

Retirement Funds - Advisor Class

As of March 31, 2025

T.RowePrice

Portfolio Management	Managed Since	Joined Firm
Wyatt Lee	2015	1999
Kim DeDominicis	2019	2000
Andrew Jacobs van Merlen	2020	2000

Investment Objective

The funds seek the highest total return over time consistent with an emphasis on both capital growth and income.

General Information

Inception Date of Series	September 30, 2002
Expense Information (Series Range) (%)	0.74 - 0.89

Market Commentary

Global equity and fixed income markets experienced continued turbulence in March amid growing concerns that President Donald Trump's tariffs on imports from major trading partners such as Canada, Mexico, and China would lead to higher prices of goods sold in the U.S. and contribute to inflation pressures. Investors were also concerned that some weaker-than-expected economic data and reports from various retailers warning about slowing sales or decreased consumer spending would translate into slower economic growth, if not a recession. As the month ended, investors were bracing for the possibility that President Trump would impose "reciprocal" tariffs in early April on countries that already have tariffs or other trade barriers on imports from the U.S.

We maintain a cautious stance on U.S. stocks relative to international developed markets given elevated valuations and a more challenging fiscal environment characterized by uncertainty relating to the new tariff policies. On the other hand, we are more bullish on international markets, notably in Europe where accommodative monetary policy coupled with recently passed fiscal measures provide a favorable backdrop. We believe this should benefit value-oriented sectors given supportive factors including an improving profit outlook, a positively sloped yield curve, and a constructive credit environment.

Key risks to global markets include high valuations, tariff concerns, inflation, and the impact of geopolitical developments, including the ongoing conflict in Ukraine and China's economic policies. We remain vigilant in monitoring the economic landscape as we seek compelling investment opportunities moving forward.

Glide Path (%)

The glide path does not represent the asset allocation or management profile of the Retirement Balanced Fund - Advisor Class. The Retirement Balanced Fund - Advisor Class maintains a static allocation of approximately 40% equity and 60% fixed income.

Performance (%) (NAV, total return performance > 1yr is annualized)

Performance data quoted represents past performance which is not a guarantee or a reliable indicator of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

**The T. Rowe Price Retirement Funds Advisor Class share the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this Advisor Class have been calculated using the performance data of the investor class up to the inception date of the Advisor Class and the actual performance results of the Advisor Class since that date. The inception dates for the T. Rowe Price Retirement Funds Advisor Class are as follows: October 31, 2003, for the Retirement 2010, 2020, 2030, 2040, and Income Funds; May 31, 2007, for the Retirement 2005, 2015, 2025, 2035, 2045, and 2055 Funds. (The inception dates shown for the Advisor Classes in the table above are the dates on which the investor class started operations except for the Retirement 2050 Fund - Advisor Class, which incepted on the same day as its investor class.) The performance results of the investor class have not been adjusted to reflect the 12b-1 fee associated with the Advisor Class (0.25%). Had this fee been included, the performance would have been lower.

The principal value of the Retirement Funds is not guaranteed at any time, including at or after the target date, which is the approximate year an investor plans to retire (assumed to be age 65) and likely stop making new investments in the fund. If an investor plans to retire significantly earlier or later than age 65, the funds may not be an appropriate investment even if the investor is retiring on or near the target date. The funds' allocations among a broad range of underlying T. Rowe Price stock and bond funds and derivatives will change over time. The funds emphasize potential capital appreciation during the early phases of retirement asset accumulation, balance the need for appreciation with the need for income as retirement approaches, and focus on supporting an income stream over a long-term postretirement withdrawal horizon. The funds are not designed for a lump-sum redemption at the target date and do not guarantee a particular level of income. The funds maintain a substantial allocation to equities both prior to and after the target date, which can result in greater volatility over shorter time horizons. Derivatives may be riskier or more volatile than other types of investments because they are generally more sensitive to changes in market or economic conditions.

The stated expense ratio includes the applicable 12b-1 fee.

The expense ratios shown are as of the fund's most recent prospectus.

All investments are subject to risk, including the possible loss of the money you invest.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.
