INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital.

Invests at least 80% of its net assets (including any borrowings for investment purposes) in stocks issued by companies that are located in, or that have economic ties to, Asia (excluding Japan). The fund may purchase stocks issued by companies of any size, but typically focuses its investments on large-and mid-cap stocks.

BENEFITS AND RISKS

This fund pursues long-term growth by seeking to invest in well-managed Asian companies primarily located in countries in regions that are generally in an earlier stage of development than more developed economies, thus, they could provide greater long-term growth potential than developed markets.

The fund is "nondiversified", meaning it may invest a greater portion of assets in a single company and own more of the company's voting securities than is permissible for a "diversified" fund. Further, the fund's relatively limited geographic orientation and exposure to emerging markets increase its risk level. The fund price is subject to market risk in addition to risks associated with unfavorable currency exchange rates and political or economic uncertainty abroad.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 3 and 3 stars among 47 and 46 Pacific/Asia ex-Japan Stk funds for the 3- and 5-year periods (as applicable) ending 3/31/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
