Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com). The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

^oExcludes the effect of contractual expense limitation arrangements. If the expense waiver was not in effect for the 30-Day period shown, there may not be a difference in the 30-day SEC yields shown above.

This Fund involves a high-risk approach to income from foreign bonds, and its share price could fluctuate significantly. The Fund is subject to the risks unique to international investing, including unfavorable changes in currency values, as well as credit risk and interest rate risk. To the extent the Fund invests in emerging markets, the international investing risks are heightened and may result in higher short-term volatility.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

MARKET COMMENTARY

Emerging markets debt posted positive returns in March as credit spreads narrowed. Within EM corporates, high yield issuers outperformed their investment-grade peers. All corporate sectors rose, with transport outperforming other sectors. All regions advanced for the period, driven by Africa.

The J.P. Morgan Global Manufacturing Purchasing Managers' Index rose, with forward-looking details indicating further improvement over coming months. New orders rose relative to inventories, and more countries experienced an improvement in data. In the U.S., the Federal Reserve left the fed funds rate unchanged, as expected, and made upward revisions to the median growth and inflation forecasts for 2024 in the latest summary of economic projections. The Bank of Japan delivered its first interest rate hike in 17 years, ending its negative interest rate policy that began in 2016, and terminated its yield-curve control. At China's annual National People's Congress session, the government will aim for an economic growth target of around 5% for 2024, although the fiscal deficit target was unchanged at 3%, disappointing investors who had hoped for more aggressive stimulus measures.

Central banks in Czech Republic, Mexico, Brazil, Argentina, and Colombia reduced their reference rates amid moderating inflation. Egypt's central bank delivered a surprise 600 basis points rate hike; allowed the Egyptian pound to float, causing a significant devaluation; and eased some capital control restrictions. The International Monetary Fund subsequently announced an agreement to expand the size of its lending program for Egypt, and multiple ratings agencies upgraded their outlooks for Egypt's credit rating to positive. Türkiye's central bank delivered a surprise rate hike, raising the main policy rate by 500 basis points as inflation remained high.

Definitions

Weighted Average Effective Duration is a calculation that seeks to measure the price sensitivity of a bond Fund to changes in interest rates. In general, the longer the average duration, the greater the Fund's sensitivity to interest rates.

Additional Disclosures

Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit [troweprice.com](https://www.troweprice.com). Read it carefully.

Credit ratings are statements of opinions and are not statements of fact.

Fund Assets, holdings-based analytics (excluding portfolio turnover), and portfolio attribution are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Fund's accountant.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Credit ratings for the securities held in the Fund are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature.

A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. If the rating agencies differ, the highest rating is applied to the security. If a rating is not available, the security is classified as Not Rated (NR). T. Rowe Price uses the rating of the underlying investment vehicle to determine the creditworthiness of credit default swaps and sovereign securities. The Fund is not rated by any agency. U.S. Government Agency securities, if any, may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.
