Investment Objective & Strategy

The fund seeks to provide long-term capital growth.

Focus on investing in a diversified portfolio with strong return potential and lower risk relative to the S&P 500 Index.

Aim to provide similar or better tax efficiency than an S&P 500 ETF

Our long-term approach seeks to minimize portfolio turnover.

Past performance is not a guarantee or a reliable indicator of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than their original cost. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com). Market returns are based on the midpoint of the bid/ask spread as of 4p.m. ET and do not represent returns an investor would receive if shares were traded at other times.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

Risks: Large-cap stocks: Securities issued by large-cap companies tend to be less volatile than securities issued by small- and mid-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges. **Stock investing:** Stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. See the prospectus for more detail on the fund's principal risks.

Additional Disclosures & Definitions

Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit [troweprice.com](https://www.troweprice.com). Read it carefully.

ETFs are bought and sold at market prices, not NAV. Investors generally incur the cost of the spread between the prices at which shares are bought and sold. Buying and selling shares may result in brokerage commissions which will reduce returns.
