				Three Years	Five Years	Ten Years	Fifteen Years
Capital Appreciation Fund - I Class	1.89%	5.19%	17.60%	7.95%	11.53%	10.86%	13.39%
S&P 500 Index	3.22	10.56	29.88	11.49	15.05	12.96	15.63

**Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com).** The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund referred to as the "investor class"). The total return figures for the I Class shares have been calculated using the performance data of the investor class up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

All funds are subject to market risk, including possible loss of principal.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

## MARKET COMMENTARY

U.S. equities advanced in March, capping a strong quarter that lifted several broad indexes to all-time highs. As measured by various Russell indexes, mid-cap equities fared best, followed by small-caps and large-caps. Value outperformed growth in all market capitalizations. Within the S&P 500, energy led returns, followed by utilities and materials. All sectors advanced, with consumer discretionary lagging and producing a modest positive return. As measured by the Bloomberg U.S. Aggregate Bond Index, bonds generated positive returns.

Investors remained optimistic about the corporate profit potential stemming from advances in artificial intelligence (AI) and were encouraged by the outcome of the Federal Reserve's mid-March monetary policy meeting. Although the central bank kept short-term interest rates steady, policymakers maintained their year-end 2023 "dot plot" projections for three quarter-point interest rate cuts by the end of 2024 despite recent upticks in inflation readings.

While market sentiment remained positive in March, driving a sustained rally in equities, we think valuations appear elevated and that the potential upside in stocks has moderated. We tend to take a contrarian approach and are focused on identifying less-cyclical names that we believe are trading at reasonable valuations. Against this backdrop, our multiyear view of markets is relatively cautious. We remain committed to finding the best risk-adjusted opportunities across the asset class spectrum to help balance our goals of preserving invested capital and generating equity-like returns over the long term with less risk than the broader equity market.

**RISK RETURN CHARACTERISTICS**

(Five Years ended March 31, 2024)

	Active Share* (as of 3/31/24)	Annualized Std. Deviation	Alpha	Beta	R-Squared	Information Ratio	Sharpe Ratio	Tracking Error

**Past performance is not a reliable indicator of future performance.** Numbers may not total due to rounding; all numbers are percentages. Analysis represents the equity only performance of the portfolio as calculated by the FactSet attribution model and is exclusive of non-equity positions and equity options. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted to USD using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested. Sources: Financial data and analytics provider FactSet. Copyright 2024 FactSet. All Rights Reserved. MSCI/S&P GICS Sectors; Analysis by T. Rowe Price. T. Rowe Price uses the current MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting. Figures are shown gross of fees. Returns would be lower as a result of the deduction of such fees. Performance returns are in USD.

## Definitions

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.
