Investment Objective(s)

The fund’s goals are preservation of capital, liquidity, and, consistent with these, the highest possible current income.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the fund. There may be additional expenses that apply, as described in your insurance contract prospectus, which are not reflected in the table.

Fees and Expenses of the Fund

	Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)
Management fees	0.55%
Other expenses	—
Total annual fund operating expenses	0.55

Example This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 year	3 years	5 years	10 years
	\$56	\$176	\$307	\$689

Investments, Risks, and Performance

Principal Investment Strategies

The fund is a money market fund managed in compliance with Rule 2a-7 under the Investment Company Act of 1940. Under normal conditions, the fund invests at least 80% of its net assets in government securities and repurchase agreements that are collateralized by government securities. The fund qualifies as a “government money market fund” in accordance with Rule 2a-7. “Government money market funds” are required to invest at least 99.5% of their total assets in cash, U.S. government securities, and/or repurchase agreements that are fully collateralized by government securities or cash. Government securities include any security issued or guaranteed as to principal or interest by the U.S. government and its agencies or instrumentalities. A repurchase agreement is a contract under which the fund (buyer) purchases a security, usually a U.S. government or agency security, from a bank or well-established securities dealer (seller) that requires the seller to repurchase the securities from the fund at a specific price on a designated date (which is often the next business day).

Rule 2a-7 does not require government money market funds to impose liquidity fees or temporary redemption gates. The fund has no intention to voluntarily impose liquidity fees and/or redemption gates, although the fund’s Board of Directors reserves the right to impose liquidity fees and redemption gates in the future.

The fund is managed to provide a stable share price of \$1.00 by investing in only U.S. dollar-denominated money market securities. Money market securities are generally high-quality, short-term obligations issued by companies or governmental entities. The securities purchased by the fund are subject to the maturity, quality, diversification, liquidity, and other requirements of Rule 2a-7. The fund’s weighted average maturity will not exceed 60 calendar days, the fund’s weighted average life will not exceed 120 calendar days, and the fund will not purchase any security with a remaining maturity longer than 397 calendar days (unless otherwise permitted by Rule 2a-7, such as certain variable and floating rate instruments). When calculating its weighted average maturity, the fund may shorten its maturity by using the interest rate resets of certain adjustable rate securities. The fund may not take into account these resets when calculating its weighted average life.

All securities purchased by the fund present minimal credit risk in the opinion of T. Rowe Price. In selecting securities for the fund, the portfolio manager may examine relationships among yields of various types and maturities of government money market securities in the context of interest rate outlooks. The fund’s yield will fluctuate with changes in short-term interest rates.

Principal Risks

As with any mutual fund, there can be no guarantee the fund will achieve its objective(s). You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. T. Rowe Price Associates, Inc., has no legal obligation to provide financial support to the fund, and you should not expect that T. Rowe Price Associates, Inc., will provide financial support to the fund at any time.

Money market funds have experienced significant pressures from shareholder redemptions, issuer credit downgrades, illiquid markets, and historically low yields on the securities they can hold. There have been a very small number of money market funds in other fund complexes that have “broken the buck,” which means that those funds’ investors did not receive \$1.00 per share for their investment in those funds. The potential for realizing a loss of principal in the fund could derive from:

Stable net asset value The fund may not be able to maintain a stable \$1.00 share price at all times. The fund’s shareholders should not rely on or expect the fund’s investment adviser or an affiliate to purchase distressed assets from the fund, enter into capital support agreements with the fund, make capital infusions into the fund, or take other actions to help the fund maintain a stable \$1.00 share price.

Interest rates A decline in interest rates may lower the fund’s yield, or a rise in the overall level of interest rates may cause a decline in the prices of fixed income securities held by the fund. The fund’s yield will vary; it is not fixed for a specific period like the yield on a bank certificate of deposit. This is a disadvantage when interest rates are falling because the fund would have to reinvest at lower interest rates. During periods of extremely low short-term interest rates, the fund may not be able to maintain a positive yield and, given the current low interest rate environment, risks associated with rising rates are currently heightened.

Market conditions The value of the fund’s investments may decrease, sometimes rapidly or unexpectedly, due to factors affecting an issuer held by the fund, particular industries, or the overall securities markets. A variety of factors can increase the volatility of the fund’s holdings and markets generally, including political or regulatory developments, recessions, inflation, rapid interest rate changes, war or acts of terrorism, natural disasters, and outbreaks of infectious illnesses or other widespread public health issues such as the coronavirus pandemic and related governmental and public responses. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others. Government intervention in markets may impact interest rates, market volatility, and security pricing. These adverse developments may cause broad declines in market value due to short-term market movements or for significantly longer periods during more prolonged market downturns.

Repurchase agreements A counterparty to a repurchase agreement may become insolvent or fail to repurchase securities from the fund as required, which could increase the fund’s costs or prevent the fund from immediately accessing its collateral.

Credit quality An issuer of a debt instrument could suffer an adverse change in financial condition that results in a payment default (failure to make scheduled interest or principal payments), a rating downgrade, or an inability to meet a financial obligation. Although the fund only purchases securities that present minimal credit risk in the opinion of T. Rowe Price, the credit quality of the fund’s holdings could change rapidly during periods of market stress. The fund’s overall credit risk is relatively low since it invests in securities that are backed by the full faith and credit of the U.S. government.

Liquidity The fund may not be able to sell a holding in a timely manner at its current carrying value. Periods of reduced liquidity in money markets could require the fund to liquidate its assets at inopportune times or at a depressed value, cause the fund to be unable to meet redemption requests without dilution of the remaining shareholders’ interests in the fund, and potentially affect the fund’s ability to maintain a \$1.00 share price.

Redemptions The fund may be subject to periods of increased redemptions that could cause the fund to sell its assets at disadvantageous times or at a depressed value or loss, particularly during periods of declining or illiquid markets, and that could affect the fund’s ability to maintain a stable \$1.00 share price.

Cybersecurity breaches The fund could be harmed by intentional cyberattacks and other cybersecurity breaches, including unauthorized access to the fund’s assets, customer data and confidential shareholder information, or other proprietary information. In addition, a cybersecurity breach could cause one of the fund’s service providers or financial intermediaries to suffer unauthorized data access, data corruption, or loss of operational functionality.

Performance

The following performance information provides some indication of the risks of investing in the fund. The fund's performance information represents only past performance and is not necessarily an indication of future results.

The performance for the periods prior to May 1, 2016, reflects the performance of the fund while it was named the T. Rowe Price Prime Reserve Portfolio. Prior to May 1, 2016, the fund operated as a prime money market fund and invested in certain types of securities that the fund is no longer permitted to hold. Consequently, the performance information below may have been different if the current investment limitations had been in effect during the period prior to the fund's conversion to a government money market fund.

The following bar chart illustrates how much returns can differ from year to year by showing calendar year returns and the best and worst calendar quarter returns during those years for the fund.

The following table shows the average annual total returns for the fund, and also compares the returns with the returns of a comparative index that has investment characteristics similar to those of the fund.

Average Annual Total Returns

	Periods ended December 31, 2020			Inception date
	1 Year	5 Years	10 Years	
Government Money Portfolio	0.25 %	0.72 %	0.36 %	12/31/1996
Lipper Variable Annuity Underlying U.S. Government Money Market Funds Average	0.25	0.72	0.37	

Updated performance information is available through troweprice.com.

Management

Investment Adviser T. Rowe Price Associates, Inc. (T. Rowe Price or Price Associates)

Portfolio Manager	Title	Managed Fund Since	Joined Investment Adviser
Douglas D. Spratley	Chair of Investment Advisory Committee	2020	2008

Purchase and Sale of Fund Shares

At a Board meeting held on March 9, 2021, the fund's Board of Directors approved the liquidation and dissolution of the fund. The liquidation is expected to occur on May 6, 2022 (Liquidation Date). Prior to the Liquidation Date, the assets of the fund will be liquidated at the discretion of the fund's portfolio management and the fund will cease to pursue its investment objective. In anticipation of the liquidation, effective May 3, 2021, the fund will be closed to new insurance providers. At any time prior to the termination, we welcome you to exchange your shares of the fund for the same class of shares of another T. Rowe Price fund. After the fund is liquidated, the fund will no longer be offered to shareholders for purchase.

The fund is not sold directly to the general public but is instead offered as an underlying investment option for variable annuity or variable life insurance contracts. Although the fund does not require a minimum amount for initial or subsequent purchases from insurance companies, your insurance company may impose investment minimums for your purchases of the fund.

You may purchase, redeem, or exchange shares of the fund on any day the New York Stock Exchange is open for business. You must purchase, redeem, and exchange shares through your insurance company.

Tax Information

The fund distributes any dividends and capital gains to its shareholders, which are the insurance company separate accounts that sponsor your variable annuity or variable life insurance contract. Variable product owners seeking to understand the tax consequences of their investment, including redemptions of fund shares and the impact of dividend and capital gains distributions by the fund, should consult with the insurance company that issued their variable product or refer to their variable annuity or variable life insurance contract prospectus.

Payments to Insurance Companies, Broker-Dealers, and Other Financial Intermediaries

The fund is generally available only through variable annuity or variable life insurance contracts. The fund and/or its related companies may make payments to a sponsoring insurance company or other financial intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the insurance company or other financial intermediary to recommend the fund over another investment option or by influencing an insurance company to include the fund as an underlying investment option in a variable contract. The prospectus (or other offering document) for your variable contract may contain additional information about these payments. Ask your insurance company or financial intermediary, or visit your insurance company's or financial intermediary's website, for more information.

MANAGEMENT OF THE FUND

Investment Adviser(s)

T. Rowe Price is the fund's investment adviser and oversees the selection of the fund's investments and management of the fund's portfolio pursuant to an investment management agreement between the investment adviser and the fund. T. Rowe Price is the investment adviser for all mutual funds sponsored and managed by T. Rowe Price (T. Rowe Price Funds); is an SEC-registered investment adviser that provides investment management services to individual and institutional investors and sponsors; and serves as adviser and subadviser to registered investment companies, institutional separate accounts, and common trust funds. The address for T. Rowe Price is 100 East Pratt Street, Baltimore, Maryland 21202. As of December 31, 2020, T. Rowe Price and its affiliates (Firm) had approximately \$1.47 trillion in assets under management and provided investment management services for more than 6.6 million individual and institutional investor accounts.

Portfolio Management

T. Rowe Price has established an Investment Advisory Committee with respect to the fund. The committee chair is ultimately responsible for the day-to-day management of the fund's portfolio and works with the committee in developing and executing the fund's investment program. The members of the committee are as follows: Douglas D. Spratley, Chair, Maria H. Condez, Alisa Fiumara-Yoch, Stephanie Angelique Gentile, Alan D. Levenson, Cheryl A. Mickel, Rachel Protzman, Chen Shao, and Mitch Unger. The following information provides the year that the chair (portfolio manager) first joined the Firm and the chair's specific business experience during the past five years (although the chair may have had portfolio management responsibilities for a longer period). Mr. Spratley became cochair in 2020 and sole chair in 2021. Mr. Spratley joined the Firm in 2008 and his investment experience dates from 1996. During the past five years, he has served as the head of U.S. Fixed Income Trading Money Markets and as a money market trader at the Firm. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of the fund's shares.

The Management Fee

The fund pays the investment adviser an annual all-inclusive management fee of 0.55% based on the fund's average daily net assets. The management fee is calculated and accrued daily and it includes investment management services and ordinary, recurring operating expenses, but does not cover interest; expenses related to borrowings, taxes, and brokerage and other transaction costs; or nonrecurring, extraordinary expenses.

In an effort to maintain a zero or positive net yield for the fund, T. Rowe Price may voluntarily waive all or a portion of the management fee it is entitled to receive from the fund or reimburse all or a portion of the fund's operating expenses. T. Rowe Price may amend or terminate this arrangement at any time without prior notice.

A discussion about the factors considered by the fund's Board of Directors (Board) and its conclusions in approving the fund's investment management agreement (and any subadvisory agreement, if applicable) appear in the fund's semiannual report to contract holders for the period ended June 30.

Variable Annuity Contracts and Variable Life Insurance Charges

Variable annuity and variable life insurance fees and charges imposed on contract holders and participants by the insurance companies are in addition to those described previously and are described in the variable annuity contract and variable life insurance prospectuses.

Variable Annuity Contracts and Variable Life Insurance Conflicts

The fund may serve as an investment medium for both variable annuity contracts and variable life insurance policies. Shares of the fund may be offered to separate accounts established by any number of insurance companies. The fund currently does not foresee any disadvantages to variable annuity contract owners due to the fact that the fund may serve as an investment medium for both variable annuity contracts and variable life insurance policies; however, due to differences in tax treatment or other considerations, it is theoretically possible that the interests of owners of variable annuity contracts and variable insurance policies for which the fund serves as an investment medium might at some time be in conflict. The fund's Board is required to monitor events to identify any material conflicts between variable annuity contract owners and variable life policy owners, and will determine what action, if any,

should be taken in the event of such a conflict. If such a conflict were to occur, an insurance company participating in the fund might be required to redeem the investment of one or more of its separate accounts from the fund. This might force the fund to sell securities at disadvantageous prices.

MORE INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE(S), STRATEGIES, AND RISKS

At a Board meeting held on March 9, 2021, the fund's Board of Directors approved the liquidation and dissolution of the fund. The liquidation is expected to occur on May 6, 2022 (Liquidation Date). Prior to the Liquidation Date, the assets of the fund will be liquidated at the discretion of the fund's portfolio management and the fund will cease to pursue its investment objective.

Investment Objective(s)

The fund's goals are preservation of capital, liquidity, and, consistent with these, the highest possible current income.

Principal Investment Strategies

The fund is a money market fund managed in compliance with Rule 2a-7 under the Investment Company Act of 1940. Under normal conditions, the fund invests at least 80% of its net assets (including any borrowings for investment purposes) in government securities and repurchase agreements that are collateralized by government securities. The fund qualifies as a "government money market fund" in accordance with Rule 2a-7. "Government money market funds" are required to invest at least 99.5% of their total assets in cash, U.S. government securities, and/or repurchase agreements that are fully collateralized by government securities or cash. A government security is a security issued or guaranteed as to principal or interest by the U.S. government and its agencies or instrumentalities. A repurchase agreement is a contract under which the fund (buyer) purchases a security, usually a U.S. government or agency security, from a bank or well-established securities dealer (seller) that requires the seller to repurchase the securities from the fund at a specific price on a designated date (which is often the next business day).

Rule 2a-7 requires money market funds to purchase securities that have a remaining maturity of no more than 397 calendar days (unless otherwise permitted under Rule 2a-7) and that have been determined by a money market fund's Board (or the fund's investment adviser, if the Board delegates such power to the adviser) to present minimal credit risks to the fund. T. Rowe Price will consider certain factors when determining whether a security presents minimal credit risks to the fund, including the capacity of each security's issuer or guarantor to meet its financial obligations. The adviser generally relies on its own credit ratings when selecting investments for the fund. A security may need to be sold if its maturity or credit quality changes and no longer meets the requirements of Rule 2a-7.

The fund's weighted average maturity will not exceed 60 calendar days, the fund's weighted average life will not exceed 120 calendar days, and the fund will not purchase any security with a remaining maturity longer than what is permitted under Rule 2a-7. The fund's yield will fluctuate in response to changes in interest rates, but the fund is managed to maintain a stable share price of \$1.00.

Shareholders will receive at least 60 days' prior notice of a change in the policy requiring the fund under normal conditions to invest at least 80% of its net assets in government securities and repurchase agreements that are collateralized by government securities.

The fund may sell holdings for a variety of reasons, such as to adjust the portfolio's average maturity or to shift assets into and out of higher-yielding or different sectors.

The fund invests in the following types of securities or assets:

Money Market Securities

Money market securities are short-term obligations issued by companies or governmental entities. Money market securities may be interest-bearing or discounted to reflect the rate of interest paid. In the case of interest-bearing securities, the issuer has a contractual obligation to pay coupon interest at a stated rate on specific dates and to repay the face value on a specified date. In the case of a discount security, no coupon interest is paid, but the security's price is discounted so that the interest is accrued until the security matures at face value. In either case, an issuer may have the right to redeem or "call" the security before maturity, and the investor may have to reinvest the proceeds at lower market rates.

Except for adjustable rate instruments, a money market security's interest rate, as reflected in the coupon rate or discount, is usually fixed for the life of the security. Its current yield (coupon or discount as a percent of current price) will fluctuate to reflect changes in interest rate levels. A money market security's price usually rises when interest rates fall, and vice versa.

Money market securities may be unsecured (backed by the issuer's general creditworthiness only) or secured (also backed by specified collateral).

Certain money market securities have interest rates that are adjusted periodically. These interest rate adjustments tend to minimize fluctuations in the securities' principal values. When calculating its weighted average maturity, the fund may use the interest rate resets to shorten the maturity of these securities in accordance with Rule 2a-7. The fund may not use these interest rate resets to shorten the maturity of these securities when calculating its weighted average life.

The main types of money market securities in which the fund can invest include:

Agency Notes Debt obligations of agencies sponsored by the U.S. government that are not backed by its full faith and credit. Agency notes are supported only by the credit of the instrumentality, which may or may not include the right of the issuer to borrow from the U.S. Treasury.

U.S. Treasury Securities The fund may purchase securities issued by the U.S. Treasury, which are debt obligations of the U.S. government. Such securities are backed by the full faith and credit of the U.S. government. U.S. Treasury securities may include Treasury Inflation Protected Securities, which unlike conventional Treasury securities, are structured to provide some protection against rising inflation. U.S. Treasury securities may also include floating rate U.S. Treasury notes and Treasury STRIPS, which are zero-coupon securities created by separating the principal and interest payments on U.S. Treasury securities. The fund may also purchase Treasury bills, which are sold at a discount and mature at par, while notes and bonds are issued as coupon-bearing instruments that pay interest every six months and mature at par. Bills mature in six months or less. All are backed by the full faith and credit of the U.S. government.

Other Securities Backed by the Full Faith and Credit of the U.S. Government The fund may purchase securities of U.S. government agencies and instrumentalities that are backed by the full faith and credit of the U.S. government, such as securities of the Government National Mortgage Association, the Federal Housing Administration, the General Services Administration, the Maritime Administration, and the Small Business Administration. These may also include securities issued by nongovernmental entities as long as they are guaranteed by a government agency or instrumentality, and any other securities that are backed by the full faith and credit of the U.S. government as they become available.

Repurchase Agreements Contracts under which the fund (buyer) purchases a security, usually a U.S. government or agency security, from a bank or well-established securities dealer (seller) that requires the seller to repurchase the securities from the fund at a specific price on a designated date (which is often the next business day). The fund will only enter into repurchase agreements that are fully collateralized and involve securities of the type (excluding any maturity limitations) in which it could otherwise invest, to the extent permitted by Rule 2a-7 under the Investment Company Act of 1940. In addition, the fund will only enter into repurchase agreements with counterparties (and, for centrally cleared repurchase agreements, sponsoring members) that are approved by T. Rowe Price.

Principal Risks

Consistent with the fund's objective(s), the portfolio manager uses various tools to try to reduce risks and increase total return, including:

- attempting to reduce the impact of a single holding on the fund's net asset value;
- thorough credit research performed by T. Rowe Price analysts; and
- maturity adjustments to reflect the portfolio manager's interest rate outlook.

The principal risks associated with the fund's principal investment strategies include the following:

Stable net asset value The fund may not be able to maintain a stable \$1.00 share price at all times. If a money market fund fails to maintain a stable net asset value, or if there is a perceived threat that a money market fund is likely to fail to maintain a stable net asset value, money market funds in general, including the fund, could experience significant redemption activity. This could reduce the market prices of securities held by the fund and make it more difficult for the fund to maintain a stable \$1.00 share price. The fund's shareholders should not rely on or expect the fund's investment adviser or an affiliate to purchase distressed assets from the fund, enter into capital support agreements with the fund, make capital infusions into the fund, or take other actions to help the fund maintain a stable \$1.00 share price.

Interest rates A decline in interest rates may lower the fund's yield, or a rise in the overall level of interest rates may cause a decline in the prices of fixed income securities held by the fund. The fund's yield will vary; it is not fixed for a specific period like the yield on a bank certificate of deposit. Recent and potential future changes in monetary policy made by central banks and/or governments are

likely to affect the level of interest rates. Although money market funds try to minimize this risk by purchasing short-term securities, during periods of extremely low or negative short-term interest rates, the fund may not be able to maintain a positive yield or yields on par with historical levels.

Market conditions The value of investments held by the fund may decline, sometimes rapidly or unpredictably, due to factors affecting certain issuers, particular industries or sectors, or the overall markets. Rapid or unexpected changes in market conditions could cause the fund to liquidate its holdings at inopportune times or at a loss or depressed value. The value of a particular holding may decrease due to developments related to that issuer, but also due to general market conditions, including real or perceived economic developments such as changes in interest rates, credit quality, inflation, or currency rates, or generally adverse investor sentiment. The value of a holding may also decline due to factors that negatively affect a particular industry or sector, such as labor shortages, increased production costs, or competitive conditions. In addition, local, regional, or global events such as war, acts of terrorism, political and social unrest, regulatory changes, recessions, shifts in monetary or trade policies, natural or environmental disasters, and the spread of infectious diseases or other public health issues could have a significant negative impact on securities markets and the fund's investments. Unpredictable events such as natural disasters, pandemics, and widespread health crises, including the coronavirus pandemic and related governmental and public responses, may lead to unexpected suspensions or closures of securities exchanges, travel restrictions or quarantines, business disruptions and closures, inability to obtain raw materials, supplies and component parts, reduced or disrupted operations for the fund's service providers or issuers in which the fund invests, and an extended adverse impact on global market conditions. Government intervention in markets may impact interest rates, market volatility, and security pricing. The occurrence, reoccurrence, and uncertainty of widespread diseases and health crises could adversely affect the economies (including through changes in business activity and increased unemployment) and financial markets of specific countries or worldwide.

Repurchase agreements The counterparty to a repurchase agreement may be unable to repurchase the securities from the fund as required, causing the fund to experience delays in accessing its collateral or additional costs in disposing of the collateral. If a counterparty becomes insolvent and seeks relief under the bankruptcy laws, the fund may be limited or delayed in its ability to exercise its rights to liquidate assets or may be required to accept collateral related to a repurchase agreement that will need to be liquidated in order to maintain compliance with the fund's investment restrictions.

Credit quality An issuer of a debt instrument held by the fund may default (fail to make scheduled interest or principal payments), or the counterparty to a contract may be unable or unwilling to honor its obligations, potentially reducing the fund's income and share price. Credit risk is increased when a portfolio security is downgraded or the perceived financial condition of the issuer or counterparty deteriorates. Rule 2a-7 requires money market funds to purchase securities that have a maturity of no more than 397 calendar days, and which have been determined by T. Rowe Price, pursuant to guidelines approved by the fund's Board, to present minimal credit risk to the fund.

The fund is subject to the risk that T. Rowe Price's credit risk determinations may be incorrect. In addition, the credit quality of a money market fund's portfolio securities can change rapidly in certain market conditions, which could result in significant net asset value deterioration and the inability to maintain a net asset value of \$1.00 per share. Shareholders may bear the risk if the fund is unable to maintain a net asset value of \$1.00 per share.

Liquidity The fund may not be able to meet requests to redeem shares issued by the fund without significant dilution of the remaining shareholders' interests in the fund. In addition, the fund may not be able to sell a holding in a timely manner at a desired price. Sectors of the bond and money markets can experience sudden downturns in trading activity. During periods of reduced market liquidity, the spread between the price at which a security can be bought and the price at which it can be sold can widen, and the fund may not be able to sell a holding readily at a price that reflects what the fund believes it should be worth.

Redemptions If a money market fund fails to maintain a stable net asset value, or if it is perceived that a money market fund's net asset value is likely to fluctuate, other money market funds, including the fund, could be subject to increased redemption activity, which could adversely affect the fund's net asset value. The fund may be subject to periods of significant redemptions that could cause the fund to sell its assets at disadvantageous times or at a depressed value or loss, particularly during periods of declining or illiquid markets, and that could affect the fund's ability to maintain a stable \$1.00 share price. The redemption by one or more large shareholders of their holdings in the fund could cause the remaining shareholders in the fund to lose money.

Cybersecurity breaches The fund may be subject to operational and information security risks resulting from breaches in cybersecurity. Cybersecurity breaches may involve deliberate attacks and unauthorized access to the digital information systems (for example, through "hacking" or malicious software coding) used by the fund or its third-party service providers but may also result from outside attacks such as denial-of-service attacks, which are efforts to make network services unavailable to intended users. These

breaches may, among other things, result in financial losses to the fund and its shareholders, cause the fund to lose proprietary information, disrupt business operations, or result in the unauthorized release of confidential information. Further, cybersecurity breaches involving the fund's third-party service providers, financial intermediaries, trading counterparties, or issuers in which the fund invests could subject the fund to many of the same risks associated with direct breaches.

Additional Strategies, Risks, and Investment Management Practices

As a money market fund, the fund typically focuses its investments on high-quality, short-term securities. However, the fund may purchase any security that meets the requirements of Rule 2a-7, such as a longer-term security with features that shorten the security's effective maturity. Such holdings are subject to the risk that they will not in the future be considered eligible investments under Rule 2a-7, resulting in the fund selling the holding at a loss.

In addition to the principal investment strategies and principal risks previously described, the fund may employ other investment strategies and may be subject to other risks, which include the following:

Illiquid Investments and Maintaining Liquid Investments

Some of the fund's holdings may be considered illiquid because they cannot be sold in the ordinary course of business within seven days at approximately the prices at which they are valued. The sale of illiquid investments may involve substantial delays and additional costs, and the fund may only be able to sell such securities at prices substantially lower than what it believes they are worth.

The fund must generally hold a significant percentage of its assets in securities that are liquid; that is, securities that may be readily sold in the market or will mature within a short period of time.

Borrowing Money and Transferring Assets

The fund may borrow from banks, other persons, and other T. Rowe Price Funds for temporary or emergency purposes, to facilitate redemption requests, or for other purposes consistent with the fund's policies as set forth in this prospectus and the Statement of Additional Information. Such borrowings may be collateralized with the fund's assets, subject to certain restrictions.

Borrowings may not exceed 33 $\frac{1}{3}$ % of the fund's total assets. This limitation includes any borrowings for temporary or emergency purposes, applies at the time of the transaction, and continues to the extent required by the Investment Company Act of 1940.

Meeting Redemption Requests

We expect that the fund will hold cash or cash equivalents to meet redemption requests. The fund may also use the proceeds from the sale of portfolio securities to meet redemption requests if consistent with the management of the fund. These redemption methods will be used regularly and may also be used in deteriorating or stressed market conditions. The fund reserves the right to pay redemption proceeds with securities from the fund's portfolio rather than in cash (redemptions in-kind), as described under "Large Redemptions." Redemptions in-kind are typically used to meet redemption requests that represent a large percentage of the fund's net assets in order to minimize the effect of large redemptions on the fund and its remaining shareholders. In general, any redemptions in-kind will represent a pro-rata distribution of the fund's securities, subject to certain limited exceptions. Redemptions in-kind may be used regularly in circumstances as described above (generally if the shareholder is able to accept securities in-kind) and may also be used in stressed market conditions.

The fund, along with other T. Rowe Price Funds, is a party to an interfund lending exemptive order received from the SEC that permits the T. Rowe Price Funds to borrow money from and/or lend money to other T. Rowe Price Funds to help the funds meet short-term redemptions and liquidity needs.

During periods of deteriorating or stressed market conditions, when an increased portion of the fund's portfolio may be composed of holdings with reduced liquidity or lengthy settlement periods, or during extraordinary or emergency circumstances, the fund may be more likely to pay redemption proceeds with cash obtained through interfund lending or short-term borrowing arrangements (if available) or by redeeming a large redemption request in-kind.

Reserve Position

For temporary, defensive purposes, there is no limit on the fund's holdings in cash.

The Statement of Additional Information contains more detailed information about the fund and its investments, operations, and expenses. The fund's investments may be subject to further restrictions and risks described in the Statement of Additional Information.

FINANCIAL HIGHLIGHTS

The Financial Highlights table, which provides information about the fund's financial history, is based on a single share outstanding throughout the periods shown. The table is part of the fund's financial statements, which are included in its annual report and are incorporated by reference into the Statement of Additional Information (available upon request). The financial statements in the annual report were audited by the fund's independent registered public accounting firm, PricewaterhouseCoopers LLP.

FINANCIAL HIGHLIGHTS		For a share outstanding throughout each period				
	Year Ended

(1) Per share amounts calculated using average shares outstanding method.

(2) Includes the impact of expense-related arrangements with Price Associates.

(3) Includes the effect of voluntary management fee waivers and operating expense reimbursements (0.28%, 0.00%, 0.00%, 0.00%, and 0.15% of average net assets) for the years ended 12/31/20, 12/31/19, 12/31/18, 12/31/17, and 12/31/16, respectively.

(4) Amounts round to less than \$0.01 per share.

(5) Total return reflects the rate that an investor would have earned on an investment in the fund during each period, assuming reinvestment of all distributions, and payment of no redemption or account fees, if applicable.

DISCLOSURE OF FUND PORTFOLIO INFORMATION

Most T. Rowe Price Funds disclose their calendar quarter-end portfolio holdings on troweprice.com 15 calendar days after each quarter. At the discretion of the investment adviser, these holdings reports may exclude the issuer name and other information relating to a holding in order to protect the fund's interests and to prevent harm to the fund or its shareholders. In addition, most T. Rowe Price Funds disclose their 10 largest holdings, along with the percentage of the relevant fund's total assets that each of the 10 holdings represents, on troweprice.com on the seventh business day after each month-end. These holdings are listed in numerical order based on such percentages of the fund's assets. A description of T. Rowe Price's policies and procedures with respect to the disclosure of portfolio information is available in the Statement of Additional Information.

The following policies and procedures generally apply to the T. Rowe Price Variable Insurance Portfolios, which are T. Rowe Price mutual funds specifically designed to be made available through variable annuity or variable life insurance contracts. For instructions on how to purchase and redeem shares of the funds, you should refer to your insurance contract prospectus.

INVESTING IN T. ROWE PRICE VARIABLE INSURANCE PORTFOLIOS

Shares of the Variable Insurance Portfolios are designed to be offered to insurance company separate accounts established for the purpose of funding variable annuity and variable life insurance contracts. The variable annuity and variable life insurance contracts holders or participants are not the shareholders of the funds. Rather, the separate account of the insurance company is the shareholder. The variable annuity and variable life insurance contracts are described in separate prospectuses issued by the insurance companies. The funds assume no responsibility for any insurance company prospectuses or variable annuity or variable life insurance contracts.

Some of the Variable Insurance Portfolios are available only in a single share class, while some of the Variable Insurance Portfolios are also available in a II Class. Shares of the funds are sold and redeemed without the imposition of any sales charges, commissions, or redemption fees, although shares of the II Class are subject to a 12b-1 fee at a rate of up to 0.25% of the class' average daily net assets. In addition, certain other charges may apply to variable annuity or variable life contracts. Those charges are disclosed in the insurance contract prospectus.

Your ability to exchange from these funds into any other T. Rowe Price Fund that serves as an investment option under your insurance contract is governed by the terms of that contract and the insurance contract prospectus, as well as the funds' excessive and short-term trading policy described later in this section.

DISTRIBUTION AND SHAREHOLDER SERVICING FEES

Each II Class has adopted a 12b-1 plan to pay certain expenses associated with the distribution of the fund's shares out of the fund's assets. Under such 12b-1 plan, the II Class may make payments at a rate of up to 0.25% of the class' average daily net assets of the class' average daily net assets to various insurance companies, their agents, and contract distributors for distribution and servicing of fund shares. These payments may be more or less than the costs incurred by the insurance companies, their agents, and contract distributors for distribution and servicing of fund shares. Because the fees are paid from the II Class net assets on an ongoing basis, they will increase the cost of your investment and, over time, could result in your paying more than with other types of sales charges.

In addition, from time to time, T. Rowe Price may make payments from its own resources to eligible insurance companies for recordkeeping and administrative services they provide to a fund for contract holders. These payments may range from 0.15% to 0.25% of the average annual total assets invested by the separate accounts of the insurance company in the fund. All payments described specifically by this paragraph are paid by T. Rowe Price and are not paid directly from the Variable Insurance Portfolios' assets.

PRICING OF SHARES AND TRANSACTIONS

How and When Shares Are Priced

The trade date for your transaction request generally depends on the day and time that your insurance company or T. Rowe Price receives your request and will normally be executed using the next share price calculated after your order is received in correct form by your insurance company or T. Rowe Price or its agent. The share price, also called the net asset value, for each share class of a fund is calculated at the close of trading on the New York Stock Exchange (NYSE), which is normally 4 p.m. ET, on each day that the NYSE is open for business. Net asset values are not calculated for the funds on days when the NYSE is scheduled to be closed for trading (for example, weekends and certain U.S. national holidays). If the NYSE is unexpectedly closed due to weather or other extenuating circumstances on a day it would typically be open for business, or if the NYSE has an unscheduled early closing on a day it has opened

for business, the funds reserve the right to treat such day as a business day and accept purchase and redemption orders and calculate their share price as of the normally scheduled close of regular trading on the NYSE for that day.

To calculate the net asset value, the fund's assets are valued and totaled; liabilities are subtracted; and each class' proportionate share of the balance, called net assets, is divided by the number of shares outstanding of that class. Market values are used to price portfolio holdings for which market quotations are readily available. Market values generally reflect the prices at which securities actually trade or represent prices that have been adjusted based on evaluations and information provided by the fund's pricing services. Investments in other mutual funds are valued at the closing net asset value per share of the mutual fund on the day of valuation. If a market value for a portfolio holding is not available or normal valuation procedures are deemed to be inappropriate, the fund will make a good faith effort to assign a fair value to the holding by taking into account various factors and methodologies that have been approved by the fund's Board. This value may differ from the value the fund receives upon sale of the securities.

Amortized cost is used to price securities held by money market funds and certain short-term debt securities held by other funds. The Government Money Portfolio, which seeks to maintain a stable net asset value of \$1.00, uses the amortized cost method of valuation to calculate its net asset value. Amortized cost allows money market funds to value a holding at the fund's acquisition cost with adjustments for any premiums or discounts, and then round the net asset value per share to the nearest whole cent. The amortized cost method of valuation enables money market funds to maintain a \$1.00 net asset value, but it may also result in periods during which the stated value of a security held by the funds differs from the market-based price the funds would receive if they sold that holding. The current market-based net asset value per share for each business day in the preceding six months is available for the Government Money Portfolio through troweprice.com. These market-based net asset values are for informational purposes only and are not used to price transactions.

The funds use various pricing services to provide closing market prices, as well as information used to adjust those prices and to value most fixed income securities. A fund cannot predict how often it will use closing prices or how often it will adjust those prices. As a means of evaluating its fair value process, the fund routinely compares closing market prices, the next day's opening prices in the same markets, and adjusted prices.

Non-U.S. equity securities are valued on the basis of their most recent closing market prices at 4 p.m. ET, except under the following circumstances. Most foreign markets close before 4 p.m. ET. For example, the most recent closing prices for securities traded in certain Asian markets may be as much as 15 hours old at 4 p.m. ET. If a fund determines that developments between the close of a foreign market and the close of the NYSE will, in its judgment, affect the value of some or all of the fund's securities, the fund will adjust the previous closing prices to reflect what it believes to be the fair value of the securities as of 4 p.m. ET. In deciding whether to make these adjustments, the fund reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities.

A fund may also fair value certain securities or a group of securities in other situations—for example, when a particular foreign market is closed but the fund is open. For a fund that has investments in securities that are primarily listed on foreign exchanges that trade on weekends or other days when the fund does not price its shares, the fund's net asset value may change on days when shareholders will not be able to purchase or redeem the fund's shares. If an event occurs that affects the value of a security after the close of the market, such as a default of a commercial paper issuer or a significant move in short-term interest rates, a fund may make a price adjustment depending on the nature and significance of the event. The funds also evaluate a variety of factors when assigning fair values to private placements and other restricted securities. Other mutual funds may adjust the prices of their securities by different amounts or assign different fair values than the fair value that the fund assigns to the same security.

How the Trade Date Is Determined

The insurance companies purchase shares of the fund for their separate accounts, using premiums allocated by the contract holders or participants. Shares are purchased at the net asset value next determined after the insurance company receives the premium payment in correct form. Initial and subsequent payments allocated to the fund are subject to the limits stated in the insurance contract prospectus issued by the insurance company.

The insurance companies redeem shares of the fund to make benefit or surrender payments under the terms of their contracts. Redemptions are processed on any day on which the NYSE is open and are priced at the fund's net asset value next determined after the insurance company receives a surrender request in acceptable form.

The funds have authorized certain insurance companies, financial intermediaries, or their designees to accept orders to buy or sell fund shares on their behalf. Generally, when insurance companies receive an order in correct form, the order is considered as being

placed with the fund and shares will be bought or sold at the net asset value next calculated after the order is received by the insurance company. The insurance company or financial intermediary must transmit the order to T. Rowe Price or its agent and pay for such shares in accordance with the agreement with T. Rowe Price, or the order may be canceled and the insurance company or financial intermediary could be held liable for the losses. If the fund does not have such an agreement in place with your insurance company or financial intermediary, T. Rowe Price or its agent must receive the request in correct form from your insurance company or financial intermediary by the close of the NYSE in order for your transaction to be priced at that business day's net asset value.

Note: The time at which transactions and shares are priced and the time until which orders are accepted may be changed in case of an emergency or if the NYSE closes at a time other than 4 p.m. ET. The funds reserve the right to not treat an unscheduled intraday disruption or closure in NYSE trading as a closure of the NYSE and still accept transactions and calculate their net asset value as of 4 p.m. ET.

GENERAL POLICIES RELATING TO TRANSACTIONS

Purchasing Shares

All initial and subsequent investments by insurance companies or financial intermediaries are typically made by bank wire or electronic payment. There is no assurance that the share price for the purchase will be the same day the wire was initiated. The Variable Insurance Portfolios do not require a particular minimum amount for initial or subsequent purchases. However, you should check with your insurance company to determine if a minimum applies to your investment. Purchases by financial intermediaries are typically initiated through the National Securities Clearing Corporation or by calling Financial Institution Services.

When authorized by the fund, certain financial institutions purchasing fund shares on behalf of customers through T. Rowe Price Financial Institution Services may place a purchase order unaccompanied by payment. Payment for these shares must be received by the time designated by the fund (not to exceed the period established for settlement under applicable regulations). If payment is not received by this time, the order may be canceled. The financial institution is responsible for any costs or losses incurred by the fund or T. Rowe Price if payment is delayed or not received.

U.S. Dollars All purchases must be paid for in U.S. dollars.

Nonpayment Purchases may be canceled for any orders that are not paid in full. The purchaser may be responsible for any losses or expenses incurred by the fund or its transfer agent, and the fund can redeem shares as reimbursement. The funds and their agents have the right to reject or cancel any purchase due to nonpayment.

Redeeming Shares

Unless otherwise indicated, redemption proceeds will be sent via bank wire to the insurance company's or financial intermediary's designated bank. Redemptions are typically initiated through the National Securities Clearing Corporation or by calling Financial Institution Services. Normally, the fund transmits proceeds to insurance companies and financial intermediaries for redemption orders received in correct form on either the next business day or second business day after receipt of the order, depending on the arrangement with the insurance company or financial intermediary. You may want to contact your insurance company about procedures for receiving your redemption proceeds under your insurance contract.

Please note that certain purchase and redemption requests initiated through the National Securities Clearing Corporation may be rejected, and in such instances, the transaction must be placed by contacting Financial Institution Services.

Large Redemptions Large redemptions can adversely affect a portfolio manager's ability to implement a fund's investment strategy by causing the premature sale of securities that would otherwise be held longer. Therefore, the fund reserves the right (without prior notice) to redeem in-kind. In general, any redemptions in-kind will represent a pro-rata distribution of a fund's securities, subject to certain limited exceptions. The redeeming shareholder or account will be responsible for disposing of the securities, and the shareholder or account will be subject to the risks that the value of the securities could decline prior to their sale, the securities could be difficult to sell, and brokerage fees could be incurred. If a shareholder or account owner continues to hold the securities, he or she may be subject to any ownership restrictions imposed by the issuers. For example, real estate investment trusts often impose ownership restrictions on their equity securities.

Delays in Sending Redemption Proceeds The Variable Insurance Portfolios typically expect that redemption requests will be paid out to redeeming shareholders by the business day following the receipt of a redemption request that is in correct form. Proceeds sent

by wire are typically credited to the insurance company's or financial intermediary's designated bank the next business day after the redemption. However, under certain circumstances, and when deemed to be in a fund's best interests, proceeds may not be sent for up to seven calendar days after receipt of a valid redemption order (for example, during periods of deteriorating or stressed market conditions or during extraordinary or emergency circumstances). In addition, under certain limited circumstances, the Board of Directors of a money market fund may elect to permanently suspend redemptions in order to facilitate an orderly liquidation of the money market fund (subject to any additional liquidation requirements).

Excessive and Short-Term Trading Policy

Excessive transactions and short-term trading can be harmful to fund shareholders in various ways, such as disrupting a fund's portfolio management strategies, increasing a fund's trading and other costs, and negatively affecting its performance. Short-term traders in funds that invest in foreign securities may seek to take advantage of developments overseas that could lead to an anticipated difference between the price of the funds' shares and price movements in foreign markets. While there is no assurance that T. Rowe Price can prevent all excessive and short-term trading, the Boards of the T. Rowe Price Funds have adopted the following trading limits that are designed to deter such activity and protect the funds' shareholders. The funds may revise their trading limits and procedures at any time as the Boards deem necessary or appropriate to better detect short-term trading that may adversely affect the funds, to comply with applicable regulatory requirements, or to impose additional or alternative restrictions. The excessive and short-term trading policy for the T. Rowe Price Funds applies to contract holders notwithstanding any provisions in your insurance contract.

Subject to certain exceptions, each T. Rowe Price Fund restricts a shareholder's purchases (including through exchanges) into a fund account for a period of 30 calendar days after the shareholder has redeemed or exchanged out of that same fund account (the "30-Day Purchase Block"). The calendar day after the date of redemption is considered Day 1 for purposes of computing the period before another purchase may be made.

General Exceptions As of the date of this prospectus, the following types of transactions generally are not subject to the 30-Day Purchase Block (certain of these exceptions are not applicable to Variable Insurance Portfolios):

- Shares purchased or redeemed in money market funds and ultra short-term bond funds;
- Shares purchased or redeemed through a systematic purchase or withdrawal plan;
- Checkwriting redemptions from bond funds and money market funds;
- Shares purchased through the reinvestment of dividends or capital gain distributions;
- Shares redeemed automatically by a fund to pay fund fees or shareholder account fees;
- Transfers and changes of account registration within the same fund;
- Shares purchased by asset transfer or direct rollover;
- Shares purchased or redeemed through IRA conversions and recharacterizations;
- Shares redeemed to return an excess contribution from a retirement account;
- Transactions in Section 529 college savings plans;
- Certain transactions in defined benefit and nonqualified plans, subject to prior approval by T. Rowe Price;
- Shares converted from one share class to another share class in the same fund;
- Shares of T. Rowe Price Funds that are purchased by another T. Rowe Price Fund, including shares purchased by T. Rowe Price fund-of-funds products, and shares purchased by discretionary accounts managed by T. Rowe Price or one of its affiliates (please note that shareholders of the investing T. Rowe Price Fund are still subject to the policy);
- Transactions initiated by the trustee or adviser to a donor-advised charitable gift fund as approved by T. Rowe Price; and
- Transactions having a value of \$5,000 or less (insurance companies and financial intermediaries may apply the excessive and short-term trading policy to transactions of any amount).

Transactions in certain rebalancing, asset allocation, wrap, and other advisory programs, as well as non-T. Rowe Price fund-of-funds products, may also be exempt from the 30-Day Purchase Block, subject to prior written approval by T. Rowe Price.

In addition to restricting transactions in accordance with the 30-Day Purchase Block, T. Rowe Price may, in its discretion, reject (or instruct a financial intermediary or insurance company to reject) any purchase or exchange into a fund from a person (which includes individuals and entities) whose trading activity could disrupt the management of the fund or dilute the value of the fund's shares, including trading by persons acting collectively (for example, following the advice of a newsletter). Such persons may be barred, without prior notice, from further purchases of T. Rowe Price Funds for a period longer than 30 calendar days, or permanently.

Omnibus Accounts Financial intermediaries and insurance companies may maintain their underlying accounts directly with the fund, although they often establish an omnibus account (one account with the fund that represents multiple underlying shareholder

accounts or underlying contract holder accounts) in the fund on behalf of their customers. When insurance companies establish omnibus accounts in the T. Rowe Price Funds, T. Rowe Price is not able to monitor the trading activity by underlying contract holders. However, T. Rowe Price monitors aggregate trading activity at the insurance company (omnibus account) level in an attempt to identify activity that indicates potential excessive or short-term trading. If it detects suspicious trading activity, T. Rowe Price will contact the insurance company and may request personal identifying information and transaction histories for some or all of the underlying contract holders. If T. Rowe Price believes that excessive or short-term trading has occurred and there is no exception for such trades under the funds' Excessive and Short-Term Trading Policy previously described, it will instruct the insurance company to impose restrictions to discourage such practices and take appropriate action with respect to the underlying contract holder, including restricting purchases for 30 calendar days or longer. There is no assurance that T. Rowe Price will be able to properly enforce its excessive and short-term trading policy for omnibus accounts. Because T. Rowe Price generally relies on financial intermediaries and insurance companies to provide information and impose restrictions for omnibus accounts, its ability to monitor and deter excessive trading will be dependent upon the financial intermediaries' and insurance companies' timely performance of their responsibilities.

T. Rowe Price may allow a financial intermediary or insurance company to maintain restrictions on trading in the T. Rowe Price Funds that differ from the 30-Day Purchase Block. An alternative excessive and short-term trading policy would be acceptable to T. Rowe Price if it believes that the policy would provide sufficient protection to the T. Rowe Price Funds and their shareholders that is consistent with the Excessive and Short-Term Trading Policy adopted by the funds' Boards.

The terms of your insurance contract may further restrict your ability to trade between investment options available under your contract. You should carefully review your insurance contract or consult with your insurance company directly to determine the trading policy, as well as any rules or conditions on transactions that will apply to your trades in the T. Rowe Price Funds and any other investment options available under your contract.

There is no guarantee that T. Rowe Price will be able to identify or prevent all excessive or short-term trades or trading practices.

Responsibility for Unauthorized Transactions

T. Rowe Price and its agents use procedures reasonably designed to confirm that telephone, electronic, and other instructions are genuine. These procedures include recording telephone calls, requiring personalized security codes or certain identifying information for inquiries and requests, and requiring Medallion signature guarantees for certain transactions and account changes. If T. Rowe Price and its agents follow these procedures, they are not responsible for any losses that may occur due to unauthorized instructions. In addition, you should verify the accuracy of transactions immediately after you receive confirmation of them and notify T. Rowe Price of any inaccuracies.

Fund Operations and Shareholder Services

T. Rowe Price and The Bank of New York Mellon, subject to the oversight of T. Rowe Price, each provide certain accounting services to the T. Rowe Price Funds. T. Rowe Price Services, Inc., acts as the transfer agent and dividend disbursing agent and provides shareholder and administrative services to the funds. These companies receive compensation from the funds for their services. These fees are included in a fund's financial statements.

INFORMATION ON DISTRIBUTIONS AND TAXES

Each fund intends to qualify to be treated each year as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (Code). In order to qualify, a fund must satisfy certain income, diversification, and distribution requirements. A regulated investment company is not subject to U.S. federal income tax at the portfolio level on income and gains from investments that are distributed to shareholders. However, if a fund were to fail to qualify as a regulated investment company, and was ineligible to or otherwise did not cure such failure, the result would be fund-level taxation and, consequently, a reduction in income available for distribution to the fund's shareholders.

For a discussion of the tax status of your variable annuity contract, please refer to the insurance contract prospectus. Any tax forms applicable to your investment will be provided to you by your insurance company.

The policy of the funds is to distribute, to the extent possible, all net investment income and realized capital gains to its shareholders, which are the various insurance companies that have established separate accounts in connection with their issuance of variable annuity and variable life insurance contracts. Any dividends from net investment income are declared daily and paid monthly for the Limited-Term Bond and Government Money Portfolios; declared and paid quarterly for the Equity Income, Equity Index 500, and

Moderate Allocation Portfolios; and declared and paid annually for all other Variable Insurance Portfolios. Shares of the Limited-Term Bond and Government Money Portfolios will normally earn dividends through the date of redemption. The funds do not pay dividends in fractional cents. Any dividend amount earned for a particular day on all shares held that is one-half of one cent or greater (for example, \$0.016) will be rounded up to the next whole cent (\$0.02), and any amount that is less than one-half of one cent (for example, \$0.014) will be rounded down to the nearest whole cent (\$0.01). Please note that if the dividend payable on all shares held is less than one-half of one cent for a particular day, no dividend will be earned for that day.

If a fund has net capital gains for the year (after subtracting any capital losses), they are usually declared and paid in December. If a second distribution is necessary, it is generally paid the following year.

All fund distributions made to a separate account will be reinvested automatically in additional fund shares, unless a shareholder (separate account) elects to receive distributions in cash. Under current law, dividends and distributions made by the fund to separate accounts are generally not taxable to the separate accounts, the insurance company, or the contract holder, provided that the separate account meets the diversification requirements of Code Section 817(h) and other tax-related requirements are satisfied. Each of the Variable Insurance Funds intends to diversify its investments in the manner required under Code Section 817(h).

RIGHTS RESERVED BY THE FUNDS

T. Rowe Price Funds and their agents, in their sole discretion, reserve the following rights: (1) to waive or lower investment minimums; (2) to accept initial purchases by telephone; (3) to refuse any purchase or exchange order; (4) to cancel or rescind any purchase or exchange order placed through a financial intermediary no later than the business day after the order is received by the financial intermediary (including, but not limited to, orders deemed to result in excessive trading, market timing, or 5% ownership); (5) to cease offering fund shares at any time to all or certain groups of investors; (6) to freeze any account and suspend account services when notice has been received of a dispute regarding the ownership of the account, or a legal claim against an account, upon initial notification to T. Rowe Price of a shareholder's death until T. Rowe Price receives required documentation in correct form, or if there is reason to believe a fraudulent transaction may occur; (7) to otherwise modify the conditions of purchase and modify or terminate any services at any time; (8) to waive any wire fees charged to a group of shareholders; (9) to act on instructions reasonably believed to be genuine; (10) to involuntarily redeem an account at the net asset value calculated the day the account is redeemed when permitted by law, including in cases of threatening conduct, suspected fraudulent or illegal activity, or if the fund or its agent is unable, through its procedures, to verify the identity of the person(s) or entity opening an account; and (11) for the money market funds, to suspend redemptions to facilitate an orderly liquidation.

In an effort to protect T. Rowe Price Funds from the possible adverse effects of a substantial redemption in a large account, as a matter of general policy, no contract holder or participant or group of contract holders or participants controlled by the same person or group of persons will knowingly be permitted to purchase in excess of 5% of the outstanding shares of the fund, except upon approval by the fund's management.

A Statement of Additional Information for the T. Rowe Price family of funds, which includes additional information about the funds, has been filed with the SEC and is incorporated by reference into this prospectus. Further information about fund investments, including a review of market conditions and the manager's recent investment strategies and their impact on performance during the past fiscal year, is available in the annual and semiannual shareholder reports. To obtain free copies of any of these documents, or for shareholder inquiries, contact your insurance company. Certain documents and updated performance information are available through troweprice.com.

Fund reports and other fund information are available on the EDGAR Database on the SEC's internet site at <http://www.sec.gov>. Copies of this information may be obtained, after paying a duplicating fee, by electronic request at publicinfo@sec.gov.
