## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital growth by investing primarily in U.S. common stocks.

The fund uses a disciplined portfolio construction process whereby it weights each sector approximately the same as the S&P 500 Index.

A team of industry-focused T. Rowe Price analysts is responsible for selecting stocks for the fund, subject to the oversight and discretion of the portfolio managers who work closely with the analysts.

The fund seeks to add value via stock selection within each industry. It maintains style and sector exposures close to those of the S&P 500.

## BENEFITS AND RISKS

The fund offers the possibility of attractive returns through a disciplined portfolio construction process and emphasis on stock selection by our industry-focused analysts. This disciplined approach may provide superior results over time.

As with all equity funds, this fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings.

## CUMULATIVE RETURNS

Growth of \$10,000

**Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com).** The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (11/29/16) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 5 and 5 stars among 1,293 and 1,179 Large Blend funds for the 3- and 5-year periods (as applicable) ending 3/31/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
