Performance data quoted represents past performance and does not guarantee future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than their original cost. To obtain the most recent month-end performance, visit troweprice.com. Market returns are based on the midpoint of the bid/ask spread as of 4p.m. ET and do not represent returns an investor would receive if shares were traded at other times.

The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

Risks: Small- and mid-cap stocks Investments in securities issued by small and mid-cap companies are likely to be more volatile than investments in securities issued by larger companies. **Stock investing** Stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. See the prospectus for more detail on the fund's principal risks.
