Investment Objective & Strategy

The fund seeks to provide long-term capital growth by investing primarily in the common stocks of mid-cap growth companies.

The fund will normally invest primarily in a broadly diversified portfolio of common stocks of mid-cap companies. T. Rowe Price expects the earnings of these companies to grow at a faster rate than the average company.

Past performance is not a guarantee or a reliable indicator of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class (incepted 12/31/03) up to the inception date of the I Class (5/3/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Mid-cap stocks: Investments in securities issued by mid-cap companies are likely to be more volatile than investments in securities issued by large-cap companies. **Growth investing:** The fund's growth approach to investing could cause it to underperform other stock funds that employ a different investment style. See the prospectus for more detail on the fund's principal risks.

Morningstar rated the fund 4 and 4 stars among 469 and 448 Mid-Cap Growth funds for the 3- and 5-year periods (as applicable) ending 3/31/2026, respectively.
