The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class (incepted 12/31/96) up to the inception date of the I Class (5/3/21) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

**Risks: Investments in other funds:** The fund bears the risk that its underlying funds will fail to successfully employ their investment strategies. One or more underlying fund underperformance or failure to meet its investment objective(s) as intended could cause the fund to underperform similarly managed funds. **Emerging markets:** Investing in underlying funds that hold securities of issuers in emerging market countries involves greater risk and overall volatility than investing in underlying funds that hold securities of issuers in the U.S. and other developed markets. See the prospectus for more detail on the fund's principal risks.
