* The fund's net expense ratio reflects a credit received from investing in other T. Rowe Price funds. The fund will always receive a credit if it invests in other T. Rowe Price funds but the credit will vary each year based on the amount invested.

† Portfolio Turnover represents 1 year period ending 12/31/19.

INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide high income and some capital growth.

Invests primarily in corporate debt securities issued by U.S. and foreign companies.

Holdings will be a mix of long-term investment-grade and non-investment-grade bonds (also called high-yield or junk bonds.)

May invest in a variety of other securities in an effort to enhance income and achieve some capital growth.

Expect the weighted average maturity to exceed 10 years.

BENEFITS AND RISKS

Pursues high current income with some capital appreciation.

Emphasis on long-term investment-grade and non-investment-grade corporate bonds should offer higher income than what is available from U.S. Treasury securities although with greater risk of loss.

High-yield bonds, convertibles, and foreign securities provide the opportunity for capital growth and higher income but with greater risk.

Yield and share price will vary with interest rate changes.

If interest rates rise significantly from current levels, bond fund total returns will decline and may even turn negative in the short term.

CUMULATIVE RETURNS

Growth of \$10,000

INVEST WITH CONFIDENCE®

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 2, 2, and 3 stars among 185, 135 and 89 Corporate Bond funds for the 3-, 5-, and 10-year periods (as applicable) ending 9/30/2020, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Credit Quality Ratings are obtained using Bloomberg Barclays methodology using ratings derived from Moody's Investors Service (Moody's), Standard & Poor's (S&P) and Fitch Ratings (Fitch). When ratings from all three agencies are available, the median rating is used. When ratings are available from two of the agencies, the lower rating is used. When one rating is available, that rating is used. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps. Unrated securities totaled less than 1% of the portfolio at the end of the reporting period.
