PROSPECTUS

January 1, 2026

TIER	T. ROWE PRICE International Equity Research ETF

Principal U.S. Listing Exchange: NYSE Arca, Inc. Exchange-traded fund (ETF) shares are not individually redeemable.

INVEST WITH CONFIDENCE®

Table of Contents

Investment Objective(s)

The fund seeks long-term capital appreciation.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the fund. **You may also incur brokerage commissions and other charges when buying or selling shares of the fund, which are not reflected in the table or example below.**

Fees and Expenses of the Fund

Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management fees	0.38 %
Other expenses	—
Total annual fund operating expenses	**0.38**

Example This example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. The example assumes that you invest $10,000 in the fund for the time periods indicated and then sell all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund's fees and expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
$ 39	$ 122	$ 213	$ 480

Portfolio Turnover The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the fund's shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. For the period June 25, 2025 through October 31, 2025, the fund's portfolio turnover rate was 13.7% of the average value of its portfolio.

Investments, Risks, and Performance

Principal Investment Strategies

The fund normally invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. Any derivatives that provide exposure to the investment focus suggested by the fund's name, or to one or more market risk factors associated with the investment focus suggested by the fund's name, are counted (as applicable) toward compliance with the fund's 80% investment policy.

Under normal conditions, the fund primarily invests in stocks outside the U.S. and in at least five countries, including developed and emerging market countries. The fund relies on MSCI Inc., a third-party provider of benchmark indexes and data services, or another unaffiliated data provider to determine the country assigned to a security.

The adviser's decision-making process focuses on bottom-up stock selection with an awareness of the global economic backdrop and the adviser's outlook for certain industries, sectors, and individual countries. The fund diversifies broadly across a variety of industries. The fund may purchase the stocks of companies of any size, but its focus is typically on large-cap companies. While country allocation is driven largely by stock selection, the adviser may limit investments in markets or industries that appear to have poor overall prospects.

The adviser also attempts to create a portfolio with similar characteristics to the MSCI ACWI ex USA Index (Index) with the potential to provide excess returns relative to the Index. The Index gives a representation of equity stocks across both developed and emerging market countries globally, excluding the United States. The Index also gives coverage of large and mid-cap equity stocks across all sectors and style segments. The fund uses a disciplined portfolio construction process whereby it weights each country/region, sector, and industry approximately the same as the Index. Within each country/region, sector, and industry, the weighting of individual fund holdings can vary significantly from their weighting within the Index. The fund attempts to outperform the Index by overweighting those stocks that are viewed favorably relative to their weighting in the Index, and underweighting or avoiding those stocks that are viewed negatively.

A portfolio oversight team, which includes the portfolio managers, is responsible for the overall structure of the fund and for developing rules for portfolio construction and uses T. Rowe Price's fundamental research by assigning equity analysts to select stocks for the fund within industries where they have focused expertise.

At times, the fund may have a significant portion of its assets invested in the same economic sector, such as the financial sector.

Principal Risks

As with any fund, there is no guarantee that the fund will achieve its objective(s). The fund's share price fluctuates, which means you could lose money by investing in the fund. The principal risks of investing in this fund, which may be even greater in unfavorable or uncertain market conditions, are summarized as follows:

Foreign investing: Non-U.S. securities tend to be more volatile and have lower overall liquidity and trading volume than investments in U.S. securities and may lose value because of adverse local, political, social, or economic developments overseas, or due to changes in the exchange rates between foreign currencies and the U.S. dollar. Further, securities of non-U.S. issuers are subject to trading markets with potential governmental interference, varying regulatory, auditing, and accounting standards, and settlement and clearance practices that differ from those of U.S. issuers. Investment in non-U.S. securities also carries currency risk. Any attempts to hedge currency risk could be unsuccessful. Such investments may have higher transaction costs compared with U.S. markets. The fund's overall foreign investing risk is increased to the extent it has exposure to emerging markets, which are more volatile than the markets of developed countries.

Emerging markets: Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. Emerging market countries tend to have economic structures that are less diverse and mature, less developed legal and regulatory regimes, and political systems that are less stable than those of developed countries. In addition to the risks associated with investing outside the U.S., emerging markets are more susceptible to governmental interference, political and economic uncertainty, local taxes and restrictions on the fund’s investments, less efficient trading markets with lower overall liquidity, and more volatile currency exchange rates.

Stock investing: Stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. The value of stocks held by the fund may decline due to general weakness or volatility in the stock markets in which the fund invests or because of factors that affect a particular company or industry.

Market conditions: The value of the fund’s investments may decrease, sometimes rapidly or unexpectedly, due to factors affecting an issuer held by the fund, particular industries, or the overall securities markets. A variety of factors can increase the volatility of the fund’s holdings and markets generally, including geopolitical developments (such as trade and tariff arrangements, sanctions, and cybersecurity attacks), recessions, inflation, rapid interest rate changes, war, military conflict, acts of terrorism, natural disasters, and outbreaks of infectious illnesses or other widespread public health issues (such as the coronavirus pandemic) and related governmental and public responses. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others. Government intervention in markets may impact interest rates, market volatility, and security pricing. These adverse developments may cause broad declines in market value due to short-term market movements or for significantly longer periods during more prolonged market downturns.

Large-cap stocks: Securities issued by large-cap companies tend to be less volatile than securities issued by small- and mid-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges.

Sector exposure: Issuers in the same economic sector may be similarly affected by economic or market events, making the fund more vulnerable to unfavorable developments in that economic sector than funds that invest more broadly.

Financial sector: Banks and other financial services companies can be adversely affected by, among other things, regulatory changes, interest rate movements, the availability of capital and cost to borrow, and the rate of debt defaults.

Index correlation: Because the fund weights each sector and industry similar to the Index, the fund's ability to broadly reallocate its portfolio due to changes in outlook for a particular sector or industry is less than other actively managed funds with greater flexibility to overweight or underweight certain industries due to changes in market conditions. As a result, the fund's performance may lag the performance of other actively managed funds with more flexible investment programs.

Active management: The fund's overall investment program and holdings selected by the fund's investment adviser may underperform the broad markets, relevant indices, or other funds with similar objectives and investment strategies.

Authorized Participant: Only an Authorized Participant may engage in creation or redemption transactions directly with the fund. The fund has a limited number of intermediaries that act as Authorized Participants, and none of these Authorized Participants are or will be obligated to engage in creation or redemption transactions. To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the fund and no other Authorized Participant is able to step forward to create or redeem, (i) the market price of the fund's shares may trade at a premium or discount to its net asset value (NAV), (ii) an active trading market for the fund may not develop or be maintained, and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of the fund will continue to be met or remain unchanged.

ETF shares trading: Shares of the fund are listed for trading on a national securities exchange and are bought and sold in the secondary market at market prices. The market prices of shares are expected to fluctuate in response to changes in the fund's NAV, the value of the fund's holdings, and supply and demand for shares. Disruptions to creations and redemptions, significant market volatility, potential lack of an active trading market for the shares (including through a trading halt), or other factors may widen bid-ask spreads and result in the shares trading significantly above (at a premium) or below (at a discount) to NAV or to the value of the fund's holdings. If a shareholder purchases shares at a time when the market price is at a premium to the NAV or sells shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

New fund: Because the fund is new, it has a relatively small number of shareholders and assets under management. As a result, the portfolio manager may experience difficulties in fully implementing the fund's investment program and may be less able to respond to increases in shareholder transaction activity. The fund's limited operating history could make it more difficult to evaluate the performance of the portfolio manager and the fund's investment strategies. In addition, there can be no assurance that the fund will ultimately grow to an economically viable size, which could lead to the fund eventually ceasing its operations.

Cybersecurity breaches: The fund could be harmed by intentional cyberattacks and other cybersecurity breaches, including unauthorized access to the fund's assets, confidential information, or other proprietary information. In addition, a cybersecurity breach could cause one of the fund's service providers or financial intermediaries to suffer unauthorized data access, data corruption, or loss of operational functionality.

Performance

Because the fund commenced operations in 2025, there is no historical performance information shown here. Performance history will be presented after the fund has been in operation for one full calendar year.

Current performance information is available through troweprice.com.

Management

Investment Adviser T. Rowe Price Associates, Inc. (T. Rowe Price or Price Associates)

Investment Subadviser T. Rowe Price International Ltd (Price International)

Investment Subadviser T. Rowe Price Hong Kong Limited (Price Hong Kong)

Investment Subadviser T. Rowe Price Singapore Private Ltd. (Price Singapore)

Name	Title	Managed Fund Since	Joined Investment Adviser
Kamran Baig	Co-Portfolio Manager	2025	2004
Leigh Innes	Co-Portfolio Manager	2025	2002
Tetsuji Inoue	Co-Portfolio Manager	2025	2012
Tobias Mueller	Co-Portfolio Manager	2025	2011
Sridhar Nishtala	Co-Portfolio Manager	2025	2004
Jason Nogueira	Co-Portfolio Manager	2025	2004

Purchase and Sale of Fund Shares

The fund issues and redeems shares at NAV only with Authorized Participants and only in large blocks of 50,000 shares (each, a “Creation Unit”). Individual fund shares may not be purchased or redeemed directly with the fund. An Authorized Participant may purchase or redeem a Creation Unit of the fund each business day that the fund is open in exchange for the delivery of a designated portfolio of in-kind securities and/or cash.

Individual fund shares may be purchased and sold only on a national securities exchange through brokers. Shares are listed for trading on NYSE Arca, Inc. and because the shares will trade at market prices rather than at NAV, shares may trade at prices greater than NAV (at a premium), at NAV, or less than NAV (at a discount). You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the fund (bid) and the lowest price a seller is willing to accept for shares of the fund (ask) when buying or selling shares in the secondary market (the “bid-ask spread”). All purchases and sales are made pursuant to this prospectus. Please refer to the fund’s website for additional information (troweprice.com).

Tax Information

The fund declares dividends, if any, and pays them annually. A distribution may consist of ordinary dividends, capital gains, and return of capital. Sales of fund shares and distributions by the fund generally may be taxed as ordinary income or capital gains unless you invest through a tax-deferred account (in which case you will be taxed upon withdrawal from such account).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), T. Rowe Price and its affiliates may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

MANAGEMENT OF THE FUND

Investment Adviser(s)

T. Rowe Price is the fund's investment adviser and oversees the selection of the fund's investments and management of the fund's portfolio pursuant to an investment management agreement between the investment adviser and the fund. T. Rowe Price is the investment adviser for all funds sponsored and managed by T. Rowe Price (T. Rowe Price Funds); is an SEC-registered investment adviser that provides investment management services to individual and institutional investors and sponsors; and serves as adviser and subadviser to registered investment companies, institutional separate accounts, and common trust funds. The address for T. Rowe Price is 1307 Point Street, Baltimore, Maryland 21231. As of September 30, 2025, T. Rowe Price and its affiliates (Firm) had approximately $1.77 trillion in assets under management.

T. Rowe Price has entered into a subadvisory agreement with Price International under which Price International is authorized to trade securities and make discretionary investment decisions on behalf of the fund. Price International is registered as an investment adviser with the SEC, and is authorized or licensed by the United Kingdom Financial Conduct Authority and other global regulators. Price International sponsors and serves as adviser to foreign collective investment schemes and provides investment management services to registered investment companies and other institutional investors. Price International is headquartered in London and has several branch offices around the world. Price International is a direct subsidiary of T. Rowe Price and its address is Warwick Court, 5 Paternoster Square, London, EC4M 7DX, United Kingdom.

T. Rowe Price has entered into a subadvisory agreement with Price Hong Kong under which Price Hong Kong is authorized to trade securities and make discretionary investment decisions on behalf of the fund. Price Hong Kong is licensed with the Securities and Futures Commission of Hong Kong and is registered as an investment adviser with the SEC. Price Hong Kong serves as a subadviser to investment companies and provides investment management services for other clients who seek to primarily invest in the Asia-Pacific securities markets. Price Hong Kong is a subsidiary of T. Rowe Price and T. Rowe Price International, and its address is 6/F Chater House, 8 Connaught Road Central, Hong Kong.

T. Rowe Price has entered into a subadvisory agreement with Price Singapore under which Price Singapore is authorized to facilitate securities trading and make discretionary investment decisions on behalf of the fund. Price Singapore is licensed with the Monetary Authority of Singapore and is registered as an investment adviser with the SEC. Price Singapore serves as a subadviser to investment companies and foreign collective investment schemes and may provide investment management services to other institutional clients. Price Singapore is a subsidiary of

T. Rowe Price and its address is 501 Orchard Road, #10-02 Wheelock Place, Singapore, Singapore, 238880.

Portfolio Management

The co-portfolio managers are primarily responsible for the day-to-day management of the fund's portfolio. Kamran Baig, Leigh Innes, Tetsuji Inoue, Tobias Mueller, Sridhar Nishtala, and Jason Nogueira are co-portfolio managers. The following information provides the year that the portfolio managers first joined the Firm and the portfolio managers' specific business experience during the past five years (although the portfolio managers may have had portfolio management responsibilities for a longer period). Mr. Baig has been co-portfolio manager since 2025. He joined the Firm in 2004, and his investment experience dates from 1991. During the past five years, he has served as the director of Equity Research, EMEA and Latin America and as a portfolio manager (beginning 2021). Ms. Innes has been co-portfolio manager since 2025. She joined the Firm in 2002, and her investment experience dates from 1997. During the past five years, she has served as Director of Research in the International Equity Division and as a portfolio manager (beginning 2024). Mr. Inoue has been co-portfolio manager since 2025. He joined the Firm in 2012, and his investment experience dates from 1998. During the past five years, he has served as the director of Equity Research, Asia and as a portfolio manager (beginning 2021). Mr. Mueller has been co-portfolio manager since 2025. He joined the Firm in 2011, and his investment experience dates from 2004. During the past five years, he has served as a portfolio manager. Mr. Nishtala has been co-portfolio manager since 2025. He joined the Firm in 2004, and his investment experience dates from 2000. During the past five years, he has served as the director of Equity Research, Asia Pacific. Mr. Nogueira has been co-portfolio manager since 2025. He joined the Firm in 2004, and his investment experience dates from 2001. During the past five years, he has served as a portfolio manager. The Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of the fund's shares.

The Management Fee

The fund pays the investment adviser an annual all-inclusive fee of 0.38% based on the fund's average daily net assets. The management fee is calculated and accrued daily, and it includes investment management services and ordinary, recurring operating expenses, except for certain expenses. The following expenses are excluded from the annual all-inclusive fee: interest and borrowing expenses, taxes, brokerage commissions and other transaction costs, fund proxy expenses, and nonrecurring and extraordinary expenses.

A discussion about the factors considered by the fund's Board of Directors (Board) and its conclusions in approving the fund's investment management agreement (and any subadvisory agreement, if applicable) is contained in Form N-CSR filed with the SEC for the period ended October 31, and made available on the fund's website at troweprice.com/prospectus.

MORE INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE(S), STRATEGIES, AND RISKS

Investment Objective(s)

The fund seeks long-term capital appreciation.

The fund's investment objective(s) constitutes a non-fundamental policy that the Board may change without shareholder approval upon 60 days' prior written notice to shareholders. The fundamental and non-fundamental policies of the fund are set forth in the SAI.

Principal Investment Strategies

The fund normally invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. Shareholders will receive at least 60 days' prior notice of a change to the fund's 80% investment policy. Any derivatives that provide exposure to the investment focus suggested by the fund's name, or to one or more market risk factors associated with the investment focus suggested by the fund's name, are counted (as applicable) toward compliance with the fund's 80% investment policy.

Under normal conditions, the fund primarily invests in stocks outside the U.S. and in at least five countries, including developed and emerging market countries. The fund relies on MSCI Inc., a third-party provider of benchmark indexes and data services, or another unaffiliated data provider to determine the country assigned to a security. The adviser's decision-making process focuses on bottom-up stock selection with an awareness of the global economic backdrop and the adviser's outlook for certain industries, sectors, and individual countries. The fund diversifies broadly across a variety of industries. The fund may purchase the stocks of companies of any size, but its focus is typically on large-cap companies. While country allocation is driven largely by stock selection, the adviser may limit investments in markets or industries that appear to have poor overall prospects.

The adviser also attempts to create a portfolio with similar characteristics to the MSCI ACWI ex USA Index (Index) with the potential to provide excess returns relative to the Index. The Index gives a representation of equity stocks across both developed and emerging market countries globally, excluding the United States. The Index also gives coverage of large and mid-cap equity stocks across all sectors and style segments. The fund uses a disciplined portfolio construction process whereby it weights each country/region, sector, and industry approximately the same as the Index. Within each country/region, sector, and industry, the weighting of individual fund holdings can vary significantly from their weighting within the Index.

The fund attempts to outperform the Index by overweighting those stocks that are viewed favorably relative to their weighting in the Index, and underweighting or avoiding those stocks that are viewed negatively.

A portfolio oversight team, which includes the portfolio managers, is responsible for the overall structure of the fund and for developing rules for portfolio construction. The portfolio oversight team uses T. Rowe Price's fundamental research by assigning equity analysts to select stocks for the fund within industries where they have focused expertise. The equity analysts are responsible for selecting stocks and determining the stocks' weights within their industry-specific portfolios, subject to the oversight and discretion of the portfolio managers who work closely with the analysts.

The analysts and portfolio managers rely on fundamental research, which considers various factors such as the quality of a company's management team and its business franchise, earnings growth potential of a company and its market sector, and valuation. The fund's portfolio oversight team evaluates the performance of the overall portfolio and the analysts' stock selections, tracking and aligning the fund's risk characteristics with those of the Index, monitoring the portfolio's exposures to industries and sectors, managing cash flows into and out of the fund, and ensuring overall compliance by the analysts with the fund's portfolio construction principles. The portfolio managers are responsible for selecting stocks that meet the fund's investment criteria, but have not yet been assigned to an analyst.

At times, the fund may have a significant portion of its assets invested in the same economic sector, such as the financial sector.

The fund may sell assets for a variety of reasons, including in response to a change in the original investment considerations or to limit losses, adjust the characteristics of the overall portfolio, or redeploy assets into different opportunities.

The fund invests in the following types of securities or assets:

Common Stocks

Stocks represent shares of ownership in a company. After other claims are satisfied, common stockholders participate in company profits on a pro-rata basis, and profits may be paid out in dividends or reinvested in the company to help it grow. Increases and decreases in earnings are usually reflected in a company's stock price, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities.

Foreign Securities

Investments in foreign securities could include non-U.S. dollar-denominated securities traded outside the U.S. and U.S. dollar-denominated securities of foreign issuers traded in the U.S. The fund may purchase American Depositary Receipts and Global Depositary Receipts, which are certificates evidencing ownership of shares of a foreign issuer. American Depositary Receipts and Global Depositary Receipts trade on established markets and are alternatives to directly purchasing the underlying foreign securities in their local markets and currencies. Such investments are subject to many of the same risks associated with investing directly in foreign securities. For purposes of the fund's investment policies, investments in depositary receipts are deemed to be investments in the underlying securities. For example, a depositary receipt representing ownership of common stock will be treated as common stock.

Principal Risks

The principal risks associated with the fund's principal investment strategies, which may be even greater in unfavorable or uncertain market conditions, include the following:

Foreign investing: Non-U.S. securities may lose value because of declining foreign currencies or adverse local, political, social, and economic developments such as war, natural disasters, public health emergencies, labor strikes, political instability, hyperinflation, currency devaluations, and overdependence on particular industries; government interference in markets such as nationalization and exchange controls, expropriation of assets, restrictions on foreign ownership or imposition of punitive taxes; and the imposition of international trade and capital flow barriers and other protectionist, repatriation, or retaliatory measures. Securities of non-U.S. issuers (including depositary receipts and other instruments that represent interests in a non-U.S. issuer) tend to be more volatile than U.S. securities and are subject to trading markets with lower overall liquidity and trading volume. The fund could experience losses based solely on the weakness of foreign currencies in which the fund's holdings are denominated versus the U.S. dollar, and changes in the exchange rates between such currencies and the U.S. dollar. Any attempts to hedge currency risk could be unsuccessful, and it is difficult to hedge the currency risks of many emerging markets countries. In addition, investments outside the U.S. are subject to settlement practices and regulatory and financial reporting standards that differ from those of the U.S. Non-U.S. securities may receive less coverage than U.S. securities by market analysts and the financial press, and may provide financial information less frequently or to a lesser extent. Furthermore, trading in foreign markets generally involves higher transaction costs than trading in U.S. markets. A foreign trading market may close for national holidays or without warning for extended time periods, or may have different clearance and settlement procedures, causing delays and preventing the fund from buying or selling securities in that market. The fund's overall foreign investing risk is increased to the extent it has exposure to emerging markets, which are more volatile than the markets of developed countries.

Emerging markets: Investments in emerging markets are subject to the risk of abrupt and severe price declines. The economic and political structures of emerging market countries, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. These economies are less developed, can be overly reliant on particular industries, and are more vulnerable to the ebb and flow of international trade, trade barriers, and other protectionist or retaliatory measures. Governments in many emerging market countries participate to a significant degree in their economies and securities markets. As a result, foreign investments may be restricted and subject to greater government control, including repatriation of sales proceeds. Emerging market securities exchanges are more likely to experience problems with the clearing and settling of trades, as well as the custody of holdings by local banks, agents, and depositories. In addition, the accounting standards in emerging market countries may be unreliable and could present an inaccurate picture of a company's finances. Some countries have histories of instability and upheaval that could cause their governments to act in a detrimental or hostile manner toward private enterprise or foreign investment. Investments in countries or regions that have recently begun moving away from central planning and state-owned industries toward free markets should be regarded as speculative.

While some countries have made progress in economic growth, liberalization, fiscal discipline, and political and social stability, there is no assurance these trends will continue. Significant risks, such as war and terrorism, currently affect some emerging market countries. The fund's performance will likely be hurt by exposure to countries in the midst of hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. The volatility of emerging markets may be heightened by the actions (such as significant buying or selling) of a few major investors. For example, substantial increases or decreases in cash flows of funds investing in these markets could significantly affect local securities prices and, therefore, could cause fund share prices to decline.

Stock investing: The fund's share price can fall because of weakness in the overall stock markets, a particular industry, or specific holdings. Stock markets as a whole can be volatile and decline for many reasons, such as adverse local, regional, or global political, regulatory, or economic developments; changes in investor psychology; or heavy selling at the same time by major institutional investors in the market. The prospects for an industry or company may deteriorate because of a variety of factors, including disappointing earnings or changes in the competitive environment. In addition, the adviser's assessment of companies whose stocks are held by the fund may prove incorrect, resulting in losses or poor performance, even in rising markets. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of the issuer's bonds and preferred stock take precedence over the claims of those who own common stock.

Market conditions: The value of investments held by the fund may decline, sometimes rapidly or unpredictably, due to factors affecting certain issuers, particular industries or sectors, or the overall markets. Rapid or unexpected changes in market conditions could cause the fund to liquidate its holdings at inopportune times or at a loss or depressed value. The value of a particular holding may decrease due to developments related to that issuer, but also due to general market conditions, including real or perceived economic developments, such as changes in interest rates, credit quality, inflation, or currency rates, or generally adverse investor sentiment. The value of a holding may also decline due to factors that negatively affect a particular industry or sector, such as labor shortages, increased production costs, or competitive conditions. In addition, local, regional, or global events such as war, military conflict, acts of terrorism, political and social unrest, regulatory changes, recessions, tariffs and shifts in monetary or trade policies, natural or environmental disasters, and the spread of infectious diseases or other public health issues could have a significant negative impact on securities markets and the fund's investments. Any of these events may lead to unexpected suspensions or closures of securities exchanges; travel restrictions or quarantines; business disruptions and closures; inability to obtain raw materials, supplies, and component parts; reduced or disrupted operations for the fund's service providers or issuers in which the fund invests; and an extended adverse impact on global market conditions. Government intervention (including sanctions) in markets may impact interest rates, market volatility, and security pricing. The occurrence of any of these events could adversely affect the economies (including through changes in business activity and increased unemployment) and financial markets of specific countries or worldwide.

Large-cap stocks: Although stocks issued by large-cap companies tend to have less overall volatility than stocks issued by small- and mid-cap companies, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods. In addition, large-cap companies may be less capable of responding quickly to competitive challenges and industry changes, and may suffer sharper price declines as a result of earnings disappointments.

Sector exposure: At times, the fund may have a significant portion of its assets invested in securities of issuers conducting business in a related group of industries within the same economic sector. Issuers within the same economic sector may be similarly affected by specific market events impacting that sector. As a result, the fund is more susceptible to adverse developments affecting an economic sector in which the fund has significant investments and may perform poorly during a downturn in one or more of the industries within that economic sector.

Financial sector: Banks and other financial services companies can be adversely affected by, among other things, regulatory changes, interest rate movements, the availability of capital and the cost to borrow, and the rate of debt defaults. Banks and other financial services institutions are often subject to extensive governmental regulation and intervention, and the potential for additional regulation could reduce profit margins and adversely affect the scope of their activities, increase the amount of capital they must maintain, and limit the amounts and types of loans and other financial commitments they can make. In addition, companies in the financial sector may also be adversely affected by decreases in the availability of money or asset valuations, credit rating downgrades, increased competition, and adverse conditions in other related markets.

The oversight of, and regulations applicable to, banks in emerging markets may be ineffective when compared with the regulatory frameworks for banks in developed markets. Banks in emerging markets may have significantly less access to capital than banks in more developed markets, leading them to be more likely to fail under adverse economic conditions. In addition, the impact of future regulation on any individual bank, or on the financial services sector as a whole, can be very difficult to predict.

Index correlation: Because the fund weights each sector and industry similar to the Index, the fund’s ability to broadly reallocate its portfolio due to changes in outlook for a particular sector or industry is less than other actively managed funds with greater flexibility to overweight or underweight certain industries due to changes in market conditions. As a result, the fund’s performance may lag the performance of other actively managed funds with more flexible investment programs.

Active management: The investment adviser’s judgments about the attractiveness, value, or potential appreciation of the fund’s investments may prove to be incorrect. The fund could underperform other funds with a similar benchmark or similar investment program if the fund’s investment selections or overall strategies fail to produce the intended results. Regulatory, tax, or other developments may affect the investment strategies available to a portfolio manager, which could adversely affect the ability to implement the fund's overall investment program and achieve the fund's investment objective(s).

Authorized Participant: Only Authorized Participants may engage in creation or redemption transactions directly with the fund. The fund has a limited number of institutions that may act as Authorized Participants. Authorized Participants have no obligation to submit creation or redemption orders, and there is no assurance that Authorized Participants will establish or maintain an active trading market for shares. This risk may be heightened to the extent that securities held by the fund are traded outside a collateralized settlement system. In that case, Authorized Participants may be required to post collateral on certain trades on an agency basis (i.e., on behalf of other market participants), which only a limited number of Authorized Participants may be able to do. In addition, to the extent that Authorized Participants exit the business or are unable to proceed with creation and/or redemption orders with respect to the fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, this may result in a significantly diminished trading market for shares, and shares may be more likely to trade at a premium or discount to the fund's NAV and to face trading halts and/or delisting. Investments in non-U.S. securities, which may have lower trading volumes, may increase this risk. If the fund effects its creations or redemptions at least partially or fully for cash, rather than in-kind securities, the fund may incur certain costs, including brokerage costs in connection with investing cash received and may recognize capital gains in connection with cash redemptions. In addition, costs could be imposed on the fund which would have the effect of decreasing the fund's net asset value to the extent the costs are not offset by a transaction fee payable by an Authorized Participant.

ETF shares trading: Shares of the fund are listed for trading on a national securities exchange and are bought and sold in the secondary market at market prices. The market prices of shares are expected to fluctuate in response to changes in the fund's NAV, the value of the fund's holdings, and supply and demand for shares. Disruptions to creations and redemptions, significant market volatility, potential lack of an active trading market for the shares (including through a trading halt), or other factors may widen bid-ask spreads and result in the shares trading significantly above (at a premium) or below (at a discount) to NAV or to the value of the fund's holdings. If a shareholder purchases shares at a time when the market price is at a premium to the NAV or sells shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

New fund: Because the fund is new, it has a more limited operating history, fewer shareholders, and less assets than funds that have been in existence for longer periods. It may be more difficult to evaluate the investment program and portfolio manager of a fund with a limited performance track record. If the fund has a concentrated shareholder base, large shareholder purchases or redemptions could require the fund to buy or sell holdings at unfavorable times or maintain greater cash reserves than desired, any of which could have tax implications for the fund and its shareholders, make it difficult to invest fully in accordance with the fund's investment program, and limit the portfolio manager's ability to successfully implement the fund's investment strategies. There is no assurance that the fund will be able to sufficiently increase its assets and shareholders in the future, which could lead to the fund ultimately being liquidated and ceasing its operations.

Cybersecurity breaches: The fund may be subject to operational and information security risks resulting from breaches in cybersecurity. Cybersecurity breaches may involve deliberate attacks and unauthorized access to the digital information systems (for example, through “hacking” or malicious software coding) used by the fund, its investment adviser and subadviser(s) (as applicable), or its service providers but may also result from outside attacks such as denial-of-service attacks, which are efforts to make network services unavailable to intended users. These breaches may, among other things, result in financial losses to the fund and its shareholders, cause the fund to lose proprietary information, disrupt business operations, or result in the unauthorized release of confidential information. Further, cybersecurity breaches involving the fund’s service providers, financial intermediaries, trading counterparties, or issuers in which the fund invests could subject the fund to many of the same risks associated with direct breaches.

Additional Investment Management Practices

The fund may employ additional investment management practices as described in this section. The fund’s investments may be subject to further restrictions and risks described in the SAI, which contains more detailed information about the fund and its investments, operations, and expenses.

ESG Integration

The Firm integrates the analysis of governance and sustainability factors into the investment process in an effort to maximize financial performance (known as ESG integration). The Firm focuses on the particular governance and sustainability factors considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund’s portfolio. For certain types of investments, including, but not limited to, cash, currency positions, and particular types of derivatives, this analysis may not be relevant or possible due to a lack of data.

Reserve Position

The adviser normally maintains a certain portion of the fund’s assets in reserves. The reserve position helps the adviser to manage liquidity and take advantage of investment opportunities without selling other fund assets, meet redemption requests and manage cash flows into the fund, and manage risk by increasing the reserve position during periods of current or expected market volatility. The fund’s reserve position typically consists of: (1) shares of a T. Rowe Price internal money market fund (which does not charge any management fees and is not available for public purchase); (2) short-term, high-quality U.S. and non-U.S. dollar-denominated money market securities, including repurchase agreements; and (3) U.S. dollar or non-U.S. dollar currencies. If the fund has significant holdings in reserves, it could compromise its ability to achieve its objective(s). Non-U.S. dollar reserves are subject to currency risk.

Temporary Defensive Position

The adviser may assume a temporary defensive position for the fund in order to respond to adverse market, economic, political, or other conditions, such as to provide flexibility in satisfying significant redemption activity, managing flows into or out of the fund, or paying expenses. The temporary defensive position may be inconsistent with the fund's principal investment objective(s) and/or strategies, which may impact the fund's returns or its ability to achieve its investment objective(s). For temporary defensive purposes, the fund may hold a greater amount of assets in reserves than normal or invest without limit in cash or other liquid instruments.

Borrowing Money and Transferring Assets

The fund may borrow from banks, other persons, and other T. Rowe Price Funds for temporary or emergency purposes, to facilitate redemption requests, or for other purposes consistent with the fund's policies as set forth in this prospectus and the SAI. Such borrowings may be collateralized with the fund's assets, subject to certain restrictions.

Borrowings may not exceed 33⅓% of the fund's total assets. This limitation includes any borrowings for temporary or emergency purposes, applies at the time of the transaction, and continues to the extent required by the Investment Company Act of 1940.

PORTFOLIO TURNOVER

Turnover is an indication of frequency of trading. Each time the fund purchases or sells a security, it incurs a cost. This cost is reflected in the fund's net asset value but not in its operating expenses. The higher the turnover rate, the higher the transaction costs and the greater the impact on the fund's total return. Higher turnover can also increase the possibility of taxable capital gain distributions. The fund's portfolio turnover rate is shown in the Financial Highlights table.

FINANCIAL HIGHLIGHTS

The Financial Highlights table, which provides information about the fund's financial history, is based on a single share outstanding throughout the period shown. The table is part of the fund's financial statements, which are included in its Form N-CSR and are incorporated by reference into the SAI (available upon request). The financial statements were audited by the fund's independent registered public accounting firm, PricewaterhouseCoopers LLP.

FINANCIAL HIGHLIGHTS For a share outstanding throughout each period

	6/25/25[1] Through 10/31/25
NET ASSET VALUE	
Beginning of period	$ 25.00
Investment activities	
Net investment income[2][3]	0.15
Net realized and unrealized gain/loss	2.38
Total from investment activities	2.53
NET ASSET VALUE	
End of period	**$ 27.53**
Ratios/Supplemental Data	
Total return, based on NAV[3][4]	**10.12%**
Ratios to average net assets:[3]	
Gross expenses before waivers/payments by Price Associates	0.38%[5]
Net expenses after waivers/payments by Price Associates	0.38%[5]
Net investment income	1.59%[5]
Portfolio turnover rate[6]	13.7%
Net assets, end of period (in thousands)	$ 13,765

(1) Inception date

(2) Per share amounts calculated using average shares outstanding method.

(3) Includes the impact of expense-related arrangements with Price Associates.

(4) Total return reflects the rate that an investor would have earned on an investment in the fund during the period, assuming reinvestment of all distributions. Total return is not annualized for periods less than one year.

(5) Annualized

(6) Portfolio turnover excludes securities received or delivered through in-kind share transactions.

DISCLOSURE OF FUND PORTFOLIO INFORMATION

The fund discloses its portfolio holdings daily at troweprice.com. A description of the fund’s policies and procedures with respect to the disclosure of portfolio information is available in the SAI.

Additional Information About the Purchase and Sale of Fund Shares

Individual fund shares may only be bought and sold in the secondary market through a broker or dealer at a Market Price (as defined below).

Fund shares are issued or redeemed only in large blocks of fund shares (previously defined as "Creation Units") and only to financial institutions known as Authorized Participants, in accordance with procedures described in the SAI. Creation Unit transactions are conducted in exchange for the deposit or delivery of a designated basket of in-kind securities and/or cash at NAV next determined after receipt of an order in proper form. Creation Unit transactions may be made on any day that the New York Stock Exchange (NYSE) is open for business.

When purchasing or redeeming Creation Units, Authorized Participants are required to pay a fixed purchase or redemption transaction fee as well as any applicable additional variable charge, as described in the SAI. Information about the procedures regarding creation and redemption of Creation Units (including the cutoff times for receipt of creation and redemption orders) and the applicable transaction fees is included in the fund's SAI.

All purchases and sales are made pursuant to this prospectus. Certain affiliates of the fund and the adviser may purchase and resell shares pursuant to this prospectus.

Section 12(d)(1) of the 1940 Act generally restricts investments by investment companies, including foreign and unregistered investment companies, in the securities of other investment companies. For example, a registered investment company (the "Acquired Fund"), such as the fund, may not knowingly sell or otherwise dispose of any security issued by the Acquired Fund to any investment company (the "Acquiring Fund") or any company or companies controlled by the Acquiring Fund if, immediately after such sale or disposition: (i) more than 3% of the total outstanding voting stock of the Acquired Fund is owned by the Acquiring Fund and any company or companies controlled by the Acquiring Fund, or (ii) more than 10% of the total outstanding voting stock of the Acquired Fund is owned by the Acquiring Fund and other investment companies and companies controlled by them. However, registered investment companies are permitted to invest in a fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth therein or in SEC rules thereunder. In order for a registered investment company to invest in shares of a fund beyond the limitations of Section 12(d)(1) in reliance on Rule 12d1-4 under the 1940 Act, the registered investment company must comply with certain conditions, including entering into an investment agreement with the fund. Foreign investment companies are permitted to invest in the funds only up to the limits set forth in Section 12(d)(1), subject to any applicable SEC Staff no-action relief.

Meeting Redemption Requests

The fund anticipates regularly meeting redemption requests by delivering a combination of in-kind redemptions and/or cash. The fund reserves the right to pay redemption proceeds to an Authorized Participant entirely or partly in cash. Cash used for redemptions will be raised from the sale of the fund's portfolio holdings or may come from existing holdings of cash or cash equivalents.

The fund, along with other T. Rowe Price Funds, is a party to an interfund lending exemptive order received from the SEC that permits the T. Rowe Price Funds to borrow money from and/or lend money to other T. Rowe Price Funds to help the funds meet short-term redemptions and liquidity needs. In certain circumstances, the T. Rowe Price Funds may also meet redemption requests through an overdraft of the fund's account with its custodian. In addition, certain T. Rowe Price Funds have a revolving line of credit in place to help meet short-term redemptions and liquidity needs, if necessary, as described in the SAI. During periods of deteriorating or stressed market conditions, when an increased portion of the fund's portfolio may be composed of holdings with reduced liquidity or lengthy settlement periods, or during extraordinary or emergency circumstances, the fund may be more likely to pay redemption proceeds with cash obtained through these short-term borrowing arrangements (if available).

Under normal circumstances, the fund will pay out redemption proceeds to a redeeming Authorized Participant after the Authorized Participant's redemption request is received, in accordance with the process set forth in the fund's SAI and in the agreement between the Authorized Participant and the fund's distributor. However, the fund reserves the right, including under stressed market conditions, to take up to seven days after the receipt of a redemption request to pay an Authorized Participant, as permitted by the Investment Company Act of 1940 and the rules thereunder. With respect to redemptions that include foreign investments, the fund may pay out redemption proceeds or deliver the securities up to 15 days after the receipt of a redemption request.

Pricing of Individual Fund Shares

Market Price The trading prices of a fund’s shares in the secondary market (Market Price) generally differ from the fund’s daily NAV per share and are affected by market forces such as supply and demand, economic conditions, and other factors. NAV is the price per share at which the fund issues and redeems shares to Authorized Participants in Creation Units (see “Net Asset Value” below). The fund’s Market Price is based on either the “Closing Price” of shares, which is the official closing price of shares on the fund’s listing exchange or, if more accurate than the Closing Price, the “Bid-Ask Price,” which is the midpoint of the highest bid and lowest offer on the “National Best Bid and Offer” at the time that the fund’s NAV is calculated. The National Best Bid and Offer is the current national best bid and national best offer as disseminated by the Consolidated Quotation System or UTP Plan Securities Information Processor. You may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the fund (bid) and the lowest price a seller is willing to accept for shares of the fund (ask) when buying or selling shares in the secondary market (bid-ask spread). Please refer to the fund’s website for additional information (troweprice.com).

Net Asset Value To calculate the fund’s NAV, the fund’s assets are valued and totaled, liabilities are subtracted, and the balance, called net assets, is divided by the number of the fund’s shares outstanding. On each day that the NYSE is open, fund shares are ordinarily valued as of the close of regular trading. Information that becomes known to the fund or its agents after the time as of which the NAV has been calculated on a particular day generally will not be used to retroactively adjust the price of a security or the NAV determined earlier that day. The fund reserves the right to change the time its NAV is calculated if the fund or NYSE closes earlier or as permitted by the SEC.

The fund's NAV is based on the fund's portfolio holdings. Market values are used to price portfolio holdings for which market quotations are readily available. Market values generally reflect the prices at which securities actually trade or represent prices that have been adjusted based on evaluations and information provided by the fund's pricing services. Investments in mutual funds are valued at the closing NAV per share of the mutual fund on the day of valuation. Investments for which market quotations are not readily available or deemed unreliable are valued at fair value as determined in good faith by T. Rowe Price, as the valuation designee, designated by the Board, by taking into account various, adopted factors and methodologies for determining the fair value. This value may differ from the value the fund receives upon sale of the securities.

Non-U.S. equity securities are valued on the basis of their most recent closing market prices at 4 p.m. ET, except under the following circumstances. Most foreign markets close before 4 p.m. ET. For example, the most recent closing prices for securities traded in certain Asian markets may be as much as 15 hours old at 4 p.m. ET. If T. Rowe Price determines that developments between the close of a foreign market and the close of trading on the NYSE will, in its judgment, affect the value of some or all of the fund's securities, T. Rowe Price will adjust the previous closing prices to reflect what it believes to be the fair value of the securities as of 4 p.m. ET. In deciding whether to make these adjustments, T. Rowe Price reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities.

T. Rowe Price may also fair value certain securities or a group of securities in other situations—for example, when a particular foreign market is closed but the fund is open. For a fund that has investments in securities that are primarily listed on foreign exchanges that trade on weekends or other days when the fund does not price its shares, the fund's NAV may change on days when shareholders will not be able to purchase or redeem the fund's shares. If an event occurs that affects the value of a security after the close of the market, such as a default of a commercial paper issuer or a significant move in short-term interest rates, T. Rowe Price may make a price adjustment depending on the nature and significance of the event. T. Rowe Price also evaluates a variety of factors when assigning fair values to private placements and other restricted securities. Other funds may adjust the prices of their securities by different amounts or assign different fair values than the fair value that the fund assigns to the same security.

T. Rowe Price uses various pricing services to obtain closing market prices, as well as information used to adjust those prices and to value most fixed income securities. T. Rowe Price cannot predict how often it will use closing prices or how often it will adjust those prices. T. Rowe Price routinely evaluates its fair value processes.

Premiums and Discounts A premium is the amount that a fund is trading above the reported NAV, expressed as a percentage of the NAV. A discount is the amount that a fund is trading below the reported NAV, expressed as a percentage of the NAV. The fund's premium/discount is calculated daily as of the end of a trading day based on the Closing Price or, if more accurate, the Bid-Ask Price on a given trading day. A discount or premium could be significant. The NAV of a fund will fluctuate with changes in the market value of its portfolio holdings. The Market Price of a fund will fluctuate in accordance with changes in its NAV, as well as market supply and demand. In stressed market conditions, the market for fund shares may become less liquid in response to deteriorating liquidity in the markets for the fund's underlying portfolio holdings. To the extent securities held by the fund trade in a market that is closed when the exchange on which the fund's shares trade is open, there may be deviations between the current price of a security and the last quoted price for the security in the closed foreign market. These adverse effects may in turn lead to wider bid-ask spread or premiums with the result that investors may receive less than the underlying value of the fund shares bought or sold. Information regarding the fund's premiums and discounts can be found at troweprice.com.

Frequent Purchases and Redemptions of Fund Shares

The Board has not adopted policies and procedures designed to prevent or monitor for frequent purchases and redemptions of the fund's shares because the fund sells and redeems shares at NAV only in Creation Units, pursuant to the terms of the agreement between the Authorized Participant and the fund's distributor, and such direct trading between the fund and Authorized Participants is critical to ensuring that the fund's shares trade at or close to NAV. Further, the vast majority of trading in fund shares occurs on the secondary market, which does not involve the fund directly and, therefore, does not cause the fund to experience many of the harmful effects of market timing, such as dilution and disruption of portfolio management. In addition, the fund may impose a transaction fee on Creation Unit transactions, which is designed to offset transfer and other transaction costs incurred by the fund in connection with the issuance and redemption of Creation Units, and may employ fair valuation pricing to minimize potential dilution from market timing. The fund reserves the right to reject any purchase order at any time and reserves the right to impose restrictions on disruptive, excessive, or short-term trading.

Compensation to Financial Intermediaries

T. Rowe Price or the fund's distributor will, at their own expense, provide compensation to certain financial intermediaries that have sold shares of or provide shareholder or other services to the T. Rowe Price Funds, commonly referred to as revenue sharing. These payments may be in the form of asset-based, transaction-based, or flat payments. These payments are used to compensate third parties for distribution, shareholder servicing, or other services. Some of these payments may include expense reimbursements and meeting and marketing support payments (out of T. Rowe Price's or the fund's distributor's own resources and not as an expense of the funds) to financial intermediaries, such as broker-dealers, registered investment advisers, or banks, in connection with the sale, distribution, marketing, and/or servicing of the T. Rowe Price Funds. The SAI provides more information about these payment arrangements.

The receipt of, or the prospect of receiving, these payments and expense reimbursements from T. Rowe Price or the fund's distributor may influence financial intermediaries, plan sponsors, and other third parties to offer or recommend T. Rowe Price Funds over other investment options for which an intermediary does not receive additional compensation (or receives lower levels of additional compensation). In addition, financial intermediaries that receive these payments and/or expense reimbursements may elevate the prominence of the T. Rowe Price Funds by, for example, placing the T. Rowe Price Funds on a list of preferred or recommended funds and/or providing preferential or enhanced opportunities to promote the T. Rowe Price Funds in various ways. Since these additional payments are not paid by a fund directly, these arrangements do not increase fund expenses and will not change the price that an investor pays for shares of the T. Rowe Price Funds or the amount that is invested in a T. Rowe Price Fund on behalf of an investor. You may ask your financial intermediary for more information about any payments they receive from T. Rowe Price or the fund's distributor.

Dividends and Distributions

The fund distributes substantially all of its net investment income, if any, to shareholders in the form of dividends. In addition, the fund distributes any net capital gains earned from the sale of portfolio securities to shareholders no less frequently than annually. Dividend payments are made through Depository Trust Company (DTC) participants and indirect participants to beneficial owners then of record with proceeds received from the fund.

The fund intends to distribute its net investment income and realized capital gains to shareholders for each taxable period. A fund with a higher portfolio turnover may result in higher capital gain distributions. Generally, your share of the distribution is based on the number of shares of the fund outstanding on the applicable dividend record date. Therefore, if the fund has experienced a net redemption during the taxable period, your share of the distribution may be relatively higher due to the smaller number of shares outstanding on the record date. See also "Taxes on Fund Distributions" below.

The following table provides details on dividend payments:

Dividend Payment Schedule	
Fund	**Dividends**
Active Core International Equity, Active Core U.S. Equity, Capital Appreciation Equity, Emerging Markets Equity Research, Financials, Global Equity, Growth, Health Care, Hedged Equity, Innovation Leaders, International Equity, International Equity Research, Natural Resources, Small-Mid Cap, Technology, and Value	• Dividends, if any, are declared and paid annually, generally in December.
Capital Appreciation Premium Income, Floating Rate, High Income Municipal, Intermediate Municipal Income, Long Municipal Income, Multi-Sector Income, QM U.S. Bond, Short Municipal Income, Total Return, Ultra Short-Term Bond, and U.S. High Yield	• Dividends, if any, are declared and paid monthly.
All funds	• If necessary, a fund may make additional distributions on short notice to minimize any fund-level tax liabilities. • Must be a shareholder on the dividend record date.

No dividend reinvestment service is provided by the fund. Financial intermediaries may make available the DTC book-entry dividend reinvestment service for use by beneficial owners of fund shares for reinvestment of their dividend distributions. Beneficial owners should contact their financial intermediary to determine the availability and costs of the service and the details of participation therein. Financial intermediaries may require beneficial owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and net capital gains will be automatically reinvested in additional whole shares of the fund purchased in the secondary market.

Tax Consequences

The following information is meant as a general summary for U.S. taxpayers. You should rely on your own tax adviser for advice about the particular federal, state, and local tax consequences to you of investing in the fund. Your financial intermediary is responsible for providing you with any necessary tax forms. You should contact your financial intermediary for the tax information that will be sent to you and reported to the Internal Revenue Service.

In most cases, your financial intermediary will provide information for your tax filing needs no later than mid-February.

If you invest in the fund through a tax-deferred account, such as an IRA or employer-sponsored retirement plan, you will not be subject to tax on dividends and distributions from the fund or the sale of fund shares if those amounts remain in the tax-deferred account. You may receive a Form 1099-R or other Internal Revenue Service forms, as applicable, if any portion of the account is distributed to you.

If you invest in the fund through a taxable account, you generally will be subject to tax when:

- You sell fund shares.
- The fund makes dividend or capital gain distributions.

For individual shareholders, a portion of ordinary dividends representing “qualified dividend income” received by the fund may be subject to tax at the lower rates applicable to long-term capital gains rather than ordinary income. You may report it as “qualified dividend income” in computing your taxes, provided you have held the fund shares on which the dividend was paid for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date. Ordinary dividends that do not qualify for this lower rate are generally taxable at the investor’s marginal income tax rate. This includes the portion of ordinary dividends derived from interest, short-term capital gains, income and gains from derivatives, distributions from nonqualified foreign corporations, distributions from real estate investment trusts (REITs), and dividends received by the fund from stocks that were on loan. For taxable years ending after December 31, 2017, you generally may be allowed a deduction of up to 20% on your qualified REIT dividends. You may not take this deduction for a dividend on shares of a fund that have been held for less than 46 days during the 91-day period beginning on the date 45 days before the ex-dividend date. Little, if any, of the ordinary dividends paid by the bond funds is expected to qualify for treatment as qualified dividend income or qualified REIT dividends.

For corporate shareholders, a portion of ordinary dividends may be eligible for the deduction for dividends received by corporations to the extent the fund’s income consists of dividends paid by U.S. corporations. Little, if any, of the ordinary dividends paid by the international stock or bond funds is expected to qualify for this deduction. A fund that earns interest income may, in its discretion, designate all or a portion of ordinary dividends as Section 163(j) interest dividends, which would allow the recipient to treat the designated portion of such dividends as interest income for purposes of determining interest expense deduction limitation under Section 163(j) of the Internal Revenue Code. Section 163(j) interest dividends, if so designated by a fund, will be reported to your financial intermediary or otherwise in accordance with the requirements specified by the Internal Revenue Service. To be eligible to treat a Section 163(j) interest dividend as interest income, you must have held the fund share for more than 180 days during the 361-day period beginning on the date that is 180 days before the date on which the share becomes ex-dividend with respect to such dividend.

A 3.8% net investment income tax is imposed on net investment income, including interest, dividends, and capital gains of U.S. individuals with income exceeding $200,000 (or $250,000 if married filing jointly) and of estates and trusts.

Taxes on Sales of Fund Shares

When you sell shares in the fund, you may realize a gain or loss.

All or a portion of the loss realized from a sale or exchange of fund shares may be disallowed under the “wash sale” rule if you purchase substantially identical shares within a 61-day period beginning 30 days before and ending 30 days after the date on which the shares are sold. Shares of the same fund you acquire through dividend reinvestment are shares purchased for the purpose of the wash sale rule and may trigger a disallowance of the loss for shares sold within the 61-day period of the dividend reinvestment. Any loss disallowed under the wash sale rule is added to the cost basis of the purchased shares.

Your financial intermediary should make available to you Form 1099-B, if applicable, no later than mid-February, providing certain information for each sale you made in the fund during the prior year. Unless otherwise indicated on your Form 1099-B, this information will also be reported to the Internal Revenue Service. You should check with your financial intermediary regarding the applicable cost basis method. You should, however, note that the cost basis information reported to you may not always be the same as what you should report on your tax return because the rules applicable to the determination of cost basis on Form 1099-B may be different from the rules applicable to the determination of cost basis for reporting on your tax return. Therefore, you should save your transaction records to make sure the information reported on your tax return is accurate.

Taxes on Fund Distributions

Your financial intermediary will make available to you, as applicable, generally no later than mid-February, a Form 1099-DIV, or other Internal Revenue Service forms, as required, indicating the tax status of any income dividends, dividends exempt from federal income taxes, capital gain distributions made to you, and/or any return of capital. This information will be reported to the Internal Revenue Service. Taxable distributions are generally taxable to you in the year in which they are paid. A dividend declared in October, November, or December and paid in the following January is generally treated as taxable to you as if you received the distribution in December. Ordinary dividends and capital gain distributions may also be subject to state and local taxes. Your financial intermediary will send any additional information you need to determine your taxes on fund distributions, such as the portion of your dividends, if any, that may be exempt from state and local income taxes.

Taxable distributions are subject to tax, whether reinvested in additional shares or received in cash.

The tax treatment of a capital gain distribution is determined by how long the fund held the portfolio securities, not how long you held the shares in the fund. Short-term (one year or less) capital gain distributions are taxable at the same rate as ordinary income, and gains on securities held for more than one year are taxed at the lower rates applicable to long-term capital gains. A fund, and a bond fund in particular, may redeem Creation Units in part or entirely in cash. As a result, it may have more capital gain distributions than it will if it redeems Creation Units in kind. If you realized a loss on the sale of fund shares that you held for six months or less, your short-term capital loss must be reclassified as a long-term capital loss to the extent of any long-term capital gain distributions received during the period you held the shares. For funds investing in foreign instruments, distributions resulting from the sale of certain foreign currencies, currency contracts, and the foreign currency portion of gains on debt instruments are taxed as ordinary income. Net foreign currency losses may cause monthly or quarterly dividends to be reclassified as returns of capital.

The fund's distributions that have exceeded the fund's earnings and profits for the relevant tax year may be treated as a return of capital to its shareholders. A return of capital distribution is generally nontaxable but reduces the shareholder's cost basis in the fund, and any return of capital in excess of the cost basis will result in a capital gain.

When a dividend or distribution is declared, the fund provides an estimate of its source. Such information is made available on the fund's website (troweprice.com) or provided on a written notice to shareholders as required. The tax status of certain distributions may be recharacterized on year-end tax forms, such as your Form 1099-DIV. Distributions made by a fund may later be recharacterized for federal income tax purposes—for example, from taxable ordinary income dividends to returns of capital. A recharacterization of distributions may occur for a number of reasons, including the recharacterization of income received from underlying investments, such as REITs, and distributions that exceed taxable income due to losses from foreign currency transactions or other investment transactions. Certain funds, including international bond funds and funds that invest significantly in REITs, are more likely to recharacterize a portion of their distributions as a result of their investments.

If the fund qualifies and elects to pass through nonrefundable foreign income taxes paid to foreign governments during the year, your portion of such taxes will be reported to you as taxable income. However, you may be able to claim an offsetting credit or deduction on your tax return for those amounts. There can be no assurance that a fund will meet the requirements to pass through foreign income taxes paid.

If you are subject to backup withholding, your financial intermediary will have to withhold a 24% backup withholding tax on distributions and, in some cases, redemption payments. You may be subject to backup withholding if your financial intermediary is notified by the Internal Revenue Service to withhold, you have failed one or more tax certification requirements, or your financial intermediary's records indicate that your tax identification number is missing or incorrect. Backup withholding is not an additional tax and is generally available to credit against your federal income tax liability with any excess refunded to you by the Internal Revenue Service.

Tax Consequences of Hedging

Entering into certain transactions involving options, futures, swaps, and foreign currency exchange contracts may result in the application of the mark-to-market and straddle provisions of the Internal Revenue Code. These provisions could result in the fund being required to distribute gains on such transactions even though it did not close the contracts during the year or receive cash to pay such distributions. The fund may not be able to reduce its distributions for losses on such transactions to the extent of unrealized gains in offsetting positions.

Tax Consequences of Shareholder Turnover

If the fund's portfolio transactions result in a net capital loss (i.e., an excess of capital losses over capital gains) for any year, the loss may be carried forward and used to offset future realized capital gains. However, its ability to carry forward such losses will be limited if the fund experiences an "ownership change" within the meaning of the Internal Revenue Code. An ownership change generally results when shareholders owning 5% or more of the fund increase their aggregate holdings by more than 50 percentage points over a three-year period.

Because the fund may have only a few large shareholders, an ownership change can occur in the normal course of shareholder purchases and redemptions. The fund undertakes no obligation to avoid or prevent an ownership change. Moreover, because of circumstances beyond the fund’s control, there can be no assurance that the fund will not experience, or has not already experienced, an ownership change. An ownership change can reduce the fund’s ability to offset capital gains with losses, which could increase the amount of taxable gains that could be distributed to shareholders.

Tax Effect of Buying Shares Before an Income Dividend or Capital Gain Distribution

The fund’s share price may, at any time, reflect undistributed capital gains or income and unrealized appreciation, which may result in future taxable distributions. Such distributions can occur even in a year when the fund has a negative return. If you buy shares shortly before a distribution, you may receive a portion of the money you just invested in the form of a taxable distribution. Generally, the fund would make distributions to shareholders of record on the record date. If you are purchasing fund shares through a broker, you may wish to confirm with your broker the date on which you would be entitled to the fund’s distributions.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant that exchanges securities for Creation Units may realize a gain or loss equal to the difference between the fair market value of the Creation Units at the time of purchase and the sum of the Authorized Participant’s cost basis in the securities transferred plus any cash paid.

An Authorized Participant that exchanges Creation Units for securities may realize a gain or loss equal to the difference between the Authorized Participant’s cost basis in the Creation Units and the sum of the fair market value of the securities plus any cash received.

Authorized Participants exchanging securities for Creation Units or redeeming Creation Units should consult with their own tax adviser.

The fund's Statement of Additional Information, which contains a more detailed description of the fund's operations, investment restrictions, policies, and practices, is incorporated by reference into this prospectus, which means that it is legally part of this prospectus even if you do not request a copy. Additional information about the fund's investments is in the fund's annual and semi-annual reports to shareholders and in Form N-CSR. Except for money market funds, the fund's annual report contains a discussion of the market conditions and investment strategies that significantly affected the fund's performance during its last fiscal year. These documents and other information are available without charge through troweprice.com/prospectus. You can also request these documents and make shareholder inquiries at no cost by calling 1-800-638-5660, by sending an e-mail request to info@troweprice.com, or by contacting your financial intermediary.

Annual and semi-annual shareholder reports and other fund information are available on the EDGAR Database on the SEC's internet site at sec.gov. Copies of this information may be obtained, after paying a duplicating fee, by electronic request at publicinfo@sec.gov.
