FACT SHEET
Africa & Middle East Fund
As of March 31, 2023

INVESTMENT OBJECTIVE AND STRATEGY
The fund seeks long-term growth of capital by investing primarily in the common stocks of companies located (or with primary operations) in Africa and the Middle East.

- Favor companies with attractive valuations and earnings that are growing faster than their local, regional, or global peers.
- Securities are chosen based on bottom-up research, supported by a top-down perspective.
- A focused portfolio leading to high-conviction decision-making.
- Country allocation is driven by stock selection.

BENEFITS AND RISKS
- Broad investment opportunity, offering exposure to a dynamic region.
- Over long periods, emerging markets investing offers diversification benefits relative to an all-U.S. portfolio.
- Emerging markets investments are subject to the risk of abrupt and severe price fluctuations.
- Investing internationally involves special risks including economic and political uncertainty and currency fluctuation.

CUMULATIVE RETURNS
Growth of $10,000

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit roweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit roweprice.com. Read it carefully. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

*Effective July 1, 2018, the “net” version of the benchmark replaced the “gross” version of the benchmark. The “net” version of the benchmark assumes the reinvestment of dividends after the deduction of withholding taxes. Historical benchmark representations have been restated to show net of withholding taxes. Effective January 1, 2018, the benchmark was changed to the MSCI Arabian Markets & Africa 10/40 Investable Market Index Net. Prior to January 1, 2018, the benchmark was S&P Emerging Market/Frontier Middle East & Africa Broad Market Index ex Israel Net. Prior to September 30, 2010, the benchmark was MSCI Arabian Markets and Africa Index Net. Prior to July 1, 2009, the benchmark was S&P IFCG Africa and Middle East ex-Saudi Arabia and ex-Israel Net. Prior to September 1, 2008, this benchmark also excluded Kuwait. The benchmark changes were made because the portfolio manager viewed the new benchmark composition to be a better representation of the investment strategy of the fund. Historical benchmark representations have not been restated. The benchmark is not available for all share classes. For additional information, please see Additional Disclosures.

For Sourcing Information, please see Additional Disclosures.
Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.
