INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a combination of long-term capital appreciation and high income.

High conviction concentrated high yield portfolio based on rigorous fundamental credit research.

The fund/portfolio/strategy will normally invest at least 80% of its assets in corporate holdings and securities rated below investment-grade, including up to 50% of assets in bank loans.

Opportunistically invest in select special credit situations although core high-yield remains the majority of exposure.

BENEFITS AND RISKS

Offers high income potential and capital appreciation by primarily investing in below investment-grade corporate bonds and floating rate bank loans through a concentrated approach.

Provides investors access to the special credit situations within the high-yield opportunity set on a highly selective basis with acute emphasis on downside protection and risk-adjusted returns.

Fixed-income securities are subject to credit risk (high yield bonds carry a greater default risk than higher-rated bonds), liquidity risk, call risk, and interest-rate risk.

CUMULATIVE RETURNS

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.
