Fiscal Year End	October 31
12B-1 Fee	-

^{*}The Fund operates under a contractual expense limitation that expires on February 28, 2025.

MARKET COMMENTARY

International stocks rose in March as investors bet on interest rate cuts by major central banks in the coming months. The U.S. dollar rose against the euro, British pound, Japanese ven and Swiss franc but weakened against the Canadian dollar as the relatively strong U.S. economy and hawkish comments by a Federal Reserve official added to speculation that the central bank was in no rush to loosen policy. Most developed European stock markets gained. The Stoxx Europe 600 ended March at a record high and recorded its second straight quarterly gain amid optimism about potential rate cuts and stronger economic growth. The European Central Bank left its deposit rate at a record 4% on March 7 and President Christine Lagarde noted that policymakers are not "sufficiently confident" to lower borrowing costs. Nevertheless, evidence of slowing inflation in Europe raised expectations for rate cuts starting in June. UK stocks advanced. The Bank of England held interest rates at a 16-year high of 5.25%. However, two hawkish policymakers dropped their demands for rate hikes, which led traders to bet on a rate cut as early as June. Developed Asian markets were mixed. Australian and Singaporean stocks recorded gains, but Hong Kong stocks fell amid disappointing earnings in China-facing companies and concerns about China's continuing property crisis. Japanese stocks gained. The Nikkei 225 surpassed the psychologically key 40,000 level for the first time as yen weakness, corporate governance reforms, and strong earnings continued to sustain the country's stock rally that began in early 2023. The Bank of Japan (BOJ) raised borrowing costs for the first time since 2007, ending an era of negative interest rates, as the central bank neared its 2% inflation goal. The BOJ also dismantled its yield curve control program but also pledged to keep buying long-term government bonds as needed. Emerging markets stocks rose. Chinese stocks rose slightly amid evidence that the economy was recovering, though disappointing corporate earnings and the property sector downturn weighed on sentiment. All 11 sectors in the MSCI EAFE Index advanced. Energy stocks performed the best, while consumer staples added the least.

PERFORMANCE

(NAV, total return)					Annualized	
	One Month	Three Months	One Year	Three Years	Five Years	Since Inception 8/22/14
International Disciplined Equity Fund	2.67%	1.73%	8.10%	2.92%	5.65%	4.27%
MSCI EAFE Index Net	3.29	5.78	15.32	4.78	7.33	4.86

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

Share prices are subject to market risk, including loss of the money you invest. In addition, there are risks associated with unfavorable currency exchange rates and political or economic uncertainty abroad. The fund is nondiversified, which means it can invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Past performance is not a reliable indicator of future performance. All numbers are percentages. Analysis represents the total performance of the portfolio as calculated by the FactSet attribution model and is inclusive of other assets. Non-equity positions are excluded from structure shown. Returns will not match official T. Rowe Price performance because FactSet uses different exchange rate sources and does not capture intra-day trading. Performance for each security is obtained in the local currency and, if necessary, is converted to USD using an exchange rate determined by an independent third party. Figures are shown with gross dividends reinvested. Sources: Financial data and analytics provider FactSet. Copyright 2024 FactSet. All Rights Reserved. MSCI/S&P GICS Sectors; Analysis by T. Rowe Price. T. Rowe Price uses the current MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting. Figures are shown gross of fees. Returns would be lower as a result of the deduction of such fees. Performance returns are in USD.

Definitions

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.

Additional Disclosures

Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit troweprice.com. Read it carefully.
