Investment Objective & Strategy

The fund seeks to provide long-term capital growth.

Focus on investing in a diversified portfolio of primarily large-cap stocks with the following characteristics:

- Rapid and/or durable earnings growth
- Above-average rate of cash flow growth
- Quality companies that will likely benefit from innovation and/or disruption
- Attractive valuation

Our strategic investment approach combined with active tax management seeks to deliver optimal after-tax returns.

Past performance is not a guarantee or a reliable indicator of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than their original cost. To obtain the most recent month-end performance, visit troweprice.com. Market returns are based on the midpoint of the bid/ask spread as of 4p.m. ET and do not represent returns an investor would receive if shares were traded at other times.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

Risks: Growth investing: The fund's growth approach to investing could cause it to underperform other stock funds that employ a different investment style. **Large-cap stocks:** Securities issued by large-cap companies tend to be less volatile than securities issued by small- and mid-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges. See the prospectus for more detail on the fund's principal risks.

Additional Disclosures & Definitions

Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit [troweprice.com](https://www.troweprice.com). Read it carefully.

ETFs are bought and sold at market prices, not NAV. Investors generally incur the cost of the spread between the prices at which shares are bought and sold. Buying and selling shares may result in brokerage commissions which will reduce returns.
