Morningstar™

Overall Morningstar Rating™	★ ★ ★
Morningstar Category™	Pacific/Asia ex-Japan Stk

Rated against 40 Pacific/Asia ex-Japan Stk funds, as of 12/31/2024, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. **Performance data quoted represents past performance which is not a guarantee or a reliable indicator of future results.**

Performance (%) (NAV, total return Performance > 1yr is Annualized)

	3m	1yr	3yrs	5yrs	10yrs	Since Inception
TRASX	-6.55	11.83	-3.43	1.67	6.11	6.12

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class (incepted 5/21/14) up to the inception date of the I Class (3/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Investing in Asia: Many Asian economies have at various times been negatively affected by inflation, currency devaluations, an over-reliance on international trade and exports, particularly for certain commodities, political and social instability, and less developed financial systems and securities trading markets. **Emerging markets:** Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. See the prospectus for more detail on the fund's principal risks.

Investment Objective & Strategy

The fund seeks long-term growth of capital.

Invests at least 80% of its net assets (including any borrowings for investment purposes) in stocks issued by companies that are located in, or that have economic ties to, Asia (excluding Japan). The fund may purchase stocks issued by companies of any size, but typically focuses its investments on large-and mid-cap stocks.

Morningstar rated the fund 3 and 3 stars among 40 and 39 Pacific/Asia ex-Japan Stk funds for the 3- and 5-year periods (as applicable) ending 12/31/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

Fund Assets, holdings-based analytics (excluding portfolio turnover), and portfolio attribution are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Fund's accountant. Unless otherwise noted, index returns are shown with gross dividends reinvested. T. Rowe Price uses the current MSCI/S&P Global Industry Classification Standard (GICS) for sector and industry reporting.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash. Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.
